The mill has 20 stamps, one 8x12" crusher, 3 Card tables, 3 Wilfley and 2 sizers, capacity 100 tons per day. Company planned continuous de ment and was to add an oil flotation plant to the mill, increasing its capac 200 tons per day, and selling commercial current. In July, 1919, the pre reports that nothing was being done on account of the lack of money.

CONTINENTAL MINING CO. COLOR

Office: Silverton, Colo.

Officers: Jos. Bordeleau, pres.-treas.-mgr.; F. B. Brown, v. p.; Way, sec., with M. J. Heller, supt. and J. H. Slattery, directors.

Inc. in Colorado. **Cap.**, $1,500,000; at $1 par; 23,000 shares in tr Transfer office: Silverton. Annual meeting in December.

Property: 18 claims, about 150 acres, located in the Eureka min

DENBIGH SILVER-LEAD MINES CO. **COLOR**

Address: 85 Devonshire St., Boston, Mass.

Officers: W. Roch, pres.; J. F. Lindel, v. p.; G. A. Haskell, tre N. Reynolds, sec., all of Boston, Mass., with H. F. Wells and J. E. Be Boston, J. J. Mendell of Manchester, Mass., and W. H. Perry of Beverly, directors. H. S. Bushnelle, mgr.

Inc. in 1916, in Colorado. **Cap.**, $1,000,000; $1 par; all issued on Boston Curb. Indebtedness, $20,000.

Property: leases and bonds for $250,000 on the properties of the ing Mining & Milling Co. and of the Terrible Dunderberg Mining & Pow These mines are one mile from Silver Plume, Clear Creek county. Pro have been worked for 40 years and comprise 43 patented claims, about 300 The company controls a number of old-time producing mines, and the dum the Seven-Thirty, Mammoth, Brown and Dunderberg workings, known "Big Slide in Brown gulch."

Ore: silver, lead and zinc occurring in a fissure vein in granit schist. Vein dips 70° N. and strikes N. E. The sulphide pay-ore in eac occurs in shoots, each over 250′ long, and streaks of varying size.

Development: by a working tunnel with 7 levels above it and 7 it, reached by a 70° shaft, 600′ deep. Method of working is by shrinkage Total extent of workings is about 5 miles. A winze 70′ below deepest is in $50 ore for the entire length.

Equipment: includes hoist, pump, and 100-h p. compressor. Both power and electricity are used. The 75-ton mill contains crushers, roll and tables, and can, it is said, treat the ore at a cost of $1 per ton. The estimates $39,000 needed to complete the new shaft, repair mill, and d work.

Recent operations include a 3-compartment raise from the 14th to level, a distance of 490′, which when completed, will be the main workin A double drum, motor-driven hoist will be installed. For the first 7 m 1919, about 1,000′ of stoping had been done.

Owners claimed that the mine has a production record of $10,000,0 from high-grade ore, and that the property now has 100,000 tons of $10 During 1918, output was three cars per week. This ore came from de work only, as no actual mining had commenced. In October, 1919, were being sent to a mill at Idaho Springs.

H. C. Bonnevie has reported on both the mine and the treatment of

believed to have attractive possibilities in depth and in vir-
that funds are sufficient for the plans outlined.
lue of concentrates shipped in 1918, was $53.25 per ton, and
ton of shipping ore, averaging $106.21 per ton, to each 7

rket campaign of Thos. W. Lawson of "Frenzied Finance"
to $2¼ with a gradual decline to 20c in May, 1919, after
ended. In October, 1919, Mr. Lawson issued a statement
pped the stock because 400,000 shares that had been tied-up
were being unloaded in the form of receipts, and claimed
n the verge of bankruptcy, with $25,000 in debts. His re-
ttee formed the Denbigh Mining Corporation to take over
ck exchangeable for new on payment of 10c a share. This
proved by the stockholders, but a meeting of them was
Wells, for December 3, 1919, to consider the corporation
or claimed that the property has 300,000 tons of ore that
$1,000,000 net profit."

Colorado. **Cap.**, $200,000; shares 20c par; 650,000 out-

claims, 200 acres in Eureka mining district on

Property: 5 acres, unpatented, at Springdale, Boulder county. Ore is said to contain lead, silver, gold, copper, also some platinum, pallad and germanium. Vein is in granite.

Development: by 2 tunnels, 80′ and 100′ long, and shaft 50′ deep. to have shipped good ore in past. Under a 30-day option to the Colo Pitchblende Co., of Denver, at last accounts.

EAGLE MINE COLORA

Address: C. M. Glasgow, St. Louis, Mo.

Property: on Kerber creek, 2 miles E. of Bonanza, in Saguache cou In August, 1919, the mine was to be unwatered to depth of 500′. An exam tion in 1918 revealed a fair tonnage of manganese-silver ore, assaying 10 per ton. A power line has been connected up, and a 50-ton mill was erected.

EAGLE MINING & MILLING CO. COLORA

Property sold to Empire Zinc Co., of Colorado, which see.

EAGLE PASS MINING & MILLING CO. COLORA

Address: M. S. MacCarthy, mgr., 628 First National Bank Bldg., ver, Colo. Mine 3 miles from La Plata, Colo.

Inc. May 6, 1913, in Colorado. **Cap.,** $250,000; shares $1 par.

Property: 3 claims, 1 patented, 30 acres, said to show ore carrying silver and lead in fissure veins in limestone and porphyry. Developed by tunnel. Only assessment work done for years. In October, 1919, the levels were leased for a year. A prospect.

EAGLE ROCK TUNGSTEN PRODUCTION CO. COLORA

Mail returned, March, 1919, from Eagle Rock, Colo. Operated, at las ports, by 40 sets of leases.

Property: 150 acres in the Boulder tungsten district; was reporte carry ore assaying 2-3% in tungsten.

Had a 75-ton mill and sampling plant, at last accounts.

EGYPTIAN MINING CORP. COLORA

Address: Sunshine, via Boulder, Colo.

Cap., $50,000.

Property: 6 claims, at Sunshine, 8 miles from Boulder, Boulder cou Colo.

Development: by 100′ shaft and considerable drifting; also by a tunnel with crosscuts to parallel veins. Three orebodies developed by t and crosscuts are 24″, 10″ and 36″ in width, respectively, the ore carrying and silver in sulphide, the values ranging from $20 to $40 per ton. There is a 24″ body of milling ore assaying 26 oz. gold per ton, and in addition, a s of high-grade sylvanite and a streak of medium value were reported. rich ore, if in commercial amount, will pay a good profit above mining c but no production figures are obtainable.

ELECTRO COPPER CO. COLORA

Address: W. H. Rathbun, pres., Minneapolis, Minn.

Property: the Bailey copper mine at Copper Spur, near McCoy, E county. Ore is malachite in granular sandstone. A leaching plant was posed in September, 1919.

ELK MINING & MILLING CO. COLORA

Address: Silverton, Colo. J. J. Cusick, v. p.-mgr.

Property: 325 acres on Red Mountain, near Gladstone, San Juan cou said to show several veins in andesite from 2′ to 7′ wide, the ore carrying copper, $2 gold and 4 oz. silver.

Development: by tunnel driven at a depth of 1,200′. Management stalled new machinery in 1917 and expected to drive tunnel 1,000′; also pla to erect a concentrating mill.

ELK MOUNTAIN MINING & MILLING CO. COLORA

Owns the Wilfley mine and mill in the Kokomo-Robinson district, nort Leadville, Summit county, Colo.

Ore occurs as replacements in limestone and carries silver, gold, lead zinc. In summer of 1917 it was reported that a vein 4′ to 10′ wide had

as high as 1,000 oz. silver per ton. No recent information is

EVERGREEN GOLD & COPPER MINES CO. **COLORAD**

Reorganized as the Evergreen Mines Co., which see.

EVERGREEN MINES CO. **COLORAD**

Office: 408 Empire Bldg., Denver, Colo. **Mine office:** Apex, Gilp county, Colo.

Officers: J. L. Tapp, pres.; Geo. E. Bell,, v. p.; Wm. C. Hollister, sec treas.; preceding with W. J. Tapp, E. F. Krewinghaus, M. C. Shaffer, Edw Ettinger, J. C. West and A. M. Roth, directors. Etienne A. Ritter, cons. engr Shad Reid, supt.

Inc. Sept. 17, 1914, in Colorado. **Cap.,** $2,000,000; $1 par; outstandin a little over 1,000,000 shares. Notes authorized and outstanding, $75,000. Annu meeting, third Tuesday in August. Company is a reorganization of the Ev green Gold & Copper Mines Co.

Property: the Evergreen mine with 11 claims, 3 patented, 70 acres, the Pine mining district.

Geology: the property shows Archæn gneiss and crystalline schis cut by pegmatite, with an eruptive rock called "evergreenite." This dike is to 12′ in width, bounded on either side by ore-bearing contact zones of abo 50 to 80′ width. The ore deposit is unusual, carrying secondary bornite dissemi ated irregularly through monzonite.

Development: by tunnel and 350′ shaft, which was being sunk , 191 to 550′. Two ore-shoots were found on the 100′ level, 1 on the 200′ and a new o south of this on the 350′ level. Main orebody is 15′ to 18′ thick. There are known ore shoots, carrying chalcopyrite, bornite and covellite, estimated b management to average 3.5% copper, 2 to 8 oz. silver and 50c to $4 gold p ton. The upper workings show some malachite and tetrahedrite. Undergrou work amounts to over 4,000′. A shoot of bornite ore 5′ thick was cut on 2 level in 1919.

Equipment: includes electric power with a 45-h. p. hoist and 4-drill compressor. A 100-ton mill has one No. 4 Telsmith gyratory crusher, Marcy mi Dorr classifier, and 2 Card tables.

Flotation plant installed and began operations August, 1916. Concentrate gave average value of $110 a ton from $5 crude ore.

No production figures are available.

FAIRFIELD MINE **COLORADO**

Property: 5 patented claims, in Virginia mining district, Clear county, shows pyrite, chalcopyrite, gray copper, zinc and lead. Ore occ fissure vein running N. 80° E. with dip 65°, in granite-gneiss formation.

Development: by 2 tunnels, 600' and 2,000' long to vertical dep 2,400', with a total of 15,500' of workings.

Dividend distributed among the owners for the fiscal year ending Aug 1916, was $10,000. Produced 10,848 tons averaging $8 per ton.

Mine operated in 1917-18 by W. T. Hireen of Idaho Springs. Reporte concentrates produced ran between $40 and $60 per ton.

LAKE SUPERIOR OPHIR MINING CO. COLOR

Address: Ophir, Colo. Believed to be out of business. Mail ret unclaimed.

Inc. Sept., 1911, in Arizona. **Cap.**, $1,000,000; $2 par. Is reorgani of the Calumet-Telluride Mng. Co.

Property: in Chapman gulch above Ophir, San Miguel county, s carry free gold ore.

Equipment: includes aerial tram, electric power and 20-stamp which handled about 100 tons of $15 ore daily at last accounts.

LA PLAISANCE MINING & MILLING CO. COLOR

Mine office: Crisman, Boulder county, Colo.

Inc. 1918, by E. V. Grant, A. Dawson, and F. A. Fair, to operat New Enterprise and La Plaisance mines. **Cap.**, $50,000. Both prop were producers of high-grade gold and silver ores, but had been aband

Equipment: includes hoisting and compressor plants.

Development: by 763′ adit.

MARION MINES & MILLS CO. COLO

Office: 850 Equitable Bldg., Denver, Colo. **Mine office:** Rye, Co

Officers: Henry E. McElwain, pres.; John H. McElwain, Frank B S. McElwain, Frank Bulkley and Clarence A. Brandenburg, Denver, di Jos. Giedlartz, sec.-treas.

Cap., $300,000, increased from $200,000, fully paid by $100,000 balance in property. Outstanding debts, Feb., 1917, $118,389. No fi information received since.

Property: the Greenhorn group, 19 claims, 6 patented, together wi millsite claim, total 65 acres; also 120 acres held by location, making 18 mineral land in the Hardscrabble district, Custer county, Colo.

Development: by tunnel showing a vein of zinciferous copper an ore with small gold and silver values. Has water power, compressor and concentrating mill. Erected a 100-ton flotation plant to treat tailings i Is a small producer, but no figures available.

MARMATITE MINING & LEASING CO. COLO

Office: Rico, Colo. E. H. Snyder, mgr.

Operating under lease the Blackhawk mine, owned by the Rico-Argenti also the Pro Patria mine of the Syndicate M. & M. Co., and the Silver mine. The Enterprise vein of the Silver Swan is being opened. Ore c iron pyrite, zinc, and a little silver. Reported shipping at rate of two c day in 1919, to the Durango smelter. An assay office has been built a Pro Patria tram and mill are also operated under lease.

MARSHALL & RUSSELL GOLD M. M. & T. CO. COLO

Out of business; property at Empire, Clear Creek county, sold at re sale July 9, 1917. See full description in 1916 edition of this book.

MARTIN MINING AND POWER CO. COLO

Martin M. & P. Co. of Delaware, is the holding company.

Address: S. G. Martin, mgr., 40 Exchange Place, New York, N. Y

Officers: S. G. Martin, pres.; S. L. Martin, v. p.; W. B. Jones with E. F. Nolan and C. W. Wright, directors.

Inc. in New York. **Cap.,** $100,000. Registrar, Empire Trust C Broadway, New York. Transfer agent, Security Transfer Reg. Co., 66 way, New York.

Property: 24 claims, 378 acres, 215 lots, 13 acres; other property by agreement and lien, option, etc., 1,296 acres, located in Silverton quad and Eureka mining district, San Juan county.

Geology: Eruptive porphyry cut by 20 fissure veins. Compan scribes three vein zones: first, 10 to 100′ wide, carrying gold with some pyrite; second, 25 to 100′ wide, a copper-silver vein; third, several zin silver veins, the ore being complex and refractory, but milling to 40% zi 65% lead product, with silver in the latter.

Development: 15,000′ of tunnels, the lowest or Martin tunne with portal at side of railroad, will, according to company, cut 15 known with 8,000′. Management reports 3,000,000 tons of partly-developed ore w average gross value of $12 per ton. About $500,000 has been spent in deve exploration work, and in opening ore.

Equipment: plan includes a 1,200-ton mill, tram and compressor

Company expects to produce 585,000 tons in four years with net va $6,867,050, expenses in that time to be $940,000.

This will be a big mine if these figures are correct.

MARYLAND MINES & RED. CO. COLO

Officers: W. N. MacPhail, pres.; J. Miller, v. p.; H. F. Christensen treas.

Property: Maryland group of 22 acres on South Boulder mining trict, Gilpin county. Ore averages $12 per ton in gold and copper. Co planned erection of mill in 1919.

COLD MINING CO. **COLORADO**

oston Bldg., Denver, and Romley, Chaffee county, Colo.

ation, purchase and development of new properties.
of 7c per share each, paid in 1915, and one of 7c in 1916.
c in 1915, $110,000; and in 1916, $15,000, for acquisition of

fary Murphy mine, discovered 1874, was not extensively
ed by a St. Louis company in 1880. The yearly output
about $300,000 net from ores sold to smelters. The gross
ee times as much. One-third of the gross value of the ore
mine, the remaining two-thirds being absorbed by smelting
, and by railway freight.
was erected in about 1886. Subsequently the property was
with varying success until about 1906. The lessees built
St. Elmo, and a smelter at Buena Vista. All of these plants
ismantled, and the mine practically abandoned in 1906.
laims, mostly patented, 350 acres in Chalk Creek district,

L. Genesee-Vanderbilt and Robinson mines in the Red Moun-
equired in 1917, and a 50-ton mill built at the Genesee. The
lex silver ores in vertical chimney deposits. Development is

gold, zinc, lead, silver and copper, in order of value, in a
system of nearly vertical fissure veins in quartz-monzonite;
is the main vein. Veins vary in width from 6" to 12', and
irregular lenses of ore. Average assay of milling ore:
silver; 4.4% lead; 7.9% zinc; 0.5% copper.
by tunnels with a shaft connecting the tunnel levels:
tunnels, No. 7, 750'; No. 14, 1,500'; Golf, 4,350'. Total
gs over 9 miles; greatest depth of workings, 1,975' vertical
in 1919 a crosscut tunnel on 1,500' level had been connected
800'. No stoping has been done between.
plant, small hoist, 3 air-compressors, 2 aerial tramways
ramway mill. Steam power is used.
concentration is used followed by flotation of slime, using
25 ton electrostatic separation plant for the zinc-iron mid-

on and as well on the zinc ore in 1916, even on sulphide

material. The process cost 23c. per ton of ore milled. Some interesting has been done at this plant.

Production: in 1913, 14,428 oz. gold; 2,233,037 lb. zinc; 3,321,31 lead; 146,606 oz. silver; 152,000 lb. copper.

Ore mined, 1917, was 36,231 tons, compared with 54,954 tons in 1916, 60,561 in 1915.

In 1917 the yield was 950 tons lead concentrates, worth $113,025; 755 non-copper concentrates, $29,597; 1,754 tons zinc concentrate, $73,956; to with bullion and crude ore, receipts totaling $242,701.

Recent costs have been:

	Tons Milled	Mng.	Mllg.	Tram-ways	Gen'l
1916	51,116	$4.11	$2.18	$0.16	$0.34
1915	55,880	3.20	1.99	0.12	0.25
1914	48,526	3.08	1.96	0.13	0.21
1913	34,271	3.45	2.04	0.24	0.30

Note: mining costs are distributed over a slightly larger tonnage than milled.

The Mary Murphy mine has seen its best days. At the beginning of available ore was estimated as 8,000 tons, and 6,000 tons in the Iron Chest Much of the ground being mined would not pay under normal metal p Unless larger orebodies are opened, the manager, G. E. Collins, predicts a pension of milling operations.

In Oct., 1919, the mill was treating lessees' ore and old tailings.

MASTER KEY MINING CO. COLORA

Office: 403 Empire Bldg., Denver, Colo. **Mine office:** Columbine, C

Officers: T. F. Kleckner, pres.; J. A. Leslie, v. p.; H S. Holcomb, treas.

Inc. January, 1919, in Colorado. **Cap.,** $250,000; $1 par.

Property: 14 claims, about 289 acres in Columbia basin, Hahn's mining district, Routt county, has contact and cross fissure veins in limeston quartzite, yielding gold, silver, and lead.

Development: by two shafts, 70′ and 110′ deep, tunnels and u ground workings, 380′. Company reports smelter returns as $407 per ton silver was 75 cents an ounce.

MATRIX MINES CO. COLORA

Address: Idaho Springs, Clear Creek county, Colo.

Mail returned from Denver office. J. A. Hazen, mgr., at last accounts.

Property: 16 claims, including the Prince Albert, on Columbia m tain, opposite Lawson. An 18″ vein of rich silver ore was mined in 1919.

MATTIE B. MINING CO. COLORA

Inc. in Colorado. **Cap.,** $100,000; $1 par. Stock offered at 50c in

Property: Bob Cat group, 20 acres in Cleora mining district ea Salida, Chaffee county. Reported to have cut copper ore 300′ from port tunnel, said to be 18 to 30′ thick.

MAYFLOWER LEASING CO. COLORA

Operating the Mayflower mine, near Silverton, San Juan county, lease. J. H. Slattery, mgr.; A. Gillis, supt.

Equipment: includes compressor. Reported shipping concent amounting to two cars a day. Employs 20 men.

McCARTHY-HIDDEN TREASURY MINING CORP. COLORA

Officers: E. L. Thomas, Omaha, pres.; T. A. O'Brien, supt.

Reported to have taken over the Oriental mine, formerly known a Hidden Treasure, in Gunnison county. Developed by 3,700′ crosscut tunne several thousand feet of workings on seven levels. Concentrates said to $90 in silver, lead, and gold.

Equipment: aerial tram 3,800′ long, mill and flotation unit, water steam power with combined capacity of 1,000 h. p., and compressor.

McINTYRE MINING CO. COLORA

PENNSYLVANIA MNG., POWER & REDUCTION CO. COLORA

G. L. Levi, Philadelphia, Pa., v. p.-sec.; Leopold Sternberger, mgr. P Box 972, Denver, Colo.

Inc. 1910 in Colorado. **Cap.,** $2,500,000; 600,000 shares in the treas Is a close corporation, owned by Leopold Sternberger and Estate of Sam Sternberger. Owns entire stock issue of the Fall River Hydro Electric Po Co.; also the Lotus group of mines and property formerly held by Luca Tunnels & Mines Co., which includes the Ludwig tunnel.

Property: lies between Fall river and Central City, Clear Creek Gilpin counties, and includes the Pennsylvania group, 374 patented cla including several millsites and placers, covering about 2,500 acres. Sh fissure veins with complex lead-zinc-copper ore, containing silver and gold, uranium, molybdenum and tungsten. None of the mines were producers exc ing the Lotus group which is reported to have shipped some ore until cl down by water.

Development: by shafts and adits, about 8 miles in all; including 6,400' Lucania tunnel.

Equipment: includes steam and water-power plants, air compress No production figures available.

PENNSYLVANIA MOLYBDENUM MINES CO. COLORA

Address: 705 Johnstown Trust Bldg., Johnstown, Pa.

Officers: M. Dembinski, pres.; G. A. Farmer, v. p.; J. A. Sloan, S. G. Fetherman, mgr.

Inc. 1916, in Colorado. **Cap.,** $100,000; 10c par; all outstanding.

Property: 14 claims, unpatented, 150 acres, in Quartz Creek district, Pitkin, Gunnison county, shows fissure vein 5 to 6' wide, producing gold, s copper, and molybdenum, assaying $25 molybdenum and $5 gold, silver, copper per ton. The Bon Ton claim was acquired early in 1920 for $15,000.

Development: 1,500' tunnel, and total of 2,800' of workings.

Equipment: compressor, 50-ton concentrator, and steam power. Co pany started operations in March, 1919, and has since opened some high-gr gold-silver ore.

PERIGO MINES COLORA

Address: Perigo, via Rollinsville, Colo.

D. W. R. Kinney, mgr., and S. J. Gish were reported to have taken a l and bond on the group.

Property: 44 claims in three groups and placer ground extending miles along South Boulder creek, owned by J. E. Lighthouse, the E. W. Wil estate, and Mrs. L. H. Potter. The mines are credited with a $2,000,000 duction in the past, but have not been worked systematically for 40 years. carries gold.

Lessees plan to operate both the 50-ton Gold Dirt mill and the 10 Perigo mill.

PHILADELPHIA MINES CO. COLORA

Mine office: Montezuma, Colo.

Officers: E. F. Pooley, pres.; F. P. Rosengarten, v. p.; W. F. Wa sec.-treas., 16th and Indiana Sts., Philadelphia, Pa.

Inc. May, 1913, in Colorado. **Cap.,** $1,250,000; $1 par; [illegible] standing.

Property: 75 claims, 10 patented, about 800 acres, in Montezuma district, Summit county, carries a sulphide ore in dacite rock traversing teruma granite and porphyry, and an oxidized ore of [illegible]

lead; 26.6% zinc. The main orebody is reported to be from 900' long, running N. W., with dip of of 45°.

PROGRESS MINING & MILLING CO. COLORA

Address: R. D. McCausland, mgr., Frawley, Colo., and Equitable B Denver, Colo.

Officers: P. S. Smith, pres.; M. E. Peters, sec., with Wm. B. Brook Martin Barber, directors.

Inc. in Colorado. **Cap.**, $2,500,000; $1 par. No balance sheet issu

Property: 26 claims, patented, including the Wilson mine, Robi group and Felicia Grace, Champion and New York leases, all at Robinson, 16 miles from Leadville, Lake county. Ore carries lead and zinc. Reserves mated by T. H. Teal at 678,644 tons.

Development: by Robinson tunnel 3,000′ long, which attains dep 1,200′ and exposes 4 ore shoots in 6′ to 10′ contact vein with incline shaft to ground below tunnel. There are also 3 shafts, East, 650′, El Dorado, 650 the 1,200′ Wilson shaft opening ore at 1,040′ depth.

Equipment: 300-ton Wilson mill, which is idle.

The company is not, strictly speaking, a mining company, but rather a treatment enterprise, specializing in the separation of the complex zinc-lead silver-gold ores of Colorado in its 300-ton custom concentrator at Robins controls, by contracts, the outputs of a large number of mines in the Ke district. However, the company also has mines of its own upon which rely in case of necessity. The company's first twelve carloads of lead-iron centrates shipped gave average smelter returns of $33.73 per ton. When motion was brought out in 1916, P. S. Smith, pres. of the company, esti profits on lead-iron concentrates at $52,350 per month, promoters claiming 000 tons of ore blocked out that varied from $20 to $40 per ton.

Property: believed to have merit, but ore treatment is not as ea as cheap as estimated. Has been much touted in newspapers and broker culars. Presumably idle.

PUEBLO SMELTER COLOR

RICO ARGENTINE MINING CO. COL

Office: Mackintosh Block, Salt Lake City. **Mine address:** Wr lough, supt., Rico, Dolores county, Colo.

Officers: F. W. Price, pres.; A. E. Rykert, v. p.; J. H. Woo sec.-treas.; S. A. King, J. E. McKnight and J. E. Frick, directors.

Inc. 1911. **Cap.,** $100,000; 10c par; 963,136 issued; assessabl ment No. 6 of 1c per share levied January 4, 1917. Company is its ow agent and registrar. Listed on Salt Lake Exchange. During 1918 paid off indebtedness amounting to $70,000.

Property: the Black Hawk and Argentine groups, 21 claims, mostly patented, adjoining the Rico-Wellington Mining Co. property.

Geology: alternating strata of limestone and sandstone, dippin of about 30° and cut by almost vertical fissures of great extent and p Where these fissures cross the soluble limestone they contain flat r deposits of sulphide ores, carrying copper, zinc, and lead, with gold values. The ore shoots or bedded deposits are from 3-30′ thick. The and the limestone are identical both in character and occurrence which are producing in the Rico-Wellington property.

Development: a new tunnel, 200′ lower than former workin 1917, a strong shoot of marketable ore carrying copper, lead and zinc, gold and silver content. This opening drained the main shoot through nection with upper workings. In 1918, it was reported that bismuth w ing in some of the ore.

Production: for 1917, $100.000; the net smelter returns of wh $88,837. Of this, $47,576 was for ore shipped by company and $41,26 by lessees. On January 1, 1919, company operations were suspended tember, but lessees continued shipping at rate of 1,000 tons per month.

It was reported late in 1918 that the Rico Consolidated Co. ha suit against the Rico Argentine Mining Co. over apex-rights for wr traction of ore, worth $900,000.

RICO CONSOLIDATED MINES CO. COL

Owned by Jesse Knight interests of Provo, Utah. G. Garren, s Dolores county, Colo. Listed on Salt Lake City Exchange.

Property: adjoining the Rico Argentine on the N. E., is said t vein of copper-silver-lead ore 35′ wide in the upper workings. A t driven over 300′ to gain 140′ depth. Company has been making ship they are not reported.

Company brought suit in 1918 against the Marmatite Leasing and Argentine companies, alleging that they had trespassed on the Alleg Company claims that 15,000 tons of ore valued at $60 per ton, amo $900,000, had been shipped.

RICO MINING CO. COL

Reorganized as Syndicate Mining & Milling Co., which see.

RICO-WELLINGTON MINING CO. COL

Address: Provo, Utah.

Officers: Jesse Knight, pres.; Chas. Read, v. p.; W. L. Mang treas.; R. L. Anderberg, asst. sec.-treas.; H. R. Trenholm, gen. mgr. Jesse Knight, J. W. Knight, Chas. Read, K. S. Jordan, W. L. Mang Allen, H. R. Trenholm, Albert Lofquist, supt.

Inc. August, 1911, in Utah. **Cap.,** $1,000,000; $1 par; 51% owned by Knight Investment Co. Listed on Salt Lake Exchange.

Since the property was taken over by its present owners it has ea $500,000, has invested $50,000 in a mill and expended $100.000 in de work. The debt of $150,000 advanced for this equipment and work off in 1916. Present debt of company, 1919, for development, is $50,00

On April 25, 1917, No. 1 dividend of 1½c per share was paid, fo similar amounts in May and June. On July 25, 4c was paid. Th $39,000.

e Wellington mine, at Rico, which contains ore-shoots ement and contact metamorphism in the limestone beds of the f the Hermosa formation. In 1914 a flat deposit of zinc-lead es parallel to the Black Hawk fault. To the north the orebody ss fault parallel to the Nellie Bly fault, the orebody north of 0' below. Across the Black Hawk fault a copper deposit, re- and broken by several faults, has been opened, the ore carry- nd silver values.

: consists of about 22,000' of underground work, reported mounts of lead-zinc and copper ore. Exploration is devoted vk and Iron veins, two great ore-bearing fissures, traversing V. and S. E. In these the ore makes in lime beds that look leposits, and as many as 5 and 6 beds, one above the other. At 2,500' from portal of Mountain Spring tunnel and about gton level, copper ore was opened in 1919. The better grade e, averaging, it is said, about 9% copper and 14 oz. silver, or

ncludes a 2,500' tram to the Rio Grande railroad, handling t a cost of 23c per ton. The 100-ton mill, formerly belonging Co. and leased for 5 years, was remodeled at a cost of nearly nill, 5 Deister tables, 6 Callow tanks, 2 Callow screens and nt were installed in 1918. A compressor costing $4,000 was

for 1917, 424 tons of copper ore, 1,826 tons of lead-zinc, hide, and 1,687 tons lead-silver, all dry weights, net value, hand, December, 1917, was $2,395. No work is reported for was again operating in 1919, and had shipped 300 tons of by April 1st, 1919.

good one and, being managed by Jesse Knight, the company ul, economical and up-to-date operation.

SQUARE DEAL GOLD MINING CO. COLOR

Address: Central City, Gilpin county, Colo.

Officers: R. J. Foster, pres., 424 Wyoming St., Scranton, Pa. Frank, v. p.; E. H. Lawall, treas., with H. K. Griffith and L. F. Hueblein, tors. Harry J. Wolf, mgr., Golden, Colo. Thos. Martin, supt.

No capitalization nor financial statement received.

Property: 3 patented claims, near Central City, said to show silver, copper and lead ore in quartz vein. Vein strikes E. W., dips 65° N.

Development: 850′ incline shaft, with 4 miles of workings. Or serves and production not given.

In December, 1915, property was tied up in litigation, but was being ated by a lessee, who placed his royalties in trust pending the outcome suit. The apex suit, between the Square Deal and Coloma Mining Co. cussed by R. T. Walker in "Eng. & Min. Journal," of August 23, 1919), w unusual one, the Coloma company won it, and took possession of the South away vein, extracting considerable ore therefrom. A mortgage on the S Deal was then foreclosed, and the mortgagee filed a new suit against Coloma, obtaining permission to do exploratory work. This proved tha South Notaway vein was distinct from the Cecil vein. The court upheld view and returned the Notaway claim to the Square Deal. Extremely inter geologic deductions resulted from the work done.

STANDARD CHEMICAL CO. COLORADO-U

Office: Naturita, Colo.

Operating carnotite mines in Colorado and Utah.

Property: 350 claims in Paradox Valley, 60 miles from Placer Colo., contains vanadium-bearing and radium-producing ores.

Company gives out no information, but is reported during 1918 to shipped 7,000 tons of radium-bearing ore. Temporarily closed late in 191 opened and employing 200 men in 1919; advertising for 75 additional August, 1919.

See U. S. Bureau of Mines Bull. No. 1: 25, p. 944.

lacer deposit near Breckenridge, on which 3 dredges operate
each year.
in 1918 was 13,565 oz. gold, and 3,345 oz. silver from
of gravel. The average value per yard was 8.6c. During 1917
51,821 cu. yds., producing $451,743 at cost of 7.6c per yard.

ISOLIDATED MINING CO. **COLORADO**

ly dead.
Gilpin County, Colo.

Officers: at last accounts, Henry P. Lowe, pres., treas. and ge C. A. West, sec., with Sir Chas. Allen, Arthur Firth and M. A. Lowe, d

Inc. July 30, 1909, in Colorado, as successor of Topeka Min **Cap.**, $1,000,000; $5 par; fully issued. Annual meeting, June 30.

Property: 7 claims, patented, 16.46 acres, in the Russell district, schists and metamorphic gneiss, cut by 3 veins with N.-E. strike and dip One vein of 4' average width, traceable 1,300', carries chalcopyrite and sp estimated to average 0.5% copper, 2% zinc, 2 oz. silver and $10 gold per

Development: by 1,500' shaft, with a second 510' shaft and a 11,640' of workings, estimated to show 50,000 tons of ore. The mi discovered 1862, and worked at intervals.

Finally closed down again in 1914, leaving workingmen unpaid.

TORONTO MINING CO. COLO

Office: 420 Century Bldg., Denver, Colo.

Officers: G. W. Summers, pres.-treas.; Stephen Haskins, v. p.; Summers, sec.; J. J. Elliot, supt., with F. G. Elliot, directors.

Inc. 1918, in Colorado. **Cap.**, $100,000; $1 par.

Property: lease and option on Congress mine, a patented lode in Enterprise mining district, Gilpin county, two miles from Blackhawk lease expires March, 1921, and company can purchase the mine at any time then for $18,375. Vein is 3' to 60' wide, carrying iron and lead carbonat native silver and said to average about $3 per ton in gold.

Developed by 2 shafts, 350' deep and a new shaft, 50' deep in Januar Company reports about 600' of drifts and considerable stoping. Assays shaft were said to be about $2-$3 per ton in silver.

Equipment: includes a 60-h. p. hoist. Mine had been idle o years.

TUCKER MOUNTAIN M. & M. CO. COLO

Mail unclaimed in October, 1919, at 901 Foster Bldg., Denver, Colo. office: Kokomo, Colo.

Officers: G. P. Lingenfelter, pres.; S. H. Dunlop, v. p.-mgr.; Benzie, sec.-treas., with G. N. Quigley and F. A. Clarkson, directors.

Inc. Nov. 9, 1916, in Colorado. **Cap.**, $150,000; 10c par; 500,000

Property: the Washington and Hancock mines at Kokomo, S county, said to show a contact deposit in limestone, dipping 22° and stri W.-S. E. Ore is a sulphide of lead and zinc, with gold and silver, assay to $20 per ton.

Development: by 300' tunnel and 1,000' of workings. Shipme ported June, 1917. No later reports received.

TUNGSTEN EXPLORATION CO. COLO

Probably dead. Letters are returned unanswered from Lakewood.

Inc. April, 1916.

Officers: at last accounts, L. A. Ewing, pres.; Chas. Theob Theobald & Knuth, Cripple Creek, Colo.), v. p.; Dr. R. W. Bailey, treas. Tilborg, sec., with C. M. Webb, Norfolk, Va., G. C. Stumm and Clark G. directors.

Property: the Bradley tract, 200 acres, 1 mile E. of Lakewood cent to Primos Chemical Co.'s mines, the Cold Spring, Cross and Bonanza

TUNGSTEN GIRL CO. COLO

Probably dead as letters are returned from former address: 325 Bldg., Denver, Colo., and Ward, Boulder Co., Colo.

Officers: Joe Connors, pres.; S. T. Weller, v. p.; Dr. Osee W treas.; Hon. L. L. Harrington, sec.; above, with Kenneth Kennedy, Lafferty, Dorothy Weller and E. S. Conners, directors.

Inc. 1916, in Arizona. **Cap.**, $1,000,000; shares $1 par.

Property: the Blue Jay and Burnt Mountain groups, 3 mile Ward, adjoining holdings of the National Tungsten Co.

TUNGSTEN METALS CORPORATION COLO

Address: T. McSherry, supt., Boulder, Colo. W. W. Geo. Teal, mgrs.

916. **Cap.**, $550,000. Company took over property of the Co. and the Ferberite Co., including the **Red Sign, Red Sign** berite mines, and constructed a $50,000 mill in Boulder Canyon, m Boulder.

7, company acquired the Kekionga mine at **Magnolia, Boulder** was a gold producer but a footwall of the gold vein is the tungsten vein 6 to 8′ wide. Has 400′ shaft. Company plans anted by development.

claims in Turret mining district, Chaffee county, about 8 da.

ins occur in mica-schist that alternates with black gneiss, artz porphyry. Croppings of amphibolite carry fibrous asbestos ornblende. Average value of ore reported as, gold, $1.40, silver, $22 per ton. Company claims 25,000 to 50,000 tons in sight.

& EMPIRE MINING CO. **COLORADO**

uth & Empire Mining Co.

ank Brady, supt., Empire, Colo.

D. Pelletier, pres., 1123 Villard Ave., Superior, Wis. J. E. J. Borgstrom, sec.; O. G. Olson, treas., with H. R. Corey, Darrow, directors.

rado. **Cap.**, $500,000; $1 par; 200,000 issued, 100,000 for

property 100,000 for cash at par and 198,000 pooled. Bonds authorized $5[illegible] (for mill), convertible 1927; over $4,000 issued.

Property: 16 claims, 2 tunnelsites and 5-acre millsite, about 520 ac[illegible] in upper Union district, Clark Creek county, 8 miles W. of Idaho Springs. C[illegible] pany organized 9 years ago as a consolidation of 14 properties whose locat[illegible] high up on a mountain side, permit working by a tunnel.

Ore: gold and complex lead zinc pyrite, also galena in the Pelle[illegible] vein.

Development: main tunnel 2,900' with face 1,100' below surface, [illegible] poses 15 veins. There is also 1,100' of drifting (850' on Columbine vein al[illegible] The Columbine vein with average width of 5' carries ore assaying $2 to [illegible] per ton. A 500' tunnel, 600' above main tunnel, also exposes this vein. [illegible] Pelletier vein developed by 190' tunnel, will be cut by new tunnel 3,400' f[illegible] portal, and 1,500' below existing workings.

Equipment: tramway, 60-h. p. hoist, air-compressor and drill.

Ore reserves: President Pelletier estimated 2,000,000 tons of ore [illegible] 10 years' supply blocked out for 50-ton mill. Existing underground work[illegible] are, not, in our opinion, sufficient to warrant this optimistic estimates even [illegible] the figure given be confirmed by further development.

UNITED LEAD CO. COLORA[illegible]

Controlled since 1906 by the National Lead Co., which see.

U. S. GOLD CORPORATION COLORA[illegible]

Address: Boulder, Colo.

Officers: N. P. Garretson, Topeka, Kan., pres.; J. R. Wolfe, v. p. [illegible] gen. mgr.; W. T. McGinnis, sec.-treas.; J. W. Middlesworth, J. H. Ho[illegible] F. E. Campbell and C. N. Watts, directors. T. J. Benjovsky, mine supt.

Inc. 1903, in Colorado. **Cap.**, $3,500,000; $1 par; 3,271,062 outstan[illegible] Dec., 1917.

Property: the Klondike group, 225 acres, patented. Sphinx group [illegible] mining claims in Boulder county, and Livingston group, 50 acres. Company [illegible] owns 50,000 shares, or entire capital stock of the U. S. Reduction Co., w[illegible] owns the mill. Chims show fissure veins in porphyry, carrying gold [illegible] Widths, 3'-15' in different workings; mill feed varies from $4 to $12 per [illegible]

In July, 1917, company started exploring for the old No. 1 oreshoot in [illegible] Livingston claim, which is said to have yielded $300,000 years ago.

Production: 34 tons of ore were shipped, 1915, to Denver smelt[illegible] which neted $1,414. Company reported April 10, 1916, bullion to the amou[illegible] $15,086 shipped to U. S. Mint, Denver, and that 7 tons ore shipped to De[illegible] smelter Feb. 9, yielded $1,974. Mill was treating up to 100 tons daily at en[illegible] 1916. During 1917 the yield was about $75,000 from 15,000 tons of ore. W[illegible] was slowed down during the war, and company made arrangements to s[illegible] Klondike group above Nederland. In Nov., 1919, it was stated that all [illegible] was limited to leasing, but when conditions are more favorable treatme[illegible] the large low-grade orebodies will be considered.

After 13 years of intermittent development, and lurid advertising, [illegible] pany started producing. The corporation is not looked upon favorably, and [illegible] vestors are advised to take company statements with a grain of salt.

70½ acres in the Cripple Creek mining district, including ado mines developed by three shafts to a depth of 1,350'. Has t operator for a great many years. For geology of the Cripple ee 16th Ann. Rept. of Colo.; also U. S. G. S. Bull. 260, 1915, odies occur at vein intersections in vicinity of phonolite dikes.

er careful investigation it was found by new management that as in sight and it was mostly low-grade; that during 1914-15 l made no profits, had exhausted its treasury surplus, was about and doing business largely upon credit; that general expenses 500 per month and mining operations were being run at a loss 00 per month.

property by Louis S. Noble, sent out in 1917, was far from unless some radical changes are made, stockholders will never dividend.

nt: management stated that the prospects of finding pay ore level did not warrant further exploration work, and that there- 1917, company had confined itself strictly to leasing. Work in stoping amounted to 1,011' of drifting and crosscutting, accom- es.

: in 1918 amounted to 516 tons by the company and 2,537 having gross value of $1,219 and $34,840, respectively.

917, an "Independent Stockholders Committee" was formed with chairman; K. Macdermid, vice-chairman, and C. J. Starke, sec., of changing the management of the company. The committee

asserted that the El Paso mine had been worked for the benefit of Cycle Mng. & Red. Co., and that if a flotation mill had been bu could have mined its large reserves of low-grade ores, instead of only the high-grade to the Golden Cycle mill. The committee also the present management had shipped over 30,000 tons of El Paso Golden Cycle mill, averaging $8 to $11 per ton, on which treatmen $4 and sorting charge of $1 were paid, whereas, if a flotation mill ha the company might have treated its ores at $1 a ton and made a han

During 1918, the hoist at the Nichols shaft was sold for $11,300 agement reported this advantageous, as the price was sastisfactory, in taxation was secured and operations were consolidated at the reducing expenses. In March, 1919, it was reported that litigation El Paso Consolidated and the Katinka Co. over extra-lateral righ settled out of court, and operations were to be resumed at the N an electric hoist taking the place of the steam engine.

Company has been promised a lease on part of the Henry through which the Beacon Hill-Ajax vein passes. This will be for 25% royalty basis.

EL PASO EXTENSION CORP'N OF WEST VIRGINIA C

Address: C. W. Hays, gen. mgr., Cripple Creek, Colo.

Property: Rocky Mountain and North Slope claims; 9.5 Beacon Hill. First named claim has old 250' shaft.

In 1918, company was reported to have taken a 5-year bond and Index mine, formerly operated by the Index Mining Co. The mine the southwestern slope of Gold hill, was idle for about 7 years. I operations the shaft was sunk 200' to the 1,150' level, and compa lessees have shipped regularly about 7 cars of ore a month, ave than $30 per ton.

Work has shown a promising quartz vein, 665' from surface, mineralized dike of basalt containing sylvanite, reported to average

In August, 1919, company acquired control of the Lexington Co.'s 13 acres on Gold Hill and the Laura D mine.

EL PASO GOLD KING MINE C

Owned by Gold King Mining Co., of Cripple Creek, in Po Cripple Creek district, developed by 1,007' shaft. Lessees were re making shipments in 1918.

t.
corporation composed of Michigan men. Developed by shaft to
haft to be sunk to 1,600' level.

VELOPMENT CO. **COLORADO**

30 Land Title Bldg., Philadelphia, Pa.
L. H. Taylor, Jr., pres.; F. M. Kurie, v. p.-gen. mgr.; P. W.
eas., with Percival Chrystie and E. B. Bronson, directors.
1915 in Delaware. Cap., $100,000; $10 par; 6,000 shares out-
nual meeting third Tuesday in January. Is a close corporation.
consists of leases on certain blocks of the Stratton Cripple
and Development Co. (Stratton Estate), on Bull Hill. The
the Eagle vein and the Basket & Luce vein with other parallel
so the Eagle cross vein running N. E.-S. W.
t: includes complete hoisting plant. Operations are con-
the Star of Bethlehem shaft, 300' deep and also through the
haft 1,500' deep. In the Eagles shaft the Stratton Company oper-

Operations were begun March, 1919. The ore, shipped to the E at Victor averaged $30 per ton.

MODOC CONSOLIDATED MINES CO. C

Address: Victor, Colo.

Officers: F. Cannon, pres.; A. H. Frankenburg, v. p.-mg Roelofs, T. Arneal, M. A. Skinner, and E. D. Avery, directors.

Property: a rich old Cripple Creek gold producer, credite duction of about $2,000,000 since 1892. Bought by T. M. Pettigrev of Denver, late in 1916.

Development: by 600′ incline shaft and 500′ winze. A 1, shaft is being. At 1,200′ depth a shoot 400′ long, carrying $30 to have been cut. About 15,000 tons of ore was broken in stopes b and shipments were from 60 to 75 tons daily.

Reported that merger arrangements between this company and t Gold Mining Co. have been completed. If this is true, company sh the Last Dollar mine, an adjoining property.

MODOC MINING & MILLING CO. C

Property operated by Modoc Cons. Mines Co., which see.

MOFFAT TUNNEL & TRANSPORTATION CO. C

Address: care War Eagle Consolidated Mines Co., Cripple

Company will operate the Moffat or Ophelia tunnel which is t public transportation outlet from Raven Hill properties at Cripple C of which have deeded right-of-way through them. At present, a d driven from the Blue Flag Company's 1,200′ level to connect wit to perfect ventilation, after which tracks will be re-laid and wo This is expected to be finished by 1920.

NEW GOLD DOLLAR MINING CO. C

Mine office: Cripple Creek, Colo.

Directors: A. E. Carlton, Colorado Springs, R. J. Gaffney, Quentin, Denver.

Inc. in 1919. **Cap.,** $150,000; 5c par. Is a reorganization of Consolidated Mining Co.

Property: 62 acres, patented, being part of the Arequa t eastern slope of Beacon hill, Cripple Creek district. Gold occurs in wide, said to average $20 per ton. Property was purchased at S in 1919 by the judgment creditor, First National Bank of Cripple deeded by the Bank to present company.

Development: 1,050′ Mabel M. and Union shafts, from whic able drifting and crosscutting has been done.

NEW GOLD KING MINES C

See Gold King Leasing Co.

OCEAN WAVE MINING CO. C

Address: Matt. Edwards, supt., Cripple Creek, Colo. C. Springfield, Ill. pres.

Cap., $100,000. Controlled by Eastern parties.

Operating under long-term lease the Ocean Wave and Little Ma Battle mountain, Cripple Creek, owned by Portland Gold Mining Co.

Development: by 400′ shaft. Mine said to have vein 4′ w with streaks of gold-bearing quartz. The ground has been sub company operations were to be resumed late in 1919.

OSTON LEASING CO. C

Frank Crawford, supt. Company has leased the Howard dump McKinney Mining Co., Cripple Creek, and is shipping about 2,000 ton

PATTERSON-BRADLEY LEASING CO. C

H. MacDonald, mgr., Cripple Creek, Colo.

Operating under lease the Specimen claim of the Stratton C Mining & Development Co. Ore developed by 300′ Pratt shaft through the Orpha May claim.

Portland and Independence mines, 253 acres, in Cripple
r county, carrying gold ore in quartz veins. The Independence
prising 110 acres on Battle Mountain, were purchased from
ndence, Ltd., a British corporation, in July, 1915, for $325,000.
mine has over 16 miles of workings and is credited with a
July, 1915, of $23,621,728.

For geology of the district, see U. S. G. S. Prof. Paper, No. Vindicator Cons. G. M. Co.

Development: the Portland mine, which has been continuously for 25 years, has a total of over 62 miles of workings; 8,071' of new w done in 1918, compared with 12,506' in 1917.

Mine has 2 shafts. No. 2 shaft being 2,280' deep. The Roosevel drains the mine, a branch from the Roosevelt tunnel will connect with Shaft No. 2 when completed. The company's share of the cost of the velt tunnel and the lateral to its own shaft is $144,591. In December, 1 ore was opened on the 21st level of No. 2 shaft, and at 2,280' a year late 2 pumps on No. 23 level are lifting 1,000 g. p. m.

The No. 2 vein at the tunnel-level has been opened for 1,200', all in

Company also operates the Independence mill at Victor, Colo., wh treat 1,400 tons of ore daily. Since the mill was acquired in July, 191 been completed remodeled and is now an up-to-date cyanide plant. was tried, but was discarded.

In March, 1918, the company's Colorado Springs mill was closed d cause the output of high-grade ores from Cripple Creek had declined that operations were no longer profitable. The Victor mill, which compa operated at Victor, was closed down July, 1918, due to labor conditions. of the machinery has since been moved to the Independence mill. The C Springs mill will be reopened if conditions improve.

Chilean-mill practice at the Portland mill was described by L. W. in Bull. 153, September, 1919, of the A. I. M. & M. E. The primary consist of six 6' Chilean mills, taking as feed the product from two 20 Garfield type rolls. Secondary grinding on the classified sand from the done by six 6 by 6' ball mills. These discharge to Akins classifiers, which the sand in closed circuit. The mills were put in as the result of 8 ye perience on Cripple Creek ores at the Victor plant. Fine grinding costs were 30.82 cents per ton, for 441,435 tons treated.

Production: from the Portland mine in 1912, 44,562 tons, gross $987,416; in 1913, 53,245 tons, gross value, $1,380,713; in 1914, 62,997 ton value, $1,467,005; in 1915, 72,192 tons, gross value, $1,710,277; in 1916 tons, gross value, $2,236,842; in 1917, 86,668 tons, gross value, $1,768,9 1918, 53,887 tons, gross value, $1,120,851; with a grand total from April, January, 1919, of 1,620,682 tons, gross value, $42,961,390.

In addition the Victor mill produced from 1910-1919, 2,328,566 tons value, $5,811,987.

Management estimates from 12 to 15 million tons of low-grade ore mines and on dumps.

Company has a co-operative insurance fund and maintains a hosp Victor, jointly with the Vindicator company, for the benefit of the emp The management is excellent, and the outlook is still promising for many of profitable operations.

PRIDE OF CRIPPLE CREEK MINING CO. COLO

ore-bearing ground. The Roseville tract itself yielded rich gold-silver ore 1882. This is another project, the fourth in the past 6 years, to revive Lea by draining a large area of old workings, and to prospect virgin ground.

SILVER MINING & REDUCTION CO. COLOR

Mine office: Leadville, Colo.

Officers: A. P. Craft, pres.; W. B. Brooks, treas. and gen. mgr.; J Smith, sec., preceding with J. L. McLean and J. F. Cleveland, directors.

Inc, in Colorado. **Cap.,** $1,000,000; shares $1 par; non-assessable. tional Security Co., New York, registrar and transfer agent.

Property: company holds bonds and a lease on several prope around Leadville, one being the Resurrection lease; also owns nearly stock of the Colorado Concentrating Co., which has a lease with option pu chase, on the Pingrey mill at Leadville, a plant with a 100-ton daily capacity

Company will separate the zinc-iron minerals from the silver-lead ore then extract the zinc by a magnetic separation system known as the Cam Ethington process, by which the iron is removed from the concentrate product that runs 25% zinc, raised to one running around 50% zinc.

Management predicts net profits of between $400 and $700 per day solely mill operations.

In October, 1919, a Wall St. house made a pre-organization offer o stock at 50c per share, issuing a 24-page booklet, "Silver, the Opportunity of day," describing the district and marketing of ore, including much extra matter interwoven with what the company plans to accomplish.

SMALL HOPES-BOREEL MINING CO. COLORA

WESTERN MINING CO. COLORA

Office: Leadville and Lake City, Colo.

Subsidiary of the Am. Smelters Sec. Co. Is an important producer of carbonate ores from Big Chief, Maid of Erin, and other mines through Wolfton shaft, Carbonate hill, Leadville, Lake county.

The Leadville unit of the U. S. S. R. & M. E. Co., unwatered the Fryer section and carried on extensive operations through the Harvard shaft. W started February, 1916, and was discontinued August, 1918. The company h to discover a second contact in that section. In 1917 the Western Mining was shipping about 200 tons daily, but all from the upper contact. Company hausted all available ore-bodies in July, 1918.

WESTERN ZINC OXIDE CO. COLORA

Office: C. H. Collins, pres.; W. A. Young, sec.-treas., Leadville, C

Formed in 1915 to take over and operate the 50-ton plant of the We Zinc Mining & Reduction Co., west of Leadville.

Employs the Wetherill process of producing zinc oxide by volatilization collecting fume in flues. Plant operated continuously. Late in 1919 it decided to double the capacity. Improvements have been made in metho hauling residue.

YAK MINING, MILLING & TUNNEL CO. COLORA

Office: Marbridge Bldg., W. 34th St., New York. **Mine office:** L ville, Colo.

1918 amounted to about $200,000 and to $15,000 for the first 919.

uarterly, commenced March 31, 1904, and were continuous 30, 1918, when the amount distributed totaled $3,497,685. Divi- discontinued until July 1, 1919, when 1½% was declared. The les a stock dividend of 12½%, declared October 31, 1904; it tribution of liquidated capital, January 10, 1918, of $500,000.

wns 250 acres and controls an additional area of 1,133 . Also holds agreements covering several hundred additional h agreements company has the right to drive the Yak tunnel at its option.

iel is a 4-mile transportation and drainage tunnel which drains of the Leadville camp, including the White Cap and Cord prop- ill. The portal of the tunnel is in California Gulch, about 1 lle. In March, 1917, the surface track to switches, dumps, etc., in Yak tunnel, by way of Louisville and North Moyer, equipped and trolley line for operation of 50-h. p. locomotives, was quipped with trolley line, 6,207′; laterals equipped with track ine, 1,922′; miscellaneous laterals suitable for equipment for es, about 5,912′.

loped by the tunnel are chiefly a complex sulphide containing nd zinc. For geology of the Leadville district, see U. S. G. S. Emmons and J. D. Irving.

in 1918, there were mined 34,152 tons of iron-silver ore;

22,653 tons of lead-zinc ore, and 1,802 tons of pyrites for acid-burne
of 58,607 tons.

CONNECTICUT

NEW HAVEN COPPER CO. CONNE

Inactive, and probably defunct

Property at Seymour, Conn., shows a copper-bearing band of h
schist, carrying chalcopyrite with some bornite. Operations were
intermittently for several years, the last work being done in October, 19
pany had power plant on the border of the Naugatuck river.

TUNGSTEN COMPANY OF AMERICA CONNE

Owns a tungsten property at Trumbull, Conn., long famous for its
Company organized in 1916, but became involved in litigation soon
and is now inactive. See Vol. XIII for description. The deposit is
well worth exploitation.

GEORGIA

AMERICAN VENTURE & MINES CORPORATION G

Office: 351 Bullitt Bldg., Philadelphia, Pa.

Officers: Meyer Schamberg, pres.; H. Hoopes, v. p.; N. S. K
treas.

Inc. 1914, in Arizona. **Cap.**, $2,500,000, of which $1,000,000 is
and $1,500,000 common. Outstanding $275,000 preferred and $750
mon; shares $1 par. Registrar, Corporation Guarantee & Trust C
delphia, Pa. Transfer agent, office of corporation.

Property: the Columbia mines, 1,705 acres consisting of 40
Parks tract, Wyllie tract, Mountain lot, Hamilton tract, and mine
to Walker and Mote tracts, all situated 11 miles north of Thomp
Duffie county, and 45 miles N. W. of Augusta, Ga.

Geology: the property shows a number of fissure veins, of u
mont type, carying up to 20' in width. The ores are quartzose
sulphides containing gold, silver and traces of copper and lead.
are mica schists with some gneiss cut by veins with 45° dip. O
to run $10 in gold and silver, principally gold, which seems high fo
age assay. Company reports 30,000 tons blocked out.

Developments: by shafts and 5,000' of workings, the deep
450'.

Equipment: 40-h. p. steam hoist, 100-h. p. compressor, 75-ton m
uses a continuous current cyanidation method.

Mine has been under development since 1916, and output, fro
mental work reported as $3,500. Property said to have produc
$2,000,000 before 1861. Expected to ship early in 1919.

ARIZONA & GEORGIA DEVELOPMENT CO. G

Inactive. **Address:** Wm. Tudor, Temple, Haralson county, G
office: Drakestown, Ga.

Organized in 1916 to operate the Tallapoosa mine of the Ge
rites Co., under lease and bond expiring March, 1919, and not
Corporation apparently still alive.

Production: for past 3 years was 30,000 lb. of cement copper
above 50% copper content), and 500 tons pyrite concentrate
49.7% sulphur, total proceeds $10,000. Company said to have spe
reopening mine.

It was hoped "that 500,000 tons could be mined yearly from wh
tons of shipping ore could be sorted that would average 45%
3.12% copper and $2.50 in gold and silver; also 150,000 tons of co
that will average 47% sulphur, 4% copper and $3 in gold and sil
remaining 200,000 tons should, after roasting, give 150,000 tons cin
aging 5% copper and $3.50 gold and silver. The pyrite of this mi
to bring 5 cents a unit above market price, due to its purity."

Is a property of merit if properly financed and developed.

FREEMAN MINE GEO

Address: Cartersville, Ga. Owned by M. J. Freeman, Dallas, J. L. Smith and F. L. Smith, Cartersville, Ga.

Property: located just outside Cartersville, Bartow county, oper 1918 by Cherokee Ochre Co., which see

Geology: manganese occurs as gravel, nodular and boulder ore. has been worked at intervals by hand methods and several hundre have been reported produced. According to the Geol. Survey of G (Bull. 35), the whole ore deposits should assay: silica, 71.02; alumina manganese, 2.40; iron, 5.15; phosphorus, 0.073%.

GEORGIA COPPER CO. GEO

Office: Washington, Ga. **Mine office:** Lincolnton, Ga.

Officers: M. N. Whittaker, pres.-gen. mgr., Lebanon, Tenn.

Cap., $1,000,000; par $1.

Property: the Magruder or Seminole mine, 24 acres, held in fee and mineral rights to 901 acres in Wilkes and Lincoln counties miles from Washington, Ga., within a mile of Lovelace, on Wash and Lincolnton R. R., which connects with Georgia R. R. Show sericitic schist intruded by eruptive dikes of 2 different ages, with in schist and between schists and eruptive rocks. Lodes have an a strike of N. 30° E., to N. 40° E., and dip of 50° to vertical, averagi 14' in width, and traceable 2,200'. The ores contain pyrite, chalc some bornite, cuprite and melaconite, and are estimated by comp average 7.3% copper, 32% lead, 7 oz. silver and $5 gold per ton.

The mine, opened 1852, and closed 1862, on account of Ar Civil War, reopened 1880-1884, as Magruder Mine and operated 18 by Seminole Mining Co., which company was succeeded by Linerd & Copper M'g Co. The Georgia Copper Co. purchased the [illegible] 1917.

Development: by 4 shafts, the main being 220' deep, the others from 40'-80', a 100' air shaft and 1,200' underground workings.

Equipment: includes 175-h. p. boiler, 2 hoists 15 and 20-h. p. drill Rand air-compressor. During 1918 a 250-ton mill with W was erected. Company expected to ship in 1919.

GEORGIA IRON & COAL CO. GEO

Office: Atlanta, Ga. **Mine address:** White, Ga. Joel Hurt Center of operations is Aubrey, one mile south of White.

Property: about 12,000 acres, 8 miles N.-N.E. of Cartersville. Th Belt R. R., owned by the company, connects the various mines main railroad at McCallie, 1½ miles S. W. of Aubrey. Holdings Bishop, Peachtree, Chimney, Moccasin and Red Mountain mines.

Geology: property shows brown iron and manganese deposits 1918 only manganese was produced. Manganese properties are by 3½ miles in area. Ore is found in quartzite and limestone high percentage of barium oxide. The deposit is reported to be extending from Bishop mines, one mile south of Aubrey to Sa mines, six miles away. Bull. 35, Geol. Survey of Georgia.

Development: by open cuts at [illegible] brev tracts, each [illegible] shafts have been [illegible] complished.

Equipment: 9 [illegible] motives, dump cars [illegible] in operation.

Daily output of [illegible] velopment has been [illegible] production rate, for [illegible]

LANSKI MINE

Address: Samuel Lanski, 110 S. Dearborn St., Chicago, Ill.

Property: 6 lots, over 1,000 acres, near Parnell on Georgi Whitfield county, Ga. Property said to show manganese ore, mostly and some red iron ore.

Developments: carried on by G. M. McKinney in 1918, cons open cut, said to show 57.50% manganese ore.

LIBERTY PYRITES CO.

Address: J. F. Ryon, Healy Bldg., Atlanta, Ga., or L. S. Be St., N. Y. City. D. S. Leonard, supt., Hiram, Ga.

Property: 3 lots, 100 acres, 3 miles north of Hiram and sa south of Dallas, Paulding county, and within a few hundred feet o Southern R. R. property adjoins the Shirley mine.

Developed by two shafts, 70′ and 100′ deep, put down in 1910. C as medium grade pyrite in gangue of siliceous material. Company w to start operations in 1919.

LINCOLN GOLD & COPPER MINING CO.

Lincolnton, Ga. Property purchased, 1917, by Ga. Copper Co.,

Inc. June 11, 1906, in Oklahoma. **Cap.**, $2,000,000; $1 p dividend, of one-half of 1%. Was practically the successor of t Mining Co., which was a sad failure.

MARKSTEIN-DORN MINING CO.

Address: Phil. Dorn, mgr., Birmingham, Ala. **Mine addr** Bartow county, Ga.

Reported to have a lease on the mineral rights on a part of owned by W. B. Vaughan, White, Ga. This tract consists of 9 lots, in Bartow and Cherokee counties, near Pinelog Mountain, about 3 Rydal on Louisville and Nashville R. R. Mine contains manganese niferous iron.

Developed: by 150′ shaft, 180′ underground passages and so test pits, the deepest 75′.

Equipment includes steam shovel, concentration mill, double 35 h. p. boiler, 15 h. p. engine and jigs.

PAGA MINING CO.

Office: Cartersville, Ga.

Reported to have a lease on the Wyvern mine, near Wyvern, a north of Cartersville and the White mine, about 1 mile S. E. of on the Louisville and Nashville R. R.

In 1916-1917 company shipped many carloads of hard mangan said to contain 20 to 25% manganese, low iron and high chert sili Wyvern mine.

Development: on Wyvern, by open cut, hand method. C 75′ long, 70′ wide and varies from 20-30′ in depth; on White mine, shafts, 40′ and 100′, an incline shaft 100′, and about 300′ of work

REPUBLIC MINING & MANUFACTURING CO.

Reported to be operating the Sweetwater mine, two miles W. of Sumpter county.

Mine contains bedded deposit of bauxite running 56.3% alu silica, and 1.8% ferric oxide. Outcrops about 1,300′ long, average

Work done by manual labor. Production said to be about 1,000 t

0 acres, about three miles N. E. of Cartersville on Row- owned by the Wm. Zeigler Estate.

rty, operated by W. C. Satterfield during 1918, showed high- ore and some manganiferous iron. Operator planned to install r and a 4-cell jig.

IDAHO

nes of the State are in the Coeur d'Alene region in Shoshone roperties of that section are grouped under that name. All d alphabetically. The value of the gold, silver, copper, lead and no in 1918 was $38,140,000, or $16,700,000 less than that of 1917. d no decrease, while the silver output was $600,000 less in value, sed price per ounce. Many of the mines, particularly the e handicapped by a scarcity of labor, and even the larger mines xpense on account of the increases in cost of freight, treatment, e total production of the principal metals for 1919 was as fol- 37,800 lbs.; gold, $710,400; silver, 6,042,016 oz. In 1918 the 00,274,000 lb. lead and 47,000,000 lb. zinc. Dividends paid by in 1918 totaled over $7,000,000. The Hercules Mining Com- ip dominated by the Day family, is the largest producer; the ., second, and the Bunker Hill & Sullivan Mng. & Concen- in size.

rst half of 1919, mining in Idaho, as in other Western mining ctive than it had been for many years. This general decline used by the drop in prices of metals and the high cost of labor the first six months of 1919 the mines of the Coeur d'Alene ing at the rate of only about 250,000 tons per year, or at 60% te. The following table, from the records of the State Mining he metal output of Idaho over a period of years:

Metal	1918	1917	1916	1915	1914
Gold, oz.	36,308	41,326	53,079	60,746	62
Silver, oz.	9,572,214	12,496,017	12,205,132	12,933,619	13,621
Lead, lb.	290,848,425	395,883,000	366,594,000	369,242,000	345,334
Zinc, lb.	51,691,000	96,123,000	98,700,740	93,410,000	49,289
Copper, lb.	5,240,000	7,282,000	8,052,725	7,365,000	5,176
Antimony, lb.	.....	.....	.....	70,950	.....
Tungsten, lb.	.....	.....	.....	54,000	.....
Total value	$37,320,082	..56,292,210	$49,102,693	$39,315,312	$24,976

The grand total value in 59 years is $846,829,076.

AEOLIAN COPPER CONSOLIDATED MINING CO., LTD. IDAH

Idle. Described in Copper Handbook, Vol. XI.

ALLIE MINING CO., LTD. IDAH

Officers: E. C. Ross of the Ross Syndicate, Gilmore, pres.-gen. m T. B. Cook, v. p.; H. R. Hyde, sec.-treas.

Inc. 1905, in Idaho. **Cap.,** $300,000; $10 par.

Property: 6 claims, including the Allie mine in the Texas district, n Gilmore, Lemhi county.

Geology: lead-silver ores occur in fissure veins in flat Devonian li stone underlain by Cambrian quartzite. The Allie vein, closely parallel t lead veins, has gangue of iron oxide with no lead and only a trace of silver ore averaging 1 oz. gold and 50% iron. For geologic features see Umpl Bull. 528, U. S. Geol. Survey, 1913, p. 107.

Development: a 4,500′ tunnel has been driven into Gilmore moun by the Gilmore, and the Pittsburgh-Idaho companies jointly. This tu crosses a dozen silver-lead veins and one carrying gold ore. Development w on the Latest Out lead vein is 800′ below the outcrop. Ore reserves w claimed 1914 to be 15,000 tons, averaging $12 per ton in gold. Extensive pr pecting has not yet shown any commercial silver-lead deposits, though it opened up good gold ore.

Production: first shipment in Feb., 1914, of 26 tons of gold ore sm smelter returns of $11,060. Total production for that year was 50 tons av aging better than $300 per ton. Yield in 1917 reported to be $25,000. No r returns available.

ALPINE COPPER MINING CO., LTD. IDAH

Address: Wallace, Idaho.

Officers: C. W. Beale, pres.; A. H. Featherstone, sec.-treas.

Cap., $100,000; 10c par.

Property: 6 unpatented claims, 2½ miles N. of Adair, in St. Joe trict, which show veins containing copper ore.

No recent returns.

ALPINE MINING CO. IDAH

Address: Charles H. Treacy, mgr., Banks, Boise county, Idaho McNeill and T. Harrington, supts.

Officers: Judge Charles Kerr, pres.; R. J. Colbert, sec.-treas.; P. Nevin; J. J. McCarthy, and W. H. Maloney, directors.

Inc. 1919, in Idaho. **Cap.,** $600,000. Capital was raised in Lou ton, Kentucky.

Property: the Three Sisters claims near Banks on the Idaho N branch of Oregon Short Line. Ore carries silver and lead. An 8-mile road to be constructed. Shipments were expected to start in summer of 192

he White Knob Copper Mine, 3 miles south of Mackay
River branch of the Oregon Short Line, with 39 claims, 18
res, also mill and smelter sites of 480 acres, and a railroad
the Alder Creek district, Custer county, Idaho.
roperty carries a great number of lenticular contact replace-
z porphyry and granite porphyry. The property is remark-
uliar ore deposits, varying greatly in size and shape, occurring
phosed garnetized margin of contact, garnetization existing
ces for fully six hundred feet from the contact. The geol-
arefully studied and is described by Kemp in Transactions
for 1917, and in Genesis of the Mackay Copper Deposits, by
y, Econ. Geol. The ore is largely a cupriferous pyrite with
lla derived from its alteration. The average assay of the
ore mined in 1916 was copper, 4.008% gold, 0.04 oz.; silver,

nt: mine has a glory hole, 125 to 200' wide, but mining is
nel. The property is opened by 46 tunnels and five shafts,
al of underground workings in excess of 17 miles. The
al depth has been attained in the Cossack tunnel, which is
ving a depth of 1,800'. This tunnel opens ore at 900' below
oducing level. Levels are at 125' intervals, and the cost of
ne level is $100,000. Only shipping ore is mined, the last 9
averaging 5.5% Cu., 2.5 oz. Ag., and $1 gold per ton.
: includes steam driven air-compressors having a capacity of
ine-shop, blacksmith shop, bunk-houses, boarding-house and

the mine is reached by an 85-mile branch of the Oregon
R. Co., running from Blackfoot to Mackay, and is connected
les Empire Railroad, owned by the company, of 36" gauge,
two 33-ton and one 35-ton Shay mountain climbing locomo-
ars. The line has a maximum gradient of 9%, with a rise of
one 6% grade on a 34° curve. A 3-mile aerial tram of 100
apacity was erected in 1918 to replace this railway, and reduce
es 80%.
mine is not operation, ore being shipped to the A. S. &
at Garfield, Utah, for treatment:

kane, Wash.; J. B. Whitehill, v. p.; R. Schacht, sec.-treas., w
Robinson, Wm. Wraith, directors. James Wilson, supt.

Inc. 1909, in Washington. **Cap.**, $1,500,000; shares $1 par;
John D. Ryan, through the International Smelting & Refining Co.
$325,000 for the development of the property on condition that
a 10-year contract to treat the company's ores.

Property: 20 patented claims, 26 miles from Porthill, Bounda
Idaho, N. of head of Priest lake, said to show a strong vein i
with a succession of ore-shoots, 8' to 20' wide, carrying galena.
shoots have been opened to a depth of 700' and on that level ex
in length.

Development: by 3 drift tunnels on the vein, the lowest (No
1,600' long with a back of 500'. Reserves above No. 4 tunnel
mated to be 250,000 tons at the end of 1918, including 20,000 tons
ore in stopes.

Equipment: a hydro-electric plant 12 miles from the mine, s
drill compressor, assay office, shops, 1,750' ground tram, 150-to
trator, replacing that burned in 1915, 2,000' aerial tram across the
river, and 13 motor-trucks. A narrow-gage railway from the
Porthill, 26 miles is to be built.

Production: total shipments to Sept., 1919, exceed 19,000 ton
ore and concentrate. Daily output of concentrate is 13 tons. D
the ore shipped contained 7,000,000 lb. of lead and 129,000 oz.
Output from July to September, 1919, 2,400 tons of concentrate
$62 per ton. About 100 men are employed, when property
operation.

The Idaho Continental is considered to be one of the impo
mines of the State, and has been rapidly developed despite its iso
tion and high cost of operation.

IDAHO COPPER MINING & SMELTING CORP.

POCATELLO GOLD & COPPER MINING CO. ID

Address: Pocatello, Idaho. H. W. Lockhart, pres.

Inc. Dec. 1, 1902, in Idaho. **Cap.,** $1,000,000; shares 50c par.

Property: 7 claims, 140 acres, in the Fort Hall district, 12 miles s Pocatello, Bannock county, shows a vein of about 3' average width, rep to give assays of 30% copper, 13.8 oz. silver and $1 gold per ton, from nite and chalcopyrite ore. Ore is of milling grade but contains a streak of rich ore, from which shipments to the White Knob smelter returns of 17 to 30% copper and 15 to 18 oz. silver per ton.

Development: by tunnels, with about 1,000' of workings. Presu idle.

PONDERAY MINING & SMELTING CO. ID

Offices: 922 Old National Bank Bldg., Spokane, Wash., and Sand Bonner county, Idaho.

Officers: Geo. S. Brooke, pres.; Leo Greenough, sec.-treas.

Cap., $500,000; $100 par; all issued.

Property: 4 patented gold-silver-lead claims near Lakeview, in B county, and 4 lime-copper claims near Bayview, Kootenai county.

POPE-SHENON COPPER CO. ID

Address: Salmon, Lemhi county, Idaho.

Officers: R. H. Winder, pres.; Thomas Austin, v. p.; C. R. Bra sec.-treas.; A. Boulais, supt.; R. H. Bradford, metallurgist.

Six assessments have been levied, the latest on February 21, 191

Property: near Salmon, developed by tunnels, the upper and lower 900' apart. In October, 1918, 12.86% copper ore was sent to Utah sm and in May, 1919, 10 to 15% ore was being extracted. In Septembe weekly output was 2 carloads. A leaching plant is being erected. Bradford volatilization process is to be used also.

PRINCEMONT MINING CO. ID

Address: Marble Creek, Idaho. J. D. Olley, supt., at Noxon, Mo

Officers: S. B. Holbert, pres., Pittsburgh, Pa., with N. B. T F. Briggs, W. J. Williams, A. G. Holmes, E. F. Holbert, and W. H. G directors.

Inc., 1916, in Idaho. **Cap.,** $2,000,000; shares $1 par; non-asses 1,650,000 issued. Annual meeting second Monday in September.

Property: 43 claims, 875 acres, as follows: Copper Prince of 13 on C. M. & St. P. R. R., Ida., also the Idaho-Virginia group of 24 near St. Joe, Ida.; and the Pilgrim group of 6 claims near Noxon, county, Mont. These properties contain copper and gold ores, and silver ore, and others only copper.

The copper Prince and Idaho-Virginia properties are fully the former developed by 600' tunnel and 125' drift and the latter shaft. The Pilgrim is opened by tunnel.

RABBIT FOOT MINING CO. ID

Mine office: Landore, Adams

W. Riddle, v. p.; Chas
with Chas. Marvin.

$1 par; issued

Bonds: $250,000 authorized at 6%. Annual meeting, secon in March.

Property: 15 claims, partly patented, 134 acres, including the Margaret mines, and bond and lease on the Decorah mine, 16 rail. Lands show contact deposits, between diorite and limesto a strike of N. 75° W., and said to be 15 to 50' in width. These dep oxidized ores, succeeded at a little depth, by sulphides, the chalco bornite ores said to average 5% copper, 2 oz. silver and $1 gold

Development: exclusively by tunnels, there being drift tunn and 150', and a 483' crosscut tunnel, with 2,800' of workings, estima management to show 182,700 tons of ore blocked out for sto Arkansaw mine has produced a little high-grade ore in the past.

Equipment: includes a 125 h. p. electric plant, taking power Oxbow station of the Oregon-Idaho Power Co., and there is near the mine.

Production: to 1916, 555 tons ore said to have averaged 11.2

Inability to pay off $20,000 debentures caused closing down o suspension of all operations except leasing, in 1915. Company's mine has since been taken over by the Arkansaw Leasing Corpora Seven Devils company is alive legally, being held to take over t interests when the results of development are completed, givin basis for distribution of interests in the corporation.

SILVER CITY MINING CO.

Address: Silver City, Owyhee county, Idaho.

Property: near Silver City, adjoins the Trade Dollar Consol the east and has a system of parallel fissures containing gold-silver 1914 the company remodeled the old Blaine mill, purchased from Dollar Consolidated, located in Long Gulch, ½ mile S. E. of Si Mill has 10 stamps, classifiers, concentration tables, and a 25-to plant. Presumably idle.

SILVER LEAF MINING CO.

Address: J. B. Sullivan, Lakeview, Bonner county, Idaho.

Property: silver-lead prospect near Lakeview, which in 1918 w by tunnels, with some ore ready for shipment. The upper level sh of $125 silver ore, alongside 36" of $35 lead carbonate ore.

SILVER MOUNTAIN MINING CO.

Office: 950 Pine St., Potlatch, Idaho. W. E. Horstkotte,

SILVER TIP MINING CO.

Merged with International Mining & Metals Co., which see.

SINKER TUNNEL MINING CO.

Address: W. G. Adams, sec., Nampa, Idaho.

Property: the War Eagle group of gold claims in Silver Cit Owyhee county. Idle since 1878, but re-opened in 1916, since 6,400' tunnel has been extended 310', cutting a rich free gold vei be 9' wide, including a "granite horse."

SMOKY BULLION GROUP

Address: E. A. Worswick, Soldier, Camas county, Idaho.

Property: 3 claims, patented, 57 acres, on headwaters of Sm near Hailey, Blaine county, contains a big deposit of low-grade co ing ore opened for 4,200' on a contact zone between granite and

Reported to show a shoot of silver-lead ore, with considerable some iron pyrite. A lower tunnel was driven under the main sho proved to be almost barren. Whether the orebody was faulted o out at comparatively shallow depth is not known. The latter because it has proven to be the case with many Wood River veins

Development: amounts to 2,000', mostly by tunnels, one 600' 575' back. Property examined by Prof. Knutson and by J. M. Wille

Property has milling plant erected by an Eastern syndicate, wh

operty and allowed it to be sold for taxes. Regarded as ect, but practically idle for 15 years up to 1920.

AHO DEVELOPMENT CO. **IDAHO**

y, supt., Pocatello, Idaho. U. B. Sollie and Dr. J. C.

up near Pocatello, showing a vein of copper ore, from shipped, 1916, returned 17.7% copper and 4 oz. silver

ed in June, 1919; company probably defunct.

sec.; E. F. Bethmann, treas.; William Jack, mgr.; Miles Joh attorney.

Inc. in Idaho. **Cap.**, $250,000; $1 par

Property: 7 claims and a millsite, all patented, ½ mile N. W in the Lolo mining district, near the N. P. R. R. Claims show a in granite, the ore carrying copper carbonates and sulphides. by Samuel Aughey.

Development: by 700' of shafts and tunnels. A 2-drill co available. No recent progress has been reported.

TUNGSTEN HILL MINING CO.

Address: C. D. Muxen, sec., Spokane, Wash.

Cap., $50,000; shares 5c par; assessable.

Property: 7 claims in the Moyie-Yahkt district, Boundary c carries scheelite, gold, silver, and lead.

Equipment: includes gas engine and compressor; a concentr was planned at last accounts.

UNA MINING CO.

Address: Ralston McCraig, sec., Spokane, Wash.

Inc. 1914. **Cap.**, $1,250,000; shares $1 par; 650,000 issued; ass

Property: 3 claims, 4 miles west of Orogrande, shows a vei carrying pay streaks of a few inches to 5' thick. In the 40' sh is said to average $7 per ton in gold with some silver.

Development: by 1,100' tunnel which cut the vein, Sept., 191

UNITED LEAD CO.

Name changed to Silverado Mining Co., which see.

UNITED METALS & POWER CORPORATION

Address: Arrott Bldg., Pittsburgh, Pa.

Inc. April, 1918, in Delaware. **Cap.**, $5,000,000; $5 par; 67,

Officers: Walter Gray, pres.; W. P. Fowler, v. p.; A. L. S sec.; C. C. Wesley, treas.; with M. E. Frazee, and A. S. Moore, d

Property: 14 claims, 289 acres, in Sea Foam district, Cust Nearest rail is at Ketchum, 105 miles distant. Company is sa re-built 22 miles of old road, constructed 3 miles of new road and The State is expending $50,000 on a road from Galena Summit between the mine and the shipping point. Four veins cross the the Montana being the principal one. Ore carries silver, lead, Ore being mined, sorted, and shipped averages $75 per ton.

Development: by a number of short tunnels.

Equipment: water-power, compressor, drills, 10 Holt tra trailers to be ready by May, 1920; employs 25 men.

UNITED MINES CO.

Office: 501 C. of C. Bldg., Spokane, Wash. **Mine office:** J. L Fairfield, Idaho.

Officers: T. S. Griffith, pres.; E. J. Peterson, v. p.; L. J. Chas. Uhden, treas., with V. A. Johnson, E. A. Worswick, Jack and J. C. Lawrence, directors.

Inc. May 17, 1916, in Washington. **Cap.**, $250,000; 25c pa issued.

Property: 13 claims, 10 miles N. E. of Fairfield, Blaine co to show a fissure vein in granite, dipping 45° with N.-S. course are 3 to 7' wide, 260' long and 150' deep. Ore is mostly sulphide pyrite, galena and chalcopyrite. Value in gold, silver, and l per ton.

Development: by 511' tunnel, [illegible] with [illegible] of workings. Ore reserves estimated at [illegible] out.

Equipment: 10-stamp mill [illegible] sawmill, etc. No details [illegible]

.D MINES CO. **IDAHO**

Varren, Idaho county, Idaho, and 120 Broadway, New York. James H. Hawley, pres.; Lorren M. Hart, v. p.; George C. .; Eduard C. Christensen, sec.; Jay A. Czizek, managing director,

1, 1916, in Delaware. Cap., $2,500,000; $5 par; 350,000 out- d on New York Curb. Security Transfer & Registrar Co., New agt. and registrar. Company has no debts, and has funds to to production stage.
200 acres, patented, including the Little Giant and Charity unnel sides, each 3,000' long and 1,500' wide, crossing vein system ; all at town of Warren, Idaho, 40 miles from Lakeport on O.

the prevailing rock is granite, cut by typical quartz veins, by later dikes of porphyry. Veins are step faulted by these dikes issures. Veins carry shoots of free milling quartz; that of old ittle Giant mine being 800' long, 3' thick, and averaging $85 per tons milled. The ore shoot of Old Charity mine workings is d averaged $30 per ton. These shoots are faulted and were lost orkings, but the deep crosscut drainage tunnel proves the shoot ze and value down to that level 450' below old stopes. One vein el carries high-grade tungsten ore.
ent: a 2,750' new drainage and transportation tunnel of 8'x8' as been driven beneath the old mine workings at a depth of 300' he vein outcrop. This has opened up five veins each with stoping 500 ft. and crosscuts, raises and drifts expose the veins, and open es. This tunnel will be extended 2,500' farther to crosscut five roduction veins.
n: in former years said to total $1,200,000 from 150' backs wo mines; including 5,500 tons of $85 ore mined and milled from orkings.
e vein was cut at 1,850' in main tunnel at a depth of 450'. A 120' shows vein to be 3' wide. Ore was stripped for 40'. Product oux & Co., New York, shows 60% concentrate from crude ore. ed 75.8% tungstic acid; phosphorus, 0.005%; arsenic, 0.18%; Recovery was 94.7%.
t: hydro-electric power developed from water carried in ditch 238' head for driving compressors, stamp-mills, and tramming ore gh tunnel.
re free milling, and first mill unit was erected at mouth of tunnel. ke and gyratory crushers with capacity of 500 tons; 10 stamps, 2 50 tons in 24 hours. A second unit is to be erected at the orkings.

WEILER MINE

Address: H. W. Weiler, Mackay, Idaho.

Property: 6 claims in Antelope district, Butte county, Idaho occurs in fissure and contact veins in porphyry and limestone, the vein up to 4' wide. Ore reported to assay 20% lead, 25 oz. silver, and up t per ton.

Development: 200' shaft and 5,000' workings. Reserves are at 2,500 tons.

Equipment: 6-h. p. gasoline hoist.

WEIMER COPPER CO.

Address: Dubois, Fremont county, Idaho.

Property: 18 claims, 360 acres, on Birch Creek, in Skull can trict, shows a crushed zone 100 to 200' thick between quartzite and which carries high-grade ore in pockets and in cross fissures, of 3" to running at right angles to the main contact deposit.

Development: by an open-cut and 2 tunnels of 300' each. Idle eral years. Said to be controlled by Jesse Knight interests.

WEST COAST MINES CO.

Address: H. J. Hibschman, Spokane, Wash.

Cap., $500,000; shares $1 par; non-assessable.

Property: 13 claims, the Pearl mine near Boise, Ada county, a vein of gold-silver ore, developed by 200' shaft and several hundre lateral workings. Idle since 1917 for want of capital.

WILBERT MINING CO., LTD.

Office: 222 Kearns Bldg., Salt Lake City, Utah.

Officers: A. S. Ross, pres. and gen. mgr.; J. A. Foley, se D. J. Lennon, supt.

Inc. 1907, in Utah. **Cap.,** $1,000,000; shares $1 par; assessable; i to $2,000,000 in February, 1918. Annual meeting in May. Stock trans company's office. Listed on Salt Lake Stock Exchange and New Yo U. S. Corporation Co., New York, transfer office. Assessment No. 5 per share was levied June, 1919.

Dividends: $10,000, Nov. 15, 1915; $40,000 in 1916; and $40,000 and $30,000 in 1918.

Financial Statement, years ending May 1:

Year	Revenue	Expenses	Dividends
1918	$165,961	$135,961	$30,000
1917	181,389	128,475	40,000
1916	.....	.....	40,000

Property: 16 patented claims, plus those of the Wilbert Annex Dome mining district, 40 miles from Arco, Butte county.

Geology: the claims show Cambrian quartzite cut by a fiss that contains lead and silver ore, mostly of concentrating grade. The v vein has been folded into a nearly horizontal bed, worked by quarryi main ore-shoot has been followed to a depth of 800' and is stoped out fr level to the surface.

Development: by 800' incline shaft and extensive lateral workin cent work has been concentrated on the 500' level.

Equipment: most of the surface plant, including a 100-ton m burned in August, 1918. It will probably be rebuilt.

Production: for year ending May 1, 1916, was 15,204 tons c assaying 25% lead and 3.86 oz. silver, which yielded by sorting and concen 5,787 tons, assaying 52% lead and 8 oz. silver. Costs were $3.56 per ton.

In 1916-'17, the mill treated 6,981 tons of 18.7% lead and 4.9 oz. s yielding 1,758 tons of concentrate, assaying 54.2% lead and 15.3 o Extraction was 72.9% and 78.6% respectively. Milling costs were $1.9

gust 1, 1917. Annual meeting, first Tuesday after first Monday

Property: 13 patented claims, 184 acres in Gorge gulch, Coeur d'Alene district, adjoining the Hercules on the E., and s the extension of the Hercules vein system for 1¼ miles in length.

Ore contains silver and lead values.

Development: by several tunnels. No. 2 is tunnel over 3,00 cutting the shoot opened in upper workings and exposing 1 to 8' o with a 400' drift on a 6 to 8" high grade streak. A 250' shaft w the point where the vein was reached by the tunnel 650' from the He dary. Shaft fully equipped with air-hoist, compressor, and electric large outcrop at east end of property was opened by 1,000' of work and arrangements made to use the 3,500' Oom Paul Cons. Minin nel, to explore Ajax ground. Early in 1918 the heading was 7,000' in was cut at a vertical depth of 1,200'. Owing to high mining cost closed down during much of 1918, but was worked again in 1919.

Extensive development of promising ground has not yet disc mercial orebodies.

ALAMEDA MINING CO.

Address: Wallace, Idaho.

Officers: F. J. Finucane, pres., 323 8th St., Spokane, Wash. Burbridge, v. p.; Chas. McKinnis, mgr.; J. A. Wayne, sec.-treas.; Chas. Hussey, directors. R. R. Catching, supt.

Originally inc. 1900 as the Alameda M. & M. Co., Ltd. 1910 as Alameda Mng. Co. **Cap.,** $1,500,000; $1 par; assessable; ments levied since 1900. Control of 800,000 shares purchased April, a share, by syndicate consisting of above named officers. Stock listed and Butte Exchanges.

Property: 6 claims adjoining Success mine on the E., in section, Coeur d'Alene district, Shoshone county. Little work has on the property during the 5 years up to 1918, owing to litigati Success company. Operations of the latter company having show bodies opened on the 400, 450, and 700' levels of the Success mine Alameda ground. The faces on the 400' and 450' levels are said to oz. silver per ton, 31.5% lead, 21.1% zinc; and on the 700' level, 7.5% silver, and 25.7% zinc.

The first suit was won by the Alameda Co., which was awar damages. The Success Co. won on appeal, the court permitting follow the granite vein downward between vertical planes along the the Granite claim beneath surface of the Cardiff, or any other claims this vein extended within the vertical lines named. The Alameda the case, but lost.

Development: by several tunnels, one being 2,500' long. zinc ore was found, on same level as the Success main tunnel, 500' belo workings on this ore-shoot.

AMAZON-MANHATTAN MINE

Address: Eugene R. Day, Burke, Idaho.

Property: 6 claims N. W. of Consolidated Interstate-Callah
Creek district, Coeur d'Alene region. Its history, which is one of
litigation over ownership, dates from 1912. The former owners ever
an option to purchase for $160,000, to J. H. Wourms of Wallace, wh
property to Con. Interstate-Callahan. Patrick Burke of Wallace, wh
given an option in 1912 and failed to make his first payment of $16,0
to deliver the property, whereupon the District Court ordered vaca
premises. An appeal to Supreme Court sent the case back to the low
being alleged that Wourms had represented both Burke and the Cons
This contention was upheld, and eventually Cons. Interstate-Callah
dered to restore the Amazon-Manhattan to Burke, upon return to th
of $159,825, the full amount paid for it. This was, it is said, supplied
R. Day and the others, now in control.

Development: in the report for 1917, Cons. Interstate-Calla
that it had expended considerable money in exploration. When p
was considered a good prospect, but little ore was found, and none wa

Development is by tunnels. The lowest, or No. 3, 2,000' long,
depth of 900'. It is now stated that reserves are worth $2,000,000
1918, a ½-mile tramway was constructed to the Ray-Jefferson compar
mill, from which 60 carloads of concentrates from Amazon-Manhatta
shipped in 1918.

l report 1918 of Robert Bell, State Mine Inspector, will
ng notes on the Bunker Hill & Sullivan ventilating sys-
ound work.
January 1, 1919, were 4,362,024 tons. Milling ore averages
d 3.7 to 4.5 oz. silver per ton. Shipping ore runs from
and 17 oz. silver per ton.
ncludes 3 concentrators, power-plant, water power, ma-
mills, etc. Replacement value of surface equipment is
49. Mill extraction is about 85% for lead and 80% for

mill, consisting of jigs, trommels, and tables, is treating
ilings daily.
has a 12-year contract, dated March 1, 1918, to sell por-
ssaying between 40 and 66% lead to the A. S. & R. Co.
rn the two companies had been constant, B. H. & S. Co.
lter at Kellogg, in 1917. Initial daily capacity, 1,000 tons.
from the Washington Water Power Co. of Spokane.

Mined Tons	Concts. Tons	Lead Lb.	Silver Oz.	Cost per ton Mining	Cost per ton Milling
9,027	84,169	67,125,717	1,191,907	$2.92	$0.71
[illegible]	103,982	93,992,898	1,692,765	2.38	0.60
[illegible]	76,284	77,298,879	1,406,260	2.36	0.43
[illegible]	59,901	74,584,741	1,298,284	1.99	.....
[illegible]	56,163	70,663,236	1,161,324	1.98	.....
[illegible]	59,471	71,860,773	1,227,076	2.25	.....

Production since 1886 is 8,275,913 tons of ore worth $86,34
Net smelter returns were $50,925,287, of which $28,771,132 was
$4,105,624 investments, etc., and $22,086,750 paid in dividends
1918.

Cost of producing lead has been as under:

Year	Price rec'd c. per lb.
1918	7.375
1917	8.731
1916	6.881

Company issues a report containing considerable detailed
little on underground conditions. The mine is a big one and w
to pay dividends for many years. The general policy of comp
gressive, with much initiative.

Bunker Hill Smelter.

Subsidiary of Bunker Hill & Sullivan Mining & Concent
which see.

Offices: Crocker Bldg., San Francisco; 1015 Paulsen Bldg
Wash.; and Kellogg, Idaho.

Officers: Jules Labarthe, director; F. M. Smith, asst. direc
Sullivan, smelter supt.

The smelter, erected in 1917, improved and enlarged sin
Kellogg, at Bradley railroad station. The principal supply of or
centrate is from the B. H. & S. mines, but custom business is do
1920 the company had arranged to receive ores from British Colu
competing with the Consolidated M. & S. Co. at Trail, Northpo
and the A. S. & R. Co.

The works consist of 4 Traylor blast-furnaces, 48 by 180
tuyeres, 2 I.-R. turbo-blowers of 12,000 cu. ft. capacity per mi
pressure, slag settlers, 20-ton electric crane, 130 cu. ft. motor-du
pots, 10-ton Baldwin-Westinghouse loco, Dwight-Lloyd sintering
two 50-ton drossing kettles, centrifugal pumps, two softening fu
ton crane, Faber du Faur retort furnaces using powdered coal,
naces, and Cottrell precipitators. The furnace charge carries
lead, and the slag assays only 1% lead.

These works are in able hands, and are of great importa
Northwest.

BURKE MINING CO.

Inc. June 12, 1912, in Arizona as a consolidation of the Interstate Lead Mining Co. and the Callahan Mining Co. **Cap.** $5,000,000; $1 373,303 outstanding, as explained below. Listed on New York Sto change. Title Guarantee & Trust Co., New York, transfer agent; trar & Transfer Co., New York, registrar.

Outstanding shares totaled 464,990 up to October, 1918, whe were reduced to 319,893. In April, 1914, the company made a contra the American Metal Co., Ltd., for the sale of the entire output mine and mill for a 10-year term commencing September 22, 19 prices to be spelter at St. Louis, less certain deductions. Owing t tinual controversies between the two companies in regard to modifi of the contract, asked by the American Metal Co., it was finally deci cancel the contract in October, 1918, the consideration being the d and surrender to the Consolidated Interstate-Callahan Mining Co., of shares held by the Metal company. In addition, company acquired of $9 per share from parties affiliated with the Metal company thei ings of its stock of 21,590 shares thus reducing the amount of stoc standing to the amount shown above.

Since the above was arranged, the mining company made a c with the Grasselli Chemical Co. of Cleveland, Ohio, for sale of i until July 1, 1919. The lead-silver ore is sold under contract to the Am. S & Refining Company and treated at Colorado smelters.

Financial Statement—Years ending June 30, to 1916, and Decem thereafter:

	Current assets.					
Year	Cash	Ore account	Other	Total	Current liabilities	S

Dividends: initial paid April 1, 1915, amount that year being $1 share; $7 in 1916; $5.50 in 1917; $1.25 in 1918; 50c. on March 30, 1920, total being $15.75 per share, or $7,126,029, equal to $3.15 per annum.

Company is a consolidation of two prospects, called the Interst Callahan groups, the first named developed and the Interstate vein while Walter Harvey Weed was consulting engineer, on whose adv present consolidation was effected at a time when this part of the d'Alene district was regarded by many mining men as worse tha promising. The mine has developed into one of the principal zinc-le ducers in America; in fact, the third largest, and one of the greatest.

Property: 79 claims, 1,250 acres, (40 patented), also the Jumbo 7 claims, the Blue Grouse (two combined have 20[illegible] trolling interest in the Silver State Mining Co. adjoi all in the Coeur d'Alene district, Wallace [illegible] Amazon-Manhattan mine was relinquished [illegible] on account of defec[illegible]

ocated in 1883, Cons. Interstate-Callahan was adjudged the owner
).

he two fissure veins thus far worked in the property are the
he Callahan. The veins cut through Prichard slates, which
a monzonite porphyry dike and by small diabase dikes. The
varies from 3-20′ in width, the Callahan from an inch to
y of the district see U. S. G. S. Professional Paper by
and F. C. Calkins in 1908; also reports of the mining in-
by Robert N. Bell, especially that for 1918, covering gen-

nt: totals over 47,000′, of which 1,088′ was done in 1919.
orking level is tunnel No. 4, about 1,200′ below the moun-
an ore-shoot 1,200′ long has been encountered, running
width. This ore extends from the uppermost tunnel down,
od metal contents on the lowest level. The 3-compartment
during 1917 and 1918 to 1,100′ below No. 4 level, the main
Exploration during these periods on the new levels has
actory. At the collar of this shaft is a station 25x25′, be-
oist room 40x40′. Hoist is driven by 250 h. p. motor. The
or a lift of 12,000 lb. at a speed of 800′ per minute from an
of 2,000′. By November, 1919, a large orebody had been
00′ level assaying 31% zinc, 34% lead and 7 oz. silver per ton.
ing deep development (to 3,000′, or 1,500′ below No. 7 level)
ion of the O.-W. R. & N. Ry. branch from Mullan, up to

s: 310,000 tons Jan. 1, 1920, plus an equal amount from new
fully developed, averaging 25% zinc. Development has not
limits of orebody.
claims are situated about a mile N. of the portal of Inter-
el. The group lies between the Idora and Interstate-Calla-
he Beaver creek side of the Nine Mile divide. The claims
two fissure veins in quartzite and slate, that average 3′ in
bands and shoots of lead and zinc ore, the lead ore carry-
er ton to each 10% lead. The mine has been intermittently
1892, but no important orebody discovered. There are
longest 1,200′, with a total of 2,140′ of workings. The group
aluable, but has an additional value to the Interstate-Calla-
its much deeper tunnel work than any now existing and
on the Beaver creek side of the mountain, with easy access
rk.
on with this work, in 1917 a crosscut was started from
level, across the Silver State ground, and into the Nipsic,
r's vein at 1,000′ below the orebody indicated in the upper
ipsic. This crosscut will also develop the Silver State.
, 1918, the drift was driven 2,282′ to the side-line of the
into that ground. At 233′ from side-line, 12″ of clean ore,
ad and 10 oz. silver, was cut. Ore carries very little zinc.
way. At a point 1,100′ above, there is 120 of high-grade
4″ wide, so a substantial orebody may be developed.
is modern, with a view to future big development. Build-
mill, bunk and rooming-houses for 300 men. The concen-
is rated at the rate of 11,100 tons of ore per month dur-
mpletely remodeled during 1918 and a contract was made
ts Corporation Co. for the use of its patents. A 400-ton
bins, consisting of a 75-h. p. motor, No. 8 Sturtevant
, two 16″ elevators, 2 Janney emulsifiers, and 16
mechanical air flotation machines, each driven by an
motor, are the installation. There are 2 sets of
of cleaners. The former are in

parallel, each unit consisting of one emulsifier cell and 6 flot while the cleaners consist of 4 flotation machines in series.

The grinding department contains a 200-h. p. motor, a 6x1 2 Akins' classifiers, two 18" elevators, and four 4" Krogh sand pu

A Sauerman slack-line cable excavator is used to reclaim ta the dump. They are dumped into a hopper, and then conveyed flotation plant. In 1917, there were 225,000 tons of these, 50% slime assaying 12% zinc, and 2% lead; the remainder, from jigs, and assay 8% and 2% respectively. By 1919 the tonnage ha duced to 125,000 tons. In June, July, August and September, plants treated 46,802 tons of slime tailing and 37,245 tons of coa The flotation concentrates from these tailings were passed over Overstrom slime tables and 4 Wilfley tables, separating some from the zinc.

During 1918 the old mill was altered to make room for 10-De strom and Wilfley tables; building elevator to feed tables; install system and classifiers; and repairing line shafting and gearing A new set of rolls was built on concrete foundation; the tr jigs were repaired and duplicates built; a new 6x6' ball-mill w another Oliver filter was erected; the pumping system was alte 30' Dorr settler added. One of the great difficulties has been se lead from zinc, and experiments are being made with selective flotation.

By December, 1919, zinc concentrate had improved from metal content, lead from 50 to 59%, and silver from 15 to 20 oz. p

There are 330 men employed, the full complement.

Production: during 1919, the mine was shut down from M October 21st, on account of low metal prices and labor conditio to permit improvements to be made in mine and mill. Production two months of 1919 was 8,866 tons of 50% zinc concentrate, 3,010 lead concentrate and 55,445 oz. silver. Output for November and 1919, was 6,700 tons of zinc concentrate, 2,150 tons lead concentrate ounces silver.

Production gradually increased and is now normal, or about 4, 50% zinc concentrate, 1,700 tons of 59% lead concentrate and 34,00 monthly. Total production to March 1, 1919, 215,680,459 lb. zinc; 5 lead; 949,980 ounces silver, realizing $11,461,364.

In January, 1920, an extension of the fifth level, 200' below t tunnel cut an orebody 22' wide that assayed 23.7% zinc, 12.8% lea silver per ton. In view of this work and the finding of the oreb the fault, the ore reserves may be considered as doubled, and turns on the shares should be not less than $20 per share.

	1919	1918	1917	19
Ore mined, tons	67,952	85,363	240,858

lan, Idaho.
Edelstein, pres.; Dave Holzman, v. p.; Harry W. Ingalls, gr., with H. R. Schroeder, R. C. Vanderford, and John

1901, in Idaho. **Cap.**, $1,500,000; $1 par; assessable; all nt, No. 17, levied May 23, 1918. Annual meeting first ptember. Company expended $30,000 in development in ch 17, 1919 had a bank balance of $2,020.
sment, of 5 mills, was payable December 10, 1919.
claims surveyed for patent on the west fork of Deadman ne National mine on the west, in Shoshone county.
two tunnels have developed a lead-silver orebody 250' to 6' wide, assaying 20% lead, 15 oz. silver, 4% zinc and er tunnel (No. 3), was driven a distance of 5,000' at 100' total cost of $14 per ft. Four separate orebodies have his level so far, but no extensive development has been hem. About 3,000 tons of ore on dump average 4.5 oz. nd 1% copper. Hand-sorted ore on dump assays, 30% silver. Three of the ore-shoots average 3' wide and 50' t shoot is 65' wide and 100' long. A raise is up 100' on ptember, 1919, a 50' vein containing irregular bunches eported cut on the tunnel level.
ncludes 1-drill Franklin air-compressor and 35 h. p. elec-

15, 1919, property was under bond and lease to J. M. ciates of Seattle and Tacoma, Wash., for $250,000, pay- at the rate of $50,000 per year. Lessees furnish surety ill erect 100-ton mill and plan to expend $75,000 on new ing 200' on orebody.

COPPER PRINCE CONSOLIDATED M. & M. CO.

Mine office: Herrick, Shoshone county, Idaho.

Officers: S. B. Halbert, pres.; Samuel R. Hite, v. p.; Be
sec.-treas.; W. M. Ramsey, with S. C. Dooley, W. Hankins,
ton, and J. W. Wood, directors. Frank Drummond, supt.

Inc. July 30, 1910, in Idaho. **Cap.,** $4,000,000; reduced
$400,000; $1 par. Annual meeting, first Monday in Septembe

Property: 37 claims, unpatented, 740 acres in 2 groups
bank of the St. Joe river, 6 miles and 20 miles, respectively, a
of navigation. Property includes water-rights. The Copper
formerly known as the Black Prince, has 13 claims, and the I
or Gold Ridge group, of about 24 claims, is about 6 miles ea
per Prince, and 3 miles from the C. M. & St. P. railway.

The Copper Prince group shows contact orebodies, betwe
Revett quartzite, of 20 to 30' estimated average width, carry
rite, bornite and gray copper, giving assays of 3 to 41% co
13 oz. silver per ton. **Developed:** by 500' of drift tunnels
the sides of 2 canyons. The orebody has been traced by trenc
cut tunnels, on each claim, for the entire length of property,
7,800'.

The Idaho-Virginia group is reported to have a 15 to 2
posit, between granite and slate, carrying galena giving assay
lead, and 14 to 46 oz. silver. **Developed:** by 2 shafts of 50' a
and 3 crosscuts, intercepting a vein said to show galena
quality. Buildings include a smithy, boarding house and a st

Company planned utilizing water power from Prince cre
of 3' ditch and 1 mile of 3' flume.

Equipment: includes 4 boilers, 2 hoists, 2 six-drill air-com
a saw-mill. In 1916, S. B. Holbert, brought suit against co
cover $27,970 for services rendered and money advanced.

No recent information is obtainable.

company holds 28,000 B. H. & S. shares.

Property: company entered upon the operation of its prop
1, 1903. Of the preferred stock, $10,500,000, and of the con
$5,250,000, were issued upon the acquisition of all the minin
formerly owned by the Empire State-Idaho Mng. & Dev.
Standard Mining Co., the Mammoth Mines in Idaho, and certa
property at Everett, Wash. The smelting property has since
without loss to the company. The above mentioned mining pr
sists of silver-lead mines in the Coeur d'Alene mining district.

In 1910, company acquired an option on a portion of the s
Govt. Gulch Dev. Co., lying east of the Black Hawk mines in th
district. On account of default of the stockholders, 414,000 sha
million reverted to the Federal Mining & Smelting Co. The
this company consists of 1 patented and 6 unpatented claims,
also controls through stock ownership the Black Hawk Mng. &
Ltd.

The company exercised an option on 7/10 of the Clevelan
the Idaho Investment Co., and started negotiating for rema
also for the Green Hill ground. This resulted in the orga
the consolidated Green Hill-Cleveland Mng. Co., to which Fed
eral deeded its 7/10 interest, and the owners, thereof deeded
interest in the Cleveland group, and also all of the Green H
Subsequently Federal leased to the Green Hill-Cleveland Mng
the mining and milling plant of the Mace mines for an indefinite
the ores in the ground belonging to the new company are exhaus
ing therefor a rental of $180,000, payable out of the first profits
company, before any dividends were declared. Ownership of
Hill Co. lies 50% with the Federal company and 50% with
Hill interest. Owners of each half interest share equally in
and management of the new corporation, operations of which w
November 1, 1912. Dividends received by the Federal from the
Cleveland Co. amounted to $352,000 in 1913, $576,000 in 1914,
1915, $160,000 in 1916. The Green Hill-Cleveland group was fina
out early in 1918, and closed.

The Helena-Frisco property was purchased in January, 1913
000. Operations proved unprofitable and the mine was closed do
1916. The mill, plant and buildings were sold to the Tamarack C
Mng. Co. for $150,000, the Federal company retaining all miner

In July, 1915, Federal purchased, at receiver's sale, the mi
trator, power line and supplies of the Iron Mt. Tunnel Co., a
Mineral county, Mont., for $100,000. The mine is an old one, h
stoped for 1,700' above water level 20 years previous. Operati
disappointing and the mine was closed down, August, 1918. Sa
of plant was $78,331.

In the 1916 annual report the following active properties
the Wardner, which includes the Last Chance mine at Wardner
or Standard-Mammoth, one mile west of Burke; the Morning,

1909	832,568	56,904

The data on the Federal M. & S. Co. is unsatisfactory, as has been withheld in recent years. The above table shows that company has been a big producer in the past, its Coeur d'Alen parently are nearly worked out. Recognizing this, company new properties in Kansas and Oklahoma described elsewhere. $12,000,000 7% preferred stock is in arrears over $1,000,000, a has received no dividend since 1909, and is now worthless, t property, the Morning mine—has a heavy load to carry.

FLORENCE MINING & MILLING CO.

Address: John B. Steffes, sec.-treas., Kellogg, Idaho.

Officers: Chas. Dallaire, pres.; J. D. Chisholm, Jas. Ezkie Haalund, directors, at last accounts.

Inc. 1908, in Idaho. **Cap.**, $1,000,000; shares $1 par; assess issued. Assessment of 2 mills levied on October 11, 1919. Ann second Tuesday in July.

Property: 10 claims, 170 acres, due E. of the Alhambra a the Sherman and Roanoke mines in the Yreka section of the Co district. Ore occurs in vein in Revett quartzite, carrying lead, copper. Orebody is 100' wide, has dip of 70° and S. E.-N.

Development: by crosscut tunnels, 150' and 300' long, with 800' workings. The lower tunnel started in 1917 to intercept depth of 1,000' is still in progress. The power line was instal and a compressor was added in 1917-18.

FLYNN GROUP MINING CO.

Address: Wallace, Idaho.

Officers: J. T. Hayes, pres.; J. F. Whelan, sec.; with J. J. Cr Kern, and T. McCarthy, directors.

Inc. 1905, in Idaho. **Cap.**, $1,000,000; $1 par; 704,888 issu

Property: 4½ miles N. E. of Wallace, Shoshone county, o ridge between Canyon creek and the South Fork of Coeur d' It includes 16 unpatented claims owned outright, and an in others. The Black Bear and Frisco mines are on the west, an Flynn and Ivanhoe on the east. Examined by Rush J. White i securing an option on control of the Black Bear shares, a through the Black Bear is now possible, and $3,000 monthly is in exploration.

There are 3 veins in Burke and Revett quartzite. No. 1 ve little lead; Nos. 2 and 3 have no mineralization, though the latt combed and well oxidized. Little development has been done, adjoining property, the Black Bear Fraction vein, has been de depth of 1,160', at a point within 300' of the Flynn. The shoots a and from 5 to 7' wide, the ore assaying 2.2 oz. silver, 7.76% lead, zinc. Future development can best be effected by tunnels. Tra is good, and power is obtainable nearby. More work is require whether this property has merit or not.

t.
0; $10 par; is a close corporation.
and a fraction, 240 acres, patented, in Hunter dis-
also 20-acre millsite.

Geology: fissure zone in quartzite and shale. Lead-silver
occurs as shoots with dip of 80° S. and course of N. 75° W. The
area is 200' by 1,800'.

Development: by tunnels and shafts. Main tunnel 4,800' l
down 1,200' below tunnel level. Two shoots developed, the N.
S. 20' wide. Best ore came from east part of Yolande and
West Hunter claims. In November, 1919, a cave-in of slopes
men for 2 weeks.

Equipment: includes 150 h. p. electric hoist, two 3,000 cu.
sors, 100 g. p. m. pump, 400-ton mill using 9 flotation cells on
system.

Results of operations:

	Tons Ore	Gross	Cost Mining	Trans. and Treatment	Impro ment
1915.....	118,764	$614,590	$333,904	$214,315	$34,7
1916.....	119,490	815,779	482,275	180,186	8,0
1917.....	116,562	994,407	525,493	293,202	44,8

No later figures obtainable. The monthly output of co
1,200 tons.

1910	170,000	1917	
1911	210,000	1918	
1912	130,000	1919	

The total to end of 1919 was $7,855,000.

Property: 29 patented claims, 347 acres, near Burke, also Gem.

Geology: ore is chiefly silver-lead sulphides accompanied b and pyrite, occurring in the Hecla lode; strike N. W.-S. E., with 80° to N. E. General country rock is sericitic Burke quartzite, intimately associated with a lamphrophyric dike, which has an a of 2°. Ore averages 5' to 6' in width, occurs mainly in the quartzi both sides of the dike, and, to a large extent, fills fissures. The p an extreme length of 1,200'. The Hecla ore carries lead and silv of Ore-Or-No-Go carries zinc as well. For geology of Coeur d'A see U. S. G. S. Prof. Paper No. 62, published in 1908; also paper Hershey, published by M. and S. Press. In November, 1919, it was the Federal M. & S. Co., for the Marsh Mines Consolidated was an apex suit against the Hecla, alleging ore was wrongly extracted f orebody of the Hecla. The Gertie M. Co. also started suit in Janua

Development: is by tunnel and shaft. Extensions amount in 1916; 12,386' in 1917, and 13,566' in 1918.

The main shaft was 2,000' deep in 1918, at which depth a statio skip-pocket were cut and the vein cut, the drift showing ore 12" continued on the East orebody between No. 3 adit and the 900' leve No. 2 shaft level to 1,200' on the Ore-Or-No-Go orebody.

Reserves were estimated at 1,296,000 tons in 1916; 1,526, 1917; 1,584,115 tons in 1918, and 1,549,833 tons in 1919, plus probable.

Equipment: the property is one of the best equipped in with hoists, compressors, machine-shops, and a 500-ton concentrato at Gem has a flotation unit. Electric haulage was started in 1917.

Year	Ore mined tons	Gross value	Cost of mining	Cost of freight and treatment	Cost of betterments
1917....	87,179	$7,272,258	$1,501,129	$2,634,028	.....
1918....	108,052	9,880,978	2,140,052	3,765,024	$282,500

The property normally employs 500 men. On account of th ket, mine was closed for 5 months in 1919.

Litigation in which the Hercules is involved is known as th case. On October 28, 1916, a 1/16 interest in the mine was purc Mathilde Cardoner of Albuquerque, New Mexico, by Eugene $350,000. Later it was alleged that he did not give correct sta to the value of the mine, therefore Mrs Cardoner was not paid her interest. On January 25, 1918, the U. S. District Court legality of the sale but in August the case was appealed.

,000; 10c par; assessable. Bonds; $105,000, 7%. 12-year, au-
14. An assessment of 5 mills per share was levied in April,
on Spokane Exchange.
er returns from November 1, 1916, to February 11, 1918, were
expenses for same period totalled $211,829. In August, 1918,
1,100,000 shares held by J. E. George of New York at 15
relinquished. Share prices have been very erratic, jump-

ing from 4 to 22 cents within 2 months. In September, 1919, was 2½ cents bid.

Property: 9 claims, 6 miles from Enaville, Shoshone coun 1886, by Octave Guay, shows 3 veins, 2 of 10 to 20' estimated third vein, known as the Great Western, of 8 to 25' width, havi 18" paystreak carrying native copper and cuprite, assaying u balance of vein carrying low-grade ore, estimated to carry 2 with small gold and silver values in quartz gangue.

Development: by 1,000' tunnel and 3-compartment shaft to level. The 523' level (750' below surface) opened up a fine sho mercial lead ore. The 900' level showed this ore to be 6' thic long. This is the deepest mining work in the Prichard slates of d'Alene sedimentary series, a formation hitherto considered un The finding of chalcocite at this mine below 1,000' of Burke qua pletely contradicts all former views. In February, 1916, a c the 1,100' level opened up a vein of solid galena ore from 18 to In December, 1919, a new tunnel was being driven.

Property examined by J. V. Richards in June, 1917, who rep the ore shoot opened by the 700', 900' and 1,100' levels was 400 averaged 3' in width. The ore is largely lead carbonate, ass lead and 1 oz. silver per ton. Half-way between 900' and 1,100' is cut off and but little ore is found at 1,100', or 100' below it the vein is strong. Reserves would not exceed 20,000 tons. the company let a contract for drilling the ground north and the vein, also below 1,200', and it was reported that 4' of 20.5% had been cut by the drill.

Equipment: the mine is electrically equipped and has a 20 centrator with Chilean mill, Wilfley tables, Frue vanners, etc. aerial tram was installed to convey ore from the mine to the r

Production: 25 tons of crude ore and concentrate weekly in recent news.

Cap., $1,500,000; shares $1 par, all issued; assessable, an 2 cents was called November 29, 1919. Listed in Butte, Spokane York Curb.

Dividends: suspended April 20, 1913, totaled $345,000 to sumed April 30, 1915, and $550,000 paid in 1915; $345,000 to July since.

Financial statement: at end of 1916, current assets wer excess of liabilities, and $15,587 at end of 1917. The new manag profits amounting to $23,915 for the first two months of 1918. are available since then. The mine had been worked at a loss of July, 1916.

Litigation with the adjoining Alameda company, which cla for ore, said to have been extracted from its ground by Success, v favor of Alameda Co., but the Success Co. appealed and won. lowed by the Alameda appealing, but the court dismissed case in N

Property: 8 claims on Nine Mile creek, 2 miles N. W. o one of the oldest located properties in the Wallace district; firs the Granite Mining Co., taken over in 1905 by H. F. Samuels, w the Success Mining Co., continued under his management unti control passed to "practical" mining men and brokers, and large bl aggregating over 1,000,000 shares, were worked out through the Duluth, Spokane and Butte exchanges.

The company had considerable publicity during 1917, due to st tion, said to have been aided by the management, and to friction management and several publications on mining news. This wa by the seeming aversion of the directors to take stockholders into the especially in connection with the new smelter contract with the Gras Co., effective May 1, 1916. The distrust of the management culm 1916, in the Success officials being summoned to court to show why should not know the terms of contract. This covered 2,000 tons 3 years, with minimum zinc content of 38%, and maximum lea certain prices.

The old management was ousted in Dec., 1917.

The results of operations since Jan., 1918, show that unless a m smelting contract is secured it is advisable to abandon the mine exposed is extracted. A new shoot of lead-zinc ore reported op 1,500′ level in 1918, proved but a temporary help and in April, 19 was closed down, largely on account of an unfavorable and unpro ment contract with the Grasselli Chemical Co.

Geology: according to U. S. G. S. Prof. Paper, No. 62, there the ore occurring in masses of irregular form and size, which are chi ments of quartzite in places where it has been most thoroughly fis ore is strictly confined to the sedimentary rock; surrounding cou monzonite. Some discussion as to the geologic features of the mine the "M. & S. Press" of April, 1918; also in the 1918 report of the Sta of Mines for Idaho. Ore carries zinc, with lead and silver.

Development: by tunnels to 700′ level, and by shaft from 7 level. From July, 1916, to Feb., 1918, 4,000′ of driving was done o 1,300, 1,400, 1,500, and 1,600′ levels, and 480′ of sinking, revealing 25, ore. Two years' work above the 1,200′, amounting to 5,000′, expo tons of ore. Exploration was practically confined to the known or ground to the east was to be explored during 1918, and it is report 1,500′ level shows 6′ of high-grade zinc ore and considerable lead.

nt: includes a 250-ton mill, employing flotation.
on: in 1916, was valued at $693,045 from ore mined and flota-

was operated during part of December, 1918, and January, 1919. 1919, the mine was closed indefinitely, excepting for work being e 700′ level by lessees, who were reported making regular ship-

a zinc smelter at Pittsburg, Kan., about 37 miles from Jop-
t consists of 6 blocks of furnaces, each having 224 retorts, a
retorts. Two additional blocks, of 224 retorts, built in 1916,
any a total of 1,792 retorts and an estimated capacity of
of spelter annually.
months ended Dec. 31, 1916, gross income was $813,006, less
e purchased, leaving a gross profit of $266,267. Operations
leaving $56,506 net profit. Full capacity was not attained
low price of spelter in 1916.
s exploited by Ridgely & Co. (Geo. Graham Rice), of
arrett Ridgely, former Treasurer of the United States,
ad. On the New York Curb shares skyrocketted to $5
c. Appears to be a good property that was used for
ather than mine profits.

KANOMA ZINC CO.

Address: C. Playter, Treece, Kan.

KANSOURI MINING CO.

Address: C. B. Boylan, pres., Miami, Okla.

Property: a lease northwest of Treece, in Blue Mound terr drill-holes cut ore to depth of 270'. Two shafts were sunk an erected. Shut down at mid-1919 on account of metal marke

KING-BRAND MINING CO.

Office: Jefferson City, Mo.

Officers: A. W. Happy, pres.; D. W. Oberman, v. p.; F sec.-treas. Directors: Joseph Pope, Felix Senevey, Dr. C. Jordan, Horick McHenry.

Inc. August, 10, 1918, Missouri. **Cap.**, $20,000; $10 par, sold 100,000 shares.

Property: 45 acres in Cherokee county, Kansas. Ore co and zinc blende in limestone and is mined by 280' shaft. Or stated as equivalent to 26,000 tons of concentrates, with dumps.

Equipment: steam hoist, 650 cu. ft. compressor. Repor 1919, letting contract for 200-ton concentrator with flotation.

LADD MINING CO.

Mail returned unclaimed in March, 1919, from former Ladd, supt., Baxter Springs, Kans.

Property: north of Quapaw, Okla. Water interfered wi ing early in 1919. A 200-ton mill was to be built.

LAWYERS MINING CO.

E. G. McAdams, Oklahoma City, Okla., pres.; George Treece, Kans. at last accounts.

Property: 36 acres, west of Treece and near Monarch. mined and a 250-ton mill was erected late in 1918.

LENABEE MINING CO.

J. R. McCorkle, supt., Coffeyville, Kans., at last account mill was to be built in 1919.

LUCKY GIRL MINING CO.

Address: Emma Knell, sec., Carthage, Mo. W. H. Berr Wilson, directors.

Property: lease on Ballard land, 1½ miles west of Baxte

Development: drilling cut good zinc ore from 160 to 254' was sunk and 300-ton mill proposed in 1918.

LUCKY JACK MINING CO.

Address: G. K. Williams, Farmington, Mo., principal ow

Property: near Baxter Springs. Drilling showed ore at to 200'. Shaft sunk and mill operating at last accounts.

LUCKY JENNY MINING CO.

Address: Ira Turner, pres., Miami, Okla. Mine leased to George Sullivan in March, 1919.

Property: 4 miles W. of Baxter Springs, near Hocker holes drilled on the lease showed 3.6 to 19.9% blende, with places, and the dump contained 25,000 tons of rich ore. A was erected late in 1918.

LUCKY JEW LEAD & ZINC CO.

Address: Westville, Kan. John West, mgr., Picher, Okl

COPPER MINES OF MICHIGAN

ADVENTURE CONSOLIDATED COPPER CO.

Office: 32 Broadway, New York. **Mine office:** Greenl county, Mich.

Officers: W. Parsons Todd, pres.; Charles G. Lund, Devereaux, W. R. Todd, Jas. L. Bishop and Chas. D. Han W. A. O. Paul, sec.-treas.; E. W. Walker, supt.

Inc. Oct. 17, 1898, in Michigan. **Cap.**, $2,500,000; shar in, $24. American Loan & Trust Co., Boston, registrar; O Co., Boston, transfer agt. Annual meeting, first Thursday nesday in June. Stock listed on Boston Stock Exchange.

An assessment of $1 per share was levied July 20, 19 March, 1916. On December 31, 1918, debit balance was $11 pared with $11,892 on December, 1917 and $53,784 credit bal ber, 1916. Gross receipts for 1918 totals $14,436 and expen which compares with gross of $205,832 and expenses of The 1918 receipts came from rent, and sale of copper and

Property: consists of 3 old mines, the Adventure, Kn ton opened in 1850, 1853 and 1863 respectively, 1,696 acres belt, also a mill site on Lake Superior. The mineral land Secs. 35 and 36, T. 51 N., R. 38 W., and in Secs. 1 and 2, W. The tract is surrounded by the Toltec, South Lake an The village of Greenland lies on the northwestern corner of principal tract, and the village of Maple Grove, controll pany, is near the mine.

The old Adventure mine was opened 1850, along a lin showing prehistoric mining. The largest annual product lbs. fine copper, 1857. After being closed by owners, the ol worked for years by tributors, proving notably rich in sil

The Hilton, or Ohio mine, opened 1863, on the Mass worked vigorously. The Knowlton was opened in 1853. mines made 1,949,173 lbs. fine copper, previous to their Adventure Consolidated which started work November 1,

The **Adventure** property is crossed by the Evergreen gon county, a series of upturned beds of trap, amygdaloid rate, 7 of these amygdaloidal beds carrying copper on tract in a distance of 1,200'.

The cupriferous beds of the Evergreen belt though ve are bunchy. On the Adventure tract the lodes run N. 73° tract, where operations were conducted, shafts being sunk 45°. The old mine had 4 tunnels and 4 shafts, all except N the Merchant lode, being sunk on the Knowlton bed, at 45°

Production from the old mines ceased, January, 1908, and development work being done since. Shipments w November, 1916, and ceased due to labor shortage, high ore, etc., on October 26, 1917; exploration of adjoining lan early in 1919.

There are 5 shafts, No. 3 being 1,520' deep, and vert 1909 and is 6x16' inside measurement, with two 6' hoistin and a 4x6' compartment for ladders and pipes. It is ab of No. 3 shaft, is lined with concrete for a depth of 50' fro is solidly timbered from surface. The shaft cuts No. 1 at depth of 894', and is expected to cut No. 2 lode at ab and No. 3 at about 2,600' depth. The No. 1 lode opened cut on the 1,021' level has been drifted upon for 5 distan and discloses very little copper. A 1,150' exploratory cro west on the 1,500' level intersects 3 beds, designated as 4, cutting the first at a di ond at 600' 1,015' from the shaft. T to cross cut to

y without promise so far as opened, the No. 2 lode, 29' wide, or a distance of 145', carrying much copper in the first 7' with r practically barren; No. three, 32' wide, and opened 547', show- amounts and generally poor, and No. 4, 65' wide, carrying copper in the 34' drift run along the footwall of the lode, No. 1½, first encountered in shaft sinking, is opened for a bout 130' at a depth of 1,190' in the shaft, and had a fair ork was suspended June, 1913, resumed in May, 1916 and sus- October, 1917. No. 3 shaft had been unwatered to the 8th was mined from 3rd-8th levels.

Mass lode, so-called, lying about 120' S. E. of the Evergreen ed by test pitting, May, 1909, and some crosscutting was done rgreen bed, down to the 6th level of No. 2 shaft, but only a drifting was done. This bed shows a width of 8 to 12', but copper, with considerable epidote.

enture mine equipment includes a 38x59' steel boiler house with p. boilers; a 50x59' steel engine house having duplex double- irect-acting hoist with 42x60" cylinders, capable of raising a rom a depth of 5,000' on an incline of 45° at a speed of 2,000' nd a 38x65' steel compressor house having a 60-drill air com- re is a complete electric light and power plant and protection furnished by water mains. The principal mine buildings are steel and painted, and the property is served by a spur of the e railroad.

on has been as follows: 23,572 lbs. in 1900; 29,361 lbs. in 1901; 1902; 2,182,608 lbs. in 1903; 1,380,480 lbs. in 1904; 1,606,208 lbs. 628 lbs. in 1906; 1,244,874 lbs. in 1907; 16,500 lbs. in 1916, and 1917. Shipments to the Winona mill recommenced in No- , and gradually increased up to May, 1917, when about 300 were sent out.

(a) Deficit. In 1918, the increase in reserves for depreciatio
pletion totaled $624,456, making a surplus balance of $501,464.

Net income for 1918 was $3,117,383; $3,157,889 in 1917; $3,
1916; $2,180,000 in 1915; $463,000 in 1914; $207,420 in 1913, and $1
1912.

Property: 931 acres, lying between the Mohawk and Allouez
off, 1880, by the Seneca Mining Co., to work the Kearsarge or
conglomerate. Under the management of Capt. John Daniell,
were sunk on this bed, which averages about 70' width, with 3
of 2 to 3', aggregating 7' width, each carrying copper in good
but bed not payable as a whole, owing to great width of partly
barren rock. Boundary lines were rectified, by exchange of
with Allouez, July, 1903, and by a similar exchange of 20 acres,
hawk, 1909, giving straight boundary lines on the dip of the bed
ting easier development by all mines concerned. Work on th
mine was started 1902, after work at the Mohawk had disclosed th
and trend of the Kearsarge lode.

The Kearsarge bed, on which the present mine is opened, va
14 to 18' in width, with but little poor ground in the entire mine
ings are considerably ahead of stoping requirements, and bloc
is almost entirely by drift stopes, which are carried about 9' wi
high, to the boundary limits, where extraction is begun and broug
ward to the shafts, thus reducing timber requirements to a minim
mine keeps 3,000,000 to 3,500,000 tons of stamp rock blocked out
ing. All levels below the first are 125' apart. A Richmond ele
signal system connects all underground workings with the engin
and underground stations are connected with surface by telephon
crete is substituted for timber in the construction of the shaft
other places where practicable, rendering the shafts as nearly fir
possible. Mules are used in tramming rock underground.

On July 15, 1918, a fire broke out in No. 3 shaft which ne
closing the north end of the mine and sealing shafts No. 3 and
200' of concrete sets and 180' of timber were destroyed. Hoistin
sumed in January, 1919.

Development: the mine has 4 shafts, numbered from south
planned to develop the entire tract. Nos. 1 and 2 shafts, 1,445' a
at 42°, are each 8x17' 4" in size, with 2 hoisting compartments and
way. These shafts were 2,799' and 3,379' deep respectively at en
Each shaft has, between the 9th and 10th levels, a 400-ton rock bin
with a measuring hopper holding exactly one 7-ton skip load, fro
seconds by one man, this system saving much time, and combining
of all rock mined down to 10th level to one point in the shaft. No
is 43' below 22nd level, in a shattered area, requiring close timbe
makes further sinking costly. The 20th level has been holed to
corresponding level of No. 2 shaft, through which rock mined b
22nd is hoisted. No. 2 shaft can be sunk much deeper before hol
into Allouez ground.

The No. 1 shaft workings all show ore of average quality
stopes on No. 10, 11, 14, and 16 levels south, beyond the shaft
The 10th and 16th levels south have reached property boundaries

During 1916 and up to April, 1917, exploration was continued
Kearsarge conglomerate, when work was temporarily suspended
to labor shortage. The Kearsarge conformity was cut in 1916

ies during 1917 and 1918. Two electric pumps were installed, one 11th and one on 21st level. These are handling the water formerly d by 8 air pumps.

e northern end of the mine is developed by two shafts known as and 4, which have a common collar, being only 6' apart at surface, verging north and south, from the surface, at an angle of 42°. These are sunk through 70' of overburden, and are concreted into the solid edge for depth of 95' from surface. The outcrop of the Kearsarge eing owned by the Mohawk, Ahmeek having only the underlay at its rn end, shafts 3 and 4 are sunk in the hanging, at an angle of 80° plane corresponding longitudinally to the strike of the bedded forma- and bend at depth of 980', in a curve with a radius of about 400', bring- e shafts to 34°, to correspond with the rather flat dip at the Kearsarge both shafts entering the bed at depth of 1,275'. Concrete sets and gers have been used in these shafts wherever ground would permit. shaft has 3 compartments, with two 8x8' skipways and a 4x8' ladder- The upper portion of the bed was worked by crosscuts, beginning at in No. 4 shaft which is the 1st level in Nos. 3 and 4 shafts, though are 3 stations above the point where the bed intersects, from which cuts will be run to the Kearsarge bed, to the Mohawk line. No. 3 was 2,938' and No. 4 was 2,773' deep at end of 1918.

luring 1917 and 1918 a commercial grade of "rock" showed in all penings of shafts No. 3 and 4. In shaft No. 3, the 17, 18 and 19 levels reached the Mohawk boundary and levels N. 16 to 19 north corres- with those of No. 4 shaft.

ew openings totaled 13,528' in 1918; 17,049' in 1917; 13,654' in 1916, 769' in 1915.

quipment: the main power house is in 2 parts, of brick and steel, with sition roof. Equipment of No. 1 power house includes 60-drill and Nordberg cross-compound 2-stage air compressors, and a 32x72" r Nordberg hoist. The electrical plant consists of a 13x26" Nord- oist. The electrical plant consists of a 13x26" Nordberg tandem- nd engine, direct-connected to a 200 k. w. 250-volt Northern Elec- nerator. Condenser pumps and reheaters are located in the base- No. 2 engine house is a duplicate of No. 1, containing a similar th double conical drums with maximum diameter of 18'-6", capable ing 10-ton skips in counterbalance from 1 mile depth. Nos. 1 and 2 houses are connected to a steel-frame boiler house, having six 200 ilers, with room for 8 equipped with feed pumps, ash sluices, coal etc. The boiler house has a self-supporting steel smokestack, 150' d 7'-6" in diameter, on a sandstone-faced concrete base. A 1,360 Sullivan compressor was installed early in 1917.

and 4 are equipped with two 32x72" cylinder Nordberg hoists, -expansion Nordberg compressor, and turbo-generator, housed in structure 65' wide by 140' long, with corrugated-iron roof; a steel ng 5' wide and 84' long with corrugated-iron roof, housing eight ilers and a steel self-supporting brick-lined smokestack, 7' d 140' high. There is also a change house of brick construc- the shaft rock house serves both shafts. Storage battery ns, and electric trammers were installed 1917-1918 as follows: 4 on shaft No. 3 and 5 on shaft No. 4.

[illegible] plant, of brick, is 800' north of No. 1 shaft, and with water the plant is connected by a temporary [illegible] 24" wide, carrying a double track for 7-ton tram [illegible] cars of cradles, and rock directed by grizzlies [illegible] below which is a hopper, feeding directly into a [illegible] motor, crushed ore being fed auto- [illegible] driven by a 35 h. p. motor, going to [illegible] contains 3 Farrell crushers,

(a) Includes deduction of assessments, levied by The Lake Mill ing and Refining Co., which totaled $48,902 in 1918; $126,152 in 1917 in 1916. (b) Surplus.

In 1918, company added $198,927 as increase in reserves for depre depletion, which made decrease in current assets $265,143 instead of $4

Property: 3,400 acres, including mineral ground 640 acres, adj Ahmeek Mining Co., which contains the Kearsarge amygdaloid at g

The old mine, opened 1859, is on the Allouez conglomerate, a bed the greenstone. The conglomerate, 30' wide in many places, with s 39° E., and dip of 39°, average 0.7 to 1% copper, and is very refrac the stamps. Mining was begun actively in 1869, and stopped in 187 exhausted treasury. The mine was then leased to Watson & Walls, money from it, after paying a royalty of one-eighth on gross prod 1880 the company resumed control, to quit once more, financially ex 1885. Watson & Walls took the mine again, and once more did well pany resumed work on its own account for the third time, and again stopping all work in 1892. The old mine had been idle for some ye for exploratory and development work in 1898 to 1900, when a shaf 1,200' on the Osceola lode, and nearly 4,000' of openings secured the indifferent results. The old Allouez made 26,051,528 lb. fine copper, 1

Development: the Allouez mine is on the Kearsarge am bed, which does not outcrop on Allouez lands, though underlying 640-acre tract, hence was reopened on the underlay. The mine ha producing shaft, until late 1909. Shafts Nos. 1 and 2 are connected cuts and drifts, on several levels. The Kearsarge bed, above the 14 opened by crosscuts, uppermost being at the 6th level, below which been cut in the shafts at the 8th, 10th and 12th levels, for crosscuts to the bed. The Kearsarge bed averages about 16' width in the Allouez

Underground openings totaled 2,759' in 1918; 2,838' in 1917; 3,50 4,458' in 1915; 3,526' in 1914; 4,400' in 1913; 8,517' in 1912.

No. 1 shaft, at the extreme southeastern corner of the tract, w partments, started May, 1903, and 3,978' deep, leaves surface at an an but at slight depth takes an angle of 80°, continuing thereon to a

curve of 60' brings the shaft to an angle of 38° 30', which is the
At the change of angle, on reaching the bed, a single idler with
ange cares for the cables passing at either end. Owing to the
he shaft, back rails of 6x10" timber are set so close to the wheels
at their flanges cannot leave the steel rails, the wooden timbers
es. The first level is opened at depth of 1,264'. In order to save
s on surface water, a gutter, cut entirely around the shaft, leads

New Arcadian Property: 3,500 acres, includes five old min
various periods in the past. The Arcadian Copper Co., operated
with great vigor, 1898-1901, and equipped it with machinery, a
mill at Grosse Point. Operations on the Isle Royale bed proving
all work was suspended, 1903; the hoist, machinery and shaft-hou
to the Trimountain Mining Co., the stamp-mill to the Centennial C
Co., and the property dismantled. The floating debt of the old
liquidated by the sale of 800 acres of land, for $750,000, to the C
Co. The old mine and equipment were fully described in Vols. I
Copper Handbook.

Development: exploratory work was resumed Oct., 1905,
dian company, on an amygdaloidal bed about one-fourth mile ea
Royale amygdaloid previously worked, and crosscutting from the
the exploratory shaft disclosed 5 cupriferous beds in a distance o
was suspended March, 1908, until organization, and was resumed
by diamond-drill boring from the bottom of the 200' exploratory
is in the S. W. ¼ of Sec. 29. Exploratory work, 1910-13, include
trenching and test pitting, but was devoted mainly to securing 3
nearly 1 mile apart, by diamond drilling, and 26 holes, aggregatin
have been drilled. Drill-hole No. 22 cut a promising amygdaloi
north area. A shaft started June, 1912, on this lode, was 1,860'
1919, and is to be sunk to a depth of 2,500 to 3,000'.

Crosscutting was done on the 750' level to explore the 2
amygdaloid beds disclosed by diamond drilling, one 300' east,
west of the shaft. On this level an amygdaloid vein of great
opened up 150' east of the shaft. Crosscuts and drifts have also b
the 250', 600', 900' and 1,050' levels and disclosed good copper co

The Old Arcadian vein was exposed in 1918 in the west ex
1,500' level crosscut. The No. 8 conglomerate, which was well
the 900' level, was encountered on the 1,700' level east crosscut
shaft. It is 26' wide, with some fine copper, but not of commercial
New Arcadian vein is exposed 47' from shaft on both the 1,700'
levels; it is 18' thick and heavily charged with copper.

During 1918, development work totaled 5,762' of drifting
crosscutting, which compares with 788' of drifting and 648' of
1917.

Equipment: includes a steam [illegible] for 2,500
compressor, necessary mine buildings, and a [illegible] equipped with

its immense acreage on the mineral belt, the property is considered

tic Property: 800 acres, Sec. 16, T. 55 N., R. 33 W., with min- N. W. ¼ of the N. W. ¼ reserved by the New Arcadian. Ex- un June 10, 1909, included extensive trenching in the horizon glomerate, supplemented by boreholes put down by a Calyx shot- 3½" core, considerable trouble having been experienced in getting pes. No. 3 borehole, at a depth of 330', cut 2' of exceptionally earing rock, with 6" of heavy copper, and a drill core fairly copper was taken, Sept., 1909, from what was thought to be the bed, at depth of 300'. In Nov., 1909, a drill-hole pitched at an cut an amygdaloidal bed estimated to pitch at 60° in opposition, f 105' aggregate depth, showing copper at various points, the final harged with fine stamp copper and a considerable amount of very copper. The drilling also disclosed an unidentified amygdaloidal 75' width, carrying considerable copper in masses approaching ze. Deepest hole bored was 1,200'.

as broken June, 1910, for an exploratory shaft, which was started e footwall trap, and sunk to a depth of 500'. Although the shaft the foot, the formation rolls so that the bed was cut at 3 points in 10'. At 200' the shaft cut the footwall of the amygdaloidal bed, calcite but devoid of copper. At depth of 310' the bed was cut g extremely heavy copper of a grade materially better than the payable mines of the district. Drifts on the 350' and 500' levels edingly bunchy ground, with occasional pockets of rich copper, on the 500' level showed further copper ground in an unidentified bed underlying No. 4 conglomerate bed, distant about 1,500' from is crosscut was continued to a point over 1,900' from the shaft. ing this vein were obtained from work done on it by the New adjoining property.

ng campaign ended with No. 7 hole at a depth of 1,235' in 1916. erate was 41' thick at depth of 1,192'. Hole passed through good- aloid veins, with copper in beds at 329', 493', 652', 792', and 1,192'. adian vein was probably that cut at 792'. A shaft was started to ension of this vein, and was down 500' in August, 1918. At 60', where the vein was cut, it was well charged with copper. Company ceptionally good showing on the 400' level.

The Frontenac Laurium, Manitou, Dana, St. Louis, and Tam panies have been completely absorbed.

On Dec. 23, 1916, the company sold its 11,207 shares of Seneca to the Seneca Copper Corporation, receiving $60 per share, a total

In June, 1919, it was reported that the company had sold its 50,100 shares of a total capitalization of 100,000 shares of the Gra Co. to the Seneca Copper Corp. The financing was said to call for of $25,000, with additional payments extending over a period of y

Property: the mine and landed holdings of the Calumet & cluding property owned outright, property controlled through subs porations, mining lands under options, and timber and miscellaneou Houghton, Keweenaw and Ontonagon counties, Michigan, amounts mately 165,000 acres, of which 102,804 acres are in Keweenaw county. pany, with its subsidiaries, has a water-front of more than 34 mi shores of Lake Superior, Lac La Belle and Torch Lake, and ap 60,000 people are supported by the operations of the company an interests.

The Calumet & Hecla mine proper, about 2,750 acres, lies in a co in Secs. 11, 13, 14, 15, 22, 23 and 24, T. 56 N., R. 33 W., in additio the company owns extensive tracts, all west of the Tamarack mine, c underlay of the Calumet conglomerate at such stupendous depth th would require a 2-mile vertical shaft, and it is very doubtful wh lands ever will become available for mining on the Calumet conglom lands west of the Tamarack were explored in 1904 by diamond-drill of a supposed cupriferous conglomerate, but nothing of promise was

The original **Calumet & Hecla** mine is opened on the Cal glomerate bed, and a parallel mine has been developed on th amygdaloid, while a third parallel mine has been partly develop Kearsarge amygdaloidal bed.

The Calumet conglomerate proved unprofitable both to the north of the Calumet & Hecla, though workable at the Tamarack mine developed the underlay by vertical shafts. The conglomerate has strike of N. 33° 30' E., with average dip of 37° 30' with the footwall is of 5' to 26' maximum width, with an average of 14', giving about 2,4 of stoping ground, or about 43,200 tons of stamp rock per acre. The richer portions of the conglomerate are in the central part of the Hecla tract. The walls of the conglomerate carry copper, the amygdaloidal footwall, and much of the [illegible] is now milled. Pillars of 75' and [illegible] every conglomerate shaft, contain [illegible] stoping ground available before [illegible]

About 18,000,000' of timber and to the end of 1918, [illegible] pillars are used as [illegible] drifts on the bed, and Iron, mainly scrap [illegible] placed above I-beams, [illegible] bed in the lower workings

. It has decreased in average copper contents with depth, but
ed in 1915, 3.36 lb.; in 1916, 3.59 lb.; in 1917, 2.40 lb.; and in
nore than in 1914, partly because old pillars, etc., were robbed.
18, there were 81 drills at work removing shaft-pillars, cleaning up
cks of stopes. This yielded 477,541 tons of ore.
met & Hecla has suffered severely from underground fires. The
ative metal cannot burn, like sulphide ore, but the old timbering
comes nearly as inflammable as tinder.
ent: the Conglomerate Property of the Calumet & Hecla is
eparate mines, known as the Hecla and Calumet branches, the
eing a southerly continuation of the Hecla branch, and the Red
shaft a part of the Calumet mine. The Calumet to the north,
he center, and the South Hecla at the south, form one continuous
ng the Calumet conglomerate by incline shafts, the Red Jacket
the same bed vertically. The conglomerate, opened for 2 miles
rop, has 11 shafts, 8 being single compartment shafts, two being
tment, and one vertical, with 6 compartments. Also opened by
and the Tamarack property adds 3 shafts.

pany. To overcome the dangerous strain caused by unequa
Walker differential rings are placed on the sheaves, the cable
complete turns around the driving sheaves.

Equipment at the Amygdaloid shafts on the Osceola bed is
the same at shafts 13, 14, 15 and 16, the new shaft No. 18, hav
hined engine and boiler house, with a small Lidgerwood hoist.
and 16 have Nordberg first-motion double conical-drum hoists
7½-ton skips in balance, good for 5,000' depth each. No. 14 a
Corliss hoists with 25' cylindrical drums, good for 5,000' depth.
17 and 18 are equipped with small Lake Shore and Lidgerwood
single 5 and 2½-ton skips. All the shafts have permanent shaft r
similar to those of the conglomerate workings. All engine-hous
connections with the main compressor-plants at the old mine.

The machine-shop has an equipment excelled by only a
largest shops in the country, including a 25-ton electric traveling
mammoth planers, with electric power throughout. These shops
of handling anything and everything in the line of repair wor
have complete manufacturing facilities for the making of mini
and smelting machinery, and have turned out hundreds of Wi
and other special machinery, under agreement with the own
patents.

The foundry has 2 iron cupolas and a brass foundry, wi
electric [illegible] crane. The pattern shop has 2 departments,
shop [illegible] for storing patterns.

[illegible] with as complete a line of
[illegible] conical woodworking mach

ith shops are as large as those of the largest manufac-
ery, and are fully equipped. The Calumet shop alone
s of 50 tons of steel drills daily. The Hecla shop does
l forging for the entire mine. The various shops employ
lacksmiths.

ctric plant of 12,000 h. p. capacity is at the mills, in Lake
bstation at the mine.

ilding is a large and handsome stone structure, housing
tive departments and the engineering force of the mine.
rivate telephone system has an exchange with about 220
ding a number of deep underground stations, with local
connections.

& Hecla public library had 45,000 volumes in 1917; ranks
circulation in the State of Michigan, with an attendance
of 88,040 in 1917. In addition to books in English, there
nan, French, Italian, Swedish, Norwegian, Slavonian, Pol-
innish and Croatian, with periodicals and newspapers in a
s, about 30 different nationalities being represented on the
l. There also is a branch library and reading room at
employees of the stamp-mill and smelters.

maintains a hospital, for employees solely, with com-
l laboratory apparatus and a dozen physicians.

owns about 1,200 dwellings, furnished to employees at an
6% on actual cost, plus cost of maintenance, and upwards
are owned by employees on lands leased from the com-
ly rentals. This low rent is equivalent to an increased
with Western mines.

school houses on the lands of the Calumet & Hecla, most
lt by the company, including a fine manual training school,
ificent high school building at Calumet.

t Hecla lands there are upwards of 30 churches, of a dozen
ations. All of these sites were donated by the company,
substantial aid has been given in their erection and main-
regardless of creed.

built a $50,000 bath-house containing tubs, showers and a
g pool. A charge of 2½ cts. per bath is made, except in
rtment, which is free to women and children. The charge
cost of washing the towels and in no way compensates
of the bath-house proper.

919, C. & H. and its subsidiaries announced that it had
et life insurance policy covering the life of each of its
s ranging from $1,000 to $1,500, without cost to the in-
act amounted to $10,000,000.

maintains 4 distinct systems of waterworks, one at the
one at the mills in Lake Linden, and two on the shore
4 miles N. W. of Calumet. The Lake Superior plants
omestic uses at Calumet against a head of 733', with an
l pump of 3,000,000 gals. daily capacity and also fur-
mill and smelter boilers, on Torch lake. At the Calu-
e there are 7 pumps, having a combined daily capacity
00,000 gallons.

maintains a fire department, affording protection to the
d locations, and responding to calls from Red Jacket,
other towns that go to make up the mining camp of
00 population.

Torch Lake standard gauge railroad, owned by the com-
mines, mills, smelter and shops by upwards of 20 miles
urs and sidings. Equipped with 250 forty-ton steel rock
comotives.

in front and 3 railways at the rear. The smelter has 4-stone fr
ings, and a 50x70' furnace building, both blast-furnaces and re
having been rebuilt within the past few years. There are 18 rev
which are top-charged, having platforms above on which th
thoroughly dried before charging. The blast furnace is 40
tuyeres its comparatively small size being due to the use of r
furnaces for the bulk of the smelting work. A new steel-fr
building houses three 150-ton reverberatory-furnaces, of so-c
pattern, modeled after the furnaces of the Lake Superior Sme
fining Co. The practice of the smelting plant is fully abreast
in all essentials. In November, 1916, another furnace was blo
smelting works have an assay-office, a laboratory, and a large w
supplies.

The electrolytic plant, 155x270', at Hubbell, has superseded
reduction plant, which has been abandoned. It is built of stee
contains four 7½-ton traveling cranes and 512 lead-lined wo
3'x11'x3' 9" deep, in 4 sets of 128 tanks. Each set is arranged
of 32 tanks, and each section in two tiers. The electric current
by four 125-volt direct current generators driven by alterna
motors operating on current transmitted at 13,000 volts from
plant at Lake Linden, transformed to 2,300 volts. There is a
circulation through the deposition tanks of the electrolyte wi
about 3 to 4% copper and 10 to 12% sulphuric acid. The
capacity of 65,000,000 lb. copper per year. Company mark
copper. This plant also recovers several hundred thousand o
ver yearly.

There is 1 concentrate or mineral house, with a storage
18,000 tons, at Hubbell. Calumet & Hecla concentrate, locally
eral, carries less than 60% copper.

The power plant at the smelter has three 125-h. p. boiler
of the two large reverberatory furnaces has a 300-h. p. boi
through which the waste gases pass.

The dock system of the Calumet & Hecla is extensive, inclu
of very large coal sheds at Lake Linden and a series of docks
and smelters on Torch lake. An electrically operated coal bri
of handling, from vessels, 10,000 tons per 24 hours was comp
spring of 1918. This bridge will unload all coal formerly hand
and 2 docks.

The Calumet & Hecla owns and operates the ship canal
Torch lake with the government waterways on Portage lake
being 21' deep and accommodating the largest vessels plying
Lakes. Tolls, ranging from 10 cts. on soft coal to 50 cts. per ton
freight, are charged by the company on independent cargo
Torch lake through this canal.

The company owns extensive tracts of pine, hemlock an
timber along the southern shore of Lake Superior, this land
tween 400,000,000' and 500,000,000' of standing timber. The co
has a long term timber contract with the Keweenaw Associatio
buys extensively of jobbers, the requirements for undergroun
alone being 18,000,000' annually, in addition to the many mil
timber and lumber used on surface at the mines, mills and sme

In 1904 the Calumet & Hecla Mining Co. started a pensi tain employees who had attained the age of sixty years or had been in the company's employ twenty years or more, we pension proportionate to their length of service and their pensions have run from $9 per month to $38 per month.

On July 15, 1916, the C. & H. celebrated its 50th anniv service medals were given to 1,371 employees; of these, 169 who had worked over 40 years, 380 for between 30 and 40 mainder for between 20 and 30 years.

Reviewing the 53 years' career of this company, several fe attention. To the investor, the total dividends, $155,750,000 vestment of $1,200,000 is not only remarkable for its amou dividends have been continuous.

To the technical man this record is particularly notewo mining record is considered. Beginning in 1866, with a sm from the rich native copper ore of the Calumet conglomerate, present daily production is 10,000 tons, mined by 17 shafts, s a mile deep. The yearly production of copper is from 65 pounds, with a record amount, 100 million, in 1906.

This production comes from very low-grade ore—lower that of the Utah Copper or other great porphyry deposits. nally mined, carried nearly 5% or 100 lb. of copper per ton, of ore decreased from year to year as depth was gained until 1.4% or 28 lb. copper per ton of ore. The maintenance of spite this decrease in metal content is due to the ability of th in keeping down costs, so that a pound of copper is no cheaply from the lean ore as it was from the richest ore. T also saving over 9,000,000 lb. of copper annually by retreating or tailings made many years ago at its mills and dumped in [illegible] plant which gives a new youth to [illegible] carrying flake copper.

the Centennial and Wolverine companies exchanged rights
t 1 acre of ground each.

70 acres, Sec. 12, T. 56 N., R. 33 W., and a triangular patch
es, at the S. E. corner of the main tract, bought to secure
the Kearsarge lode, and including about 10 acres, bought
l Colony, for the surface plant. The first work was done,
hoolcraft Mining Co., which failed to open a paying mine,
nized, 1876, as the Centennial Mining Co., and again re-
with present title. Expenditures of upwards of $1,500,000
he old company in unsuccessful efforts to open a payable
thern extension of Calumet conglomerate. Seven shafts,
depth, were sunk on this bed, No. 3, the deepest, being
. The Centennial lands are in the great mining area of
available for building purposes. Two additions have been
rights sold at good prices, mineral rights being reserved
in did a little work, 1897, on the old conglomerate
to the Osceola bed, deepening 2 shallow shafts

2,339' deep; "E" shaft, 1,300' south of "B" and 3,900' nort
boundary, is 2,388' deep. The third level of "E" shaft has b
toward the Globe boundary. "F" shaft, started 1,300' sou
abandoned on account of treacherous overburden, but the
located, 1907, by diamond drill at a new site, 1,800' south o
north of the Globe boundary.

New work in 1918 was 3,348' of drifting, 35' of cross-c
raising and 95' of shaft sinking.

Equipment: the shafts are practically duplicates in all e
lars, having 40x50' shaft rock houses, with 90-ton ore bins.
each rock house includes a steam hammer for heavy copper,
rock crusher, taking everything hoisted from the mine dir
The shafts have duplicate first-motion hoists with 24x60"
and double conical drums of 14' diameter, with capacity for
each, hoisting 6-ton skips. The boiler houses have Bradley
with coal trestles connecting. Water for boilers is furnishe
000-gal. dam.

Extensive use is made of electric power on surface,
some underground electric pumps. The electric plant at

57,364 was expended diamond-drilling the lands under option from
Mineral Land Co., but no important discoveries were made.
any's output was sold in 1917 for the highest average price ever
y copper company, namely, 28.735c per lb. In 1918, despite the
h copper was sold at prices established by the Government, the

high price received of 24.757 cents was due to fact that company well forward. Copper Range is an assured success, and worthy that has been given it.

Copper Range Consolidated Co.

Company dissolved October 18, 1915, shareholders receiving ber of Copper Range Co. stock in exchange.

Copper Range Railroad Co.

Office: 82 Devonshire St., Boston, Mass. **Operating off** Mich.

Officers: Wm. A. Paine, pres.; F. W. Paine, v. p. and s John H. Rice, Frederick W. Denton, Thos. S. Dee, Wm. D. Cal Stanton, directors.

Inc. 1899, in Michigan. Cap., $5,000,000; shares $10 $4,244,300. Debentures outstanding, $2,280,000 first-mortgage 5% pany is authorized to issue bonds to extent of $20,000 per mile of line, and $15,000 per mile of completed branch lines and side- trolled by Copper Range Company. Balance sheet of Decembe cost of road at $6,249,264, with equipment inventoried at $954,6 pares with 1917 cost of road, $6,235,621; equipment, $931,628. $930,606 gross and $324,131 net in 1916; $960,275 gross and $228, in 1918, road was taken over by United States Railroad Admi amount due from Government as standard return would be $22 certain adjustments of contracts made in 1917. The gross revenu Government operation was $1,171,804; the net, $100,880. Credit was $799,096. About 75% of the gross income is derived from t ore, mineral and freight.

The railroad has upwards of 100 miles of track, the 65-mil ning from Calumet to McKeever, and connecting with the Ka at Calumet; the Duluth, South Shore & Atlantic, Hancock Mineral Range railways at Hancock and Houghton, and the Chi & St. Paul railway at McKeever. The company also has track miles of the Chicago, Milwaukee & St. Paul railway, between Ontonagon, with additional trackage rights of 73 miles over the which fast freights are operated between Calumet and Channin rights have been given the Chicago, Milwaukee & St. Paul Range between McKeever and Houghton, and a direct passeng exceptionally good equipment, is operated jointly by the Chicag St. Paul and Copper Range lines, between Chicago and Hough nect the main lines with all of the principal mines along the righ

The company owns a half-interest in a bridge crossing tween Houghton and Hancock; also extensive water frontage in the western part of Houghton, with general office building, sh warehouses and wharves for merchandise and coal. The coal w with modern unloading machinery, and has deep water alongs accommodating the largest freighters plying the Great Lake Range railway is a model small road.

Baltic Mine.

Property: 800 acres, near the eastern limit of the Michi about 75 acres being on the eastern sandstone and non-miner comprise all of Sec. 21 except the S. E. ¼, and W. ½ of Sec. 20, T Lands are bounded on the north by the Wheal Kate and Sec. 16 on the east by St. Mary's Mineral Land Co.; on the south by lands of Hussey, Howe & Co., and the Trimountain mine; on Trimountain. Exchanged 39 acres, 1905, with the Atlantic min able the Baltic to sink No. 5 shaft to much greater depth tha sible. To the southward the Trimountain and Champion mine the same lied, which has a strike of N. 63° E., from Baltic sha the northward is the Superior mine, on the same lied. The dip

°, being the sharpest of any developed cupriferous bed in the Lake

ic amygdaloidal bed is exceptionally strong, ranging 15 to 60′ in well mineralized that at most points it can be more or less thorough- m wall to wall. The great width of the stopes has brought about valling system, by which waste rock is built into dry walls along the aving timbering, while giving stronger walls than any timber could aving the cost of hoisting lean rock. The walling system of the oven a success under actual test, and is now in general use in the the credit being due Mr. Denton. A little melaconite is found in es crossing the lode, these being too small to follow, but the black ed in the stopes is saved in milling, with 35 to 40% copper as dressed, eadily with the native copper mineral. The native copper of the nical, and it is probable that some copper arsenides are mined and rrow arsenical fissure veins occur occasionally in the district south ke. While the finished copper is arsenical, it makes wire of great th.

ment: in 1918, amounted to 13,693′ of new openings and 178′ ing, which compares with 14,121′ of new openings and 398′ of shaft 17.

re numbered from South to North.

he discovery shaft, located between Nos. 2 and 3, was sunk at a and was abandoned at depth of 219′.

ie southernmost shaft, 2,839′ deep, began production 1906 and fur- of the 1918 production. The surface plant at No. 2 includes a boiler wo 250 h. p. boilers, and an engine house with an air-compressor re- of free air per minute to a pressure of 70 lb. per square inch, and double-conical drum. The shaft rock house has a crusher operated nd the shaft has concrete stringers.

aft, 1,170′ northeast of No. 2 and 3,498′ deep, has a steel shaft rock circular type, with 1,200-ton bins, equipment including a 16x18″ 18x24″ crushers and a large crusher operated electrically.

aft, 900′ northeast of No. 3 and 2,982′ deep, has a frame shaft rock ed with steel, 36x71′, with 17x31′ wing, 88′ high, with 1,400-ton two 18x24″ crushers.

aft, the northernmost, 885′ N. E. of No. 4 and 1,624′ deep, has a duplicating that at No. 4. Stoping was done on the 9th and 14th ive, and drifts run to the Atlantic boundary. The ground was con- turbed in the upper levels, but is growing more settled at the bottom, owings are reported on the West lode. Hoist is a duplex Nordberg, 00′ depth. Shaft has been abandoned and ground tributary thereto ore hoisted through the No. 4 shaft.

ent: hand power cranes for handling mass copper have been in- shafts, and the mine has electric pumps. In 1915 installation of enerator for underground haulage and construction of transformer w transmission line from stamp-mill was completed.

pressor house, between shafts Nos. 3 and 4, is 36x58′ in size, with ndations, stone walls and steel roof, housing a compressor with educe 4,000′ cu. ft. of free air per minute to a pressure of 70 lbs. djoining is a boiler house of similar material, 49x76′, with wing g four 250-h. p. boilers and a 140′ self-supported steel smokestack. plant supplies steam for shafts 3 and 4. A new boiler plant was n 1916. Adjoining the boiler house is a 360′ coal trestle, of 5,000 tons lerneath being a 5x8′ concrete tunnel, through which coal is hauled , on a down grade, by endless cable. The mine has a complete plant. A considerable town has grown up about the mine with ellings for employees, on lands owned by the company. The prop- d by the Painesdale branch of the Copper Range railroad.

, on Lake Superior, one-half mile west of the Atlantic mill, went ion, 1901, and was enlarged, 1907. The building is of structural

steel, on stone foundation, equipped with 4 Allis simple heads of 5 daily capacity each, and 2 Nordberg compound heads of about capacity each, giving the mill a capacity of about 4,000 tons daily. Wilfley tables, Woodbury jigs and Deister concentrating tables fo finer slimes. The mill has crushing rolls and a Huntington mill and a settling tank for slimes. Mineral carries about 60% fine cop furnished by a 500-h. p. 14x32" Nordberg cross-compound engin h. p. auxiliary engine.

Adjoining the mill is a boiler house with five 250-h. p. boil secured by a set of duplex fans, driven by the mill engine, with a co stack 226' high and 8' in diameter. Behind the boiler house is a 2 storage yard, for the joint use of the Baltic and Atlantic mil brought to the boilers, through tunnels, by gravity. A 1,250-k. plant, installed 1912, at the Baltic mill, supplied power for a number mills at this and other stamp mills of the parent company.

Water for the Baltic and Atlantic mills is furnished by a 51 dam across the mouth of Salmon Trout river. The entire steel st chored to a 2" steel base plate, at the bottom of the concrete, by a of 1½", 2", and 2½" steel rods of 15 to 30' length. Water is ta dam about 20' below the crest by three 38" riveted steel pipes Atlantic and two on the Baltic side. Surmounting this structure the Copper Range railroad.

(d) Deficit.

Champion Copper Co.

Owned jointly by St. Mary's Mineral Land Co. and Copper is described under its own title.

Atlantic Mining Co.

Office: 82 Devonshire St., Boston, Mass. **Mine offi** Houghton county, Mich.

Officers: Wm. A. Paine, pres.; F. W. Paine, sec.-treas. Stanton, Frank P. Son, F. W. Denton and J. H. Blodget, direct

Inc. Dec., 1872, in Michigan; reincorporated, 1901, for increased, 1902, to $2,500,000, shares $25 par; fully issued; paid assessment was $2, October 11, 1909; the first in 30 years. Has p $990,000, last in 1905. Owns $40,000 stock in Michigan Smelt Safe Deposit & Trust Co., registrar; American Loan & Trust Co fer agent. Annual meeting, second Tuesday in March. The controlled by Copper Range Consolidated Co., through ownership of the capital stock. Balance sheet of December 31, 1918, sho $337,577, compared with $286,887 in 1917.

Property: 8,217 acres, including 1,351 acres of mineral la of timber lands, and 2,106 acres miscellaneous lands, latter in site, and a valuable frontage on Portage Lake. Mineral lands ar except S. E. ¼ of S. E. ¼; N. ½ of Sec. 9; N. W. ¼ of Sec all in T. 54 N. R. 34 W. Principal holdings are the old Atlantic including the mines known before 1872 as the South Pewabic an about 2 miles south of Portage Lake and 4 miles southwest of the Sec. 16 tract of 640 acres. The mines, idle since 1911, are Vol. X of the Copper Handbook.

DOUGLAS COPPER CO.

Office: 705 Sears Bldg., Boston, Mass. Property north west of Ahmeek holdings in Allouez township, Keweenaw coun

Officers: Charles L. Paine, pres.; George P. Gardner, v Sheldon C. C. Douglass, W. A. S. Holmes and A. S. Knight, Dublin, secretary.

in Michigan. **Cap.**, $2,500,000; shares $25 par; **assessable**; ven for land, making $10 paid in value.
440 acres in a compact tract, being E. ½ of Sec. 30 and W. ½ acing eleven 40-acre tracts formerly owned by the Sheldon Doug- rthey estates, and the St. Mary's Mineral Land Co. This tract rlay, or deep extension of the Kearsarge lode into which the rich vorked in the Ahmeek, pitches. To open this ground a 3,300′ ver- t be sunk.
it planned selling treasury stock to raise necessary funds for rk.

12, 1916, in South Dakota. **Cap.**, $1,000,000; shares $1 par; n organization. The initial offering of stock May, 1917, was at ne, 1917, to $1 a share.
approximately 360 acres in T. 57 and 58, N. R. 31 W., being formerly owned by the Federal Copper Co., south of the Phoenix weenaw Copper Co. Lands cover a 1½ mile stretch across the pper lode and near the Phoenix, St. Clair and Eagle River prop- weenaw Copper Co., with Ojibway lands on west and east. Lands Kearsarge amygdaloid which dips 30° N. W., giving 292 acres is lode, whose copper content in this part of the range is as yet

rted in 1917, that company, acting under name of Bear Lake Ex- ured option on 2,000 acres, S. W. of Calumet, in T. 55, 56 R. 34, Longyear-Michigan options in T. 56 R. 34 aggregating 1,240 acres, ve been absorbed by Federal. The Bear Lake Pool options on . 56 R. 34, were later reported acquired by the Federal.
: includes compressor with 2 drills, and 1,000′ hoist. Dur- ix diamond-drill holes were opened and four said to show com- haft down about 40′.

MINING CO. **MICHIGAN**
Congress St., Boston, Mass. **Mine office**: Demmon, Hough- ch. **Mill office**: Point Mills, Houghton county, Mich.
. M. Edwards, pres.-gen. mgr.; Henry D. Forbes, v. p.; treas., with C. F. Moore, C. A. Hight, Sidney J. Jennings and ard, directors. Albert L. Wyman, sec. Enoch Henderson, supt.
3, 1857, in Michigan; re-incorporated in 1887 for 30 years, ion renewed in 1917. **Cap.**, $500,000; increased, 1899, to gain increased, Nov., 1908, to $5,000,000; shares $25 par; issued, $17.20. Last assessment of $1 per share levied on June 3, 1919. l $1,919,519.
ock has been set aside for the purpose of acquiring the total 0 shares of the Rhode Island Copper Co. Has paid dividends ederal Trust Co., Boston, registrar; American Trust Co., Boston, Annual meeting, third Wednesday in April. Listed on Boston

controlled by U. S. Smelting Co., through a majority of directors. et of December 31, 1918, showed a deficit of $109,123, as com- ns of $286,198 in 1917. The revenue in 1918 totaled $697,672 and was $1,048,303. Cash on hand early in 1920 was about $178,000. ,280 acres of mineral property, and a 217-acre mill-site, with age on Portage lake. The old Franklin mine (described Vol. s, was sold, July, 1908, to the Quincy Mining Co., for $170,000, 5 N., R. 33 W., 640 acres, lying directly north of the Franklin

Junior and west of the Rhode Island, was bought from St. Mary's Co., 1909, for 33,333 shares.

Property carries 2 miles of the strike of the Pewabic amygda cupriferous beds of the Keweenawan series. In addition to t there are 3 other tracts of mineral lands, of 160, 480 and 640 ac pany also controls, and is absorbing, the Rhode Island Copper 800 acres immediately north of the Franklin Junior mine.

Development: early work was on the Franklin Junior pr two parallel lodes, the Allouez conglomerate and the Pewabic an apart, have been worked. The amygdaloid worked prior to 1902, lb. copper per ton, and was abandoned in favor of the conglom latter, decreasing in width and value on the 2,000' to 2,400' levels, and work resumed on the Pewabic in the Franklin, Jr., shaft about 20' in the footwall. The copper content being extremely lo stopped, and only exploratory work done. In 1913, a crosscut wa ward from the shaft at 3,200' level to explore the entire eastern pa pany's holdings. At 550' from the amygdaloid this crosscut entere able ore in the Allouez conglomerate and drifts were started to pr and copper content of the orebody. Work continued until August, resumed in July, 1915, the orebody being developed for 1,100' on It is opened for stoping on each level from the 27th down to the 3 of 900' on each level, or about 9,000' of drifting, with a continuo as an ore-chute from the 2,700' to the 3,700' level, where ore is gath motor trains and carried to the shaft. Besides this main raise th for men and supplies, the new raises in 1918, aggregating 121'. down to the 39th level, and shows considerable improvement bel 2,000'. Shaft is equipped with a steel circular ore-house (Edward merly used at No. 2 conglomerate shaft. On the 28th level a cro 1915 connects the lode with the shaft, and a similar crosscut has the 37th level. The conglomerate shaft, bottomed at 2,400' on the i been connected.

An extension of No. 27 and 22 levels S. from No. 1 shaft to No. 2 shaft was completed in 1916. The conglomerate was much ri than the average. The ground above this up to No. 17 level was u 2 shaft, which had caved, was re-opened and repaired from the 4 bottom of the 17th level, but work here was stopped in 1918 for

Mechanical haulage installed on No. 29, 30 and 31 levels g costs.

A long crosscut on No. 32 level driven through the Kearsarge on the footwall side of the Wolverine sandstone, 4,542' from the Pe loid.

This crosscut passed through a thickness of 25' of Calumet c 2,150', the 10' Osceola amygdaloid at 2,820' and the Kearsarge co wide, at 3,380' from the shaft, but all three lodes were devoid Twenty-two other amygdaloids were also cut, 9 of them copp only 2 rich enough to warrant exploratory drifts and raises; th were barren. Ore of sufficiently good grade to warrant further found on the footwall side of the Kearsarge amygdaloid.

During 1917, the 30th level was carried forward 540', to a total of No. 1 shaft (on the Pewabic), and the best copper seen in the a opened. This level was driven 115' farther in 1918, all with same Management believes this same condition will be found in the exte drifts on lower levels.

Production in 1917 came almost entirely from the Allouez Co No. 1 shaft; in 1918, 24.6% of the output came from the Pewabic from the Allouez lode. Total 1918 development amounted to 2 compared with 1,916' in 1917.

Ore extraction was stopped May, 1919, company announcing ment work only would be carried on until conditions improved an be sold at a profit.

cludes a hoist with a 10-ton skip at No. 1 shaft, and has sion cylinders, storing up energy, otherwise wasted, in compressed air being mixed with steam, in the cylinders, as a

ched by the Mineral Range railroad. Equipment includes 5 ay heads, with 20x24" cylinders, each capable of crushing nerate or 500 tons of amygdaloid rock daily. Each stamp is n ore bin, and equipped with hydraulic separators, which re- heavy copper. The washing plant includes 8 classifiers, 20 ishing jigs, 32 Wilfley and 10 Overstrom tables. The jigs are tric type, with centershield copper discharges, obviating skim-

tars are on concrete foundations. In 1918, an experimental nsisting of one 8'x48" Hardinge mill, one 75-h. p. motor and re set up.

mill is furnished by a 16x32" engine, and steam is supplied oilers. The boiler house has a self-supporting, brick-lined ameter, 165' high, on a 52' brick foundation. Water is fur- 00-gal. vertical compound pump, having 12x42" high-pressure ssure cylinders, with 47" stroke and plungers of 37½" diam- wn through a 36" pipe line, running 200' under the rock to a uarter-inch screens. The mill has a 5x12" duplex fire pump, electric light. There is a 267' wharf at the mill site, equipped sheds, with 18' of clear water alongside. The mill site has for employees.

1903 the recovery of copper was 15.25 lb. per ton of ore 7 was only 11.48 lbs., falling, 1909, to 9.47 lbs. per ton of ore st production ever secured by the mine was 5,259,140 lb. fine ecent production has been 4,206,085 lb. in 1905; 4,228,650 in n 1907; 3,703,421 lb. in 1908; 1,615,556 lb. in 1909; 966,353 lb. in 1911; 1,710,651 lb. in 1912; 1,021,440 lb. in 1913; 93,283 lb. . in 1916; 3,155,574 lb. in 1917. 1918 production was 296,182 3 being discarded and balance, 273,964, stamped, yielding copper, equal to 10.3 lb. per ton.

xcellent and mine on a basis to produce profitably in normal e employed in 1919, mostly sinking the shaft.

NG CO. **MICHIGAN**

burton Place, Boston, Mass. **Operating office:** Calumet,

olphe L. Agassiz, v. p.; Geo. P. Flagg, sec.-treas.; Jas. mgr., and Walter Hunnewell, directors.

906, in Maine. **Cap., $300,000; $3 par, fully paid.** Is con- nership of 50,100 shares, by the Calumet & Hecla Mining Co. s reported that the Seneca Copper Corporation had purchased g $25,000 cash, with additional payments to extend over a

acres, the N. W. ¼ of Sec. 26, N. E. ¼ of Sec. 27, and S. E. ¼ of Sec. 22, except the N. W. ¼ of the N. W. W. Property lies S. and E. of the Seneca and N. and E. of ng the Kearsarge amygdaloidal bed under about 175 acres, to f about 2,700'. Extensive drill borings were made before the The Kearsarge bed averages about 12' in width, with strike verage dip of 33 to 36° with the horizon, and its copper con- ow.

hy two 3-compartment shafts, exact duplicates, sunk at he Kearsarge bed. Levels are opened at 100' intervals.

ut 1,500' from the Seneca boundary, is 1,900' deep, having a ximum width. Drifting has been done on the alternate odd- m the 1st to 9th, inclusive.

75' S. W. of No. 1, and 1,800' N. of Mohawk No. 1, is 1,520'

deep, and drifting has been done on the 2nd, 3rd, 5th and 7th showing being on the 5th.

Property is served by a 2¼-mile spur of the Mineral Range north from the Mohawk mine.

Production: begun July, 1910, was 28,552 tons of ore yi lb. fine copper, and in 1911, was 1,347 tons ore, yielding 14,275 lb. about 9.3 lb. copper per ton ore milled. The mine was shut do 1911. It is obvious that, owing to its comparatively small size and the Gratiot cannot work the Kearsarge bed profitably at the av copper, except on a very large scale, and can be operated much m ously in connection with the Seneca than alone.

GLOBE MINING CO.

Office: 15 William St., New York.

Officers: L. P. Yandall, pres., with R. D. Rickard, J. R. rit Smith of New York and W. H. Leggett, of Detroit, directors. sec.-treas.

Inc. May, 1911, in Michigan. **Cap.,** $78,250; $25 par; f issued.

Property: 3,200 acres, Secs. 1, 2, 3, 4 and 5, T. 53 N., R. 35 entirely across the Keweenawan trap formation, from the eastern sandstone, lies next south of the Champion, and immediately nor lenge, carrying about 6,000' of the strike of the Baltic and all paral was developed by the Copper Range Consolidated Co., under opt was relinquished, February 1, 1909, after expenditure of upwards o

Development: diamond-drill borings, to locate the Bal some cores with excellent values, but disclosed a heavy overburd boulders, rendering it necessary to reach the solid rock by a vertic was begun early 1905, but the first shaft was abandoned, owing to was replaced by a new vertical shaft, about 700' south of the Cham The shaft is telescopic, inside measurements of timbers at th 13' 3"x23' 3", with a second section below of 9x19' 6", and a t smaller size.

The shaft is 1,040' deep, with first level 356' below surface, cut thereafter at 100 intervals. The Baltic amygdaloidal bed was diamond-drill boring, and about 900' of drifting on the seventh about 1,000' from surface, and showed a little copper, in patches, bu was unpayable. Work was suspended January 31, 1909, and pre idle since. Notwithstanding the unfavorable results secured by so far, the property is by no means devoid of promise.

HANCOCK CONSOLIDATED MINING CO.

Hancock, Mich.

(a) Includes smelting, metals marketing, etc.

consists 725 acres of mineral territory, immediately west
ie old Quincy mine, in T. 55 N., R. 34 W., including the original
136 acres, set aside, 1859, by the Quincy Mining Co., which
ineral rights to the Pewabic bed. The Pewabic bed, on lands
original Hancock tract of 136 acres, is owned by the Hancock
Lands carry the Pewabic, Quincy, West and Hancock of Sumner
beds.

e best part of the Quincy mine is tributary to No. 7 shaft, which
north of the Hancock boundary.

916, approximately 75 acres were sold to the Quincy Mining Co.
In part payment thereof the Hancock was granted the right to
o. 7 shaft and one stamp of the Quincy mill. Operations were
ler this agreement during 1916, 1917, and part of 1918, but the
l from the shaft did not warrant the expense of its upkeep. In
mpany sold 125 acres, which includes the shaft, to the Quincy
r $235,000.

ancock mine, opened 1859, was closed June 1, 1885, on account of
of the metal, after producing 5,709,384 lb. fine copper. The Han-
er amygdaloidal bed averaged about 12′ in width below the fifth
h of 1,052′, where the mine was bottomed.

rty carries the upper half of the Michigan series of cupriferous
glomerates, and has 4 known copper-bearing beds, the Pewabic
important. The property also carries the underlay, but not the
3 copper-bearing beds of the Quincy, these being the Quincy to
apparently of little value, followed by the Pewabic, which is the
e Quincy and the so-called West lode of the Quincy. The known
beds outcropping on the Hancock property are the Hancock or
in the old Hancock mine, and now known as No. 1 lode, lying
st of the Pewabic; the old West bed, now known as No. 2 lode,
′ west of No. 1, and the New West bed, now known as No. 3 lode,
west of No. 2. Company also owns lots 6 and 7, Sec. 28, for a

INDIANA MINING CO.

Office: 60 Congress St., Boston, Mass. **Mine office:** Dee ton, Mich.

Officers: R. M. Edwards, pres. and gen. mgr.; Sidney J. Henry Tolman, treas., with C. F. Moore and C. A. Hight, dire Wyman, sec.; Thomas Bennett, supt.

Inc. Aug. 11, 1909, in Michigan. **Cap.,** $2,500,000; $25 pa shares; paid in $12.50. Last assessment March 1, 1917. Listed Exchange. State Street Trust Co., Boston, transfer office; Fe Boston, registrar. Annual meeting, third Thursday in April. 60,000 shares to owners of land for property and offered 36,000 1909, for public subscription.

Receipts, 1918, were $2,779, from sale of equipment and in tures were $19,400; deficit, $12,209. Receipts, 1917, were $80,263, was from assessment No. 4. Expenditures, including 1916 d totaled $75,852, leaving balance of $4,411.

Property: 1,200 acres bought 1909 from the Indiana C tract lying N. E. of the Lake and N. of the North Lake, in Sec T. 50 N., R. 37 W. The property was worked on a small scale burning of the mill, 1864, but the old openings are inaccessible been done thereon by the present company. The lands are heav can supply all mining timber for a considerable time. Ample w from the Fire Steel river. Transportation is furnished by a spu Range railway, and the Mineral Range line is within a short di

Geology: the lands are traversed by the Evergreen belt ing amygdaloidal beds and by a number of unidentified cuprif between the Evergreen belt and the eastern sandstone. The of the tract is in the hypothetical horizon of the Lake amygda Indiana is covered with a heavy overburden of sand, hamperin tions. The ground has been tested by extensive diamond-drill

No. 2 drill hole disclosed phenomenally rich copper rock mediately under a 400' conglomerate. The nature of this ore is pute, it having been called sandstone, conglomerate and fel little question that it is an altered felsite; the rock consists es and light-colored mica, with secondary infiltrations of calcite a grains of disseminated native copper. The even size of the q their interlocking texture, indicates an igneous origin. There a the 40' of rock felsite rock and [illegible] ores of about 25' wid [illegible] the second zone of 2 [illegible] both cut fels [illegible] [illegible] [illegible]

1,150' level could not locate No. 2 hole, but found No. 9, 100' from
l position. The conclusion was that the deposit cut by No. 2 hole
great size or had no regular trend.
No. 2 shaft, an incline, was started in the S. W. quarter of Sec. 21
the South Lake amygdaloid lodes. In 1917, this shaft was down 310',
exploratory work had been done on the 300' level. This work was
e in the horizon of the main system of Ontonagon county lodes, but
merate was encountered the position of the crosscut had not been
Some copper was found, worthy of exploration, but not of com-
e when opened. Due to rising costs, work was suspended in 1917.

es and an 80-acre millsite. Mineral lands include
Portage and Huron mines, the Dodge and Frue pros-
Montezuma tract of about 200 acres purchased,

1913, for $100,000, and sundry undeveloped tracts. The Hussey-
280 acres, lying N. E. of the Superior, supposed to carry the e
Baltic bed, was bought, 1907, for $220,000. Lands include all of S
and parts of Secs. 3, 9, 10 and 15,, T. 54 N., R. 34 W.; also 160
T. 54 N., R. 33 W., 40 acres in Sec. 31, T. 55 N., R. 33 W., a
Sec. 36, T. 55 N., R. 34 W., giving a compact tract carrying abo
the strike of the system of copper-bearing bed.

Geology: the Isle Royale has 3 parallel amygdaloidal be
of N. 32° E. and average dip of 56°, of which 2, the Isle Roya
beds, have been extensively opened, the latter lying approximately
former. The shafts are on the Isle Royale, but the Portage he
many levels by crosscuts. East of the amygdaloids is the "Mal
near the Eastern sandstone, 4 to 7' wide and rich in mass and ba
deficient in stamp rock. It was opened to a depth of about 250' by
tin Mabbs, about 1875, and has been tested to some extent by the
There also are unidentified and unexplored copper-bearing am
W. of the Portage bed and occasional narrow fissure veins carryin
per ores.

The 3 old mines included in the present Isle Royale tract pro
lb. fine copper, under primitive conditions, at a net aggregate le
500,000. The old Isle Royale and Grand Portage mines were ope
the Huron in 1855. The history of these 3 mines is given in detail

Development: considerable diamond-drilling has been
ground openings were 19,106' in 1912; 13,626' in 1913; 9,694' in
1915; 17,455' in 1916; 19,271' in 1917 and 12,409' in 1918.

No. 1 shaft, near the northern boundary, was completely
December, 1903, and was abandoned. About 2 miles of drifts h
on this shaft. In May, 1914, work was started to retimber the sh
to sinking and exploring the Portage lode. In February, 1916,
been finished down to the 16th level and hoisting was being done
levels. No sinking was done in 1917 or 1918, the company confi
cipally to locating water pockets and draining the mine. The
that about 45% of the ground would be available for stoping.

No. 2 shaft, with 3 compartments, 2,280' S. W. of No. 1, is 3,
below the 33rd level. Drifting in 1917-1918 was in the West lo
that 55-60% of the ground may be available for stoping.

No. 2 shaft has a combination shaft ore-house, with Portage
The engine-house is equipped with a hoist capable of raising 6-t
depth of 6,000'.

No. 3 is merely a site for a shaft, to reopen the old Huron s

The new shafts, No. 4, 5, 6 and 7, are all on the Isle Ro
southern end of the property, and have several miles of workin
siderable heavy copper. These shafts are unconnected with the
in shafts No. 1 and 2, at the northern end of the property. No
connected by drifts on the upper levels.

No. 4 shaft, about 3,100' S. of No. 2, is 70' below the 19
deep, developing stamp rock of average grade. Equipment in
cylinder hoist, good for 1 mile depth, a 35-drill air-compressor,
No. 1 shaft, and a cylindrical steel shaft rock house having cyl
42" in diameter and 32' high. In 1917, electric pumps were mount
7 and 8, and in 1918, storage-battery locomotives were installed
and 14 levels.

All north drifts from the 1st to the 11th level, inclusive, o
workings. The Huron mine has been completely drained

s and was bottomed in the vein, 38' below the 19th level, or 2,304'
r, 1918. The levels are opened at 100' and 120' intervals. On
is a circular steel shaft ore-house, similar to that at No. 4. The
includes a brick engine house, with hoist and 45-drill air-com-
l boiler house, electric pumps on the 1st, 3rd and 9th levels and
locomotives on levels No. 10, 12, 13 and 14.
ft, 2,400' S. of No. 6, was started in 1913, but work was stopped
the strike and not resumed until late in 1915. It is bottomed in
below the 9th level, and is 1,201' deep. The north drifts down to
ave been holed to corresponding drifts from No. 6 shaft. The
ave been driven 1,200', or midway to the point selected for No. 8

started September, 1908, on the Hussey-Howe tract, is 972' deep,
plat cut at depth of 350'. A 205' crosscut, at depth of 474', dis-
e bed in which the shaft is sunk. On the 3rd level, at depth of
as run S. to within 50' of the Houghton Copper Co. boundary, dis-
amount of amygdaloidal rock, not carrying copper in promising
A" shaft is supposed to be sunk on the Baltic bed, but there is very
s to whether the shaft really is opened on the northern extension
and failure to locate the twin Baltic bed, within a distance of 205'
t on the 474' level, accentuates this doubt.
12 shaft, begun October, 1905, and discontinued January, 1908, at
also was sunk in search of the Baltic bed and drifts and crosscuts
in 4 directions, without securing satisfactory results. The shaft
badly disturbed amygdaloidal bed, practically barren of copper.
was started, 1904, on Sec. 10, but was discontinued because of the
rden, and a diamond-drill substituted, the drill-cores showing an
bed of which about 5' in width carried copper in fine grains.
equipment: the main plant at No. 2 shaft, includes No. 2 en-
compressor house having a 35-drill 2-stage air-compressor; a 44x72'
with a 16x72' coal-storage addition and a 3,000-ton coal trestle,
50 h. p. 84" horizontal boilers, taking water from a dam 300x500x6'.
shop is of steel, on stone foundations. The company has a private
tem. There are about 150 dwellings on the company's lands.
shaft a new collar was put in and a change-house erected in 1917.
ange-house was erected and 2 boilers installed, making six. At No.
ame ore-house, equipped with 24x48" crusher and operated by a
r, was put into commission.
Royale railway, owned by the company, connects the mine and
at 5 miles of main line, having easy grades. Equipment includes
and 60-ton locomotives, and forty 40-ton steel ore cars, equipped

ite, at the mouth of Pilgrim river, has nearly 1 mile of frontage
e. The old mill was burned, December 24, 1914. A new 2,000-ton
mp heads was in operation, August, 1915. The mill cost $220,000
300-ton orebins and 3 stamps, having circular mortars and 5⅝"
The stamps rest on concrete bases, 20' thick, and are fitted with
d steam cylinders. Each stamp has a maximum capacity of
daily. The dressing floor has 78 rough jigs, 6 finishing jigs and
s to treat slime. There are rolls with fixed bearings to regrind
om the mortars.

1910.....	520,860	10,433,060	14.5	1.42	7,567,399

Production for 1919 was 13,007,647 lb.

(a) Includes mining, transportation, stamping and taxes.

(b) Includes nearly 2c per lb. extraordinary expense of re mill, re-opening No. 1 shaft, and No 7 shaft expense.

The Isle Royale is a low-grade mine, but shows itself capa substantial profits. Profitable operations for many years to come anticipated. Company started a campaign in 1917 to develop mo to equip the plant with modern facilities; this has cost in the ne $600,000, but company is now in position to produce 20,000,000 lb. nually and at a cost, low enough, in normal times, to make a goo small capitalization.

w Central Railroad Co. is a reconstruction of the old Lac La ailway. The entire capital stock issue, $400,000, reduced from s owned by the Keweenaw Copper Co. The railway company , not issued, and ended 1917 with accounts and bills payable of ainly to the Keweenaw Copper Co. The railway, with about line, spurs and branches, cost $692,346, and runs from Centen- uburb of Calumet, where connection is had with the Copper e Phoenix shaft. The road consisted of about 40 miles of , company sold the equipment and rails of the Mandan—Lac ecause this equipment was not suited for the heavy duty that whenever commercial rock was mined in considerable quan- ds of the sale, $225,000, was invested in Liberty bonds.

,195 acres, mainly mineral lands, heavily timbered, in 3 ying the strike of the Keweenawan mineral belt for about 14 actically all of the amygdaloidal and conglomerate cupriferous ct, as well as numerous copper-bearing cross fissures. Lands f Rs. 27, 28 and 29 W., and include the tracts formerly owned pper Harbor, Empire, Girard, Hanover, Keweenaw, Mandan, ania & Boston, Resolute and Vulcan companies, in addition to hrough stock ownership in subsidiary corporations.

s lands carry nearly 2 miles of water frontage on either side of r, including Fish cove, 1 mile east of the river's mouth, which fair harbor at comparatively small expense. The lands include irse of the river, on both banks, and with other holdings, give entire water-frontage of Mosquito lake, making possible the great water power, with a hydro-electric installation at the r. There is a mill site on Bete Gris bay, at the mouth of the ving about 5 miles of water frontage.

also owns the Lac La Belle, or Mendota, ship canal, 1 mile ac La Belle with Lake Superior. This canal has a 14' channel, endid haven that should be made a harbor of refuge.

mine, opened about 1860, had 3 old shafts, about 100' apart, Medora amygdaloidal bed, traversing lands of the company lies immediately under the Allouez conglomerate, and outcrops eet north of the Montreal river bed. The Medora, about 12' in a soft chocolate-colored amygdaloid, carrying considerable id quartz, in connection with fine stamp copper and occasional " paystreak along the footwall carrying some barrel work, the ng bunchy.

ract also carries other copper-bearing beds, among these being e vein, outcropping about 2 25' E. of No. 1 shaft, but making depth. About 100' S. of the Medora amygdaloid is another r in small quantities, and to the northward are the Wolverine out 15' width, and the Allouez conglomerate, lying about 280' bed, at surface.

nine was reopened on a considerable scale to a depth of 1,700' ', with about 2 miles of workings. All work in the mine was , 1909. The Medora workings are fully described in Vol. VIII. nine also carries the Medora bed, about 3 miles E. of No. 1 renching and test pitting, done 1906-07, on the Empire tract, bout 15' width, carrying some copper at surface. The Empire ontreal river amygdaloid, on which the Manitou did consid-

Mandan-Resolute tract of 2,440 acres carries the Kearsarge ally its entire territory. The shaft on the Kearsarge bed, about a mile S. of the old Medora workings, and was 1,355' ned, 1911.

owns a diamond-drill outfit and has made extensive borings, ection of the Medora, Mandan, Resolute and Empire tracts. 914, were confined to exploratory work in the horizon of the

Ashbed lode, and the first drill-hole located a copper deposit promise, early in 1913, at a depth of about 500'. Mine has been 28, 1914.

Development: in 1917, operations were conducted on the only. Fifty-three diamond-drill holes, aggregating 3,063', were exploratory purposes and the shaft sunk to depth of 1,616'. Th 10th levels showed fair copper. In 1917, 41,148 tons was stamped lb. refined copper per ton.

Due to scarcity of labor and increasing costs, operations were December 1, 1917. Company was reported considering the sale of or cutting the lumber itself. In either case, there would be a lar

p., $2,500,000; shares $25 par; $5 n Stock Exchange. Federal Co., Boston, transfer agent.

Reports for years ended April 30:

Receipts—	1919	1918
Copper sold	$168,861	$373,81
Misc.	9,457	16,35
Totals	$178,318	$390,1
Expenditures—		
Mine and prod. exp.	$265,693	$391,6
Equip. and dev.	619	6,7
Taxes	22,041	21,8
Dwelling acct.	652	8
Totals	$289,006	$420,9
Prev. Surplus	$331,525	$362,3

Cash on hand at end of 1919 was about $220,000.

Property: 2,010 acres, the S. E. ¼ of Sec. 29, S. E. ¼ W. ½ of Sec. 32, and E. ½ of Sec. 31, T. 51 N., R. 37 W., incl of mineral land, 680 acres of timber lands and 180 acres of cuto

The company's first work was done on the Knowlton and B cipally on the Knowlton amygdaloid, on which there were old sh 300', latter having been deepened to 600' by the present compan siderable copper was taken from the Knowlton bed, exploration ferred to virgin territory, at the southern end of the property, demonstrated by the outcome. There was also a 90' shaft on th 1,000' E. of the Knowlton, sunk in 1865, whose cost was paid fo per extracted. Considerable diamond-drilling has also been do ings of the Adventure, on adjoining lands, indicate that the L several other promising amygdaloid beds, in the same genera Lake bed now being opened.

Geology: the strike of the Lake amygdaloid in the inn of the shaft is about N. 6° E., with dip of about 35° W. It wa that the Lake bed was a fissure vein, but this was disproven of parallel strata, including a conglomerate lying about 400' Lake, a typical Lake Superior amygdaloidal trap flow, is exce a copper-bearing bed, ranging from 50 to 100'. The hanging fairly well defined, but the footwall is extremely irregular, marked line of separation between copper rock and trap. The to carry 3 well-defined shoots of enriched copper ground, rakin depth. An unsuccessful attempt was made to locate the north the Lake bed by diamond-drilling from surface and 3 holes wer now known that the lode turns W. and passes into South Lake diamond-drill holes, aggregating 1,628', have been bored. T bottom workings of the mine show a deflection to the westwa at the extreme north, of N. 15° W., which corroborates the L. L. Hubbard, that the Lake bed is the third and the East lod from the top in the series of 4 amygdaloid beds cut by the South Lake. There are two other lodes only 50' W. of the mercial ore. For order and description of the Knowlton, Butle of the Evergreen belt, see Mass Copper Co., in this book and

The mine is operated by a 1,500' incline shaft, ore being levels from the 2nd to the 11th. The lode is bunchy with ver some mass copper, but the general average is about 2%, equiv refined copper.

The Knowlton shaft was unwatered August, 1916, to m Knowlton lode, which, though narrow, shows good copper valu The Butler and Evergreen lodes are reached by a 900' cross-cu

eing cut late in 1918. Four test runs of ore averaged 26 lb. per
nt expects to resume operations here when mine is reopened.
nt: the mine has about 3,500′ of workings, a very large pro-
rifts being in neither the footwall nor the hanging-wall, giving a
a of the actual values in the bed. New work during fiscal year
1919, totaled 1,204′, compared with 2,813′ for 1918.
: includes a 32x72″ duplex-cylinder double-conical-drum hoist,
g 10-ton loads from depth of a mile; old 6-drill and 15-drill air-
ken from the equipment of the old Belt mine, and a new 50-drill
mpound air compressor, in a steel compressor house. Mine struc-
machine-shop, smithy, office, boarding house, and a change-house
ft. There are a number of dwellings and many old houses at the
The property is reached by the Copper Range railway, which
he old Belt location, with a 1½ mile spur to the shaft, and a sid-
lt to within 500′ of the shaft by the Mineral Range railway, giv-
e advantage of competitive railway rates.
: fiscal year ending April. Work resumed in May, 1915,
utdown.

about 5,500 acres, lying in a very irregular but fairly com- ecs. 33, 34 and 35, T. 51 N., R. 38 W., in Secs. 4, 5, 6, 7, 8, 9 and . 38 W., and in Sec. 1, T. 50 N., R. 39 W., holding being bounded he Union, Adventure and farm lands, on the E. by the Adventure l on the S. by various lands, and on the W. by the Flint Steel, Ad- t. Mary's Mineral Land Co. Holdings include 4 old mines, the een, Mass and Ogima, also 2 old prospects, the Merrimac and roduction of which, under previous managements, was 11,131,023 These 5 properties are described, in detail, in Vol. II, Copper

tract carries the outcrop of six of the copper bearing amygdaloid ergreen belt, for about 1½ miles. The outcrops vary greatly in age about 10′, showing a sharp bend in the strike, which varies , on the north, to N. 37° E. at the southern boundary. The dip ies from 38° at the Ridge to 47° at the old Mass mine. The cop- s are as follows, from north to south:

on. Carries heavy copper and stamp rock.

Lies 140′ south of the Knowlton, and carries a little heavy copper (milling ore).

Butler. Lies about 75′ south of the Mass bed, is wide and fairly places.

Lies about 200′ south of the North Butler, is 12′ to 35′ wide, stamp copper with occasional heavy copper.

Lies about 100′ south of the Butler. Carries mainly stamp cop- barrel-work, being 5′ to 10′ wide and showing some good ground. een or Ridge. Lies about 250′ south of the Ogima and is one of the property, ranging 4 to 40′ in width and usually being richest Is very bunchy, but shows some excellent stopes, yielding mass np-rock of good grade.

ass. This bed, which is the lowest of the series of the Evergreen the number of cupriferous beds to 7, corresponding with the num- ining Adventure property, lies about 120′ under the Evergreen pened by crosscuts from "A" shaft on the 15th and 18th levels. es about 12′ in width, carrying considerable epidote and is very copper is exceedingly fine, most of it being of a flaky nature, very eye. A mill test of ore from this bed in 1909 gave a recovery f mineral per ton.

Development: the Mass has openings on all its copp
and is hoisted through the nearest shaft, workings on each lev
by crosscuts. The Mass carries the outcrop of the copper-be
Evergreen belt for about 1½ miles. Shafts "A" and "B" are
Butler lode down to and including the 10th level. The mi
notably rich in mass copper and carries silver values, but the
ingly bunchy, ranging from very rich to absolutely barren.
derground, bringing the average content of stamp rock to 16.51
50% of the rock broken is hoisted, and about 25% of the re
copper.

"A" shaft, 1,757' deep, with two compartments, sunk on t
has been abandoned.

"B" shaft, 875' S. W. of "A" has 3 compartments, and is b
Levels are at variable intervals: those at considerable interval
saving in drifting through poor ground and sub-levels can be
"C" shaft, 2,148' S. W. of "B" and 1,554' deep with a pla
level, is the old Ogima shaft, sunk on the Butler bed, but the
opened by a 400' crosscut on the 3rd, 5th and 7th levels. Some
was opened on these and on the 9th levels west on the Butle
pany has concentrated work upon the Butler, though work wa
Ogima and Knowlton beds.

"D" shaft, 150' deep, is idle.

Company will sink a new shaft 1,800' west of "C" as soon a
permit.

Considerable diamond-drilling has been done south from t
into the horizon traversed by the so-called Adventure lodes.
drills on the Adventure property, and also north of the Kn
mond-drilling was done in 1910 in the N. E. ¼ of Sec. 5, to
and conglomerate strata outcropping at that point, which is quit
the hypothetical horizon of the so-called Adventure lodes, wi
eastern sandstone undetermined.

Development during 1918 totaled 2,280', compared with 4,
sults underground were satisfactory in both years, but develop
tion were restricted due to labor shortage. Grade of copper pr
16.51 lb.; 1917, 16.29 lb.; 1918, 17.33 lb. Work done on No.
Evergreen lode to be well mineralized as far west as "C" shaft
Drifting and crosscutting in 1917 revealed good ore from thi
and there seems little doubt that a new mine has been opened
property, and that it can be operated through "C" shaft.

In 1918, the Butler lode produced 127,491 tons, and the
tons, compared with 163,310, and 74,733, respectively, in 1917.

The shaft ore-house at "B" is equipped with a steam ham
crusher, and a 50x24" engine; "C" shaft has a steel ore-hous
equipped with devices permitting automatic handling of ore.

The central power-house has a 24x48" duplex hoist, good
depth. The power plant includes a 50-drill 2-stage cross-co
pressor, a 20 k. w. dynamo for electric light, and three 335
boilers. During 1918 an air-compressor, with capacity of 2,5
per minute, was installed.

In addition to the usual mine buildings, there are about 9
The company also has a town site, Mass City, a village with a
and business houses, which is the terminus of the Mineral Ran
ation on the C., M. & St. P. railway.

The Mass mill is at Keweenaw bay, on an arm of Lak
tion of the Mineral Range and Duluth, South Shore & A
of Houghton
a new mill

ouse has a 16,000,000-gal. Nordberg vertical pump, connected ning 300' under the bed of the bay to the intake.

begun 1899, with an output of 42,800 lb. fine copper, gradu- 2,576,447 lb. in 1903, decreasing thereafter, through loss of d. Recent production has been as follows: 2,007,950 lb. copper lb. in 1906; 2,078,677 lb. in 1907; 1,766,930 lb. in 1908; 1,723,436 1,885 lb. in 1910; 1,326,898 lb. in 1911; 2,045,006 lb. in 1912; 913; 2,955,952 lb. in 1914; 4,638,452 lb. in 1915; 4,752,588 lb. in . in 1917; 3,403,827 lb. in 1918; 1,797,000 lb. in 1919.

d in 1919 totaled 123,780 tons; in 1918, 196,456 tons; in 1917, l in 1916, 287,900 tons.

ed copper in 1918 was 23.82c and price received 24.34c per lb., 9.81c. and 26.23c. in 1917. The 1919 cost was 27.83c..

onsolidated has conquered every sort of misfortune that befalls gh the acquisition of the Evergreen Bluff property, was placed g position than ever before. The experience of 17 years has knowledge of the vagaries and possibilities of the 7 cupriferous green belt; though bunchy, two of the number are of real prom- n and Butler. It is probable that other beds can be worked the future of the mine appears to depend on these beds. There bility of locating and developing other and richer beds to the main workings, in the horizon of the Lake and Adventure beds. is both progressive and experienced, but labor is short.

MINING CO. **MICHIGAN**

1917, company was consolidated with the Old Colony Copper of Mayflower-Old Colony Copper Co. (which see), on a share Described, Vol. XIII.

-OLD COLONY COPPER CO. **MICHIGAN**

State St., Boston, Mass. **Mine office:** Houghton, Mich. F. Fay, pres., with R. L. Barstow, G. E. Clarkson, G. P. Mosman, C. J. Paine, and F. W. Nichols, directors; C. J. Mor- G. S. Goodale, supt.

5, 1917, in Michigan, as a consolidation of the Mayflower Old Colony Copper Co. Stock was exchanged on a share **Cap.**, $5,000,000; shares $25 par; $14 paid in. Last as- paid February 9, 1920. American Trust Co., Boston, transfer ny Trust Co., Boston, registrar. Annual meeting, third Wed- . Shares listed on Boston Stock Exchange.

et for December 31, 1918, shows: receipts from assessments, $1,102, and machinery sale, $360; total, $86,663. Expenses were: construction, $2,300; equipment, $2,390; and general, $8,619, a The deficit was $8,536. Balance on hand, December 31, 1917, on January 1, 1919, $23,766.

bout 2,040 acres on Mineral Ridge, near Calumet, Hough- prises Secs. 7, 8, 17 and 18, T. 56 N., R. 32 W. Lands are rsarge mine and east of Wolverine, South Kearsarge, and Calu- es. Prospecting was begun on the Mayflower in 1899 and con- s.

t: on Mayflower property, by 4 shafts, No. 1, or Faull has considerable drifting on the 1st and 2nd levels and a cross- allel cupriferous amygdaloids, showing occasional patches of ing of promise. No. 2, or Isle Royale shaft, 160' deep, has feet of drifting and shows a bunchy amygdaloid, 10 to 12' ore or less copper in a 2' streak next to the hanging wall; No. badly broken amygdaloid. No. 4 shaft, 580' deep, starts from unnamed amygdaloid, lying approximately 2,000' east of the nd at a depth of 425' runs into a parallel amygdaloid lying 90' of the first bed. The copper showing is poor. On the Old there are 5 shafts, aggregating about 2,200' in depth, and over

6,000′ of drifts and crosscuts, all of which have so far show results.

The new shaft, known as Mayflower-Old Colony No. 1, dow ary 20, 1920, reached the Mayflower lode at 1,665′, where it show commercial amount. The shaft lies about 300′ W. and 250′ post between Sections 8 and 17, on the line which formerly divid The formation is a mixture of trap and amygdaloid, and at passed into the latter rock. At a depth of 1,452′ five feet resembling that of the Mayflower lode. The trap at the botto and the geologic features are said to be new to the district.

In the Old Colony mine a cross-section was secured, 1899- driven about 3,000′ and by diamond-drill borings eastward to th the tunnel; this cross-section showed upwards of 75 amygdaloi erate beds, a number of which carried a little copper in the where cut in the tunnel.

Drilling and exploratory work was resumed in the Mayflow after 3 years idleness, and in the Old Colony, in 1911, after Hole No. 16, on the Mayflower property, is known as the discov the so-called Mayflower lode was first cut by it. The holes o close this to be a big, well-mineralized amygdaloid bed, extendi of 6,000′, and for a depth of 1,500′. This lode lies on the ext of the copper range, near the eastern sandstone. Hole No. 41 was abandoned in 1916 at a depth of 2,635′, having run into a sandy material. Hole No. 42, started in February, 1916, at a of No. 41, was abandoned October, 1916, at a depth of 2,763′, w decomposed ground was encountered.

Diamond-drilling in 1917, amounted to 42 holes in the Mayfl in the Old Colony.

Thirteen holes on the Mayflower and 10 on the Old Colon commercial ore; hole No. 20 showed 101′ of 1.65% ore; hole showed 100′ of 1.2% copper ore, 60′ of which carried 1.9%; h 17 in this locality, showed 87′ and 95′ widths.

These earlier drill-holes were sufficiently promising to wa ing, provided both companies shared the expense, and as the way of dividing the expense was a consolidation of both com accomplished in 1917.

Equipment: includes 15 dwellings, boiler house, chang engine-house, containing hoist and compressor.

Annual meeting, first Tuesday in May. Listed on Boston Stock

eet for 1918, indicates receipts, $445,782; including $290,923 from 154,859 from assessment and $975 from interest. Surplus for year The accumulated deficit was reduced to $52,068, and $247,473 ng and development. These figures compare with 1917 receipts, 8 from copper, and $96,986 from assessments. The deficit for 34; mining and development cost $117,144.

the Minnesota, Rockland and Superior mines, 4,870 acres of ry, 1,466 acres of timber and miscellaneous lands and a 150-acre ; total holdings of 6,686 acres.

tract is 3 miles east and west by 4½ miles north and south, in ich there are 4 scattering tracts to the westward, one of 40 acres, s each and one of 160 acres, all carrying the outcrop of the Calico The Superior mine produced 567,331 lb. fine copper, 1856-69 and Rockland, lying next east of the Minnesota, was operated 1853-70, 09 lb. fine copper from the Minnesota contact vein which averaged and carried considerable silver in that mine. The old Minnesota 847, closed 1870, made 34,704,668 lb. fine copper and paid dividends The Minnesota mine is fully described in Vol. II, Copper Handbook. the Michigan company's tracts carry the following known the Evergreen belt: Calico, Contact, Minnesota, Branch, North lton, Mass, Butler, Ogima, North Amygdaloid and South Amygda- mably the other parallel beds, in addition to various other uniden- aring beds of the Keweenawan series. The Knowlton, or north- Evergreen belt of parallel beds, lies about 1,000′ south of the shafts and the 7′ amygdaloidal bed supposed to be the Butler, extent in Peninsula bluff 2,000′ south of "B" shaft, shows some nd stamp rock. There are 3 old shafts on the Butler bed and several parallel copper-bearing strata. There also are cupriferous utcrops north of the Calico bed on which no work has been done. **ent:** mine has 3 shafts on the Calico bed and about 10 miles "A" shaft is 2,133′ deep; "B" is bottomed at the 14th level and level. The lode grew steadily poorer with depth and showed a nch, being only about 5′ wide on the 16th level of "A" shaft, arged with copper. The mine was closed down in 1910, when the urned over to tributors, who continued to scram the mine with themselves and the company until May, 1913, when all work was

15, work was resumed at the old "E" shaft, and continued to date. his was enlarged from 2 to 3 compartments and sunk to a depth ing south of the shaft encountered the Evergreen, Butler and ll showing commercial values. Results from other development orted as most encouraging.

l in 1919, that a new shaft was to be sunk east of "E" shaft.

t: buildings include a machine-shop, smithy, carpenter shop, ce and changing house.

construction of which was begun April, 1906, is about 1 mile lass mill, on Keweenaw bay, with ample water frontage. Con- uspended in 1907, after about $175,000 had been expended. In nent was overhauled; necessary additions and improvements were mill is expected to be in operation at an early date.

lb. copper: 1900-1905, 6,113,500; 2,875,341 in 1906; 2,665,404 06 in 1908; 1,979,305 in 1909; 36,682 in 1910; 327,773 in 1911; 90,000 in 1916; 35,400 in 1917; and 1,177,176 in 1918.

as thus far proved a disappointment, largely because limited cted the necessary exploratory and development work. Recent e been rather promising. The property is very fully described Copper Handbook.

MICHIGAN SMELTER CO.

Office: 82 Devonshire St., Boston, Mass. **Works office** Houghton county, Mich.

Officers: Wm. A. Paine, pres.; John R. Stanton, v. p.; sec.-treas.; Frederick I. Cairns, supt., and Chas. A. Snow, director ford, asst. supt.

Inc. 1903, in Michigan. **Cap.**, $500,000; $25 par. The entir is owned by 6 mining companies, the Copper Range group holding and the Stanton companies 8,000 shares, holdings in shares bein Champion, 4,400 shares; Trimountain, 4,400; Baltic, 3,200; Mohaw verine, 3,200; Atlantic, 1,600. No dividends have been paid, profi turned back into improvements. Annual meeting, second Monday

Works: company owns and operates the Michigan smel west of Houghton, near the old Atlantic stamp mill, with frontag lake. It was designed by Frank Klepetko, and is the largest and smelter in the Lake Superior district, with a capacity of 90,0 copper yearly.

The plant is terraced throughout, permitting automatic handlin The copper ore (locally rock), is delivered in 40-ton bottom-dum by the Copper Range railroad, which also hauls away the refin shipment from the Copper Range wharves in Houghton.

The 3,000-ton storage bins hold 10 days' supply for the works, or in Lake Superior terms, mineral, is dehydrated in rotary dr gases from the furnaces, taken to the furnaces in tram cars and hoppers on the charging floor. Coal trestles, on an upper level, h of hard and soft coal, with tunnels underneath through which fu tram cars, descending by gravity to the furnaces and boiler room are separate storage bins for charcoal, sand and limestone.

The reverberatory furnace buildings has three 5-ton traveling furnaces. Alternating with the larger reverberatories are one two 200-h. p. Stirling water-tube boilers, heated by waste gases fro After leaving the boilers the gases are drawn through a 6x8' sub with arched roof, up the hill to a 150' smokestack, with base furnace building.

The blast-furnace building has 2 cupola furnaces. Blister mechanically, in molds upon a circular casting table, cooled in wat by a link elevator to the loading platform. Slags are carried m the sampling mill and reduced in a 30-ton crusher of 1,000 tons for re-smelting. The slag from the final fusion is granulated discharged through launders to low ground northward.

The combination machine-shop and power house has a comp driven by an independent engine, and a 300-h. p. Nordberg hori compound engine, driving a 200-k. w. generator, actuates the for the blast furnaces. Electric power is used for operating the cranes, casting machinery and lighting. There are 3 specially de electric locomotives.

Miscellaneous buildings include office, laboratory, warehou Water is obtained from the old Atlantic dam, on Cole's creek, th flume with capacity of 5,000 gals. per minute, leading to a 50,0 tank, 100' above the works, giving good pressure at all points. well planned and well handled.

s: formerly paid semi-annually, but are paid quarterly since 8. Payable Feb., May, August and Nov.; $5 in 1906; $9 in 1907; $3 in 1909; $2 in 1910; $1.75 in 1911; $3.50 in 1912; $5 in 1913; 6 in 1915; $17 in 1916; $20.50 in 1917; $10 in 1918; $5 in 1919; on Feb. 2. The grand total is $9,257,000.

: 800 acres, in an irregular tract, having its axis on the strike rge amygdaloid bed, in Secs. 27, 28, 33 and 34, T. 57 N., R. 32 W., N. E. of Calumet, with the Ahmeek and Seneca mines on the meek to the west. In May, 1916, purchased 900 acres near Dollar ween Torch and Portage lakes, with a long strip of shore on each uiring an excellent millsite on Torch lake.

property carries the Kearsarge amygdaloid bed, which is 8' in average width, as at the Wolverine, and the upper workings he same percentage of copper as in the Wolverine mine, but the gs are by no means so rich. The Kearsarge bed is crossed at ap- ght angles by a number of narrow fissure veins, with nearly vertical a considerable amount of mass copper and in addition there are es carrying copper arsenides, including mohawkite, keweenawite, ieyite, and stibio-domeykite, the first two being peculiar to this irst found in this mine. The fissures carrying mohawkite range dth, are well mineralized where crossing the amygdaloidal bed and ite but usually short distance on either side, the mohawkite and s occasionally occurring massive, but commonly being disseminated us gangue. The copper arsenides decrease with depth, and recent s been small. There also are other cupriferous amygdaloidal tratified series that may be prospected later.

nent: 6 shafts, numbered from north to south, of uniform size, f timbering, with solid cribbing through the overburden and with ment. All operating shafts, i. e. No. 1, 4, 5 and 6 are equipped collars. The skipways in the shafts, are laid with concrete stringers very satisfactory. The mine is equipped with electric signals and t 65 power drills. New work in 1918, totaled 9,253' which com- 134' in 1917.

ft, about 1,500' south of the northern boundary, is bottomed at and is 2,693' deep. No. 1 hoist, in the central power-plant at No. es two 4-ton skips in counterbalance. No. 1 shaft has a combina- house, equipped with a 12x24" engine and crushers. The new nue to show the necessity of selective underground working.

ft is 2,364' deep. Like No. 1, it had good ore near surface with t at depth, followed by improvement below the 12th level. The No. 2 shaft, serving both No. 1 and 2, includes an engine house se. Hoists are double-conical-drum duplex-cylinder engines, good th, each handling two 4-ton skips in counterbalance. The boiler motive firebox boilers with foundations for 3 additional boilers, e house has 2 air compressors, of 40 drills aggregate capacity. operated during 1918.

ft, 1,600' deep, was abandoned, as the ground can be reached

through shafts No. 2 and 4. No. 4 shaft is 2,489′ deep, developin copper content from surface. Equipment includes a steel shaft r 3 crushers and a steam hammer. The engine house has a doub hoist, good for 6,000′ depth. A compressor plant, at No. 4 shaft pressors and two 4-ton trolley locomotives.

No. 5 shaft is 1,787′ deep. Equipment includes a new all-s house and a Bullock hoist good for 2,000′ depth.

No. 6 shaft, the southernmost and newest, is about 2,600′ and 2,600′ from the Ahmeek boundary, commanding about thr mile of the strike of the Kearsarge bed under about 160 acres, o as much ground as the entire Wolverine mine. This shaft, lo in the footwall rock, is 1,451′ deep, and can be sunk to a maxi Mechanical haulage was installed on No. 8 level in 1916, and tw locomotives were put in operation in 1918.

New openings at No. 4, 5 and 6 shafts in 1918 continued to cellent mineralization as in previous years.

The mill, near the mouth of the Tobacco river, on Trav Superior, opposite the mill of the Wolverine, is 178x206′ in size, sheathed with iron, on foundations of sandstone. A steel trestle 50′ high, leads into the mill, loaded cars being pulled up the inclin engine. The mill has 4 stamps, all compounded, giving a daily c to 3,000 tons. The mill has a Chilean mill and 3 sets of auxiliary with fixed bearings, to reduce oversize material from the morta heads, this averaging 20 to 25% of rock stamped. Mineral from charges automatically and is sluiced into the basement, where 1½-ton mineral cars, having 14-mesh perforated steel bottoms drainage out of water, after which the cars are weighed, then l elevator and dumped into bins. The bin house has 4 compartm cement floor and steam-pipes underneath, for drying the rema from the wash. The mineral is taken from the bin house, i steel mineral cars to the Michigan smelter at Houghton for redu from the mill are dewatered, then raised by bucket elevator, and conveyor, some distance from the mill. To utilize exhaust stea a 1,250-k. w. turbo-generator has been installed.

In 1918 a concrete building 42′x42′x18′ on a concrete foun was built to accommodate this turbine which will furnish pow the mill machinery in addition to three 7,000 gallon electrically-dri pumps which are to be installed at the old pump-house, thereby present pumping boiler plant.

Water for both the Mohawk and Wolverine mills is furnish pump house, standing near the Tobacco river, from which water pump house has at present a 20,000,000-gal. triple expansion pump by a 9,000,000-gal. pump, giving an ample water supply for both

A 30x300′ wharf, on Traverse bay, a short distance from th of clear water alongside, is fitted with coal hoists and storage s the needs of both mills. Employs about 700 men.

Yield of fine copper, per ton of rock stamped, averaged 1 decade ended 1912.

16. Accounts payable, 1918, $6,372; 1917, $8,999, and 1916, $6,520.
: 1,120 acres, in Secs. 28, 29, 32 and 33, T. 51 N., R. 37 W.,
ately north and east of the Lake Copper Co. Property was sup-
y about 7,000′ of the strike of the Lake amygdaloidal bed, but
e Lake bed curves to the westward, rather than to the east. Prop-
ies the copper-bearing series of the Evergreen belt of amygdaloidal
rious other unidentified cupriferous strata. The company's lands
y the Fire Steel river, and are traversed by both the Mineral Range
Range railways.

ment: exploratory work has been thoroughly and systematic-
and carried out the preliminary work consisting of diamond drilling
mplete cross-sections, of about 8,500′ and 9,500′, respectively, to
strike and dip of all the strata on the property. These sections
0′ apart, and the contact of the Keweenawan series with the eastern
s been definitely located by drilling.

liamond-drill holes were put down between 1909 and 1911, with
′ to 2,000′. Several cupriferous amygdaloidal beds were disclosed,
d 8 conglomerates, have been correlated as extensions of No. 1 and
enture series of lodes. No. 1 bed, of about 33′ width, showed 10′
copper, but No. 2 bed was lean. Formations above No. 8 con-
d are practically unexplored, and excepting the work done in holes
remain entirely untouched. Results obtained from holes 3, 7 and
s conglomerate bed, were very promising and a vertical shaft was
1913, near No. 3. At 300′ depth a crosscut to the N. W. cut No. 8
. A 200′ winze, 30° incline, was sunk and 100′ gained in depth.
evel exploratory work to develop lodes cut on South Lake property
l, but no commercial rock was found. At a distance of 1,050′ N. W.
the crosscut broke through into the overburden. In the summer
sinking was resumed, and by June, 1916, had been bottomed on the

s at right angles to the general trend of the formation were driven
tions from the shaft on the 800′ level. In Dec., 1918, the S. E.
1,576′ long and the N. W. crosscut was 1,969′ long. The S. E.
etrated a lode which showed 2 to 8″ of rich brick copper, and
fine copper. In September, the Butler lode was cut by the N. W.
a 30′ drift on the lode shows considerable copper; but operations
ed at end of 1918 until more favorable cost conditions prevail.

ent: includes a hoist good for 1,200′ depth, small air-com-
ding house, and all mine buildings.

th Lake is an exploration company, but in view of the encouraging
ed by diamond-drill borings on this and adjoining properties, is
romising; the management is very capable.

Property: 2,120 acres, in 4 separate tracts, also an extensi Houghton county, and miscellaneous lands in Houghton and Kewe includes the Osceola, North Kearsarge, South Kearsarge and Ta mines.

The **Osceola** mine proper, 720 acres, lying next south of & Hecla, was opened 1873, on the Calumet conglomerate; thi unremunerative, work was begun on the Osceola amygdaloidal and 730' east of the Calumet conglomerate. The Osceola amy strike of approximately N. 39° E., and is opened by six shafts n north to south. Crosscuts have been sent from the Osceola we Calumet conglomerate, at various depth, without encouragement, drilling was done, 1904, to locate and test the Kearsarge amygdal Osceola tract, but the results were not encouraging. It is said tha ceded the right to mine the Kearsarge bed on its property to the La Co., in exchange for certain surface rights.

The 4 northernmost shafts of the Osceola mine proper a No. 5 Osceola shaft, 700' S. E. of No. 3 is 4,667' deep. No. 6 formerly known as the Opechee, 1,300' S. W. of No. 5, is 4,73 shaft shows some good stopes, especially on the lower levels in drifts, toward the Tecumseh mine.

Some work was done at No. 3 shaft in 1916, but stopped 191 improvement in labor and mill conditions. Mining was limited t where the 46' level was the most active and most productive. A opened above the 38th in very good ground for 500'. No. 4 driven into La Salle ground. The Ancient shaft 1,800' S. operating between No. 47 and 46 levels. Rope haulage was int from the new shaft.

Osceola contributed 246,[illegible] tons to 1[illegible] Its output was in 191 pared with 203,281 tons in 1[illegible] in 1917 and 270,[illegible] tons in 1918.

The [illegible]

r. Two trolley-type locomotives were ordered in 1918 for this
e mine.
secured from Lake Superior through a 1½-mile line of 6" pipe,
ith a stand pipe at the Tamarack mine, leading to a 130,000-gal.
rvoir between Osceola shafts Nos. 5 and 6.
rsarge or **North Kearsarge** mine, 1,120 acres, lies north of the
ith which its has underground connections. Extensive diamond
1907, showed considerable good stamp rock in the foot and hanging
ts where the main bed was impoverished. The Kearsarge amygda-
nges 16 to 20' in width, in this mine, and has proven very bunchy,
very good average values. The southern workings, approaching the
ave shown improvement, but the mine is richest near the Ahmeek,

rth Kearsarge shaft is 4,229' deep and has a hoist good for 6,500'
ng two 6-ton skips in balance. No. 2 North Kearsarge shaft was
depth of 2,400', some years ago.
orth Kearsarge shaft, 1,825' N. E. of No. 1, is 3,403' deep and
rge area of good ground, especially in the northern drifts. No. 4
rge shaft, begun 1907, sunk 75' in the footwall, is 1,622' deep. The
with concrete for 185' from surface, and has large loading bins
e 10th and 13th levels, to which rock is milled through chutes, from
ve. Equipment of the rock house includes two 24 by 36" crushers
electric motor. The steel-frame boiler-house at No. 4 has three
ith room for 2 additional. During 1917 and 1918, four storage-
notives with 5-ton cars, were installed on No. 15, 16 and 18 levels.
th Kearsarge surface plant includes a stone compressor house and
mpressor at No. 1 shaft, combination machine and carpenter shops,
d office, all of wood.
haulage was installed early in 1919 on levels No. 31 and 32, shaft
vels No. 34 and 35, shaft No. 3.
earsarge contributed in 1918, 745,722 tons of 12.60 lb. copper ore,
es with 691,263 tons of 12.54 lb. ore in 1917, and 651,079 tons of
n 1916.
th Kearsarge mine, 160 acres, lying south of the Wolverine
e Centennial, was known formerly as the Iroquois. Development
eptember, 1899, and the best stopes are toward the Centennial line,
e bed averaging about the same width as in the North Kearsarge
e mines, and being remarkably uniform in copper values. This
letely developed, both shafts and all but a few of the drifts having
oundaries of the property, and the mine is officially stated to have
life. There are about 600,000 tons in the pillars and arches yet to
ich will be a slow operation, with comparatively high costs.
mine yielded 218,728 tons of 14.96 lb. copper ore, which compares
ons of 14.28 lb. ore in 1917, and 408,572 tons of 17.06 lb. ore in
180,000 tons came from the shaft pillars in 1917 and 1918.
uth Kearsarge shaft, the northernmost, is 2,820' deep, and prac-
boundary. The shaft rock house cares also for rock from No. 2
ich it is connected by an 1,100' trestle. Two skips are operated in
2 S. Kearsarge shaft is 1,992' deep. This shaft was closed in
18, due to lack of labor.
per min. motor-driven pump handles the water coming through
gs.
arack Junior mine, 120 acres, lying between the Centennial
Hecla, has 2 vertical shafts, on the Calumet conglomerate, No. 2
ep, with 12 levels opened. The Tamarack Junior has been idle
apparently is dead, so far as the conglomerate is concerned, with
spects of finding other workable cupriferous beds on the tract.
ransported from the various mines to the mills by the Hancock &
ay, a branch of the Duluth, South Shore & Atlantic system.
built in 2 sections, the main section being 176x213', of steel

frame, with 4 steeple-compound stamps. These stamps, which are general use in the Lake Superior district, were invented by B. Ne result of some years of experimentation. The stamps have circ with ⅝" screens, and hydraulic separators, about 20% of the copper coming from the mortar discharges and separators. The older stamps with circular screens having ⅜" openings, and is otherwise No. 2 mill.

The wash department of the 2 mills are equipped with classi with 6 round tables and 1 Wilfley table for each stamp, the Wilfleys ings from the round tables. Chilean mill reduces over-size mate stamp mortars and there are crushing rolls and Hardinge mills.

A complete automatic sprinkler system for fire protection wa 1917 and a plant to pump the tailings further into Torch lake was p tion in 1919. This plant was built jointly by the Osceola Consoli Co., the Lake Milling, Smelting & Ref. Co. and the Calumet & H

The steel boiler-house, adjoining the mills and furnishing po has three 250 h. p. 72" boilers, delivering steam at 150 lbs. pressure h. p. 84" boilers operated under 105 lbs. pressure, all of the locor type.

The power plant has an Allis-Chalmers Corliss engine, operati Morgan-Gardner d. c. generator, furnishing current for 220-volt enclosed arc lamps.

The joint pump-house of the Osceola and Tamarack mines ha 000-gal. triple-expansion pumps having 22", 40" and 60" cylinder 30" horizontal plungers of 52" stroke and 42" discharge. Water is an 8' tunnel, running 1,275' under Torch lake, with 3" intake he against clogging by ice.

Dividends: Quincy paid its first dividend in 1862, and prof disbursed to shareholders in every succeeding year except 1 giving the company a continuous dividend record of 49 years, date, rendering it the oldest dividend-paying American copp second only to the Tharsis Sulphur & Copper Co., Ltd., which of continuous dividends since 1867, or 1 year longer than record. Recent dividends, by years, have been as follows: 1902, 28%; 1903, 22%; 1904, 20%; 1905, 24%; 1906, 30%; 190 18%; 1909, 16%; 1910, 20%; 1911, 16%; 1912, 21%; 1913, 15 1915, 32%; 1916, 64%; 1917, 72% 1918, 34%; 1919, 10% to dece dividends, $26,892,500.

A table of statistics, production, costs, etc. 1864-19[illegible], is X., of The Copper Handbook.

The p[illegible] marked Quincy's 70th anniversary. The c paid its st[illegible] $9,452,500 in dividends and $[illegible] surplus; this [illegible] to a profit of 46c on each [illegible] per produced [illegible] average price for the [illegible] equal to $9,97[illegible]

Property [illegible] many years ago, [illegible] tions include a [illegible] $750,000; the old [illegible] tion, 1910, of Sec. [illegible]

ıd Co. bought for $600,000; 80 acres under and to the S. of shaft
bought from Hancock Mining Co., July, 1915, for $226,250. In
company purchased 125 acres from the Hancock Mining Co.,
This parcel adjoins the original 80 acres.
ldings of the Quincy now include lands formerly held by the
ranklin, Mesnard, Pontiac, Arcadian and St. Mary's, in order
ı south to north.
ment: property carries the Pewabic bed and a number of
per-bearing amygdaloids, from the Hancock mine, on the north-
f Portage lake, to the boundary of the Franklin Junior mine,
lf way from Hancock to Calumet. Through the territory lately
afts No. 2, 6 and 8 can be sunk to practically unlimited depth.
ıe was opened 1848, on the Quincy amygdaloid, a bed lying some
st of the Pewabic, but the Quincy bed was abandoned 1856,
ewabic amygdaloid was opened. There is a footwall branch,
e Pewabic East lode, underlying and parallel with the main bed,
ionally yields good returns. The so-called West branch, about
f the Pewabic bed, has been opened by shafts No. 2, 4 and 7
osscuts on different levels and considerable stamp rock has
therefrom. About 1,000′ west of the Pewabic bed is the Han-
aloid, which is narrow but fairly mineralized, and which yielded
of 21 lb. fine copper per ton, after reasonable selection, when
the old Hancock mine, this figure being materially above the
rage return from the Pewabic bed.
wabic amygdaloidal bed, on which all shafts are sunk, has a
out N. 30° E., with an average dip of 52 to 54° at surface, flat-
ıe lowest workings at depth of more than a mile to approxi-
30′, the shafts following the dip of the bed on catenary curves.
ic averages about 20′ in width in the upper workings, but is
arrower at the bottom. The lower workings show decreased
es with much less heavy copper than above, but the ore is more
value. Part of the decrease in copper returns is due to mining
ormerly would have been left as worthless and practically the
bic bed is now mined. There are copper courses, or shoots,
the north with depth.
wabic bed has good walls and the mine requires comparatively
ing. Dry-walls are built of waste rock, in wide stopes, saving
of hoisting waste and also the cost of timber. Shafts are
in the footwall. The Pewabic rock now runs 19 lb fine cop-
with some silver. Previous to about 1890, about 40% of the
secured in masses. In 1912 the proportion of mass copper was
company reports approximately the same percentage to date.
ınmost drifts of the Quincy are about 3,000′ below mean water
rtage lake, while the northernmost workings at No. 8 shaft
iles from the southern breasts.

mond drill for exploratory and preliminary development work

The Quincy has been much troubled by air-blasts, violent
brought about by the settling of super-incumbent rock in the so
of worked-out openings, causing violent compression of the
throughout the mine. The most serious disturbances from air
are practically artificial earthquakes, felt for only a few miles
surface, were experienced in February, 1906, and March, 191
seems reason to fear that these troubles will prove interm
tinuous for the balance of the mine's life. The air-blasts, whil
have caused more alarm than damage.

Development:

	1918	1917
New openings	24,580'	26,900
Shaft-sinking	428'	499

New work averages slightly over 5 miles yearly, the min
proximately 120 miles of workings.

Owing to the acquisition of adjoining mines, the Quinc
numbered irregularly and are described herein in order of occ
south to north, rather than in order by number.

No. 7 shaft: the southernmost, planned and sunk by Joh
leaves surface at an angle of 53° and is bottomed at an ang
The shaft was sunk 4,000', in 18 months, through refracto
phenomenal speed being rendered possible by sinking and rais
tions simultaneously. The shaft is bottomed at the 71st leve
of about 6,500'.

No. 7 shaft has a steel shaft rock-house, with 750-ton bins,
mer, two 24x36" crushers and an 8,000 h. p. hoist, with 52x84"
winding drums 28' in diameter by 11' 9" face, carrying 8,000'
cable, the main shaft weighing 120,000 lb. This hoist can
skips from a depth of 1½ miles at a speed of 3,000' per min
being limited to this rate by an automatic cutoff which also p
winding. Starting a load of 6 tons from a depth of more

About 35% of the present product of the mill is No. 3 grade
ing very fine copper.

The mill power-house at No. 2 mill, has four 250-h. p.
tube boilers. There is an electric light plant.

The mill and pump-house has a 20,000,000-gal. centrif
a 20,000,000-gal. triple-expansion pump, and the old pump ho
with combined capacity of 21,000,000 gal. daily. Water is
7x7' 6" tunnel, driven 100' under the bed of the lake. A 6x
long, connecting mills, boiler houses and pump houses, car
and steam pipes.

Tailings retreatment:

Tailings at the mills amount to millions of tons, and
ments on reconcentration have been conducted at intervals s
companies that have attacked this project have bankrupted
monotonous regularity, notwithstanding which, the successf
secured at the regrinding mills of the Calumet & Hecla off
the Quincy sands also may be retreated profitably at some
November, 1919, it was reported that the company was to sp
a plant for the treatment of this sand.

Smelter: this was blown-in Dec. 1, 1898. It is at Riple
of Portage lake, opposite Houghton, just east of Hancock a
mile from the mine. Remodeling of the mill was started
1919. Smelter treated 23,000 tons of mineral in 1918.

One building has four 40-ton reverberatory furnaces,
building has 60-ton and 120-ton reverberatories, the latter
matic casting machine. On arriving at the reverberator
trucks carrying mineral are lifted by electric cranes and c
into the furnaces, which are top-charged. An overhead trol
building permits handling large bars and cakes, and a
system is used for casting. Slags are trammed, in 3,00

elevator which raises the ladles and dumps their contents of a trestle. The cupola building has 1 blast furnace only, ory slags. A briquetting plant has 2 boiler-iron retorts for w-grade mineral before smelting. Miscellaneous buildings include an engine house, casting house, cooper shop, office, chine shop, 50x100′ warehouse, and a coal-shed.

has remained nearly constant for several years, but was ned by the labor strike of 1913. Silver production during troy ounces of metal about 80% pure and 20,800 troy ounces pure. Profit on silver in 1918 totalled $54,680.

M. Edwards, pres.; Henry Tolman, treas.; Albert L. Wy-S. J. Jennings, H. M. Howard, Carl F. Moore and C. A. .

1898, in Michigan. **Cap.**, $2,500,000; $25 par; paid in $10.50. 2, of $1, was payable January 14, 1907, and assessment No. ayable June 15, 1910. The Franklin Mining Co. owns 99,524 acquired by exchange of 3 shares Rhode Island for one of nal meeting, second Wednesday in April. No bonded debt. sfer Co., Boston, transfer agent.

ort for 1917 shows rents $806, advanced by Franklin Min-l, total receipts, $16,597. Expenses amounted to $4,619 at es, balance being interest and incidentals.

300 acres, immediately north of the Franklin Junior mine. s been explored by extensive diamond-drill work, showing Mesnard epidote, Allouez conglomerate, Pewabic amyg-rge amygdaloid, and other copper-bearing beds. All g between the Kearsarge amygdaloid and the Calumet drilled by a series of holes, the Calumet bed sho r. The first cores from the Kearsarge bed showed co quantities from a bed of about 19′ width.

at: No. 1 shaft, 500′ deep, is sunk on the Pewabic amy,

loid. This lode is 8 to 10' thick, of which 2 to 3' near the h
well mineralized but spotty in the 4 levels opened.

No. 2 shaft, 1,227' deep, has 10 levels, with a 125' winze
The workings are north of the shaft, except on the 8th, 9th a
the latter 2,400' long. The 8th level south develops a stre
ground toward the Franklin Junior, and a 1,400' drift on the
showed 25 to 75' stretches of payable ground. The Rhode I
is being developed by the Franklin Mining Co., where at a
2,000', the Pewabic bed averages 8 to 10' width.

The Albany & Boston, or Allouez conglomerate, has be
crosscuts on the 500' and 1,000' levels, but the result was
A 250' crosscut on the 10th level, about 1,100' south of No. 2
closed an amygdaloid bed of some promise. The east cross
level, at depth of 1,000' cut 2 apparently valueless beds,
Mesnard epidote. The East lode, about 5' wide, carries a
but nothing of promise. The West lode, 96' from the Pewa
wide, carrying occasional bunchy copper. The 4 amygdaloi
between the West lode and the Allouez conglomerate have
N.-S. drifts, 3 proving barren.

Equipment: includes a frame shaft house at No. 2, w
house having hoist capable of raising 2-ton skips from a quar
and a 12-drill air compressor. Buildings include a machine sh
warehouse and 15 dwellings.

The Rhode Island is idle and the plan of developing at
through the north drifts of the Franklin is a good one, sinc
bed to the south of the Rhode Island has shown great impr
a depth of 2,000' in both the Mesnard shaft of the Quincy
shaft of the Franklin.

total issued stock 40,000 shares were given to the old stock- re for share, 20,000 were offered and taken by the same stock- $2 per share and 10,000 shares were offered to holders of record at $6.60, but were largely taken by the underwriters; 10,000 were offered in March, 1915, and an additional 10,000 in Oc- at $5, both of these last offerings being practically all taken by s. In April, 1916, 10,000 shares more were offered to the stock- 7.75 per share.

2, 1918, the 100,000 new shares authorized by the increase in n of record were offered to stockholders of record at $2 per rate of one additional share for each share held. This money purchase 166 acres S. W. ¼ of Sec. 30, immediately north of for which company paid $90,000.

of liabilities December 31, 1918, was $178,176. Expenses at 6,984, including $38,905 for underground work and $274 for con- ash on hand $4,244. This compares with 1917 excess of lia- 6. Mine expenses, $203,593, including $130,049 for underground 919 for construction.

500 acres of mineral lands, being the W. ½ of Sec. 31 and Sec. 30 T. 51 N., R. 37 W., adjoining the Lake mine on the east, nture on the west.

work was begun on the property in 1862, though the name iginally given because the extensive prehistoric workings were e been the work of the Aztecs. A 16-lb. stone hammer was taken

stone mill in early days, and produced 756,853 lb. fine was secured in a single mass. Exploratory work was of the Evergreen series, by the Aztec- drilling was begun Sept., 1909, con-

tinuing until March, 1911, when suspended because of adverse fi
tions. Borings were begun at the base of Evergreen bluff, near th
Evergreen belt, thence working southward toward the eastern sand
drill-holes were put down at various points on the property.

Exploratory drilling having shown copper rock in five holes,
at the corners of a 200' square, actual mine development work wa
upon. The holes showed that the beds run N. 70° W. and dip
The drill-cores and recent underground work were carefully stud

N., and R. 34 W. The tract has room for 3 or 4 shafts, and has a den, the bed being proven by trenches at intervals of 1,000′, show- daloid of 35 to 40′ average width, with extensive carbonate stains, ering, and a little fine copper near surface. The property has been he eastern sandstone.

e has two workable copper lodes, the Baltic, locally known as the the West lode, discovered in 1911, a formation independent of the to 30′ thick, which, however, cannot be stoped until the Superior l. On the Superior lode all ground above No. 15 level has been

nent: by 2 shafts, sunk in the footwall of the lode, insuring but necessitating crosscuts at each level. Owing to the great copper-bearing stratum, it is necessary to crosscut along the bed als. The Superior mine is opened on the northern extension of ygdaloid bed, though some call this the Superior lode, not being the correlation is correct. The Baltic bed, in the Superior mine, r impregnations in the footwall, always an evidence of strong , and there is a conglomerate bed under the foot that carries a of copper. The milling ore is remarkably deceptive in appearance, oxidizes readily, and when it has been broken a few weeks, appears fresh fracture shows its true nature. As a triangular tract of land etween shafts No. 1 and 2 is owned by others, they cannot be ove the 12th level. The mine has about 11 miles of workings, work for 1918 totalling 2,564′, compared with 2,502′ in 1917, 5,136′ in 1915, and 2,654′ in 1914.

aft, 3,104′ deep, is 1,200′ from the northern limit of the property; e Superior lode on all levels, and the West lode from the 12th to . The ground, especially in the upper levels, is very treacherous, careful attention and close timbering. All recent development has to the West lode, which shows commercial values. Exceptionally opened on the 31st level for 350′. A raise made from the 19th to , provides for safety and ventilation.

aft has a frame shaft-rock house, of the Calumet & Hecla type, engine and two 23x36″ crushers. The hoist is good for 4,000′. pment at No. 1 shaft includes a combination boiler and engine 0″ boilers, a hoist, and 10-drill and 18-drill air compressors. No. nected with the main line of the Atlantic railway by a 7,000′ spur, the Isle Royale railway.

aft, 2,540′ S. W. of No. 1 and 2,400′ from the southern boundary, e footwall, at an angle of 53°, is 20′ below the 18th level or 1,628′ ment at No. 2 includes a steam hoist, formerly used at No. 1, ock house having 2 crushers and an engine, with rated capacity aily.

reports that the future of the mine depends on developments on 1st levels south of No. 1 shaft, as there is only a reserve of 150,000 be stoped.

include an office, warehouse, smithy, change house, and a number or employees at a small townsite lying between the shafts.

n: (begins January, 1909)

ization, the revenue totalled $4,832,088, of which $3,119,853 sales. Mining expenses were $2,223,632, equipment $629,, $387,862; surface $290,967; general $100,920; crushing elting, etc., $304,773.
389 acres mining lands, in Sec. 19, 20, 29, 30 and 31, T. 50 d Secs. 24, 25 and 36, T. 50 N., R. 40 W. This tract has an idth of 2 miles, and a N.-S. length of 2¾ miles, lying just nagon river. It is practically all on the mineral belt, only lying on the eastern sandstone. The tract may carry the n of the amygdaloidal bed under development by the Lake ighboring mines, all idle for many years, are the West e N., National on the E., and Tremont-Devon on the W. ll timbered, with an inexhaustible supply of good sandstone oses. Nearest railroad is the C. M. & St. P., at Rockland,

own attempt at Lake Superior copper mining was made in 70-71, on what is now the Victoria property. In 1849, the then as the Cushin, was opened on a line of prehistoric masses of native copper, one weighing upwards of a ton. Bought, 1850, to Forrest, and property reorganized, 1858 as ning Co. Under these titles the property made 373,279 lb. Issued shares $180,000. The mine was operated regularly,

on a small scale, 1849-'55, and thereafter spasmodically. It
1883, but remained idle until work was begun March 1, 1899,
company.

Geology: the mine is on a high and steep hill, notwithst
the solid rock is covered with heavy sand and clay drift.
amygdaloid bed, on which the mine is opened, is 5 to 80' w
about 12', but of very irregular width and dip, and very lunch
The average strike is N. 66° E., and dip 61° N. W., the lode
2 miles of outcrop on Victoria lands. The formation is mut
surface, the bed being irregular in dip, but widening at dep
regular walls. The lode is low in average grade, but fairly r
per contents, carrying low-grade milling ore, with best value
ing wall.

Considerable diamond drilling has been done N. of the
total of 15,292' of holes having been drilled, in 2 cross-secti
several beds that may warrant future attention.

Development: the old mine was opened by 5 shafts,
located at irregular intervals, with levels spaced at 55 to 65'.

The Victoria, or, No. 2 shaft, which was chosen for n
was enlarged to 2 compartments, and a third compartment wa
16° E. of the skipway. The two skips work in balance. The
deep, bottomed below the 27th level. Levels between the 4th
been opened at regular intervals of 100'; below the 23rd at in
with drifting on all levels. The total openings tributary to N
67,385' on January 1, 1919.

The productive part of the mine tributary to Victoria
is on the Forrest bed, an epidotal amygdaloid having an avera
to 12', widening to 80', at one point. Walls are quite regul
crush zones occur, the mineralization extends into the wa
occasional maximum of 50' width of ore. The footwall bed
Forrest, at a depth of 2 to 12', is well mineralized in places,
sional masses from 100 lb. to 3 or 4 tons in weight, but is
copper occurring mainly on the foot, with considerable e
hanging. Underlying this epidotal bed, at a distance of 60', i

sufficient to take care of exploration to a depth of 5,000′, being 2,835′.

se has storage-bins for stamp ore and waste, with chutes, d air lifts, and there is a pneumatic hammer for mass ler house is for heating purposes only.

No. 2 shaft include machine and carpenter shops, smithy, g house, hospital, warehouse, general store, mine office, 76 dwellings, sawmill, lathe, shingle and planing mill. An for motion pictures, etc., was installed 1918. Water for fire protection is pumped from a well having a storage alf mile from the mine.

ill, on the bank of the river, near the hydraulic works, has llis-Cuyahoga stamp. The stamp of 650 tons daily capa- tar screens, and all oversize above 3/16″ is run to a set of lls. The washing floor contains 22 jigs, 5 Wilfley tables, Standard table, hydraulic separators and settling tanks. concentrating slime tables were installed. Machinery is 2″ piston-valve engine. A 12x36″ engine was installed in tarted June, 1906, shows tailing losses of only 0.1 to 0.15% extraction of 81%. Mineral (concentrate) was formerly Calumet & Hecla Co., but is now smelted at the Quincy . In 1916, three boilers were erected at the stamp mill to en the water supply is low. The mine and mill are con- ′ tram line, in two sections, the upper with 6%, and the grade. A stationary double-sheave hoist, at the top of the pull the empty cars up the steeper grades, but otherwise d by gravity, in counterbalance.

ant: a large water power has been developed from Glenn branch of the Ontonagon river, about a mile from the f $251,603. This is the best natural water power of the pper district, the stream dropping about 110′ on the com- by a series of small falls, between which are numerous lstone bottoms. The company utilizes 72′ of this drop. ed by means of a dam, canal and hydraulic air-compressor. 25′ between abutments, has an extreme height of 24′, is 14′ om and 8′ at the top, and has a 320′ main section with d 160′, giving a total of 580′, built with an arch up- vided with two 44′ flush gates, for drainage and flushing te, waste weir and sand fence.

erting water from the dam is 4,800′ long, 10′ deep at the a bottom slope of 1″ in 100′. At the end the canal opens at the extreme end of which the compressor shafts are al is equipped with drainage gates, slush gates, overflow ged measurement gates.

shafts of the compressor are 5′ in diameter, spaced 19′ nter. The shafts were sunk through solid sandstone, by iminary holes, bored to the required depth of 343′, then to 5′ in diameter.

ned throughout with concrete, formerly drew air through ubes. This proved unnecessary as the water falling down ir with it and this air is carried through 280′ of air cham- k at the bottom of the shaft. A water seal at the intake 3/8″ steel shells, firmly concereted into the bottom of the chamber is 281′ 6″ long, and 18′ wide, with minimum of of 26′ height, having a maximum capacity for 80.264 cu. air. The water seal at the upflow end is formed by an long, below which a tunnel 10′ high leads to the upflow x18′ in section, sunk at 72°, with a vertical depth of 271′, e, where the water is again discharged into the river. developed is 72′, and the pressure head 271′, giving a

maximum air compression of 117 lbs. per sq. inch. Imprison down the shafts by suction and swept along the tunnel in t rushing water, is released in the chamber where the cons of bubbles causes compression, escape backwards being pre ⅜" steel shells connected in the shafts. The chamber, know pressor, is connected with a 12" pipe line to mine and mil sure is relieved by a safety or blow-off pipe.

The Taylor hydraulic-pneumatic plant was completed in M nishes 4,000 to 5,000 h. p. under a full head of water, and has sho of 82% under test. It is the largest single-unit air compressor i the fifth installation of the sort in the world. It is possible to c of the inlet shafts if so desired, with corresponding variation of ef but only one unit is in regular use. The compression is auton isothermal, and the air as delivered is unusually dry.

An extensive topographical and hydraulic survey of the c and the watershed shows that an average of 15,000 h. p. can be d western branch of the Ontonagon river, but the expense of dev sarily will be large. During the drought of 1910, the water supp normal and additional storage for water was secured on the we the Ontonagon, near the outlet of Lake Gogebic.

g from 8 to 35°. The so-called Nonesuch formation consists
s of sandstone running from 4 to 8' in thickness and separated
ate, the entire copper-bearing ground having a width of about
rry considerable finely disseminated native copper which is as
This formation is badly faulted and ground is said to have
hat the payable lode abutted directly against the unpayable on
ns described, there is a third which lies about 45' back in f

t: includes 4 shafts. The No. 2 temporary shaft was 1,5
out 4,756' of openings, Jan. 1, 1919. It connects with the

White Pine shaft. This shaft is vertical for 581', has 392' of cu 45° underlay. A new hoist was installed in 1918. The main (called No. 3), located between the two temporary shafts (No. incline 1,090' deep, with about 9,666' of workings. It is equip skips.

The No. 4, an inclined shaft, west of No. 1 shaft, sunk in a considerable distance above the lode, is 977' deep and has a workings. It is equipped with 5-ton skips. New workings totaled 3,478' in 1917; 5,288' in 1916. The rock is soft and can be min cheaply. The property has been extensively diamond-drilled, holes having been made since work was begun in 1907. The consisted of 10 holes totalling about 1,000' showing the second lod to be of fair quality, and the third lode of shaft No. 4 to be Generally, recent development has shown good values.

Equipment: includes a power plant and compressor at 750-k. w. electric turbine on Iron river, 1½ miles from the mine a water for the mill.

Mill: company has a 1,000-ton mill equipped with gyra rolls and Hardinge mills instead of the steam stamps commo Superior copper country. Concentration is effected on Wilfley tailings saved, as future regrinding and leaching will undoubte reclaiming the copper content.

During 1917, experiments were carried on with a 50-ton Minerals Separation type, with results so encouraging that a 6 plant was erected. Two pebble mills were converted to ball grinding and 2 Dorr thickeners, 3-tray type, each 40' in diameter a is near the working shafts and connects with them by means which rock is transferred from the shaft rockhouses to the cr the mill.

Production:

	Tons Ore Treated	Lb. Cu. per Ton	Mine Cost per Ton	Lb. Cu. Prod.	Cos per l
1918....	194,568	16.83	$2.984	3,273,680	22.4
1917....	212,889	19.11	2.365	4,067,529	14.5

Due to labor conditions and high costs, all pended on Mar. 25, 1918, and mine was closed

Mine

1918
1917

1,440 acres mineral land in the White Pine district, Ontonmiles west of the White Pine property of the C. & H. Mng. Co. owns the leases and exclusive mining rights for 50 years, paying royalty. These leases were purchased from F. L. Smith of Detroit, who received 60,000 shares of stock in payment for their lands and t work done prior to June 1, 1915.

rty is similar to that of the White Pine Copper Co. in that it ie and soft shales and slates. Considerable copper glance was iamond drill exploration work the copper in the core of one hole only, no native copper being present.

ent: thorough diamond drill development has been comists of one line of holes, spaced 1,000' apart, which cut the copperbout 400' below the surface and on their dip; a second line of spaced, cut the beds about 600' in depth; the third line of holes, t, cut the beds at a depth of 1,100'. The second line was located en the holes of the first; the third line holes were put down 250' the second line. Drilling has disclosed very uniform values for ,000' along the strike of the formation and at an average depth

f the five shafts planned, 1,495' from the E. boundary, reached a 438' by 1918. It has 4 compartments, 21'14"x11' outside timbers, hoisting capacity of 1,500 tons per day. The first level is at 55' 220', third 320' and fourth 420'. Drifting and crosscutting in ,963'. Total drifting to date, 5,623', total crosscutting 1,322'. eals that the ground carries a shale (No. 1), 5' on the foot-wall, copper per ton, then 6' of barren sandstone, followed by shale ain lode, 4½' wide, containing 22 to 30 lb.; 9' below this is 18 rained sandstone, returning up to 50 lb. per ton. Work indicates s will outcrop on the property for 2½ miles. During 1918, a hale was encountered 33' E. of shale (No. 2) in the main crosscut, ssays 20 lb. copper for 3" along the foot, and contains fine copper disseminated through the mass.

on will undoubtedly be by means of the flotation system, experiowing possibilities of an 85% extraction.

: 60' head-frame, 329' trestle, shaft-house, hoist of 500-ton o 1,000' depth, 12-drill compressor, 3 boilers, machine-shop, saw-, water-supply, 26½-mile telephone line, and dwellings, etc., for ile railway is to be constructed.

: ore hoisted to date totals 18,189 tons of milling grade and w-grade ore. That for the mill is estimated to contain 21 lb. of

(a) Deficit. The books being readjusted to meet pre requirements.

Property: 2,608 acres, with timber rights to 1,768 acre 3 to 5 miles S. of the mine.

Geology: the main tract carries the outcrop of the loidal bed for about 2 miles. The mine was discovered 186 Indian pits along the outcrop, and a single shallow shaft wa to entire lack of transportation facilities little was accomplish was leased in 1880 and worked for mass copper, but did not p until the present company began work April, 1898, when the down, retimbered and deepened, and 3 new shafts sunk. The amygdaloid of 12' minimum, 20' average and 46' maximum 59° E., and having an average dip of about 70°. The Winona resembles both the Baltic bed and the Knowlton bed of th carrying considerable epidote, calcite and quartz, with a limit mass and barrel copper, though the bulk of the metal occu Diamond drilling has located several cupriferous beds on all lean where cut. The older workings show mineral of the somewhat heavier copper at depth. The mine is on a spur of railway.

Conditions underground are much better to the S. of the original workings to the N., but the mine has been exten contains a large tonnage of rock available for stoping.

Development: No. 1, the discovery shaft, has 3 compar deep, with 4 levels opened, which show a little heavy coppe rock in the northern drifts, but is of little promise and has b

No. 2 shaft is 1,000' deep, with 9 levels opened, showi depth of about 200', but with poor ground below, and has be 1906.

Old No. 3 shaft, 750' deep, has been idle for years.

New No. 3 shaft, 1,650' S. W. of No. 2, is bottomed at t 3d to 10th levels, inclusive, have been extended to No. 4 shaf showing alternations of good and poor ground. The opening rock carrying 12 to 15 lbs. fine copper per ton, allowing fo and reasonable selection of ground broken.

Equipment at No. 3 shaft includes a steel shaft rock ho two 18x24" crushers, pneumatic steel gates, and pneumatic tr

No. 4 shaft, about 1,700' S. W. of No. 3, is bottomed a the 15th level. The shaft is sunk in the footwall. Connecti King Philip workings on the 5th, 7th, 8th, 9th, 10th and 12th le

No. 4 shaft is equipped with a modern steel shaft roc cylindrical ore bin of about 40' diameter, built of heavy steel crusher. The hoist at No. 4 shaft is about 1,700' from the good for 1,500' depth; it operates two 3-ton skips, working at a speed of 1,200' per minute.

King Philip No. 1 shaft, about 1,400' S. of Winona No in size, sunk about 85' inside the footwall, at an angle of 70° 1,500'. Copper content was improving in Nov., 1919. The l of 20 to 25', and carries considerable epidote. Company plan and explore the Winona lode at depth.

King Philip No. 1 has a wooden shaft and [illegible] 1916, which allows a 15% increase in output.

King Philip No. 2 shaft [illegible] ing river, and 1,400' [illegible]

rily idle, is also sunk in the footwall; it has crosscuts on the levels to the Winona bed, which show about the same copper l shaft with which it has underground connection on the 8th

o. 2 shaft has an isolated steam hoisting plant. It contains a 4" crusher, and a mass hammer of drop type.
n 1918 amounted to about 166' of new openings. Due to the evelopment some lean stopes were opened to keep up tonnage. has been confined principally to stoping for some years past.
he power plant at No. 3 shaft includes an Allis-Chalmers 0-cycle 2,300-volt cross-compound a. c. generator. The equip- t includes a motor-generator set which has a 450 h. p. 3-phase variable speed induction motor, at 600 r. p. m., connected on ble couplings, to two 20-ton fly-wheels, 10' in diameter. The et has 2 bearings of 11x33", and 2 bearings of 9x27" with oil hem at the rate of 16 gals. per minute, automatically filtered insuring perfect lubrication. A 150 k. w. motor-generator ic locomotives, transforms a 2,200-volt alternating current into rrent. There is a 25-drill air compressor in the central power is provided by three 270 h. p. water-tube boilers, operated at m pressure.
ip boiler house has a battery of two 300 h. p. Parker tubular ' power house has a 50-drill, 3-stage air compressor.
include a carpenter shop, machine shop, smithy, warehouse, oarding houses and about 150 dwellings for employees. There with wing for boilers, and a wing containing a shingle mill, daily capacity of 20,000' of sawed lumber.
: the mill, built at a cost of about $300,000; is near No. about 13c. per ton in transportation charges. The mill secures Sleeping river by a dam, with a storage capacity of 150,000,000 graphic surveys for 3 years show that the watershed tributary about 3,000,000 gal. per day, which is enough for the mill.
r ton transportation charges saved by the new mill may seem , but it actually means about 1c. per lb. on the cost of finished ean the difference between success or failure, so closely are adjusted in a low-grade Lake Superior copper mine. The years past has been to put Lake Superior mills some miles es, on large bodies of water, but in the case of the Winona, s had to consider costs rather than the easier solution of its

the mill by electric locomotives, is crushed by 2 Allis-Chalmers head having a 24" cylinder, and 1 a steeple-compound head ylinders. Equipment includes 6 Hardinge conical tube-mills, nd 12 setting tanks. Under the wash floor there are 6 large he wash water, which is reused after clarification. Tailings -conveyor for a distance of 321' from the mill, and delivered above the ground, forming a great hill of waste at hand for e future time. Slimes are delivered by a 1,200' steel launder the sand discharge. During 1918, a concrete building 48x66' was built adjacent to stamp-mill, to be used as a flotation ntract was let for equipment of a 600-ton flotation plant con- -cell Minerals Separation machine, Dorr thickeners, classifier, one Oliver filter. This plant was ready for operation in

14, the mine was shut down on account of the low price of essees started work, the rock being shipped at first to the mill, and after January 1, 1915, to the Trimountain mill, hen the company resumed work, sending the mine output to

re again suspended in July, 1917, as company had been pro- 0 lb. of copper per month at a cost of 27c. per pound, and

copper was then selling at 23½c., the price fixed by the Gov
being inevitable, the mine was leased in October, 1917, to the st
others on a royalty basis. Company resumed operations, May,
February, 1919, and resumed August, 1919.

The Winona has made various separate campaigns of pr
the percentage of copper extracted ran down to unpayable fi
occasions. Returns show an average of 18.95 lb. fine copper r
of rock stamped in 1904, 14.34 lb. in 1906, and 12.59 lb. in 1907

Winona's ore actually averages 20 lb. of copper per ton,
the copper is light and flaky, the mill has never been able t
recovery. Much experimental work has been done in an atte
problem, and the new flotation unit may be the solution.

Production: 1902, 101,188 lb. copper; 1903, 1,036,944 l
lb.; 1905, no production; 1906, 278,182 lb.; 1907, 1,285,863 lb,
1910, no production.

Recent production:

	Tons Ore Stamped	Mineral Lb.	Lb. Copper per Ton Ore	Lb. Copper Rec. per Ton Ore
1918	57,837	1,359,055	23.67	14.15
1917	112,083	2,640,780	23.56	13.33

1899, in Michigan. **Cap.,** $2,500,000; shares $25 par; paid in,
nent $1, levied August, 1917, payable 50c., Sept., 1917, and 50c.,
s levied assessments of $700,000 since organization. Shares are
on Stock Exchange. State Street Trust Co., Boston, registrar;
., Boston, transfer agent. Annual meeting, second Monday in

shortage and excessive costs, plus the fact that many stock-
to pay the last assessment, operations were suspended in April,

65 acres, adjoins the Winona, in Secs. 16, 20 and 21, T. 52
xploratory work, begun Feb., 1899, was done in search of the
r to locate the southern extension of the Baltic amygdaloid,
on was turned again to the Winona bed, and latterly to develop-
aloidal bed, the No. 8 lode, lying about 2,300′ E. of the Winona
e strike of the Keweenawan formation on this land is N. 53°
ge dip of 65°, and the Wyandot lands carry the strike of the
led series for about 1½ miles.
: by several shafts, No. 1, 1,000′ deep, located in the S. E.
52 N., R. 36 W., is sunk in the footwall of the Winona bed.
ry shaft is sunk 710′ on a stratum paralleling the Winona
e of 1,200′. This bed looked good when first opened, and
es were rich, but proved poor under development. A crosscut
n the bottom of No. 11 shaft for 2,640′, intersects 13 distinct
s, Nos. 3 and 2 showing copper. Drifting done on No. 3 bed
able mass and barrel copper, but No. 8 is the more promising.
work of the past includes a 102′ vertical shaft, sunk on a
bed, known as the Misery river bed, in Sec. 16, T. 52 N., R.
ng of value was developed. Some years ago a vertical shaft
ls held under option, near the W. quarter post of Sec. 28, T.
to depth of 250′, and crosscuts driven both E. and W. with
le of workings. This work crossed the horizon of the Baltic
as deemed the Baltic amygdaloid was found highly altered,
s was the whole country in the neighborhood.
mond-drilling has been done on the property and a core, taken
orizon of the Lake bed, showed a little copper, but was not
tant at that time. The ground has been carefully prospected
drill, in Secs. 16 and 21. Holes Nos. 21 and 22 showed beds
gement, and some trenching was done on 1 bed, 48′ wide, carry-
r from foot to hanging. Another trench, 1,500′ N. E. disclosed
ly 16′ of overburden, and a shaft known as the Sec. 16 shaft,
epth of 65′. A crosscut at this depth shows the bed to be 38′
ely-disseminated copper for about 10′, with small masses along

Recent activity has been centered in development work i
1,100' S. E. of the No. 11 shaft. This lode is opened by the
the 700' level, and below this depth by a 115' winze, with abo
on the 815' level, 400' of drifts on the 900' level and about 600
1,000' level, the bottom of the winze, up to March, 1918. The
levels has been varied and sufficient work has not been done to
the value of the lode.

Equipment: includes a steam plant with hoist, good for
pressors of 12 drills aggregate capacity.

Two mill tests have been made, the second in 1917, on 65
21.62 lb. copper recovered per ton.

The Wyandot company has worked persistently and wit
than a decade to make a profitable mine, and, though not ye
not exhausted the possibilities of its holdings.

MICHIGAN IRON MINES

Normally, the American production of iron ore is about
Of this, the Lake Superior region contributes 85%, Michigan ave
its output in 1919 being over 13,000,000 tons. There are three
districts in Michigan, namely, the Gogebic, Marquette and Men
the first named is in Wisconsin, but the most important section
The iron formation rests on quartzite, cut by igneous dikes. Th
soft, red hematites, carrying 54% iron 0.03% phosphorus, and
of the mines are over 2,000 feet deep.

The Marquette range is smaller than the others. The f
quartzite and greenstone, and is cut by dikes. The ores are mass
hematite (rarely magnetite) similar to those of the Gogebic are
iron, 0.5% phosphorus, and 7% silica. The mines are also dee
feet. The Menominee range though usually considered a Mic
partly in Wisconsin. In Michigan, the productive formation o
dipping narrow belts, resting on dolomite and overlain by slat
soft, bluish-black hematites containing 55% iron, 0.6% phos
silica. Mining is conducted to a depth of below 1,500 feet.

From the various Ranges the ore is railed to docks on Lake
by steamer to lower lake points, and then by rail to furnaces a
other centers.

in Montana. **Cap.**, $25,000,000; $5 par; 3,000,000 issued d from $15,000,000 in August, 1918. Bonds amounting to in 1919. U. S. Corporation Co., New York, transfer Co., New York and Boston, registrars. Stock listed Curbs. Annual meeting, first Monday in February.

December 31, 1918, showed cash and accounts re- and notes payable, $54,624. Expenditures during

1918 were $193,140 at the mine, $237,994 on the railway, and $1
ern office, a total of $449,988.

Property: is extensive, covering two entire mining dis
27 lode claims and 6 placer claims in the French Gulch distr
county, Mont., and 89 lode claims in the Elkhorn district. Be
Mont. Company will practically control all these districts.

Both French Gulch and Elkhorn mines were opened in
which followed the discovery of gold at Bannack, a few miles
1862.

The *Elkhorn property* consists of the Central and other
the Idanha, Park, Aspen, Blue Eyed Annie and other mines, abo
adjacent, either owned or held under bond and lease. This tr
numerous big, strong quartz veins, cutting quartz monzonite and
zones of alteration adjacent to the veins. In the western part
veins are silver bearing, and high-grade ore was extracted
The ore contains gray copper and high-grade silver sulphide
shoots whose size and extent is as yet undetermined, since t
are shallow, seldom exceeding 100' in shafts or tunnel backs.
to belong to two distinct systems, one E. W., the other N. E.-
having a southerly and flatter dip and being the larger veins.

The eastern claims include the Park, a large N. E.-S. W. vei
and dipping 75° N. W., traceable across four claims. It is form
brecciated quartz with altered granite streaks and carries sh
copper and lead sulphides, having gold-silver values. Samples
of open cuts for a distance of 250' along the vein average 1.7%
oz. silver, and the lead ore from these cuts carries 7.5% lead,
11 oz. silver for 4' across, the full width of the vein not being d
grade ore has also been found in several shallow shafts and cu
but the development does not permit a definite estimate of amo

Copper ore occurs in the Idanha or Mono vein, a great lode
with a dip of 55° to the south. This vein is parallel to the Pa
mile N. W. of it. It is a copper-bearing quartz pyrite vein, whi
old veins of the Butte district. It is developed by a 900' tunn
back at the face. This tunnel cuts the ore at a point 600' from
crosses the vein at a slight angle, crosscuts exposing its full wid
ples show an average of 2.9% copper and 6 oz. silver per ton for
a persistent hanging wall band and two other bands of sulphide

The Aspen is an E.-W. cross vein, and is said to be fault
system. It is 2' to 5' thick and has been exposed for 600' by a dri
ing for this distance a 12" pay streak of siliceous ore carryin
copyrite and gray copper. This ore shows values of 0.9% copp
silver and $10 gold per ton.

The Mary-Montreal vein, developed by a 250' tunnel; the
opened by a 100' shaft and long drift tunnel, and the Elkhorn v
dozen shallow shafts close together, all show high-grade oxid
The Blue Eyed Annie vein is said to carry 15' of $15 ore on the 2
are also half dozen other veins of promising outcrop, but slig

Development: officially stated in June, 1919, that $2,50
spent in exploration of the various properties.

The main working tunnel intersects the veins from 1,000' b
their outcrops. This tunnel is 2,065' long with branches east and
its face that intercept the Park and Idanha veins, the total tunn
gregating 11,000'. The Idanha vein above the tunnel is estim

secretary-treasurer; G. H. Edmunds, Ruby, Mont, business
weeney, Ruby, Mont., dredge superintendent.

nsive placer claims in the Alder Gulch district, Madison
out 80 miles by rail from Butte. Described in detail in
Bureau of Mines, 1916.
to 1916 has cost $1,200,000, advanced largely by the
ay and a few shareholders. There are 4 electric dredges,
only 2 have been in operation. A few details of the
of interest.

	No. 1	No. 2	
Year built	1908	1908	
Monthly returns, cubic yards	96,270	62,709	
Power consumed, h p	380	380	
Depth of digging below water, feet	30	35	
Capacity of buckets, cubic ft	7½	7½	
Gold-saving area, square ft	1,231	1,231	
Cost of boat	$108,000	$128,000	$

No. 4 boat has dug as much as 411,000 yards in a m 2,000 tons.

Power is supplied by the Madison River power plant Over $50,000 has been spent on a machine-shop, and over and supplies are kept on hand. On the dredges 36 men ployed; and 49 in other departments.

Production: from 1899 to 1916 a total of 37,000,000 yar yielding 16c per yard, or $5,920,000. From 1906 to July 31 tity moved was 31,379,890 yards, at a total cost of 6.96c pe

This has been one of the most profitable dredgin America, but will soon be worked out. Many dredge im generally in use, have been devised by the Conrey Compa of Gordon MacKay, Harvard University benefits largely made at Alder Gulch.

COOKE MINING & REDUCTION CO.

Property: near Cooke, Park county.

Developed: by tunnels, showing auriferous and arge ores. Has a small steam plant. District is remote fro being on N. E. border of the Yellowstone Park.

Idle at last accounts.

COPPER AGE & EDISON MINING CO.

Idle. **Officers:** Chas. J. Heidenreich, Spokane, Wash Webster, Wallace, Idaho, sec.-treas.; L. N. Hyde, supt.

Inc. 1906, in Washington. **Cap.,** $250,000.

Property: 12 claims, 4 miles south of Saltese, is an e of the Richmond mines, carrying extension of copper-he that mine, the vein paralleling the Monitor. The vein is ex the tunnel just east of the divide; it averages 10' thick, is n carries a very little chalcopyrite and chalcocite in a siderit

Development: includes a main 1,160' crosscut tunnel, v showing sulphide ore assaying up to 30% copper, and $14 g work has been done since 1916, but company contemplated tions at last report.

906, in Arizo
5,500 in notes

Company was organized to operate a mine in the D trict, Inyo county, Cal., but which proved of little value.

In 1918 paid $150,215 for a 51% interest in the Eclip Hell Gate canyon, about 30 miles E. of Helena, Mont., a p owned by the Eclipse-Argo Co., producing 2,000,000 lb. of 1916, and later (1916) was owned by the Castleton Coppe 1919, the control of the Legal Tender silver mine at Clanc by the Furnace Creek company. It is an old and once mine.

Property: the Argo group consists of 5 claims, 2 patent a well-defined fissure vein, up to 18" thick, cutting through stone, at an angle of 75 to 80°. Ore is massive chalcopyri copper. Reported on in 1916 by F. A. Linforth.

Mine shut down December, 1918.

Development: by 200' Argo shaft, to be sunk another tunnels, workings totaling over 3,000', opening the mine t The vein probably extends through the Argo and Lamont c of 2,750', but only 500' has been explored.

Equipment: 8½-mile electric transmission-line from Mo at Canyon Ferry, has reduced power costs as much as $ ton of ore; mine has hoist and other machinery; the mill, equipped for fine crushing and flotation, is to be remodelled.

Production:

Period	Ore and Concts. tons	Copper %	Copper
Jan., 1917-Dec. 31, 1918.... (Furnace Creek O. C. Co.)	2,498	25.49	1,273,0
Mar., 1916-Jan., 1917..... (Castleton Copper Co.)	1,307	26.03	680,4
Oct., 1902-May, 1909..... (Former owners)	2,018	27.57	1,112,0
Total	5,823	26.33	3,066,7

Up to October 1, 1918, costs of the Furnace Creek $11.92 per ton of ore, or 18.997 cents per lb. of copper.

Tailing dumps at the mill amount to 12,000 tons averag which will be leached.

Property though small is considered good, and well m

was in financial difficulties owing to local farmers shutting

Title and Guaranty Trust Co., New York, transfer agent and

liscovery of gold in Montana was made in the Bannack district
that year the placers are reported to have produced $600,000 in
mining began very shortly after. In 1863 a 6-stamp mill was in
easonable estimate from available data puts the total production
to 1905 at not less than $4,000,000. From 1905 to 1913 the pro-
d is approximately $2,000,000. The ores have been of value almost
ount of their gold, but they contain also some silver, lead and
istrict has been comparatively inactive during the last twelve years.
property has been operated in the past in a desultory manner by
sees.

the Golden Leaf group of 8 patented claims, adjacent to
annack, at an altitude of 5,935′ a part interest in 2 claims, the
te, with underground rights, also an additional area of 200 acres,
nderground rights in Excelsior and Horace Placer millsites.
ng point is at Grant, 12 miles from Bannack, on the Pittsburgh-
ad, which connects with the Oregon Short Line at Armstead.

the rocks of the Bannack district consist of Paleozoic lime-
by a nearly circular shaped area of syenite about 1¼ miles in
contact deposit on which the company's claims are located ex-
the border of the syenite intrusion. The orebodies are irregular
imestone, and vary in width from 1′ to 30′ and even 40′, averaging
e high-grade bodies vary in length from 50′ to 100′; the milling
of much greater extent. The best ore is usually in the widest
ein, and is for the most part very soft, requiring little blasting,
ound stands well without timbering. A large tonnage of shipping
at over $1,300,000, has been removed from the property, leaving
rge reserves of milling grades of ore. See U. S. G. S. Bull. 574,

ent: approximately 17,000′ of underground workings to a
The Priscilla tunnel, the main working adit, was driven 800′ to
an elevation of 90′ above creek level, and cuts the contact 250′
though the highest point of contact on the surface will be 800′
cilla tunnel.

ves: were estimated Feb. 1, 1917, as 130,700 tons, averaging
with a net realizable value of $632,750. There were also 100,000
le low-grade ore at $6; 5,000 tons medium grade at $20, and 1,000
de at $100 per ton, a total of 106,000 tons of a net value of
value is principally in gold, the silver contributing 50c. to $1 per
unt has been taken in above estimate of ore below the Priscilla
In May, 1918, a winze was said to be down over 160′ in rich ore.

t: a well-equipped surface plant, also a reduction plant; the
e cyanide plant has a daily capacity of 150 tons. The plant, which
ons May 5, 1917, uses the continuous counter-current decantation
er for mine and mill is furnished by a hydro-electric plant at the
ing obtained from Grasshopper creek, 2½ miles above the mill,
et working head of 39′. During the winter, when water is not
esel oil engine will furnish the power.

sts were estimated not to exceed $2 per ton; mine and overhead
xceed $1 per ton. Average mill-heads were estimated at $10 per
xtraction of over 90%.

ant of 9,000 tons (yearly) capacity was reported under erection

ell developed and ore reserves, as estimated, are sufficient for 4
on. The possibility of developing new orebodies seems good.
1 ⅛ of the mineralized contact area owned by the company has
d, and no work goes below the water-level. Using modern methods
efficient management, the Bannack mine should have a large pro-
[illegible] a profit.

KE GOLD MINING CO. **MONTANA**

es Breen, gen. mgr., Helena, Mont. S. R. Brown, supt.;
foreman.

Cap., $650,000; $1 par.

Property: 19 claims, 18 patented, 7 miles S. W. of Rin from Basin, the nearest rail point. The formation is peculia lava flow containing numerous egg-shaped masses, technically netted with quartz threads carrying gold; the rock itself also and quartz films, containing gold. A large quantity of this posed by surface workings and tunnels. Over 20,000 tons of a 10-stamp mill in former years gave a recovery of $2.45 gold p ball-mill plant, driven by electric power, was erected late in 1 are low, probably not over 75c., and ore mills easily and cheap ought to pay if a large enough tonnage were handled.

POTOMAC COPPER CO.

Office: Hirbour Bldg., Butte, Mont.

Officers: Wm. P. Jahn, pres.; Paul A. Gow, v. p.; J. J. George E. Palmer, treas., with N. J. Bielenberg, John Harr Higgins, directors.

Inc. Nov. 30, 1918, in Montana. **Cap.**, $1,500,000; $1 standing. Application made for listing on New York Curb. and Registrar Co., 66 Broadway, New York, transfer agent and meeting, second Tuesday in March.

Property: 20 claims, about 300 acres, in the Copper Cli county, Montana, 12 miles north of Bonita, Mont., on N. P. from Potomac, terminus of a branch line of the C. M. & St. amined by W. H. Weed and P. A. Gow, 1919.

Discovered in 1881, the property was desultorily operate by an English syndicate in 1900, when selected ore was sorte

Geology: ore occurs in six well-defined fissure veins and in faults between this and an impure limestone. The ve in a zone of sheeting, 1,200' or more wide, and a mile long. enargite, accompanied by famatinite, pyrite and some copper outcrop of mineralized brecciated quartzite, 100' high, 400' lo thick, and known as the "Copper Cliff," is estimated to contain of 2½% copper ore, with $2.50 per ton in gold. The report the ore in this "Cliff" is $5,000,000. A second ore zone, cut b tunnel, shows 40' of 2¾% ore with $2 gold.

Development: by several tunnels, the two lower ones the veins. The lowest is a crosscut, 500' long, to be extended to cut the veins at depth of 400'. This will be the main ha extraction from all veins of the property. At the Leonard exposes a 10' vein with 60° N.-W. dip and good average value

Company has electric power, a new and excellent wagon and an old logging railway grade much of the way which railroad. An 11-mile transmission-line, compressor, and dwel late in 1919.

Company estimates that with 90% recovery, milling 10 t 90% of value of concentrate paid for by smelters, the ore value of $9.42 per ton and a net profit of $3.65 per ton.

Property covers an entire mining district, showing vein amounts of profitable concentrating ore and a promise of se tonnages by development work. It is a very promising prop

240 acres, situated 1½ miles from Armstead, Mont. ourse of several E.-W. fissure veins, 3' to 3½' wide schist and limestone. The ore carries 3 to 9%

nd several shallow openings, all said to show 3½ to 10% ore. An open-cut has secured.

SHEILS & IRONSIDE MINING & MILLING CO. MONTA

Office: Dr. F. A. Ironside, 16 North Main St., Butte, Mont.

Officers: John Sheils, pres.; Stanley Ironside, v. p; F. A. Ironside, treas.

Inc. 1913, in Montana. **Cap.,** $500,000; shares $1 par; 446,000 issued.

Property: 6 claims, 2 patented, 120 acres, situated 13 miles N. E. Butte, and an equal distance from Boulder, Jefferson county, show a fissure with ore shoots 250' and 90' long occurring in granite. This granite is an almost vertical dike, greatly altered and mineralized, having a maxi width of over 50'. The ore occurs entirely in the dike, not as a segregation in quartz veins running with the dike, within it or at its margin. Orebo 3' to 5' wide and carries silver, lead, copper, zinc and some gold.

Reported on by W. L. Creden, H. D. Morse, C. J. Stone; also by Morris.

Development: by 3 tunnels, main one 1,850' long, with several stu and a 50' winze with 200' of drifting at the bottom.

Equipment: includes hoist, 3 drills, electric power, and a 100-ton centrating mill.

Production: for 1915-16 amounted to 476 tons averaging 4.5% cop 26.6 oz. silver, and $4.40 gold. Shipped about 40 tons of concentrates mon in 1917, and until mine was closed, February 1, 1918.

SILVER CABLE MINING CO. MONTA

Address: Box 1403, Missoula, Mont.

Officers: J. D. Corbett, pres.; George Falligan, v. p.; C. C. Mott, treas., with J. W. Kennedy, H. E. Chaney, and W. J. Rhoades, directors.

Cap., $1,250,000; shares $1 par; assessable. Listed on Butte Excha Annual meeting, first Saturday in July.

Property: 7 claims in east Coeur d'Alene district, just over the Mo tana line on the eastern slope of Bitter Root Mts., 5 miles from the Nort Pacific R. R.; part of the land lies in Idaho. Said to have a high body of s lead and zinc ore, from 500' to 700' high, proved for over 200' in length, and f 4' to 6' wide. Ore is said to average better than 15% zinc.

Development: by 1,500' tunnel, raises and drift in ore. Reported veloping in 1919.

SILVER FISSURE MINING CO. MONTA

Address: A. W. S. Cochrane, sec., 30 Broad St., New York.

Property: near Polaris, Beaverhead county, Mont., known as the P laris mine, formerly operated by F. Aug. Heinze, carries silver and gold.

Shut down 1915, but leased to and operated by Silver Fissure Silver Min Co. (which see), since 1918.

SILVER FISSURE SILVER MINING CO. MONTA

Address: Seligman & Meyer, 61 Broadway, New York.

Officers: A. J. Seligman, pres.-treas.; J. Blamner, v. p.; D. J. Verge sec., with J. F. Mercer and P. Mangone, directors. H. W. Chadwick, asst. Glenn Anderson, mgr., Butte, Mont.

Inc. in Delaware. **Cap.,** $1,000,000; par $1; all issued. Annual me first Monday in November.

Property: the Polaris mine, 6 patented claims, 180 acres, in Beaver county, owned by the Silver Fissure M. Co. Ore reserves, July, 1918, re 69,620 tons containing 1,507,300 oz. silver and 1,300 oz. gold. A 50-to employing chloridizing roasting and hypo-sulphite leaching was erected 1918. Property is a good one, but its operation is greatly hampered by situation.

and T. A. Grimes, directors.
), 1907, in Montana. **Cap.**, 5,000,000 shares; 10c par; non-
tanding 3,633,900. Annual meeting, third Tuesday in June.
7 claims, 3 patented, 140 acres, 20 miles S. of Helena, and a
Wickes, Mont. The claims show N.-S. and E.-W. fissure veins
aplite, andesite and dacite. Ores carry gold, silver, copper and

nt: by Bunkerhill tunnel, 1,030′ long and Tulare tunnel, 700′;
Total workings, about 2,500′, greatest depth, 350′.

Production: test lot of 31 tons in 1917 returned 4.87% copper, 17.6 o silver, and 0.01 oz. gold, equal to $24.94 per ton. The cost was $4 per ton.

Appears to be a promising property.

WILLOW CREEK MINING CO. **MONTAN**

Address: P. H. McDermott, chief owner, Helena, Mont.

Property: Owns the Mountain Meadow group, 4 miles from Pon Madison county, Mont., on Willow creek. Mine shows a 12′ fissure vein granite carrying free gold with pyrite and chalcopyrite, both with gold valu in quartz gangue. Has a small mill. Regarded as promising.

A small shipment was made in July, 1917, but no recent returns secured.

WILSON MINING & SMELTING CO. **MONTAN**

Address: William Burke, pres. and mgr., Saltese, Mont.

Officers: A. Burke, v. p.; G. W. Dougherty, sec. and treas.; M. Ha and G. Early, directors.

Property: 2 groups of claims on Silver and Big Thunder Creeks, abo 2 miles from Saltese, Mineral county; 6 claims on a lead and silver vein fo one group, 8 claims showing a shoot of copper, in the other group Commerc lead ore is reported in an upper tunnel.

An assessment to pay for further exploration was levied in March, 1918.

WINDFALL PLACER MINING & DEVELOPMENT CO. **MONTAN**

Office: Missoula, Mont.

Officers: W. J. Johnson, pres.; Chas. Marsh, v. p.; A. J. Gibson, trea A. K. Anderson, sec.-mgr., with Gunnar Nordquist, directors.

Inc. in Montana. **Cap.**, $1,000,000; $1 par.

Property: 620 acres of placer ground and of water rights, dump, a timber lands, of which 300 acres are said to contain gold-bearing gravel, miles from Quartz, Mineral county, and 3 miles from the N. P. and C. M St. P. railroads. The district is reported to have produced over $20,000,000 go

Geology: bedrock consists of soft shale, sandstone and quartzite, ov lain in places by porphyry, above which is from 15′ to 40′ of gravel, averagi 30 cents a cubic yard. The gold is high grade, being 984 fine.

Development: ground has been opened by the "booming" system moving gravel. Dumping facilities are good, there being a 1,200′ drop betw the upper and lower ends of property.

Equipment: includes a 6,000 board feet sawmill, a 6,400′ flume, 30″ 30″ in cross section, 1,600′ of 16″ to 24″ pipe having a vertical drop of 395′, bottom of which is a "Y" with two 11″ branches carrying water to giants fit with 2, 3, 4, or 5″ nozzles. An average of 300 miners' inches of water is av able for 7 months each year. A derrick is employed to lift up to 8-ton boulde and in 1918 an hydraulic elevator of 5 tons capacity under a 300′ head of wa was installed. Sluice-boxes consist of double line 36 by 48″ with grade of in 12′.

Production: approximates $360,000, from 200,000 cu. yd. Costs are es mated at 10 cents a yard.

No recent production figures are available.

WISCONSIN MONTANA MINING CO. **MONTAN**

Office: Downing, Wis. **Mine office:** Superior, Mont.

Officers: A. O. Nichols, pres. and gen. mgr.; D. McDonald, v. p.; C. Coolidge, sec.; Dr. P. A. Beebe, treas. and R. A. Cleveland, directors.

Inc. January 29, 1900, in Wisconsin. **Cap.**, $50,000; shares 5c par. A nual meeting, first Tuesday in February.

Property: 16 patented claims, 320 acres, and a 5-acre millsite, 1 m from the Missoula river and about 10 miles east of Superior. Claims sh fissure veins cutting through limestone, slate and quartz; one reported as wide, with irregular shoots assaying from 1 to 42% copper, with gold, silver, a lead values.

Development: by tunnels of 40′, 80′, 400′ and 710′ length, with lates A 3,000′ tunnel was planned. Mine was under lease in August, 1917. No cent returns received.

ACER MINING CO. **MONTANA**

'16 the following companies were organized under the laws e Anaconda owning 78% of the stock of the first named and other two companies; Andes Copper Mining Co., cap., $50,- $100 par; Andes Copper Co., cap., $50,000.000, shares $25 par; Railway Co., cap., $5,000,000, shares $100 par. These com- ting in Chile, and development so far shows 100,000,000 tons of These will be found described in the chapter devoted to Chile. made in 1916 amounted to $7,968,836. This includes total cost of er Co. stock acquired to Dec. 31, 1916; 20,740 shares of Alice fining Co.; 26,100 shares of Greene Cananea; 50,000 shares of ., and 188,300 shares of Butte Copper & Zinc.

estments, with $4,550,600 of Liberty Bonds, totalled $9,066,389, uding the cost of stock issued during the year by the South nies to reimburse Anaconda for advances made; 28,740 shares of Zinc; 50,900 shares of Inspiration Cons., and 2,700 shares of

sum of $8,883,628 was invested. Aside from advances made erican companies, the International Smelting Co. (a subsidiary), ion on 630,000 of the total of 1,250,000 shares of the Walker California (which see), and $794,668 in purchasing land and rizona Oil Co., which has producing wells in California.

ompany owns 1,168 acres mineral claims at Butte, including formerly held by the following companies: (1) **Boston & & S. Mng. Co.**; (2) **Butte & Boston Cons. Mng. Co.**; (3) . **Co.**; (4) **Washoe Copper Co.**; (5) **Parrot Silver & Cop- ice Gold & Silver Mng Co.**; (7) **Trenton** (formerly Colo- **ev. Co.**; (8) **Big Blackfoot Lumber Co.**; (9) **Diamond Coal** 0) **Original Cons. Mng. Co.**; (11) **Colusa Parrot Mng. &** s the Southern Cross gold mines near Anaconda. In 1915 e Scott mine at Butte, and in 1916, the Pilot Butte mine.

ns 1,100,000 acres lumber land (Big Blackfoot Lumber Co.) and er, Hamilton, Hope, St. Regis, Mont.; and 13,280 acres coal tville, Wyo.; Washoe, Belt, and Sand Coulee, Mont.

mine was bought August 4, 1915, for $65,000. Company has a e Emma mine (Butte Copper & Zinc Co.) operated as a zinc ght the Czarroma claim fraction, containing the continuation of for $225,000 late in 1915. Options were secured on several the S. W. part of Butte. The E. portion of the Alex Scott Little Annie claim, were purchased for $750,000. Company the low-grade gold property, called the Porphyry Dike, near so on the Bonanza claims in the S. W. part of Butte, because zinc-silver ore in commercial amount. The Gambrinus mine July, 1918; and company bought a half interest in the Kit $48,000, the ground lying between the company's Orphan Girl an of the Davis-Daly Co.

Geology: Butte hill is a network of metalliferous veins, the older v nearly east and west strike being displaced by a number of northwest fault v cut in turn by still later northeast fault veins and these all cut by the R fault. The geology is fully described by Walter Harvey Weed in Prof. Pap (1912) of the U. S. Geological Survey, which can be had free of charge f that Bureau. The matter of clearly defining apex and extra lateral rights, u the present Federal mining laws, is one of the greatest possible difficulty, an the past has led to litigation costing millions of dollars, all of which ultim had to be paid out of the profits from copper produced. In 1916 the mines owned by the Anaconda were developed by 42.06 miles of new opening which 2,879′ was shaft-sinking.

The mine waters are highly charged with copper, and precipitation p have been built at practically all of the big mines merged in the Anaconda. scrap iron, tin cans and wire rope are used as precipitating agents, these ar commanding a standard price of 1 cent per pound. The flow of the water i precipitation tanks and launders is much more rapid than is the case in the Spanish lixiviation plants. The principal plant, at the Leonard mine, cost a $20,000, and treats water from all of the Boston & Montana mines. It h building for drying and shipping the copper precipitate.

Mines and shaft equipment: by the merger of the Anaconda and Bo & Montana, both among the six largest copper producers of the world, and addition of a number of other mines of second and third rank in produ capacity, the Anaconda became the largest copper company in the world, em ing normally, 8,863 men in the mines and 1,854 on surface at high wages (a agreement, arranged July 1, 1919, and good for one year, gives miners $ first-class engine-men, $7.75; journeymen in other trades, $6.50; and la $5 per day), and with a payroll in Butte alone of over $1,000,000 monthly, very large additional payrolls at its works in Anaconda and Great Falls. company's interest in its employees is genuine, and in addition to a depart of labor, and a safety-first organization, a large area of ground near Ana called "Opportunity" has been drained and cut up into large lots for fa and residences.

As property lines have been practically eliminated, so far as underg work is concerned, by the merging of various companies, and workings been connected, the property can be most usefully described in sections c by the familiar names used under former ownership, or by the names of t operating shafts of the company.

The many mines of the Anaconda Company have immense reserves o of all grades, and each year's development maintains the required tonnage.

The Anaconda mine was opened, 1880, as a silver producer, but at 150′ depth the oxidized silver ores were succeeded by high-grade copper mainly chalcocite and bornite, while at depth there is a large amount of enar Net earnings of the mine, during the 15 years, 1880-1894; are unknown, may be safely estimated at not less than $50,000,000. At a depth of about quartz pyrite veins of the Anaconda showed impoverished values, there considerable pyrite, but the fault veins showed large orebodies at depth 1,200′ to the deepest levels yet reached in mining which is 3,400′ in the High mine.

The Anaconda mine proper has a 3-compartment shaft, 2,800′ deep, conn underground with the Never Sweat, St. Lawrence, Bell, Belmont and Mou mines. The mine has electric locomotives for tramming on several le Hoisting is by 8-ton skips, swung under double-deck cages and worked in co balance.

The St. Lawrence mine has a 2,600′ three-compartment main shaft, nected underground with the Anaconda, Never Sweat, Mountain View Pennsylvania mines. The St. Lawrence has been on fire since 1889, in an ex sive area above the 1,100′ level. The fire has been fought constantly, walled off by cement bulkheads, and while it cannot be extinguished troublesome, it does not result in the loss of copper, as the sintered ore rem after the burning of the sulphur can be mined later, and the mine water strongly charged with copper, much of which is recovered by precipitat

e it is run over scrap iron and cement copper is made. The hoist ylinders, raising 5-ton skips swung under single-deck cages.
r Sweat mine has a 2,500′ three-compartment main shaft. Square- is used in stoping, as well as back filling. Some trouble has been rom the St. Lawrence. The surface plant includes a 28″x48″ double ising 3-ton skips swung under single-deck cages; also a 7,500 cu. ft.

ont mine, about 1 mile south of the main shaft of the Anaconda, r, has a new 2,400′ four-compartment working shaft, the largest . Connections have been made with other mines and a 1,500-ton ed. Equipment includes a powerful new hoist, with capacity of rom the Corra mine.
ond mine has a 3,400′ three-compartment shaft, developing the d other veins to the bottom level. Equipment includes a 34″x72″ g single-deck cages with 5-ton skips: and 2 electrically-driven f 7,500 cu. ft. capacity each.
Ore mine is one of the deepest in Butte, having a 3,600′ three- shaft, producing high-grade chalcocite. The High Ore does the number of connecting mines of the Anaconda, handling all water conda, Washoe and Parrot properties. The mine has 9 electric ood for 600 gals. per min., with 1,200′ lift. These are located on ′ and 2,800′ levels. Relief pumps to run by steam or air are also ferent levels.
c mine has a 2,500′ three-compartment shaft, connected with the he High Ore mine. The Modoc has several veins besides the one ts chief ore supply coming from the veins, which are stoped up utte Co.'s boundaries on the north and to the Ballaklava mine on

tain Chief mine, area 1.15 acres, lies next north of the Butte- l, is said to have produced about $1,500,000 worth of ore from a The Mountain Chief is developed to 500′ by its own shaft, but s are worked through the High Ore mine.
t group of properties includes the former holdings of the Parrot r Co., 19 fractional claims, area 40.6 acres, embracing the Parrot, llona, Original No. 6 and the Oro Butte, Champion and Copper l various other small properties. Main shaft of the Parrot mine an air shaft, and the ground is worked from the West Steward at shafts.
Mina 1,200′ shaft is now used for air only.
al, Steward and Gagnon shafts are on a western continuation of nd Steward veins, and in 1912 a continuous ore shoot of good 00′ long, was opened in the bottom level of these mines.
al mine has a 3,100′ shaft with three compartments below 1,100′. ocated, 1864, in the first stampede to the new Silver Bow diggings . st mine patented in Butte.
d mine has a 3,800′ vertical shaft, showing, in the bottom work- . carrying good copper ore, with silver values. Equipment in- eel headgear and a 34″x72″ first-motion duplex hoist, good for

nine, purchased for $1,125,000 cash, in 1916, is now part of the ine. It has been equipped with a steel head-frame and large

n is the westernmost of the productive copper mines of Butte. rried more silver than those of the mines farther east and have f minerals, such as hübnerite, unusual elsewhere in the camp.
n old 2,800′ three-compartment incline shaft, sunk at an angle sed as an auxiliary shaft, ore being hoisted through the Original vertical 2,800′ shaft, near the west end of the property, is as ntilation only. Equipment includes a 22″x48″ hoist.
ght mine, once the principal producer of the Washoe Co., has

ore averaging about 1 oz. silver for each unit of copper. The Moonlight has 1,700′ three-compartment shaft, connected underground, with the Blue Ja Never Sweat and Anaconda.

The Poulin mine, formerly owned by the Washoe Co., has a 1,200′ shaf but is operated through the 1,500′ Buffalo shaft, and is to be operated for zinc or

The Silver Bow No. 1 mine has a 1,000′ shaft, connected with the Pen sylvania, Berkeley and No. 3 mines. It has been a good producer for many year

The Berkeley 1,500′ three-compartment shaft has a 28″x48″ double dru hoist, handling 3-ton skips in each compartment.

The Rarus mine has a 2,800′ three-compartment shaft, connected with th Tramway mine. The veins have divergent branches, and constitute a sort stockwork, with an ore zone up to 300′ in width, in places. It has been equipp with steel head-frame and 34 by 72 in. air-operated hoist.

The Tramway mine, lying between the Minnie Healy and Rarus, former owned one-third by Butte Coalition, and two-thirds by Butte & Boston, has shaft that is the central shaft for the Minnie Healy-Rarus group. The Tramwa shaft, 2,800′ deep, has 3 compartments, each 5′x4′ 2″ in the clear. The first the new levels in the Minnie Healy is the thirteenth, about 50 below the old 1,5 level, in which fire was burning, 1908-1909. The Tramway has numerous bod of 5 to 6% copper ore, with good gold and silver values, the really great or bodies coming in between the 1,300′ and 1,400′ levels, and on the 1,700′ le there is an orebody up to 75′ in width, averaging nearly or quite 7% copper.

At the Tramway mine equipment includes a 92′ steel head-gear with sheave wheels. A 34″x72″ Allis-Chalmers 2-cylinder Corliss hoist, with drums, using 1½″ round wire cables, has capacity to raise 7-ton skips from depth of 3,500′. Each compartment has 5-ton skips changeable to 4-deck cage for lowering men, an auxiliary hoist being used for sinking and handling sup plies through the third compartment. The main surface plant of the departme at the Tramway shaft, includes a boiler house, engine house, carpenter sho machine shop, office buildings, warehouse and changing house with hot an cold water and shower baths.

The Nipper mine of the Red Metal group, includes the Nipper, Chief Josep Balm and L. E. R. claims. The Nipper mine, area 15.18 acres, has 2 shafts, 1,000′ and 1,200′ depth, with 12 exits, being connected underground with th Parrot, Never Sweat and Little Mina mines, and has been operated to som extent through the Parrot shaft.

The Green Mountain mine has a 2,200′ three-compartment shaft, not deepen for several years.

The Mountain Consolidated mine has a 2,500′ three-compartment shaft, wi a good ore showing on the 1,400′ level and below, and an especially good showi on the bottom level, at 2,500′. A Nordberg first-motion hoist was erected in 19 The East Grey Rock shaft is used for ventilation only.

The West Grey Rock mine, producing ore carrying values mainly in go and silver, with a small percentage of copper, has a 1,826′ shaft, the 1,800′ bei the deepest level open in 1916. The veins, though small, carry good ore, ri in silver. The Corra shaft is kept open for ventilation.

The Leonard has an old 1,800′ shaft, used for men and supplies, and th main, or No. 2, a new shaft of 4 compartments, 2,800′ deep. Mine is timbere with 12x12″ and 14x14″ square sets, requiring monthly an average of abo 1,000,000′ of mine timber, board measure. The 2,000′ level shows equally lar and good orebodies. Water from the Mountain View, Pennsylvania, Tramwa East Colusa and West Colusa mines drains to the 1,200′ level of the Leona and is forced thence to surface by 4 electric pumps. Valves are of pot for and the entire water end is phosphor-bronze, columns being lined with woo thoroughly soaked in oil, to withstand the corrosive action of the mine waters.

The Leonard surface equipment is the show plant of Butte, and is ve complete, including a 152′ steel headgear and 2,000-ton ore bins. The pow plant has ten 250-h. p. boilers, and a 34x72″ hoist, good for 3,500′ depth, rai cages with 5-ton skips swung under, with 1½″ round cable. There also i

g engine. Plant includes 3 air compressors of 3,000, 4,000 and 5,000
y per minute, respectively, and 2 of 7,500 cu. ft. each.
t Colusa mine has a 2,200′ three-compartment shaft, with levels at
s to depth of 1,200′, and thereafter at 200′ intervals. Shaft
arly in 1910, and cut down to 3 compartments, being given false
ate squeezing, which caused much trouble in the past. Mine is
1 10x10″ and 12x12″ square sets, and shows vein matter up to 400′
nnection is had underground with the Mountain View and Leonard
ice equipment includes a 23x60″ hoist, operating 2 double-deck cages,
id a 28x48″ single drum auxiliary hoist.
t Colusa mine has a 2,000′ three-compartment shaft with levels
Y intervals from 300′ to 700′. The mine has a vein of about 65′
·ly averaging 3 to 4% copper, but mine is now an important pro-
ore for the new electrolytic zinc plant. Production is about 200

ısylvania mine has a 2,800′ three-compartment shaft, with levels
ıls from 100′ to 1,000′, and at 200′ intervals below. This property
stopes above the 600′ level, ore lying nearer surface than in most
mines. Equipment includes a 350-gal. electric pump on the 1,800′
water to a crosscut to the Leonard mine, whence it goes to the
plant. Surface equipment includes 2,000-ton ore bins, a 34x72″
ɔerating two 5-ton skips and a 28x48″ single drum hoist sinking

er State mine in the northwestern part of the camp, develops the
Jessie, Edith May, Emily and several other veins. Mine has a
npartment shaft with extensive orebodies opened up on the 1,100′,
1,600′, 2,000′ and 2,200′ levels. The Emily shaft auxiliary to the
eepened from 400′ to 817′, or 1,000′ level of the Badger and con-
n 1912. Property is now an important producer of copper and zinc

ıtain View mine has a 2,249′ three-compartment shaft, and a 2,000′
e Mountain View shows 6 veins of 8′ to 60′ width, ore averaging
:opper tenor, being among the richest mines in the camp. Equip-
4,500-ton ore bins, a hoist good for 3,000′ depth, and a 28x48″
ıxiliary hoist.
c shaft on one of the most easterly claims of the company is 900′
is now a producing property.
ıleaf mine, located east of the proven ore zone of Butte, has a
ith about 800′ of lateral workings. Work was suspended, July,
roperty is by no means devoid of promise.
ıern Cross mine, situated in the Georgetown district, west of
·chased 1912, for $370,800, is a gold property developed by a
ipped with electrical machinery. It was extensively worked be-
zed ore is good iron flux, but was closed permanently Dec., 1919,
:xhaustion of orebodies.
mpression plant at the High Ore mine has eight 1,200-h. p. air
ach with a capacity of 7,500 cu. ft. of free air per minute. The
ed to 90 lb. and is used in the hoisting engines in place of steam.
′ long, contains 25 receivers, each 10x30′ on the ground, for the
. this air-storage plant having reserve power for 8 hours. In
ı this plant is the largest steel water-tank in the world, 100′ in

wer, supplied by the Montana Power Co., is brought from Great
. and from Canyon Ferry, near Helena, 70 miles distant, current
the mine with a primary voltage of 50,000 volts, reduced to 2,000
former station, just outside of Butte, power being distributed to
rkings from a main station at the Never Sweat mine, the current
40 volts.
and fire protection have been given much attention by Anaconda
in 1917 a systematic plan covering all underground workings was

adopted, electrically-driven surface fans with a capacity of 696,100 cu. ft. free air per minute being installed. In 1918, five Sirocco double and single-i fans, of 228,000 cu. ft. capacity, were put in. To increase the velocity of currents in shafts, experiments were made at the Parnell shaft, inserting c crete slabs between the timbers. Results were so good that all shafts will b arranged.

As a protection against fire, shaft and station timbers are covered by m laths and cement coating at the Belmont, High Ore, Parnell, Rarus, and Tr way shafts. At other points underground, timbers are coated with cement the "Gunite" method.

New development—the total at all mines:

Year	All work feet	Shafts deepened, feet	Ore mined, tons	Cost Minin per to
1918.....	220,704	4,991	4,918,468	$6.07
1917.....	182,688	2,809	4,193,624	5.86
1916.....	222,103	2,879	5,582,077	4.42
1915.....	186,560	.....	4,383,339	3.93

The normal daily output of ore is 16,500 tons.

A feature of work in 1917 and 1918 was the mining of pink manganese (rhodochrosite) from the Emma and other mines. This was concentrated, partly sold or used in making ferro-manganese at Great Falls.

Coal mining—the quantity raised and its disposition.

Year	Mined tons	Used at coal mine, tons	Used by Anaconda, tons	So to
1918.....	1,065,743	56,589	632,012	374
1917.....	1,054,510	66,238	551,533	43
1916.....	964,122	64,773	616,910	282

Lumber Department—the mills at Bonner, Hamilton, Hope, and Regis had the following record:

Year	Timber cut, feet	Purchased, feet	Used at mills, feet	Sent to mines, feet	Used at factory, ft.	Sold, feet	
1918.....	82,950,859	41,219,939	1,415,915	72,162,891	2,208,966	35,765,541	54
1917.....	87,880,500	16,476,014	1,455,703	57,205,887	4,172,414	50,534,133	41,
1916.....	105,495,846	30,005,910	1,361,549	91,321,061	6,215,378	80,800,144	50

Profits from the coal and lumber departments were $1,295,119 in $363,312 in 1917; and $354,187 in 1918.

Railroad—the Butte, Anaconda and Pacific line had the follo results:

Year	Ore and freight, tons	Passengers, number	Gross earnings	Operating charges	Taxes, interest etc.	
1918.....	5,680,451	245,682	$2,122,607	$1,535,724	$213,960	$
1917.....	6,800,161	355,224	1,803,374	1,436,199	219,580	24
1916.....	8,416,003	408,865	2,199,611	1,464,796	207,648	52

The Washoe smelter, where all the Anaconda company's ore is concent and most of it smelted, is about 2 miles from Anaconda and 26 miles f Butte, all ore being hauled by electric power over the Butte, Anaconda & P R. R., owned by the company. In 1914-15 the entire plant was remodeled capacity increased to 15,600 tons per day, leaching and flotation plants insta an acid plant erected, a zinc plant put in operation and brick works built improvements costing, it is said, over $6,000,000. The results are so remark as to be almost startling. The great items of saving of the remodeled comprise coal-dust firing of reverberatory furnaces with greatly incre capacity (583 compared with 239 tons per day) with less slag loss; the a donment of briquetting and blast furnace smelting in favor of the new re beratory practice; the treatment of all ore in the Anaconda concentrator, ins of sending it to Great Falls; the introduction of flotation and the operat the leaching plant. The saving has been increased from 75 to 96%, the tail formerly carrying 0.62% copper now carry but 0.1% copper—that is, 2 lb copper to the ton. The savings amount to 8.4 lb. copper per ton, and paid entire cost of reconstruction in the first half year of operation. This work

la company in the ranks of low cost producers and was a great metallurgists.

e Smelter: This plant can treat 16,000 tons of ore per day oke, 900 tons coal for reverberatory furnaces, 3,000 tons lime- 60 tons coal for power and heating. Sixty million gallons of ach day and 42,000 gals. per min. Three thousand, two hundred d at a monthly wage of $400,000 in and around the works.

orage bin the ore passes through an automatic sampler; thence itor plant of 2 great buildings, each housing 4 units com- rushers, Harz jigs for coarse and Evans jigs for medium rates, 4 sets of 55x24" rolls, 8 Wilfley tables using Butchart conda classifiers, six 7½'x72" Hardinge mills, each with 225-h. p. g steel linings and steel balls; 6 Dorr classifiers, 4 Minerals on machines, each having 15 agitators and 14 spitzkasten with Anaconda operates under license from Minerals Separation, from 4 to 12 cents per ton of ore treated, depending on quantity. i differs from the other 7 in having Hancock instead of Evans be mills using Forbes liners and pebbles.

oncentrate goes to the blast furnace, the fine to settling tank, centrate to Dorr thickeners, 12x50', discharging 60% solids

ent is very fully described in the Mining World, March 4, 1916, ns of A. I. M. E. for 1916.

oaster divisions, one having Evans-Klepetko type of McDougal idling 215 tons per day of fine concentrate, fine lime rock and igs. A Ruggles-Coles dryer prepares concentrate for the acid verter. Roaster No. 2 contains 28 Anaconda roasters, a modi- ougal furnace and treats material from the tank house and

itory furnace plant is in 2 buildings, each with 4 furnaces and ch furnace is 143x23' and handles 700 tons material per day tons coal in 24 hours. The coal previously ground in Raymond verizer to 100-mesh, is blown into furnaces through Warford ounces pressure. Coal dust firing is much more efficient than ach furnace develops 6½ boiler h. p. per ton coal burned, hot ough Stirling boilers. Furnaces are fed from top, banking ist side walls. Slag flows off continuously instead of being nmed and matte is tapped at intervals, running into 10-ton rect to converters.

iace building contains two 51' furnaces, and one 87' long, each s. The latter handles 3,000 tons per day, the others 1,600.

ding contains 7 stands for Great Falls type converters. Latter iigh, and weigh 450,000 lbs. with magnesite brick lining. The nverter is 85 tons matte, 35 tons ore, blown to blister copper Blister copper is poured into 2 casting furnaces, each of 140 one in reserve. Air at 15 lbs. pressure oxidizes copper which ind poled and poured into a casting machine. All handling e by electricity.

iing plant, 2,000 tons capacity, recovers the copper from sands dump. These sands are roasted in McDougal furnaces, cooled wetted to lay dust and conveyed to tanks 50' in diam. and 14' 1,050 tons, where it is leached by hot solution of salt and copper precipitated from solution by scrap iron.

int treats flue dust in White-Howell rotary furnace, the dust- a Cottrell electrical treater for removal of dusts, then cooled nic trioxide removed by a second Cottrell treatment, the fine arged by a screw conveyor into barrels.

naking 11,000 standard fire brick per day and another making k from retreated tailings is one of the newer features of the

The reverberatory costs have been reduced from $1.75 to $1.25 per ton ore by coal firing and other changes in practice, as compared with $1.35 p ton of charge for the blast furnaces, but so much limestone has to be used the blast furnaces charge that the cost, per ton of copper ore, is higher.

It has been found that leaching produces cleaner tailings than flotati though other factors equalize the 2 processes, since for leaching the roasti costs are 25 to 30c., excavating 14c., hauling 8c., and other costs 33c., a total 80c. per ton, using 65 lb. of 60% acid for 9 lb. copper. Over 500,000 tons tailing and ore are leached annually.

Full description of the Washoe smelter plant and the technical treatm have been published in the Trans. Am. Inst. M. E. and in Mining & Scient Press, Feb. 26, 1916, and Mining World, March 4, 1916.

The acid plant produces 200 tons a day of 60% acid, but a much big plant will be built in the next few years to supply acid for the zinc plant a other uses.

The changes in the Great Falls plant have been equally important. T refinery has been enlarged 50% and now turns out about 200,000,000 lb. refined copper a year.

Probably the most important event of recent years was the production a large scale of high-grade electrolytic zinc. The 10-ton test plant showed su good results that a 2,000-ton concentrator, using flotation, was erected at An conda, and a refinery of 100-ton capacity of metal per day at Great Falls. Bo company and custom ore is treated. The refinery was increased to 150 tons spelter daily. In two years plant improvements at all points cost $13,645,9 Changes in practice are ably described by Frederick Laist in "Eng. & Min. Jou of October 7, 1916.

In 1917, work was started on a new stack at Anaconda, 585′ high, with inside diameter of 70′ at bottom and 60′ at top. This was finished and co nected with the 20 Cottrell electric precipitators in May, 1919. The brick w made from tailings from flotation plants. To treat flue-dust, a 100 by 20′ rev beratory furnace was erected near the Cottrell treaters. Two sets of treat are connected with this furnace; one removing dust, the other removing arse from the gases. This arsenic will be saved in marketable condition.

The copper rod and wire manufacturing plant at the Boston & Monta works at Great Falls, put in operation June, 1918, is the first rod and wire pl to be built in the West, and marks the entrance of Anaconda into a new fi that of manufacturing.

The Chicago, Milwaukee & St. Paul system requires large quantities of w and rods in connection with its electrification, as will other northwestern r roads, and to meet this demand was one of the reasons promoting the constr tion of the Great Falls plant, the manufacture of rods and wire at Great F obviating the expense incident to shipping refined copper products from Ea plants to Northwest points.

Five electric furnaces, for the manufacture of ferro-manganese, w erected in October, 1918, but were closed in December, on account of lac demand resulting from the end of the war. In 1919, this plant was re-model for the production of calcium carbide. In January, 1920, manganese ore again being sent to this plant. The manufacture of fertilizer is also under utilizing acid from the reduction works and a deposit of phosphate rock Maiden Rock, 45 miles from Anaconda. Present production of 50 tons fertilizer daily will be increased to 1,000 tons daily by end of 1920.

With the proposed 25% increase in the capacity of the zinc reduction pl at Great Falls, which now is capable of producing around 7,000,000 pounds spelter monthly, the proposed brass works at Great Falls is expected to be re sidered by the Anaconda, as freight charges east would cost the Anaconda more than a brass product, which is made up of an alloy of copper and zinc.

In order to secure additional roasting capacity for the zinc plant at Gr Falls, 14 of the 28 furnaces for the copper-leaching plant were re-modeled roasting zinc concentrates.

on—omitting outside ore and metal, excepting zinc:

Inc. March 15, 1907, in Arizona. **Cap.**, $2,500,000; shares $10 par assessable; fully issued. Bond issue of $200,000, 7%, dated Jan. 1, 1916, ized with $95,200 issued. Listed on Boston and Butte Stock Exchanges. a 50c. dividend August 1, 1910. Boston Safe Deposit & Trust Co., transfe Federal Trust Co., Boston, registrar.

Interest on bonds unpaid since June 1, 1917.

Property: the Burke and Ballaklava claims, about 6½ acres in the part of Anaconda hill, adjoining Mountain Chief, Modoc and High Ore of the Anaconda Copper Co. Property willed to Bishop Carroll of the C Church, who sold it for $400,000 cash to this company.

Claims form a narrow tract 1,960' long running with the veins on the

Butte hill. The Burke vein crosses the claim of that name and
d in the Modoc mine. There are 4 veins, but one of which is
ble. This vein is generally correlated with the Jessie, but com-
nditions led to a lawsuit with the Anaconda Co. for ownership
ody mined on the 800′ level. This suit was settled by a division
Nov. 28, 1913.

nt: 1,625′ three-compartment shaft with 12 levels. The mine
ed on the 800′ level, for ventilation and safety, with the Modoc
aconda, and on the 1,200′ level with the West Colusa. This
for drainage.

n the 100′ and 300′ levels show ore carrying 5 to 8.5% copper
. silver per ton, from which small shipments were made. The
pyrite and a little high-grade silver ore, and the 700′ level shows
sive bornite, pyrite, glance and some chalcopyrite, all argenti-
l ore production has come from the 800 to 1,600′ levels, inclusive,
chalcocite, carrying good silver values. The vein ranges up
carrying rich ore on the 800′ level; the 1,200′ level shows the
width, with ore averaging 4 to 4.5% copper, and the 1,400′ level
lcocite and bornite of about 7.5% average copper tenor. This
oped westward to the workings of the High Ore mine, whose
uous with those of the Butte-Ballaklava mine.

WHACKER MINING CO. **MONTANA**
essey Block, Butte, Mont.
Frank, pres. and gen. mgr.; H. I. Wilson, v. p.; H. Frank,
rald, treas.
1914, in Washington. Cap., $1,000,000; $1 par; assessable;
al meeting, second Monday in January, at Butte. Security
trar Co., New York, transfer agents and registrar. Listed on
A dividend of 1c per share was paid Oct. 25, 1917.

Property was leased for one year to East Side Mining Co., incorporated by I. A. Heilbronner and Patrick Wall, April, 1916. Lease called for royalty 25% and shipments of not less than 1,000 tons a month. Controlling stockholders also gave an option on 51% of entire stock at 50c. a share, payments in 30 to 90 days and at intervals for 18 months.

Company is a reorganization of the Bullwhacker Copper Co., whose stockholders received share for share in the new company on payment of 15c. a share in six months' installments. This wiped out a debt of $121,200 due the sons of Patrick Clark (Clark Bros. & Klein) and put $20,000 in the treasury. Mine was profitable when leased, but ran into debt for an experimental leaching plant. The Mines Operating Co. secured control by buying three-fifths of East Side stock at 75c. per share.

Property: one claim, 20 acres, on the east side of the Butte district near the Pittsmont smelter. Easterly part of claim covers a zone of granite impregnated with oxidized copper ores, mined in an enormous open pit 200 across and 75' deep, from which 30,000 tons of 4.07% copper ore were extracted by lessees in 1912-13. It is a highly silicious ore.

Development: by an old 300' shaft with crosscuts beneath the orebody at that level, also several new shafts, proving an extension of the orebody beyond the open pit.

Equipment: includes hoist, compressor and a 75-ton leaching plant which as yet has not been successfully operated (described by P. E. Peterson in "Min. & Eng. World," Oct. 4, 1913, p. 584).

The orebody is extensive and, though probably not deep, has a large tonnage from which much money should be made. Deep development is expected to show veins carrying copper sulphides. Early in 1919, the company was reported shipping 500 tons of ore daily to the Anaconda company's leaching plant.

BUTTE-CABLE COPPER & GOLD MINING CO. MONTANA

Officers: Louis Feldman, pres.; Nicholas Bossnitz, v. p.; preceding officers, Wm. Henthorne, John Strasser, J. G. Kimball and Dan Kowsky, directors. G. W. Peterson, Anaconda, sec.

Inc. Nov. 21, 1906, in Montana. **Cap.,** $1,000,000; shares $1 par.

Property: 6 claims, 4 patented, 15 miles west of Anaconda, near Ca... Consolidated Mining Co., show a 3 to 4' vein carrying about 2' of commercial ore, giving assays of 11.9% copper, 156 oz. silver and 0.6 oz. gold per ton. Sullivan & Peterson, of Anaconda, offered stock at 15 cts. a share, Feb., 1911, to raise money for patenting claims. Idle at last accounts.

BUTTE CENTRAL COPPER CO. MONTANA

Fully described in Volume XI.

Property was sold to satisfy judgment for $57,000 at sheriff's sale in No... 1918, and bought in by Butte Copper & Zinc Co., operated by the Anaconda company. Butte Central, et al. did not redeem property.

BUTTE CENTRAL MNG. & MLG. CO. MONTANA

Offices: 27 State St., Boston, Mass.; and Butte, Mont.

Officers: Walter R. McDonald, pres.; William G. Burns, v. p.; Ralph Gallagher, treas., with S. S. Carpenter and Harry W. Davis, directors. W. Burns, sec.; Carl J. Trauerman, agent and mgr., Butte, Montana.

Inc. Aug. 11, 1914, in Delaware. **Cap.,** $750,000; $5 par; all issued. Bonds: $300,000 1st mortgage 6% 30-year gold bonds, all issued. Fifty-one per cent. of the stock is owned by the Butte-Detroit Copper & Zinc Mng. Co. and 66⅔% of the bond issue by the U. S. Manganese Corp. Federal Trust Co., Boston, Mass., transfer agents. Davison Company, 27 State St., Boston, Mass., registrars.

Property: company formerly owned the Ophir claim, 20 acres, at Butte, once owned and developed by the Butte Central Copper Co.

The Ophir plant and mill were sold by the Sheriff of Silver Bow county, Mont., October 31, 1918, to satisfy an old judgment. It was bid in by the Butte Copper & Zinc Co., a subsidiary of the Anaconda Copper Mng. Co., and not redeemed within the legal period.

Year	Ore Sold	Operating charges	Paid Anaconda	Net Profit	Surplus afte dividends
1919.....	$666,602	.....	$49,190	$49,190	$8,7
1918 (13 months)	$669,328	$47,582	.....	$619,986	$319,8
1917 (17 months)	1,535,163	1,025,013	$356,222	119,772	119,7

An initial dividend of 50c., $300,000, paid July 30, 1918.

Property: the Emma mine, 13 acres, and other claims totaling over 9 acres in the Butte district, 1½ miles from the main properties of the Anacond company. Mine was formerly developed to 800′ level, but due to low copp and relatively high zinc content of the ore, was idle for several years. Develo ment resumed by Anaconda by virtue of an option and lease, dated July 8, 19 given to that company. Terms of lease are as follows: the Anaconda C acquired an option for 9 months on all or part of the 88,300 shares of But Copper & Zinc Co. remaining in the treasury of the latter company, at a pri of $1 per share. The A. C. M. Co. took a lease on the Emma mine for 5 yea with privilege of renewal for an additional 5 years, and agreed to install equi ment and to unwater mine to the 800′ level. A new lease was obtained Anaconda on July 6, 1917, to run until 1931. For expenditures actually ma by the A. C. M. Co. in developing the Emma mine, the Butte Copper & Zinc C agrees to make payment in its capital stock in lots of 10,000 shares or fractio parts thereof, but total payment to the A. C. M. Co. for work and equipme shall in no case exceed 50,000 shares of Butte C. & Z. Co. stock. The A. C. M Co. shall have a right to abandon the leased premises if it finds working the impractical, or impossible, in which event all machinery or equipment install and permanently attached to the Butte property shall belong to that compan Further stipulations are provided in the event of a renewal of the lease.

The A. C. M. Co. has fulfilled the terms of this lease and taken up th shares optioned to April, 1916. An additional option on 100,000 shares was al exercised, and Anaconda now owns 217,040 of the 600,000 shares issued.

Development: aggregates several thousand feet from a 1,000′ shaft wi levels at 200′, 400′, 500′, 800′ and 1,000′.

The Emma mine is in the heart of the city of Butte, and as transportati facilities were difficult, a crosscut was driven 2,500′ from the 1,800′ level of t Gagnon mine of Anaconda to connect with and develop the Emma orebodi During 1918, rich zinc ore was opened, also considerable rhodochrosite (pi manganese), which was much in demand, and enhanced the value of the mi The manganese workings are kept open, as the ferro-manganese made at Gre Falls may eventually be sold as far east as Chicago, Reserves amount to seve hundred thousand tons of zinc-silver ore and as much manganese ore. T depletion of reserves and their low grade was offset by the ore opened on t 1,000′ level which is reported to be one of the best silver-zinc-lead bodies open by Anaconda on this property.

Production: in 1918 was 32,293 tons of zinc and 71,364 tons of mangan ese ore and in March, 1919, ore extraction was at rate of 2,000 tons of 19 zinc and 7 oz. silver ore per month.

Butte Copper & Zinc is rather an attractive property on account of the assur market for its ores. Its stock had a varied speculative career during 1918-19.

BUTTE & CORBIN CONS. COPPER MINING CO. MONTA

Officers: J. L. Templeman, pres.; Lewisohn Block, Butte, Mont.; L Williams, v. p.; J. B. Fitzpatrick, sec.-treas.; at last accounts.

Inc. May 1, 1907, in Montana. **Cap.,** $700.000; $1 par; issued 469,8 Annual meeting, February 4.

Property: 5 claims, 82 acres; also 10 acres timber lands in the Cor or Colorado district, on the eastern side of Valparaiso mountain. The ore a complex mixture of lead, copper, and zinc, occurring as short shoots in f veins in granite. Vein reported by company to average 8′ 4″ in width, a carry 4% copper, 6% lead, 2% zinc, 8 oz. silver, and $1 gold per ton.

Development: by shaft and the 500′ Rarus tunnel, which cut a at 165′ from the portal, assaying 2.5% copper, with paystreak carrying

copper, 8 oz. silver, and $6 gold per ton. Amount of ore on dump, $10 value, according to Ropes & McIntyre.
ast accounts.

h 7, 1916, in Delaware. **Cap.**, $2,500.000; $1 par. Transfer Trust Co., Boston, Mass., and United States Corporation Co., egistrars, State Street Trust Co., Boston, Mass., and Equitable York.
ɔwns 51% of the Butte Central Mng. & Mlg. Co. The U. S. p. owns 51% of the shares of Butte-Detroit Copper & Zinc Mng. agreement with shareholders of the latter company to exchange r common stock of the U. S. Manganese Corp. It is probable anese will eventually own all stock of the Butte-Detroit company.

JTH MINING CO. **MONTANA**

ıs. M. Everett, receiver, Lewisohn Block, Butte, Mont.
ı. B. Wolvin, pres.; C. M. Everett, sec.-treas; with Meyer Green, John W. Neukom, directors.
y is under lease to Mines Operating Co., of Butte, controlled by ıd associates, for 5 years, and has been in active operation since

ınesota. **Cap.**, $2,500.000; shares $10 par; 200.000 issued, bal- edemption of $500,000 bond issue, on which interest is overdue . and sinking fund provision not fulfilled. Company went into on friendly suit, March 16, 1915. Receiver's report shows ead of bonds and a floating debt of about $190,833 unsecured.

The prior lien is mostly for labor certificates ($39,000) issued in half payme of wages in 1914. Bankruptcy proceedings instituted in March, 1915, were s aside by the Federal Court, Sept. 29, 1915.

Property: Brundy group, at the base of the mountains east of Butt includes the Macarona, Montgomery, and portions of the Altona, Colleen Baw and Amazon claims. These claims aggregate 67 acres and are crossed by th Columbia Gardens street car line and adjoin the Pittsmont mine on the southea

The ore thus far mined has come from open-cut work on the hillsi back of the mill. This ore is an altered granite stained green and impre nated with silicate of copper with carbonate and oxide of copper in nes and bunches. As mined in the cut it has carried a little over 1.5% copp and with a mechanical loader can, it is said, be put in the mill for 15c a to

Development: underground is mainly on the Montgomery claim o which there is a tunnel 1,200′ long and a 200′ shaft, the latter with extensi workings at 100′. The main ore body on Altona hill, to the east of th street car line, has several tunnels, proving the downward extension of th ore on the property.

Equipment: is electrical throughout and includes a 75-h. p. hoist an 750-cu. ft. compressor at the Montgomery shaft.

The Butte-Duluth mill was fully described by C. F. Sherwood in the Sa Lake Mining Review of November 30, 1915. Its total cost was $725,000.

The property has merit, and aside from its leachable ores has a d cided prospective value in the veins at depth of 1,000′ below the surface.

In bankruptcy proceedings the former superintendent, Mr. Sherwo said the mill ran on ore averaging 1.52% copper for 4 months before was shut down, and that drill cores to a depth of 202′ from the bottom a 23′ pit ran 0.98% to 2.70% copper. With acid at $12.50 per ton, a savi of 38c per ton could be made in leaching costs.

Production in February, 1915, was 120,000 lb. electrolytic copper an 30,000 lb. of cement copper. In 1918, the daily output was 175 tons of containing 1.75% copper which was sent to the leaching plant of th Anaconda company. A year later the quantity was 250 tons, averaging The mine is operated under a lease that is regarded by certain shareholde as worse than unfair to company, as the ore reserves are being depleted, an shareholders get nothing. See Mines Operating Co.

BUTTE EAST SLOPE MINING CO. MONTAN

Office: 619 Daly Bank Bldg., Butte, Mont.

Officers: E. P. Lomas, pres. and mgr.; M. F. Lyth, v. p.; C. B. Lom sec.-treas.; also directors.

Inc. Jan. 28, 1916, in Montana. **Cap.**, $500,000; $1 par. Annual meeti last Tuesday in January.

Property: 5 claims, 3 patented, 100 acres in Jefferson county, on E sl of range next east of Butte.

Geology: the country rock is granite and the vein formation is of t quartz-pyrite type. Ore carries gold and silver, with copper showing depth. At 90′ in depth vein is 23′ wide and assays $6.10 per ton.

Development: recently started, consists of a 185′ vertical shaft, wh is to be sunk to 500′, a crosscut driven at 250′, and hoist erected.

BUTTE & ELK RANGE CO. MONTAN

Address: Grant St., Pittsburgh, Pa.

BUTTE EXEMPTION COPPER CO. MONTAN

Officers: James H. Lynch, pres.; John A. Poore, v. p.; Butte, Mo with W. F. Love, M. J. Cavanaugh, T. P. Poore, and J. D. Crossman, dir tors.

Inc. in Maine. **Cap.**, $2,500,000; $1 par; 2,010,000 issued.

Property: consists of undivided ¾ interest in the Canyon, Colle Bawn, Exemption, and the entire interest in Mountain Spur lode cla approximately 56 acres, situated in the Eastern part of the Butte distri Silver Bow county.

Company has been inactive for a number of years.

REAT FALLS MINING CO. **MONTANA**

ed.

Butte & Superior has had eight years of costly litigation,
e Elm Orlu Mining Co. involving extralateral rights of cer-
nd the other concerning the patent rights of Minerals Sepa-
ation process. In this latter dispute, B. & S. has really done
the whole mining industry, in forcing the patents to be

Orlu, through its controlling company, the Clark Montana
ed suit against the Butte & Superior Mining Co. over rights
dies in the Elm Orlu claim and in the Black Rock claim
erior. The successive steps in this controversy are as

U. S. District Court decided in favor of Elm Orlu, giving

this company the westernmost 301′ along the vein and B. & S. all rights the Rainbow lode east of the point where it enters the Black Rock cl (B. & S.); subject, however, to the prior rights of the Pyle vein of Elm Orlu, below its junction with the Rainbow.

The B. & S. appealed this to the U. S. Circuit Court of Appeals at S Francisco in November, 1917, which affirmed the decision of the lower co and found that ore taken by B. & S. from the disputed ground was wo with interest, $177,707. Application to the U. S. Supreme Court for a view of this decision, was denied on May 10, 1918; but the Circuit Court Appeals granted an appeal to the U. S. Supreme Court, who heard the peal January, 1919, and sustained the decision of the Circuit Court of peals. The geological features of this case were presented by R. M. Sea in 'M. & S. Press' of May 10, 1919.

Another collateral issue of the case not wholly determined by the U. District Court involved claims on the part of Elm Orlu to certain orebod developed in the Black Rock claim 550 ft. eastward of the point ab referred to by reason of the alleged apex in the Elm Orlu claim of a bra of the Rainbow lode extending into the earth beneath Black Rock cl This issue was never tried as a settlement was arrived at in August, 1 and confirmed by the Court. By this agreement, Elm Orlu gets about and B. & S. 2/3 of the disputed area, while B. & S. pays Elm Orlu $2,500 cash for ore already extracted. Elm Orlu was awarded 186′ additional e ward on the Rainbow vein below 1,200′ and the B. & S. that portion ab 1,200′. The Jersey Blue vein west of the new plane below 1,300′ awarded to Elm Orlu. Each side paid its own costs. The suit involved amining 12 levels in each mine, crosscuts, 6 miles of drifts, 10 raises, 50 1,200′ long, and a complexity of vein-intersections and fault-crossings.

Litigation with Minerals Separation over United States patents first provoked by the installation made in 1911 by James M. Hyde (forme an employee of Minerals Separation, Ltd.), at the mill of the Butte & S perior Copper Co. (name since changed to B. & S. Mining Co.) In t suit (Minerals Separation v. Hyde) the District Court at Butte, Monta sustained U. S. Patent No. 835,120 and found infringement as to 7 clai In 1914, the Ninth Circuit Court of Appeals at San Francisco, reversed t decision; but on writ of certiorari the U. S. Supreme Court on December 1916. unanimously adjudged this basic patent for air-froth flotation valid to 10 of its 13 claims. The remaining 3 claims, which specified the use "a small quantity of oil," and which the Court held to be invalid, have sin by disclaimer, been brought within the scope of the Supreme Court's cision.

Following this decision of the Supreme Court in the Hyde case, Butte & Superior Mining Co. began using oil in minimum quantities ½ of 1 per cent, contending that this relieved it of liability for infringeme This issue was tried in the suit of Minerals Separation v. Butte & Super and on May 4, 1917, the United States District Court at Butte, Mont., ag found validity and infringement as to the 10 claims (3 modified by claimer) previously litigated. On May 13, 1918, the Ninth Circuit Cour Appeals at San Francisco partly reversed this decision, holding the pa limited to ½ of 1% of oil on the ore. The U. S. Supreme Court revie this case on writ of certiorari, and on June 2, 1919, partly reversed the cision of the Circuit Court of Appeals, holding that the patent extende and covered the use of oils in amounts equal to any and every fractio 1% on the ore. Pursuant to this decision, the District Court of Montana tered its decree on July 19, 1919, issued a permanent injunction against Butte & Superior, and held it to account for all profits made by reason its infringement. This accounting was set for October 27, 1919, but was tended to December 1. In its report filed with the U. S. District Cour November, B. & S. suggested to M. S. the sum of $451,097 for infringem this not being an admission of the amount saved by flotation, but as an in the accounting. On September 8, 1919, the U. S. Circuit Court of A

ncisco dismissed an appeal of the Butte & Superior Mining Separation. The appeal was against certain provisions of udge George N. Bourquin at Butte in September, 1917. In S. brought contempt proceedings against B. & S., alleging nction.

e consists of zinc blende, galena and small quantities of pyrite occurring with gangue material, mostly quartz, silici- ochrosite and rhodonite as vein replacement of the granite. in parallel or branching ore shoots ranging in thickness ingers up to orebodies as much as 100′ wide within the l general zone of mineralization known as the Rainbow surface the commercial ore consisted principally of was mined in the early days of Butte mining. The ore shoots as developed during recent years occur down- ximately the 500′ level, and as far as disclosed by present ease in horizontal area and in importance as greater depth actually blocked out ready for mining is maintained at tons, greater development than this being inadvisable iculty in maintaining developed drifts and crosscuts for period before actual mining operations are to be con-

es from 10% to 30% zinc, averaging about 18% zinc, 1.25% , 8 oz silver and 30c gold. The small amount of iron, ontents permits of the production of a good grade of zinc the very fine dissemination of the mineral requires fine ent concentration, and most of the zinc mineral is after- y oil flotation.

ntent decreases slowly with depth, but thus far the zinc n and without appreciable pyrite.

Total otage	Shafts feet	Total miles workings	Ore reserves tons	Zinc %	Silver oz.
3,459	950	29	830,000	17.0	5.70
7,730	724	23	1,059,200	17.6	5.90
1,838	2,649	20	1,044,850	17.7	5.65

id of 1919 show a decrease of 25% due to loss of ground n in the Elm Orlu case and not to any diminution of ore-

e shafts—No. 1 is 1,200′ and No. 2 is 2,050′; No. 3 which is ew main or working shaft. It has concrete skip-pockets 00, 1,500, 1,600, 1,700, 1,800 and 1,900′ levels. Ore occurs with frequent fault seams and slips, and there is con- t as a result of ore extraction. These facts necessitated t. All 3 shafts are well protected by concrete and cement 200′ station of No. 2 shaft electrically-driven quintuplex mine water. The main ore-shoot has been opened con- E. of the ground in dispute with the Elm Orlu. No. 3 to 3,050′.

) men are employed underground.

main shaft is a Nordberg hoist designed for an ultimate ling at 3,000′ per minute, driven by a 2,000 h. p Westing- oying the Ilgner and Ward-Leonard systems of balance essors, complete machine-shops, coarse-crushing plant at ,800-ton mill using gravity concentration and flotation. are employed in surface operations.

centrates are sold under contract to the American Zinc, Co., and U. S. Smelting Co. under a toll basis, though been disposed of by sale to various zinc retort smelters

throughout the country or to the Anaconda Copper Mining Co. for treatme at its electrolytic plant at Anaconda.

Production: figures for the production of the property prior to 1913 a not available, but the results of operations since that time are as follows:

Year	Tons Milled	Oper. Cost	Tons Concts.	Assay Con., %	Lb. Zinc Concts.	Zinc Rec. %	Aver. Price, c.	Net Total	Pa per d

Silver production in 1919 was 2,010,000 oz.

This table does not give the lead, copper, and silver in concentrate, whi in 1918 amounted to 11,956,951 lb., 1,293,313 lb., and 2,781,394 oz., respective

Butte-New York Copper Co.

Controlled through stock ownership by Butte & Superior Mining Co

General office: 25 Broad St., New York.

Officers: M. M. Ferguson, pres.; R. J. Schaefer, v. p.; W. G. Sarge sec.-treas., New York; M. M. Ferguson, L. B. Holloway, Philip Lawren G. M. Minton, A. J. Ronaghan and W. G. Sargent, directors. Annual me ing 2nd Monday in January.

Inc. Oct. 17, 1906, in South Dakota. Previously a holding compa controlling over 95% of the capital stock of the Butte-Milwaukee Cop Co. In 1914 it purchased all the assets of that company, comprising fo claims in the Summit Valley mining district, Silver Bow county, Mon adjoining the property of the Butte & Superior Mining Co., and thr claims in the Argenta mining district, Beaverhead county, Mont. Clai aggregate 53 acres. **Cap.** authorized, $1,000,000; outstanding, $582,17 par value $1. The former authorized capital stock was $4,000,000, consi ing of 800,000 shares of par value of $5 each; the stockholders, howev voted April 16, 1915, to change the par value from $5 to $1 per share, a to increase the amount of stock by 300,000 shares, making $1,100,000 authe ized. The Butte & Superior Mining Co. owns $323,655 of the stock. Sto transferred at company's office. Registrars: Empire Trust Co., New Yo

Bonded debt: $150,000 first mortgage convertible income gold 6s; dat June 1, 1916; due June 1, 1925; int. J. & D. (up to and including June 1920, interest is payable only out of income at rate of 6%, but is cumulativ for that period; thereafter interest will be paid unconditionally.) Coupo $100, $500, and $1,000. Authorized, $500,000. The unissued bonds are r served for future requirements. Convertible at any time prior to maturi into stock of the company at par. Subject to call on and after June 1, 191 at 105 and interest. First offered ($150,000) to stockholders of record Ap 19, 1915, at par, on the basis of $100 bond for each 400 shares of stock he Normal income tax deducted from interest.

Property: holdings consist of 4 claims, patented, known as the Polloc Colonel Sellers, Florence, and Bird, lying immediately north of the Butte Superior, and 3 lode mining claims in the Argenta district, Beaverhe county, Mont.

The Colonel Sellers claim has a promising surface showing with stron persistent quartz veins in granite. The Butte & Superior completed th sinking of the 1,200' Milwaukee shaft on Colonel Sellers claim and co nected it by crosscutting with 1,200' level of Black Rock mine. This wo was continued beyond the Colonel Sellers shaft so as to open the Mastodo vein on the Florence claim. The Milwaukee shaft is well equipped wi power plant and hoist. The Butte & Superior Co. spent $24,000 in develo ment work on the Butte-Milwaukee property and in return received 205,0 shares of the capital stock of the Butte & New York Co. Developmen work said to have proved good zinc orebodies.

tcrop on Bird claim is 100′ wide and resembles outcrops of
: veins of the district.
:k mine has 4 veins, 2 more or less developed by a short
30′ three-compartment shaft. A silver vein was opened on
nd mine is said to have produced, years ago, about $400,000
with values mainly in silver and gold, from above the 200′
ore running 2% copper and 15 oz. silver per ton, with small
produced, 1906.

:laims, patented, 42 acres, consisting of the Maggie placer,
, Little MacQueen, Undine and Snow Bird placer, about

a mile east of the Colusa and Leonard mines, and near the Pittsmo shafts of the East Butte Copper Co.

Development: by 800 three-compartment shaft on the Little MacQue claim lying about the center of the group, that has cut several small string of ore assaying up to 9% copper, but none of commercial size. There is al a 7' vein of 2% ore carrying 14" paystreak said to range 8 to 10% in copp tenor, with small values in gold and silver also some lead and zinc.

Property reopened August, 1916, by the Tuolumne C. M. Co. under agreement whereby the T. C. M. Co. acquires a 51% interest in the C. property for sinking shaft from 800' to 1,600' and driving crosscuts on th latter level to the N. and S. boundaries of the group.

See Tuolumne Copper Mining, p. 1005.

COLUSA-PARROT MINING & SMELTING CO. MONTAN

Office: Box 1683, Butte, Mont.

Officers: Hon. Wm. A. Clark, pres.; Wm. C. Siderfin, v. p.; W. C Messiass, sec.; Alex. J. Johnston, treas.

Inc. Nov. 26, 1897, in Washington. **Cap.,** $500,000; shares $50 par.

Company is practically out of business, its only present property bein lands, platted as an addition to the city of Butte. Has an asset of co siderable value in a million-ton tailing dump at the Butte Reduction Wor which is being treated.

CRYSTAL COPPER CO. MONTAN

Officers: 31 Milk St., Room 209, Boston, Mass.; and 73 Hirbour Bldg Butte, Mont. Matt W. Alderson, mng. dir. A. C. Ray, mgr., Basin, Mon

Officers: Bowdoin S. Parker, pres.-treas.; George W. Clement, v. p. Eugene H. Walker, sec., with Louis H. Goddu, Edward P. Barry, and Jo E. Allen, directors. William D. Gibson, mgr. E. P. Barry, gen. counsel.

Inc. April 4, 1916, in Maine. **Cap.,** $2,000,000; $5 par; increased 19 from $1,000,000; $5 par; changed November 7, 1918, from $1,000,000; $1 pa Stock listed on New York and Boston Curbs. Security Transfer and Regi trar Co., New York, and Federal Co., Boston, transfer agents, Securit Transfer & Registrar Co., New York and Old South Trust Co., Bosto registrars. Annual meeting April 1.

Property: (1) the **Goldsmith mine** at Butte, Mont., under bond an lease. The deposit is a quartz lode, on the western split of the Rainbo lode. The main shaft, 367' deep, developed from the surface 3 veins fro which about $1,500,000 worth of silver ore was produced by former owners.

The Anaconda company owns ground adjoining the Goldsmith. I Alice mine, the richest silver mine of that company, is only 1,500' awa while W. A. Clark's Moulton mine, reputed to have produced over $6,000,0 is but 400' distant.

Development: the Crystal company opened and retimbered the ol Tong shaft, sinking it to the 500' lev[illegible]e crosscuts intersect both th northern and southern veins, from which the company has been mining an shipping silver ore since November, 1918. The shaft was deepened to th 600' level late in 1919, and crosscuts driven to several veins have cut ship ping ore, 2' of it very high grade.

Equipment: the mine has up-to-date machinery and appliances, includ ing a 150 h. p. electric compressor, a 100 h. p. electric hoist, good for a shaf of 1,000' depth; all mining operations are carried on under the advice o experts in each branch of the business.

(2) The **Crystal mine** and group of claims are about 8 miles N. o Basin, Jefferson county. The company owns an undivided half interest i the Commence and Crystal; one-half and one-sixth of the St. Lawrence an Jack Fraction; the Mammoth claim, total of about 84.39 acres, in the Catar act district. The output is mostly copper ore, but a good grade of silver-lea ore has also been developed, and shipments made.

The gross value of copper ore mined and sold since the Crystal com pany took over the mine is $70,000, and of the silver ore, $25,000, a tot of $122,000.

nt: all work done so far has been devoted to mine develop-
per tunnel has been extended to 1,334', carrying it within 50'
m. There is over 3,000' of unexplored vein to be opened by ex-
nel farther W., the known orebodies on the St. Lawrence claim

nts December 20, 1919.
small surface area and mineral rights of 320 acres under
e, adjacent to, but south and west, of the older productive

vo main veins have been developed, running in N. W.-S. E.
ponding to the Blue vein system to which the Jessie, Edith
very productive fault veins belong. There are also several
eins on which but a small amount of development has been
tly. The veins are frequently faulted and a careful study of
ions is necessary for recovery of veins beyond the faults.
it: to a depth of 2,800' by the Colorado shaft, and workings.
' Hibernia and the 800' Mt. Moriah shafts having shown the
ep exploration, the Colorado shaft was sunk to 2,000' and later
tifying results. The chief development work is on the Hesperus.

vein, the principal one in the mine, been opened down to 2,100, 2,300, a 2,500', these levels producing ore running over 7% copper. The 2,500' le was connected with the Anconda company's Belmont mine in May, 1 improving ventilation of the Colorado mine. Reserves are said to be e to an output of 15,000 tons of ore monthly for 3 years. In December, 1 6' of 8% copper and 6½ oz. silver ore was cut on the 2,100' level of t Colorado mine. Development is at the rate of 9,000' yearly.

The Davis-Daly ground has been generally considered to contain o low-grade and base zinc-pyrite ores and to be outside the copper sect of Butte camp. Developments show, however, that good copper ores ex and that the extensive area of unexplored ground will make this prope a profitable one.

The Hibernia mine contains zinc-silver and manganese ore, which w be worked when a pending dispute is over.

Normally, 360 men are employed, of whom 300 are underground.

Equipment: a hoist was installed early in 1917, with a capacity of 3 tons per trip and speed of 2,000' per minute at depth of 4,000'. There is electric-driven air compressor, and a large battery of boilers ready in ca electricity is cut off. The ground around the shaft being limited, the outp at the mine is conveyed several blocks over a narrow-gauge surface tr to ore bins alongside the Northern Pacific railroad. In the Colorado mi storage battery locomotives are to be used, also skips.

Production: years ending June 30 (normal output of ore is 300 to daily).

Dutton group, 134 acres, held by placer patent, is in the
ıear the Pennsylvania mine, and is idle at present.
erty is the **Pittsmont group** at Butte, described below.
oldings include the Swissmont group of 6 claims, near Elk-
ty, Mont., and the Chamounix group, near Austin, Lewis &
, including the Christina group of 6 claims and the Fannie
claims. The Swissmont group has developed a considerable
oxidized gold ore carrying an excess of iron over insoluble
lue as a flux.
group has shipped some silver-copper ore in the past, but
ny also has timber operations at Feeley, Mont.
ed at the Elkhorn property in 1917, but owing to scarcity of
ost of cyanide, operations have been postponed until condi-
favorable.
ıas a 49% interest in the Ohio Oil Co., a Standard Oil sub-

'ittsmont claims cover 280 acres of flat valley bottom,

about 1½ miles east of Butte and extending outward from the footslopes the continental divide mountain ridge. The ground is a filled-in valley, sandy wash and debris being in places several hundred feet deep, so that no crops of any kind exist on the ground. The underlying rock is the normal granite (quartz-monzonite) which is cut by 3 systems of veins; Northwest, responding to the Blue Vein series. Ore-shoots occur in veins of each The zone of oxidization and leaching of copper extends from 500′ to 700′ the surface. There are 12 principal veins that have been productive. these are not wide, usually under 5′, the ore-shoots are long and persistent. least 2 veins on the 800′ level have been stoped almost continuously for in length. Though the 800′ level has been the most productive level opene date, due both to an increased primary mineralization and secondary enrich which has affected the lower levels to a much lesser extent, the lower levels tinue to yield strong ore shoots of commercial grade, though lower in value ore from upper levels.

Development: 2 shafts, No. 2 and 3, 1,830′ and 1,240′ deep, respecti No. 2 is the working shaft, and levels are opened from it at 800′, 1,000′, 1,500′ and 1,800′.

Total workings are over 20 miles, and new work each year averages ft. Good ore has been opened on the two bottom levels, but as the 1,800′ has bad ventilation, and it is difficult to get men to work there, a new shaft raised from the 1,800′ level to surface.

Ore production comes from the following levels: 800′, 39%; 1,000′, 1,200′, 15%; 1,500, 23%, and 1,800′, 5%.

Normally, 630 men are employed underground.

Equipment: consists of hoisting plant, flotation plant, and smelter. above includes a 2,000-h. p. steam plant, 2,000-h. p. electric plant, 600-h. p. hoist good for 2,000′, and 50-h. p. steam hoist good for 1,500′; two 25-d compressors, and 50 machine drills. Electric power is used for practically thing except hoisting. There are about 20 buildings, which include the sintering plant, 2 engine rooms, change-house, boiler-room, concentrator, tion plant, carpenter, machine and electric shops, sampling mill, laboratory, office building. The smelter building contains one 600-ton blast-furnace 300-ton furnace with 3 basic-lined converters. The sintering plant contains 42" Dwight-Lloyd machine. Concentrator is equipped with crushers, jigs, etc., and flotation plant is equipped with tube-mills and Janney machines. capacity of concentrator is 600 tons and of flotation plant 800 tons, the tional capacity of flotation plant to be used in reworking tailings, of 123,520 tons were treated in 1918, carrying 0.7 lb. copper per ton, at co $1.29 per ton.

The Pittsmont reduction plant is the only operating smelter in Butte does a considerable amount of custom business, treating ore from several dependent mines, including Davis-Daly. About 350 men employed on su

Production: normally, the daily output of ore is 900 tons.

pany owns the Elm Orlu mine adjoining the Butte & and the Badger State mine of the Anaconda Copper Co. n of the Butte district. The Poser claim is owned by a

Elm Orlu covers part of the Rainbow lode and several ıg large bodies of copper ore and immense bodies of zinc as chalcocite both in secondary fault veins and in veins of nd also as chalcopyrite mixed with zinc ore.

by 2,200′ shaft and several miles of workings, principally

velopment during 1919 was the opening of the Northwestern It carries copper, and the apex is below depth of 2,000′.

Litigation: in 1916, Elm Orlu, through its controlling company, Clark Montana Realty Co., began suit against the Butte & Superior Mi Co., which had been mining ore beneath the Elm Orlu claim. The history o controversy ended 1919, is as follows:

The U. S. District Court, in 1917, decided in favor of the Elm Orlu, g the company the westernmost 301' along the Rainbow lode, west of the where it enters the Black Rock claim (B. & S.); subject, however, to the Orlu prior rights to the Pyle strand below its junction with the Rainbow.

The B. & S. appealed to the Circuit Court of Appeals, which affirmed decision of the District Court and gave judgment for $177,707 against the Superior Co. On appeal to the U. S. Supreme Court the decision of the C Court of Appeals was confirmed. The geologic features of this case were illustrated by R. M. Searles, in Mining & Scientific Press of May 10, 191

A collateral feature of the case involved orebodies in the Black Rock 550 ft. eastward of the point above noted.

The case was settled by payment of $2,500,000 to the Elm Orlu. Elm gets 1/3 and B. & S. 2/3 of the disputed area, while Elm Orlu takes 180 tional eastward on the Rainbow vein below the 1,200' and the B. & S. thr tion above 1,200'. The Jersey Blue vein of the new plane below 1,300' als to Elm Orlu. Each side paid its own costs.

Litigation with the Anaconda company concerning part of the Em in the Pilot-Butte mine is the next apex suit of Elm Orlu.

Equipment: is exceptionally complete and recent additions includ trically-driven hoist with 2 drums 10' diameter by 8' face, designed to wind of rope at a speed of 2,500' per min. The motor is of 1,800-h. p., operat conjunction with a motor-generator flywheel set.

The output of the mine is treated in the mill of the Timber Butte M Co. (which see), also owned by Senator and W. A. Clark, Jr.; zinc concen go to the National Zinc Co.'s plants at Bartlesville, Okla., and Springfie Copper ore is shipped direct to the Anaconda smelter, the mine yielding 50 to 100 tons a day when working full time.

Normally, 380 men are employed underground and 73 on surface, pro 730 tons of ore daily.

Timber Butte Milling Co.

Is the corporation owning the mill in which the ores of the various properties are concentrated.

Officers: W. A. Clark, Jr., pres. and gen. mgr.; W. A. Clark, v. p D. Mangam, sec.; J. K. Heslet and A. J. Johnston, directors; W. N. Ros supt.

Cap., 1,000 shares; $100 par. A close corporation.

The mill was erected to concentrate zinc ores of the Elm Orlu Capacity 750 to 1,000 tons daily. Process, gravity separation and fl Crushing is by rolls and Hardinge mills; separation by tables and Minerals ration flotation machines. Electric power is supplied by the Montana Co. Mill began operations about May 1, 1914. Recovery over 93% an centrates average 52% zinc.

GREAT BUTTE COPPER CO. MONT

(Successor of Butte & Bacorn Copper Co.)

Address: 53 Silver Bow Block, Butte, Mont.

Officers: F. W. Bacorn, pres.-mgr.; H. H. Robinson, sec.; Charles treas., with W. B. Schiller, C. W. Brown, Henry Fownes, R. C. Patterso Eisaman, and C. G. McIlvain, directors.

Inc. 1916, in Montana. **Cap.,** $1,000,000; shares $1 par; all outst non-assessable. The Great Butte took over the property of Butte & Bo July, 1916.

Property: 23 patented claims, one [illegible] of the Butte & S mine. Holds under option the Calume [illegible] and Jasper lode cl 46 acres.

Development: exploration is in p[illegible] Calumet shaft, w 2,000' deep with crosscuts and drifts at

making a praiseworthy attempt to develop commercial ore in the outskirts of the Butte district. See Butte and Bacorn Cop-III.

(d) Deficit.

Dividends: paid since organization of company per share: $1.25 1905; $7.25 in 1906; $6 in 1907; $3 in 1908; $4 in 1909; $1.10 in 1910; $1.2 1911; $1.70 in 1912; $2 in 1913; $1.50 in 1914; 90c in 1915; $2.50 in 1916; $2.5 1917, and $1 in 1918. Total, $35.90 per share, or $14,657,000.

Property: consists of two groups of claims, the Speculator group about 220 acres on Butte Hill, and the East Side or Sarsfield group, about acres. Also owns a smelter-site consisting of 2,216 acres, near Whitehall, water-rights about 18 miles from Butte, 8 miles from Anaconda, and near tracks of the C. M. & St. P. Railway and the Northern Pacific Railroad.

In order to give a more regular outline to the company's property and avoid controversies over extra-lateral rights, exchanges of acreage have been made between the North Butte and Anaconda companies and agreements have been made between the North Butte and Tuolumne companies covering the ownership and rights to certain parts of the Jessie vein. An undivided one-interest in the Granite Mountain claim was acquired from the Lewisohns, company to sink at its own expense the existing shaft from the 500' to the 2 level and make certain connections and explorations, the title to the shaft maining with the North Butte company. During 1912 and 1913 company chased by cash payments and 20,000 shares of the company's stock the undivided interests in the lode claims in the Butte East Side mineral area; and 1917 also purchased the property of the Butte-Monitor Tunnel Mining Co., sisting of 8 claims.

Eastside Group

Eastside Group: It is believed that these claims carry the easterly exte of numerous big ore-bearing veins operties contiguous to this The group lies about 2 miles east hill, and covers the mo slopes between the bed of Silver e Continental Divide adjacent to the A. C. M. Co.'s Tro Main Range Co. and

of the East Butte Co. Development work has been in progress
for the past two years, and includes a 900′ four-compartment
the Sarsfield claim at a point about 150′ east of the Continental
s level, over 1,500′ of cross-cutting has been done in two direc-
e the ground on both sides of the Continental fault.
uipment consists of a 125 h. p. electric hoist, compressor, and
ectric pumps of 600 gal. capacity, one on the 700′ and one on the

9 the company was preparing to work the Bertha claim on the
hip silicious ore to the Anaconda leaching plant.

Speculator Group.

itor Group, or Butte Hill property, is traversed by a number of
tly belonging to the Blue Vein series. These veins carry high-
oots, which have thus far been remarkably persistent in depth.
much primary chalcocite, frequently massive, with considerable
rgite and smaller proportions of other sulphides. All ores carry
values in gold. The veins are 'heavy,' requiring close attention
ith square-sets, monthly timber used being about 1,000,000′ board
ste is hoisted, all being used for dry-filling.
of the vein system has shown the necessity of thorough drifting
t considerable depth, and development on all levels down to the
l profitable orebodies.
l ore supply comes from the following veins, named in their
ce from the south boundary of the mine northward; Speculator,
th May, Gem, South Croesus, North Croesus, Snowball, and
. the Speculator, Adirondack, South Croesus, and Snowball be-
or Anaconda vein system; the others are well-known members
, or Northwest fault-vein series. The Edith May and Jessie
rincipal ore producers of the North Butte in the early opera-
pany.
y vein is opened on the 700 and 800′ levels, and at 200′ intervals
el to the 3,400′ level. The vein varies in width from 5 to 42′,
occurring above the 2,000′ level. A good body of ore has
ned on the 700′ level, where a width of 8½′ averages 3.6%
ance of 240′. Below the 700′ level the vein was of little value
el was reached, after which a marked improvement was noted.
es above the 2,000′ level were practically all first-class smelt-
ance of 1,000′. The 2,000′ level showed a slight decrease both
ngth of ore-shoots. At the 2,200′ level the vein splits into a
t-wall vein. Metal contents of the foot-wall vein are low be-
el, while the hanging-wall vein carries good ore on all levels
st level now opened. On the 3,200′ level, 5′ of ore has been
ance of 210′, the average assay being 4.3% copper. The 3,400′
has encountered ore of a similar character.
n ranks next to the Edith May in production. Where opened
in the Gem crosscut, the Jessie vein was 10′ wide and held
. The ore-shoot found on the 1,200 and 2,200′ levels was high
nearly 1,000′ long, changing in character below this depth and
le sphalerite in the drifts to the west. On the 2,200′ level the
ide, showing some ore up to 5% in copper tenor, but averaging
an the ore in the workings above. The west drift on the 2,000′
ore-shoot 6′ wide, carrying 6% copper and 7.5 oz. silver. The
low-grade ore only. The 2,600′ drift west showed 4′ of 3.5%
ed by a fault 15′ from the crosscut and not yet recovered;
ing east disclosed only small bunches of high-grade ore. On
vein where cut by a crosscut from the Granite Mountain
l width of 6′, with 3′ of ore assaying 11% copper and 10.0 oz.

[redacted]*in* is opened by drifts on all levels from the 1,600 to
[redacted]ge and important orebody. On the 1,800′ level the

ore-shoot is 8½′ wide, averaging 3% copper and 8 oz. silver per ton; on 2,000′ level it is 300′ long, averaging 10′ thick, 3% copper and 6 oz. si This shoot has been developed down to 2,200′, and on the 2,400′ level an shoot, 300′ east of the one just mentioned, shows 2′ of 3% ore with 7 oz. s per ton. This shoot has been opened on the 2,600′ level for a length of varying in width from 3 to 5′, and averaging 3.5% copper. The vein also tains considerable quantities of zinc ore, from which shipments have been from time to time.

The *South Croesus* vein has been mined from 1,600 to the 2,400′ level. the best showing at the 2,200′. Here two shoots are developed, one 2 length with an average width of 2′, the ore containing 5.5% copper and 3 silver per ton; the other, 240′ long, averaging 3½′ in width and assaying copper and 4 oz. silver per ton. On the 2,400′ level, a 3′ body of ore has driven on for 200′, averaging 2.5% copper.

The *Gem vein* showed no ore of commercial importance above the 1,600′ and the 1,800′ level had about 6′ of 4.5% ore. It is developed to a small e on the 1,800, 2,000, 2,600 and 2,800′ levels, both value and width increasing depth, the 2,800′ level showing 12′ of 5.3% ore carrying 2.2 oz. silver per The vein is irregular in size, and where developed has been broken by faults. The Adirondack vein, like the Gem, shows no commercial ore abov 1,600′ level, but has been mined from this horizon down to the 2,800′. O 2,400′ level the ore has been opened for 600′, varying in width from 2′ t and averaging 4% copper. On the 2,600′ level the shoot is over 200′ long, va in width from 4′ to 7′, and containing 3% copper. On the 2,800′ level there width of 4′, averaging 3% copper. About 500′ west on the 2,000′ level a shoot has recently been opened, a distance of 119′, showing an average wi 5′ of ore assaying 4% copper and 2.1 oz. silver.

The *Snowball* vein has characteristically high silver content. It was cut on the 1,800′ level in 1910, since which time it has been developed worked from the 1,400′ down to the 2,800′ level. The shoot varies in length about 800′ to over 2,000′. On the 2,200′ level it has been worked for a leng over 2,000′, of which 740′ averaged 5′ of ore assaying 8% copper. On the level the shoot is over 1,000′ in length, varying in width from 2 to 4′ and aging about 4% copper. On the 2,800′ level the vein has been exposed sh 265′ of ore 3′ wide assaying 4.3% copper and 7½ oz. silver per ton.

The *North Berlin* vein was opened in 1916 on the 2,200′ level. Since time this vein has been developed on all levels from the 1,800 to the 2,80 clusive. On the 1,800 and 2,000′ levels drifting exposed bunches of ore, but of commercial value. On 2,200′ level, an ore-shoot 500′ long and 4′ wid been developed, with an average assay of 5.5% copper and 11 oz. silver. O 2,400′ level the shoot now developed is 510′ long, of an average width of 3′ assays 4.2% copper and 5.5 oz. silver. On the 2,600′ level ore has been ex for a distance of 395 ft., having an average width of 3½′ and assaying copper and 3.8 oz. silver. The crosscut on the 2,800′ level has reached the which shows high-grade ore.

Development: is extensive, aggregating many miles of workings. development for 1918 amounted to 23,046′, compared with 12,175′ in 1917 21,694′ in 1916. The four-compartment Granite Mountain shaft, which principal working shaft, is 3,700′ deep, with levels opened at the 400, 600, 70 and at 200′ intervals down to and including the 3,600′ level. In 1915 a new trict hoist was installed at the Granite Mountain shaft, the largest electri driven hoist in America. It is capable of operating to a depth of 5,000′, ho 7 tons of ore, and making a round trip in about 2 minutes.

Following a serious fire at the Granite Mountain shaft in 1917, the wo fire-proofing this shaft was commenced and completed in January, 1918. work consisted of 1,500′ of concrete of monolithic construction, while the compartments of the upper part of the shaft were gunited (cement sprayed on).

The Speculator shaft, the other operating shaft, has been deepened to with levels at 200′ intervals, from and below the 1,400′ point, developing

. The Speculator shaft has a 128′ steel head-frame standing
crete foundation, equipped with self-dumping skips and pockets,
y of 1,500 tons of ore. No waste is hoisted, as it is used for
g.
e and 500′ Adirondack shafts are idle, and of no present value.

PITTSMONT COPPER CO. **MONTAN**

Controlled by East Butte Copper Co., which see.

Office: 1126 Farmers Bank Bldg., Pittsburgh, Pa. **Mine office:** Butt Mont.

Officers: R. H. Gross. pres.; J. H. Ree. v. p.; F. Ward Paine. se treas.; R. T. Rossell, asst. sec.-treas.; Oscar Rohn, gen. mgr., with Wm. Paine, directors.

Inc. April 21, 1906, in West Virginia, as Pittsburg & Western Copp Co., and changed name, Jan. 21, 1908, to present title. **Cap., $6,000,0** par value $5, divided into 1,000,000 shares common stock and 200,000 shares 6 cumulative preferred stock, all issued.

The East Butte Copper Co. owns $4,002,800 of the common and all the p ferred stock. $910,716 bonds outstanding December 31, 1916, were retir February, 1917. Annual meeting, first Monday in April, at Pittsburgh.

Company acquired the property of the Pittsburgh & Montana Copper under foreclosure proceedings, July, 1909, selling it to the East Butte Cop Mining Co., which agreed to purchase bonds enough of the Pittsmont Co Co., to fund its floating debt, aggregating at that time $2,300,000, and also agr until these bonds were fully paid for, to advance all funds necessary for deve ment and operation of the property and interest on the company's indebted In consideration of this agreement the Pittsmont Copper Co. contributed $4,0 000 of its common stock to the East Butte Copper Mining Co., the latter p chasing $1,000,000 of Pittsmont preferred stock and $110,000 of demand n issuing own stock therefor. This debt has now been paid off.

During 1918 East Butte paid Pittsmont $1,000,000 on account of rentals crued. The latter in turn purchased from the former its entire issue of 200 preferred shares, $5 par.

RAINBOW LODE DEVELOPMENT CO. **MONTA**

Office: 807 Lonsdale Bldg., Duluth, Minn. **Mine office:** 14 West Gra St., Butte, Mont.

Officers: Edward C. Congdon, pres.; G. A. Tomlinson, v. p.; Ja Wanless, sec.-treas., with Thomas F. Cole, Walter B. Congdon, directors.

Inc. Nov. 9, 1912, in Delaware. **Cap.,** $1,500,000; increased June 1, 1 from $800,000; shares $10 par, issued $800,000. **Bonds:** $400,000, 1st mort 5-year convertible 6% due June 1, 1920, convertible into stock at par, and $80 2nd mortgage authorized, $47,000 issued. Annual meeting, first Tuesda June.

Property: 10 claims, including the Third Sphinx, Michigander, Mo Valley Queen, Carn Brea, Sarah, Wedge, Hidden Treasure and Wanda cla with fractional interest in the Lone Star Claim. The group lies east of Butte & Superior property and is supposed to carry an extension of the R bow lode.

Equipment: at Rainbow shaft includes a 300-h. p. double drum h good for 2,500', 2 electric hoists, air compressors, combined capacity of 1,65 ft. per min., one 400 gals. and one 200 gals. pump, blacksmith shop, carpenter s change house and office.

During 1916 the company completed its Butte & London contract, and owns 51% of the Greendale Exploration Co. stock, which latter company o the Greendale Placer claim and the Six O'Clock claim immediately south. paid for this stock according to the contract by sinking the Butte & London s to 1,600' and crosscutting to the north and south boundaries of the Green Placer claim on the 1,500' level.

The crosscut at the 1,500' level of the Rainbow shaft was extended to north boundary and a few feet of drifting done from it along veins which l promising. The drainage drift on that level from the North Butte was c pleted.

While favorable indications of the possible proximity of ore shoots found, according to the statement of engineers familiar with Butte, no ore any commercial grade was discovered. The indications above mentioned sisted of quartz-filled veins of various dimensions and in several parts of

l Butte & London, open cuts gave trifling assays of gold, cop- vhere running over 8% zinc or 2% copper or an ounce or so of

complete the Butte & London contract, it was found necessary ney than was provided for in the first mortgage. Consequently, :age was authorized, and the amount outstanding on it, $47,000, two of the large stockholders so that the contract might be ıe Rainbow company get control of the Glendale placer claim. is now inactive, as it seemed best to await possible develop- hborhood of its property, which might renew the interest of the he company to an extent which would lead them to assist in financing.

ıpment has been disappointing in that no ore has been found 00' on the Rainbow group and 1,600' on the Greendale Placer s, the officers feel that still deeper development will reveal pay

State Street Trust Co., Boston, transfer office; Bea Trust Co., Boston, registrar. Annual meeting, second Monday in March. Butte, Mont.

Dividends: 45c per share in 1911, 20c per share in 1913.

History: company was formed to acquire and mine the Tuolumne cla which carries the Jessie vein. This and other veins were worked from 190 1918, to a depth of 2,680', with a production of 207,969 tons of ore yield 21,761,190 lb. copper, 658,194 oz. silver, averaging 5.25% copper and 3.1 silver. All work was stopped January 1, 1918, because increased cost of opera and declining grade of ore did not permit sufficient profit.

Following a reorganization of the company in 1916 the Main Range Colusa-Leonard Extension groups were taken over on very favorable deve ment contracts, and in 1918 all outstanding interests in these groups were quired and properties deeded to Tuolumne Copper Mining Co.

The Colusa-Leonard Extension group consists of 6 claims—the Ma Placer, Golden Hematite, Little McQueen, Undine, Snowbird Placer and Sy cate. The property, though practically undeveloped, has a two-compart shaft 1,200' deep. A connection has been made from this shaft to the M Range shaft on the 700' level. The property is well equipped, and during was unwatered and developed on the 1,200' level. The claims contain the w erly extension of the Spread Delight vein at depth, and the Sinbad vein traverses this tract.

The Main Range group consists of the 7 claims—Sinbad, Main Range Fr tion, Spread Delight, Tent Peg, Rory O'More, Kingstella, and Lillie. This pr erty has been partly developed from the Main Range shaft to the 1,200' level large orebody varying in width from 10 to 35' and 350' in length has been veloped in the Spread Delight vein on the 700 to 1,200' levels. Stoping op tions on orebody above the 800' level up to June 1, 1919, yielded 50,218 which contained 2,303,866 lb. of copper, 419,859 oz. of silver, and 382 oz. g yielding $491,144 in net smelter returns. During the year 1919 the Main Ra shaft was sunk to the 1,200' level and a large amount of development work on the vein on the 1,000' level.

Development: includes two 1,200' shafts, about 1,000' apart. The e ern or Main Range shaft has levels at 700, 800, 1,000 and 1,200' depth, with dr on the veins at each level. Considerable ore has been mined from above 800' level, mainly from the Spread Delight vein, the figures being given in accompanying table.

On the 800' level the vein was 110' thick and showed a 6-8' orestreak on wall which has not yet been developed. The main oreshoot in the middle the vein shows from 15-35' of ore which has been stoped out up to the 700' le

On the 1,000' level this vein is explored by a 590' drift and the ores was found to be leached and broken by faulting, the ore averaging 15 oz. silver 2% copper with a 6' band of 70 oz. ore on the sill floor.

On the 1,200' level the Spread Delight vein shows less quartz, and so as drifted on, shows all commercial ore.

In 1919 the company operations included 425' of shaft sinking, 1,931' crosscutting, 999' of drifting, besides station cutting and raises. Returns fr all ore mined above the 800' level, up to January 1, 1920, amounts to $577,4

In addition to the Spread Delight vein, four other large veins have been in this property, but they are as yet undeveloped. Shipments have been m from the Sinbad vein, which shows a width of 20', and the Rory O'More 40' wide, shows an ore-shoot 15' in width.

The Main Range mine is well equipped, the surface plant consisting of large double-drum electric hoist, 2,500 cu. ft. electrically-driven compressor, fra ing and carpenter shop with framer and saws electrically driven, blacksm shop, machine-shop, warehouse, boiler plant, change-house, office, 80' head-fra and ore-bins.

919 were interrupted by labor troubles. Production for 314 s, yielding net smelter returns of $217,796 or $8.215 per ton.
oldings of the company, embracing 13 claims in the Colusa- and Main Range groups, or a total of over 80 acres, are on on of the copper vein system of the Butte hill. The property Anaconda, East Butte, and North Butte, lies to the west of lt, and the extensions of the largest veins of the Butte hill n this property. Development has shown the existence of ood grade, and the policy of vigorous development that has company will, it is believed, result in making another large nd payer in the Butte district.

Corporation Co., 65 Cedar St., New York.

Inc. May 17, 1918, in Delaware. **Cap.,** $7,000,000; shares $10 par: c sisting of 1,000,000 8% preferred, non-cumulative, participating, and 600,000 c mon shares: 40,000 preferred and 500,000 common outstanding. Of the l 250,000 shares were set aside for acquiring the 2,500,000 shares (par $1) Butte Detroit Copper & Zinc Co. Butte Detroit shares were exchanged at in U. S. Manganese on a payment of 10 cents cash., i. e., Butte Detroit ho had to turn in 10 shares and $1 in cash to obtain one share of U. S. Mang common stock, thus paying $250,000 cash to convert their stock into that of Manganese.

Dividends: 2% was paid April 27, 1919; and 2% July 27, 1919, 8% cumulative stock.

Business: this is a honding company ostensibly organized to ac and develop manganese properties and treat ores of same. Before the p of company could be fully completed, the armistice was signed and it had to up its manganese projects. It is at present examining and acquiring merito precious-metal properties. It holds 50% of the stock of the Liverpool S Mines Co., 51% of that of the Monarch Mining & Power Co., all of the s and 55% of the bonds of the New York-Montana Testing & Engineering 51% of Butte-Detroit Copper & Zinc Mining Co., and 66 2/3 of $300,000 issue of the Butte Central Mining & Milling Co., all of which are sepa described. The outstanding shares of the U. S. Manganese Corporation in the stock necessary to complete conversion of the Butte-Detroit Copper & Mining Co. shares.

Company will, it is said, endeavor to develop the field for high-grade ganese ore for dry batteries and chemical uses, a product commandin prices in a domestic market, consuming 25,000 tons annually.

Property: in taking over the Butte-Detroit, the U. S. Manganes the Ophir mine, which had been extensively opened to depth of 1,100′, sh considerable zinc and manganese ore. (For details of development, se XIII). The Butte Central M. & M. Co., the operating company for Butt troit, had an old judgment against it, and late in 1918 the Ophir mine a on which U. S. Manganese depended for its output of manganese, was sold Anaconda company for $57,000 at public auction. By law, the owners Ophir were allowed a year for redemption of the mine. According to the son Company, of Boston, which is promoting this bunch of interlocking panies, the Ophir mine contains 1,000,000 tons of black manganese, and manganese ore. The Butte-Detroit mill is reported to be capable of crush tons of ore and concentrating 250 tons daily. Crude ore carries 30% Mn. concentrate 50%. On a delivery of 100 tons daily at Chicago "a net pro $1,570" was expected, basis of manganese at $1.20 per unit ($60 per ton).

In January, 1919, it was announced that U. S. Manganese had a contra the output of the Valley Forge mine in Montana, and the Monarch mine near liston, Powell county, Montana, 25 miles from Helena. A mill is being at the latter. The company's plans are ambitious, but———

des 60-ton amalgamation and concentration mill. Pre-

ANTIMONY SYNDICATE NEVADA

Address: Mill City, Nev.

Property: the Black Warrior and Bloody Canyon antimony mines, claims, 40 acres, in Pershing county, Nev. The Black Warrior mine in the Buena Vista district is developed by several tunnels to depth of 150', with total workings amounting to 2,000'. Ore, partly oxide and partly sulphide, occurs in fissure veins in porphyry, with N. S. course and dip of about 80°. Equipment consists of 25-ton mill.

Output amounted to $92,500 in 1915, and $230,000 in 1916, the ore averaging 62% in 1915, and 40% in 1916. Production for 1917 amounted to 161¼ tons.

The Bloody Canyon mine in the Star district is developed by 2,500' of sinking to depth of 300'. See Pioneer Exploration Co.

ARCANE MINING CO. NEVADA

Idle.

Mine office: Pioche, Nev.

Officers: H. W. Rand, pres.; A. M. Cheney, v. p.; S. P. Kinney, sec.-treas.; preceding officers, Frank Holman, Frank Manning, directors. H. Freudenthal, res. agt. **Cap.**, $100,000; shares 10c par.

Property: five claims, adjoining the properties of the Ohio-Kentucky and Amal, Pioche, through which the Susan Duster lode of the Ohio-Kentucky extends, with 45° dip to the south. The ore from the lode on the O. K. property is said to have had an average assay value per ton of 7% lead, 20% zinc, 20 oz. silver and $2.50 in gold.

Development: 1,200' of underground work has been done. Company said to plan sinking a vertical double-compartment shaft to the 650' level, which depth it expects to cut the Susan Duster lode, 200' distant from the Arcane-O. K. line. The O. K. company is said to have followed the lode to the property line.

Equipment: power house, blacksmith shop, 40-h. p. gasoline engine and air-compressor.

ARGENTUM MINING CO. OF NEVADA NEVADA

Company inactive. Mines and mill under bond and lease to Candelaria Mines Co., which see.

Property: includes Northern Belle and Holmes Mines, in camp of Candelaria. Mineral county, Nev., 9 miles from Redlich, on Tonopah & Goldfield R. R. Fully described, Volume XIII.

ARIZONA EXTENSION SILVER MINES CO. NEVADA

Address: 265 Russ Bldg., Bush St., San Francisco, Calif.

Officers: (same as Arizona Silver Mines Co.), E. S. Van Dyck, pres.; F. W. Lockman, v. p.-supt.; C. D. Olney, sec.; M. E. Pratt, chief eng.

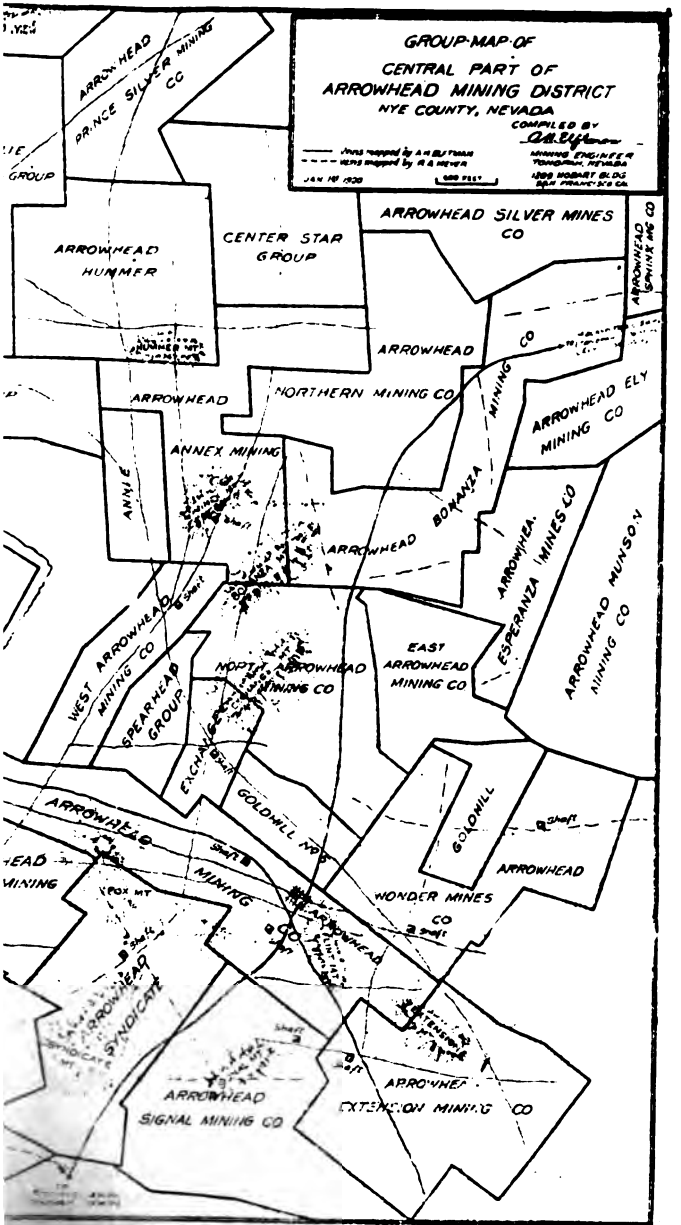
Inc. in 1919, in Nevada. **Cap.**, $1,000,000; $1 par. Listed on Boston Curb January 10, 1920.

Property: 8 claims and 3 fractions, 170 acres, between the Arizona Silver, Cons. Silver, Inc., and Silver Reef Mines Co., in Buena Vista district, near Unionville, Pershing county. Reported on by J. S. Coupal on December 1919. Ground was worked in the 60's and 70's and is said to have yielded $20 in silver.

Geology: flat bedded limestones between two rhyolite dikes, contain flat orebodies that are partly developed. A fault-fissure running N. W.-S. across the property also shows some good ore. Deposits are stated to be "blanket" and "fissure" types.

Development: includes merely a dozen short tunnels, three of them one blanket vein. An 80' shaft cut this same vein 300' from the outcrop, the total work on this orebody, assuming an average thickness of 12", is said to block out [illegible] tons of 12.1 oz. The "fissures" carry more gold than blanket.

The [illegible] looked for 200' below the Silver [illegible] than the other two properties. [illegible] publicity campaign, he published [illegible] son of Frenzied Finance [illegible]



'Y' MAP OF THE ARROWHEAD DISTRICT, NEVADA.

who is said to have sent two engineers to the mine and subsequently given Va Riper the choice of selling to him 1,010,000 shares of Arizona Extension f $505,000 or of taking 1,010,000 shares of the final company (Cons. Silver, Inc.) provided Van Riper gave to Lawson's final company a 60-day option on t remaining 990,000 shares at 50 cents each. Van Riper accepted this second of

Lawson Van Riper, and others, were arrested in March, 1920, for alle fraud in this and allied promotions.

ARIZONA SILVER MINES CO. NEVAD

Office: 265 Russ Bldg., San Francisco, Calif. **Mine office:** Unionvil Nevada.

Officers: Edw. S. Van Dyck, pres.-mgr.; F. W. Lockman, v. p.-sup Chas. D. Olney, sec.; M. E. Pratt, engr., with A. L. Holbrook and J. J. Lo directors.

Inc. April, 1919, in Nevada. **Cap.,** $1,000,000; shares $1 par; 108 issued; 550,000 shares in treasury. National Security Co., New York, tra agents. Annual meeting, first Monday in May.

Dividends: initial of 3c per share on Dec. 15, 1919.

Property: 8 claims, 2 patented, about 120 acres, in Buena Vista can Pershing county, near Unionville, includes the Arizona mine, credited wit gross production of $5,000,000 from 1868-1880.

Geology: of the district is fully described in U S. Geo. Sur. Bull Ransome. The ore occurs in a solid blanket vein in limestone, averaging thickness. About 5,000' of work has been done, almost all of it in ore and re by Chas. D. Wilkinson, engineer for the Goldfield Cons. Mng. Co., made gives an average assay of 27.3 oz. silver per ton, with 26,600 tons in sight, taining about 728,900 oz. silver.

Equipment: includes air-compressor, drills, mill of 35 tons daily pacity with flotation unit, in operation since March, 1919, and reported ma an extraction of 90%, the concentrates from 20 to 30 oz. ore averaging 15 silver per ton. Treated 1,231 tons in 1919, yielding $8,075.

ARROW MINING CO. NEVA

Reorganized in May, 1918, as the Southeastern Mining Co., which see.

ARROWHEAD ANNEX MINING CO. NEVA

Address: Divide Brokerage Co., Box 416, Tonopah, Nev.

Officers: J. M. Gilfoyle, pres.; B. D. Luce, v. p.; Pat Mooney, treas., with F. H. Connolly and A. G. Raycraft, directors.

Inc. 1919, in Nevada. **Cap.,** $150,000; 10c par; 100,000 shares offere 7 cents each.

Property: 4 claims, a short distance N. of the Arrowhead Mining ground. In 1919, a shaft was sunk and a hoist erected.

ARROWHEAD BONANZA MINING CO. NEVA

Address: Tonopah, Nev.

Property: in the Arrowhead district of Nye county.

ARROWHEAD CONSOLIDATED MINING CO. NEVA

Address: Ely, Nev.

Property: 1 mile S. of the Arrowhead Mining Co.'s ground. Inc tions are reported to be good, and by mid-November, 1919, a shaft was d 75' showing some ore. Shaft is being sunk 100' further. A head-frame an h. p. gasoline engine is used.

ARROWHEAD ESPERANZA MINES CO. NEVA

A company reported organized late in 1919 to develop claims in the ea part of the Arrowhead district.

ARROWHEAD EXTENSION MINING CO. NEVA

AURORA CONSOLIDATED MINES CO. NEVA

A subsidiary of the Goldfield Cons. Mines Co.

Office: Reno, Nev. **Mine office:** Aurora, Mineral county, Nev.

Officers: Geo. Wingfield, pres.; J. H. Miller, v. p.; with H. M. Ho Chas. E. Knox, E. A. Julian and F. M. Manson, directors.

Inc. in 1912, in Utah. **Cap.**, $100,000; shares 10c par; assessab 685,550 shares issued. June 30, 1914, 87% of the issued stock of the Aurora Co Mines Co. was sold to the Goldfield Cons. Mines Co. for $763,000, by Jesse Kni and associates.

Annual report for 1918 shows: Total earnings, $297,114; total operating penses, $386,103; operating loss, $83,988; deficit, Dec. 31, 1918, $305,548.

Property: at Aurora, is a group of claims in the Sierra gold belt, back Hawthorne, containing several old and well known mines, with gold qu veins in sheared andesite, slate, etc.

Development: 400′ vertical shaft, connecting with main working t nel, 4,500′ long.

Mill and cyanide plant: 40 stamps with daily capacity of 500 to weight of stamps 1,580 lb since dismantled.

Production: in 1916, 173,270 tons; in 1917, 175,447 tons; in 1918 (to S tember), 104,086 tons. Operations showed a loss of 65c per ton in 1918, against a loss of 10 cents in 1917, and a profit of 43 cents in 1916. Total duction for last five years amounted to 633,332 tons, yielding $1,842,482 cost of $1,856,624.

All operations ceased October, 1918, as company could not make a p owing to increasing high cost and low tenor of ore. The assets of the Au Cons. are to be liquidated and the proceeds applied on its indebtedness to Goldfield Cons., amounting to $457,500, December 31, 1918.

Mill sold, 1919, to Goldfield Dev. Co. and moved to Goldfield.

AURORA MINES CO. NEVA

Property sold and company out of business. Fully described, Vol. XIII

AUSTIN DAKOTA DEVELOPMENT CO. NEVA

Address: Valley City, North Dakota. **Mine office:** Austin, Nev.

Officers: C. E. Garvin, pres.; A. B. Cox, supt.-v. p.; with C. A. S man, H. R. Bruns, S. H. Nelson and T. Carter Griffith, directors. F. W. S berg, sec.-treas.; C. F. Littrell, supt. G. J. Babcock, cons. engr.

Cap., $1,500,000; shares $1 par; 1,200,000 shares issued.

Property: 800 acres in the Reese River mining district, at Austin, N der county, Nev. Ore is gold-silver in chlorite zone, in 2 parallel ledges, thick and cut by several mineralized dikes in granite. Workings for abo expose a quartz vein varying in thickness from 6 to 24″, and averaging $ per ton.

Development: by the X-Ray 2-compartment shaft, 330′ deep with of laterals; the O. K. incline shaft, 350′ deep, the 250′ Dalton shaft, sunk 6′ vein of milling ore and the 150′ Tesora shaft, sunk about 800′ from the Drifting on 300′ to reach the main or Dike vein, in April, 1919.

Equipment: pump, 80-h. p. hoist, ore bins, compressor, storehou stable. Construction of a mill was under consideration in August, 1919.

Production: reported to aggregate $1,000,000.

AUSTIN GOLDFIELD MINING CO. NEV

Geology: carries plumbojarosite, a very rare mineral, carrying gol and platinum (see U. S. Geol. Survey Bull., 620). Ores carry gold, silver, co per, lead, zinc and platinum, lowest assay at the Azurite copper mine said to \$3.60 gold, \$4.50 silver, 27% copper, .03 oz. platinum. Ores occur in replaceme orebodies of irregular size and shape, the largest 35x40' and 8 to 10' thick thick-bedded limestones cut by porphyry dikes.

Development: by 3,160' of workings, including several tunnels, estimate to block out 8,800 tons of 20% copper ore and 30% lead ore.

Shipments during 1914-'16 returned \$38,000. In 1918-'19 the mine w operated by lessees on a 15% royalty basis.

BAMBERGER EXPLORATION CO. NEVAD

Name changed in November, 1919, to Simon Bamberger Co., owns th Gusset Patch group at Pioche, Lincoln county, leased until February, 192 to Black Metals Mines, Inc., which see.

BATTLE MOUNTAIN MINES & DEVELOPMENT CO. NEVAD

Office: 617 Merritt Bldg., Los Angeles, Cal. **Mine office:** Battle Mou tain, Nev., F. E. Perry, manager.

Officers: M. H. Whittier, pres.; F. B. Sutton, sec. Is a close corpor tion and no details of organization are made public.

Property: 20 claims, 9 patented, in Lewis mining district, Land county, 16 miles south of Battle Mountain. Ore carries silver as stephani in shoots in quartz vein. Average value reported as 20 oz. silver and tra of gold and copper.

Development: by tunnels, from 700' to 4,670' long with a total 28,000' of underground work, said to have blocked out 50,000 tons of ore.

Equipment: included 200 h. p. Diesel engine, compressor and 125 t mill, with flotation unit.

No work done during past 2 years, and equipment to be sold and m leased.

BELCHER MINING CO. NEVAD

Merged with Jacket-Crown Point-Belcher Mines Co. (which see), Ma 10, 1915.

BELMONT BIG FOUR MNG. CO. NEVAD

BLUE LIGHT COPPER CO. NEVA

Address: care C. W. Marsh, pres., Washington, D. C. **Mine o** Mina, Mineral county, Nev.

Officers: Henry L. Dollman, v. p.; F. M. Baker, Carson City, Ne sec.; Wm. C. Osborne, treas.; preceding officers, Chas. N. Van Cle Chas. E. Test and Richard Stegemeier, directors.

Inc. Oct., 1907, in Nevada, as successor of Blue-Light Mining **Cap.**, $2,500,000; shares $1 par; non-assessable.

Property: 14 miles from Mina, Mineral county, developed by 600′ sh from which several carloads of rich carbonate ore have been shipp Shaft reached sulphide zone in 1917, but workings have not yet pas through leached material. Mine is equipped with hoist, buildings, etc. amined by R. W. Hadden. No recent returns secured.

BLUESTONE MINING & SMELTING CO. NEVA

Office: 42 Broadway, New York City. **Mine office:** Mason, Nev.

Officers: D. M. Steindler, pres.; S. W. Cohen, v. p.-gen. mgr.; J. B. Woddell, C. D. Kaeding, and Sir M. B. Davis, directors. H Thompson, sec.-treas.; M. V. Summerhayes, supt.

Inc. May 18, 1917, under laws of Maine. **Cap.**, $2,000,000; $10 p 100,000 outstanding.

Property: 440 acres, 380 patented, including the Bluestone mine an group of 20 claims adjoining the Mason Valley mine in Lyon cou Formerly owned by the late J. D. DeLamar. The Bluestone is the ol property in the district, claims having been patented previous to 1890.

Geology: ore is mainly chalcopyrite, associated with considerable dote, in a garnet-limestone gangue, there being practically no oxidized o even at the outcrop. Ore is uniform in character, and after a light roa well adapted to magnetic separation. Drill-holes proved that ores ex to 750′ depth.

Development: mine has been opened to a depth of 540′ and has 2 m of workings, including a 1,300′ main haulage tunnel, cutting an ore-sh about 300′ wide and 500′ long at a point 300′ below the apex. This sh is said to carry an 80′ paystreak of high-grade ore, ranging up to 20% tenor, with balance of ore carrying 2.5% copper. Management estim 1,600,000 tons of ore in sight, averaging 2.6% copper, in 1917.

Equipment: includes a 50-h. p. hoist, 25-drill electric air-compres and 800-ton flotation plant, which supersedes the old magnetic plant. Company built 2½ miles of railroad from Mason to the mine in 1

Production: in 1919, up to time of stopping work, due to the ma monthly output was about 1,750,000 lb. of copper. Operations resu September, 1919, but suspended in March, 1920.

BLUSTER CONSOLIDATED MINING CO. NEVA

granite-porphyry intrusions, ranging from quartz-diorite to true granite, overlain by a thick series of Paleozoic beds. These rocks are extensively truded by dikes and masses of granite porphyry. The vein system is extens and well defined with outcrops traceable for thousands of feet on the surfa and underground workings proving continuity downward, and large size oreshoots.

Development: the Lucky Hill mine is partly developed by a cross tunnel 350′ long intersecting two veins, whose width is stated to vary from 8 40′, and by a shaft 300′ deep, showing good milling ore to a depth of 60′ be the tunnel level, at which point vein dips out of shaft. Old workings con much milling ore of fair grade, estimated at 100,000 tons of 15 oz. ore. Dur 14 months in 1917-18, shipped 6,000 tons unsorted ore averaging 22 oz. si per ton.

The Argentum mine has been developed to a depth of 1,460′, and from 1 to 1893 is said to have produced 300,000 tons of $50 silver ore from a contin ore shoot. The Mt. Diablo is developed to a depth of 1,000′. Ore: the p cipal value is in silver, occurring as chlorides and bromides with about $1 p per ton. Recent developments on the 200′ level on the Baldwin vein at Lucky Hill mine have opened a shoot of shipping ore 4′ to 11′ wide and 100′ l

Reserves: the company's engineers estimate reserves, including or place, fills and dumps as follows:

Lucky Hill, 157,000 tons, average 15 oz.; Argentum, 381,000 tons, ave 14 oz.; Mt. Diablo, 478,920 tons, average 15 oz.

Equipment: Lucky Hill mine is equipped with compressor plant, t chine-drills, motor-trucks, and 40-stamp mill to be enlarged to 500 tons daily.

Production: prior to August, 1918, the Argentum and Diablo are e mated to have produced 445,000 tons of high-grade ore, and the Lucky H 9,000 tons shipping ore. Since August, 1918, the Lucky Hill mine has m tained weekly shipments of 50 tons of ore averaging 20 to 40 oz.

In July, 1919, the mine was reported undergoing a thorough examin previous to the formulation of plans for future development work and ins tion of equipment. In December, about $550,000 had been secured from sa treasury shares, and machinery had been installed.

Officers: S. F. Taylor, pres.; Gurney Gordon, v. p.-mgr.; W. R. G Sec.; J. W. Davey, asst. sec.-treas., with H. G. Humphrey, directors. Le Kamp, gen. supt.

Inc. October, 1916, in Nevada. **Cap.**, $1,500,000; $1 par; issued 1,00 Listed on San Francisco Exchange. U. S. Corp. Co., transfer agents registrar. Annual meeting, October 1.

Property: 260 acres at Como in the Silver City-Palmyra distric Lyon county, 12 miles S. E. of Dayton and 14 miles S. W. of Virginia City.

Geology: ore is mixed oxide and sulphide, carrying gold and silv a quartz vein in andesite. The quartz is hard, and contains calcite in amounts.

Development: by incline and vertical shafts to a depth of 350'; a tunnel 4,000' long. A rich shoot was opened in Oct., 1919, on 100' level o Lucky Sunday claim. A new tunnel to open mine at depth of 600' is driven.

Equipment: complete for mining, and a 100-ton cyanide mill (desc in Min. and Sci. Press of Jan. 10, 1920, by F. Borzynski), employing crush stamps, ball-mill, agitators, Oliver filter, etc. A good recovery is made cost of $2 per ton.

Company is producing, but no reports have been secured.

COMO GROUP MINING CO. NEV

Address: 20 Fordonia Bldg., Reno, Nev.

Officers: C. P. Ferrel, pres.; W. S. Schuyler, v. p.; with W. G. Ed sec.-treas., and J. H. Rae, and J. H. Rae, Jr., directors.

Inc. 1919, in Nevada. **Cap.**, $150,000; 10c par.

Property: 6 claims, 120 acres, four adjoining Como Cons. on the in Washoe county. A strong vein traverses three of the claims for 4,5 a large quantity of ore is said to be opened.

COMSTOCK FRACTURE MINES CO. NEV

Incorporated December, 1919, in Nevada, by C. A. Garrett, T. B. G Gurney Gordon, F. M. Kleppe, and O. R. Vaughn. Cap., $75,000; 20c. par.

No information has been received as to property.

COMSTOCK LEASING CO. NEV

Address: Virginia City, Nev. H. B. Bulmer, mgr.

Property: 2 patented claims on the Comstock Lode, at Virginia Storey county, held under lease from the Potosi Gold & Silver Mng. Co the Chollar Gold & Silver Mng. Co., both old and inactive companies.

Ore: occurs in fissure vein with diorite foot and andesite hanging veins run N. E.-S. W. and contain gold-silver ores.

Development: by 2,000' tunnel to depth of 400'.

Equipment: includes electric hoist, 100-ton cyanide mill.

COMSTOCK-PHOENIX MINING CO. NEV

Office: Provo, Utah. Mine at Six Mile Canyon, Virginia, City, N

Officers: Jesse Knight, pres.; Geo. H. Drysdale, v. p.-mgr.; with D Starr Jordan, J. Wm. Knight, and F. M. Manson, directors. W. L. M sec.-treas.

Inc. 1909. **Cap.**, $1,000,000; $1 par; all outstanding.

Property: 3 patented claims in the Silver Star district, 2 miles railroad, on what is believed to be a cross fissure, about 1 mile from the stock lode. The main vein has a N. E.-S. W. course. Several distinc shoots have been encountered that vary from 1 to 8' in width, and a 50 oz. silver, with some gold.

Development: by 800' shaft, tunnel and raises. A drift was tended westward on the 800' level in 1919, in the direction of the Co

Equipment: electric hoist, compressor, tram and buildings.

Production: shipments from 1909 to 1914 amounted to $40 net returns of $250,000. Old company paid dividends of $102,516. Pres

eorganization in January, 1917, of the old company, has not

y, Nev.
anson, pres.-treas.; F. C. Hunter, sec.
vada. **Cap.**, $2,000,000; $1 par; 1,500,000 outstanding,

Property: the Cortez group at Cortez, Nevada, in Eureka and La counties. The group consists of 49 claims, 38 patented, 790 acres. Co also owns water-rights and millsites all formerly owned by the Tenabo ing and Mining Co. It includes the old Garrison, Mt. Tenabo, St. L Fitzgerald and Arctic mines, which have yielded over 7,400,000 oz. of s and $500,000 gold from 125,000 tons of ore, since 1864. Milling was sto in 1892 and all operations in 1895. Lessees extracted the remaining ric during 1901 to 1916.

Geology: the orebodies occur as irregularly sinuous replacement uptilted limestone, overlaid by massive beds of quartzite, whose out forms cliffs along the mountainside. A porphyry dike deflects one body. See description and illustrations by Emmons, U. S. Geol. S. Bull. p. 103.

Development: by 4,000′ Garrison main tunnel, attaining a vertical d of 800′, with 7 levels and a total of 15 miles of workings.

Reserves: estimated at 68,000 tons of 17 oz. ore on dumps and in a blocks underground; also 120,000 tons of tailings, carrying 7 to 10 oz. s

Equipment: includes an old mining and milling plant, and dwell shops, etc.

Management is unusually competent, Mr. Manson being head of Western Ore Purchasing Co., and chairman of the Rochester Nevada S Mines Co. The re-working of old stope-filling and the exploration of l of virgin ground below the old workings offer excellent speculative p bilities.

CONSOLIDATED MAYFLOWER MINES CO. NEV

A reorganization of the Mayflower Bullfrog Consolidated Mng. Co., e 1917.

Address: 701 Storey Blk., Los Angeles, Calif. **Mine office:** Pio Nevada.

Officers: Jos. B. Kendall, pres.-mgr.; John H. Miller, v. p.-sec.-t with Frank M. Manson, P. H. O'Neill and Wm. J. Tobin, directors.

Cap., $250,000; shares 10c par; assessable; 1,964,371 shares outsta Four assessments, 1c. per share, levied April and October, 1918, and Oct Dec., 1919. Listed on New York Curb and San Francisco Exchange. Corporation Co., New York, registrar.

Property: 11 patented claims, 200 acres, in Bullfrog district, P Nye county. Oxidized and free-milling ore occurs in veins with N.-S. and dip of about 20° E., carrying mainly gold with a little silver and The vein is 4′ wide, and assays said to average $8 to $12 per ton. Exam J. B. Kendall and R. C. Cameron.

Development: about 3,000′ of workings, including 1,925′ in 1919. A 530′ Mayflower shaft work was in progress on the 200, 300, and 500′ le 1919, exposing 8′ of commercial ore. Reserves estimated in Nov., 19 80,000 tons of $10 ore.

Equipment: 4,000′ water pipe-line, hoist, compressor, and 100-to consisting of 15 stamps, ball-mill, amalgamating plates, concentrator, and mill. Test runs gave a recovery of 80%.

Production: in 1918, under previous management, 10,000 tons ing $14 per ton from the 200 and 300 levels. Shipments are sent to the Ma smelter at Kennett, Calif.

CONSOLIDATED NEVADA-UTAH CORPORATION NEV

a California. **Cap.**, $216,000; shares $1 par; assessable; sferred at company's office in San Francisco. Listed on San Francisco Exchange. In July, 1919, the company was or the first time in 30 years.

Property: a considerable part of the California claim and the C Virginia claim, covering 1,310′ along the Comstock Lode at Virginia City, same management and operated in conjunction with the Ophir Silver, U Cons., and Mexican Gold & Silver companies, which see.

Development: under present management work on the 2,700′ and 2 levels was stopped and exploration pushed on the 2,150′ and above to the l level. Ore varies from narrow veins up to quartz 15′ in width and rang value from $10 to $50 per ton in gold and silver. A new shoot at 2,150′ yielded up to $72 ore.

The ore is treated at the Mexican mill, the return amounting to a $35,000 per month. The first week in Oct., 1919, yielded 457 tons of ore w $12,000.

CONTACT COPPER CO. NEVA

Address: Hutchinson, Minn., and Contact, Elko county, Nev.

Officers: S. G. Anderson, pres.; Wm. Schultz, v. p.; Sam G. Ander Jr., sec.-treas., with J. A. Lindenberg and J. A. Jorgenson, directors.

Cap., $1,000,000; shares $1 par.

Property: two groups, the Lucie, 11 patented claims, and the l Rock, 8 patented and 5 unpatented claims, at Contact, said to show copper bonate ore in veins.

Development: the Lucie group has a 145′ shaft, said to show or the way to the bottom. The Blue Rock has 2 shafts, 50′ and 30′ deep, bot to show ore. No production to date.

COPPER CANYON MINING CO. NEVA

New York office: 25 Broad Street, N. Y. **Mine office:** Battle Mou Nevada.

Officers and directors: R. M. Atwater, Jr., mgr.; C. C. Burger, v. p E. Whicher, treas.; F. Sommer Schmidt, gen. mgr. H. Pelz, sec.

Inc. November 4, 1916, in Delaware. **Cap.,** 1,000,000 shares at $1 value. 500,000 issued. **Transfer office:** 25 Broad St., New York; N Trust Co., 26 Broad Street, registrar. Stock listed on N. Y. Curb. A meeting, third Tuesday in November.

Property: (1) Copper Canyon group and (2) Copper Basin group. first named comprises 16 patented claims of about 300 acres in Copper Ca Battle Mountain, Nevada. Formerly owned by the Glasgow & Western M Co. Purchase price was paid out of first year's production. First work

Claims said to show 3 veins, the Virgin, Superior and Estes, varying 10′ to 30′ in width; the first two with a N. S. course and dip of 60° to 80° ore shoots of about 150′ in length. The Estes ore body found by presen agement is 100′ long, and 20′ wide of high grade ore. The ore is a sulphide and oxide of enargite, chalcocite, chrysocolla, malachite and assaying from 5%-15% copper.

Development: by two old incline shafts, 200′ and 600′ and by a ve shaft started in 1917. The extent of underground workings is 3,500′ greatest depth of 570′. Mine is worked by the fill-stope method.

Equipment: 60 h. p. gasoline hoist; 100 cu. ft. compressor, centr pump, 250-h. p. distillate engine.

The Copper Basin group, 9 miles from Battle mountain, covers a r hilly tract of granite porphyry and altered shale, containing veins and d nated deposits of copper ore. Development at numerous points by shaft underground work has proven a large amount of commercial ore, whose is as yet unknown.

Production: April, 1916 to January 1, 1919, about 3,000,000 lb. copp

Copper Basin is a very promising property, and the Copper Canyon w further deep development.

Property: 7 patented claims, 101 acres, is a well-known gold mine, veins in quartz monzonite, carrying gold-silver ores, changing to copper, and zinc at depth. Orebodies from 2.5 to 5′ in width.

Development: by 600′ vertical shaft, a 45° incline shaft 400′ deep, a 74° incline shaft 300′ deep, with about 2,500′ of underground workings. results from carload lots are 0.9 oz. gold, 4.9 oz. silver, 8.6% lead, 2.3% 1.3% zinc. Company claims that on the lowest levels the amount of le diminishing and copper increasing. The first copper ore mined in comm quantities in the Searchlight district was shipped from this mine.

DUPONT COPPER MINES CO. NEV

Office: N. H. Wheeler, gen. mgr., 7 E. 42nd St., New York City. **address:** Dupont, P. O. Searchlight, Nev.

Officers: S. J. Kistler, pres.; Wm. D. Miller, v. p.; Chas. M. W sec.-treas., with C. S. Clark, directors. G. B. Hartley, J. V. Priest, a W. Wishon, mining and consulting engineers.

Inc. Feb., 1916, in Arizona. **Cap.,** 2,500,000; $1 par; 1,500,000 Security Transfer & Registrar Co., N. Y., transfer office. Metropolita Co., N. Y., registrar.

Property: the Sazarac group, formerly owned by the Gold Co ing Co., defunct 1907, and the Bornite group. These holdings com claims, 8 patented, 410 acres, at Camp Dupont, 18 miles from Searchlig county, Nev.

Company also owns a stock interest in the Queen Calumet Copper Mining Co. of Bisbee, Ariz.; also options on 30 mining claims, about 60 near the Dupont mines, a 51% stock interest in the Assets Realizing Mine California (which see), the entire mill equipment of the Hartley M. M. & tion Co. at Mazuma, Nev., a defunct English concern, and "the prospect of ing" 44 patented lode claims, developed by 5,000′ of tunnel, crosscut carrying more than 100 fissure veins yielding 10 to 7,000 oz. silver per estimated to contain more than two hundred millions of tons of silver-lead ores.

Geology: the Sazarac or Dupont mines show mineralized veins cutting a quartz-monzonite porphyry, intrusive in a pre-Cambrian

y Tertiary volcanics. A basic granite is cut by great tongues
itite dikes paralleling the N.-S. vein system.
d quartz-porphyry with specular and spathic iron and carries
lues. In the N.-S. Sazarac vein, 5′ wide, the ore is specular
ed quartz-porphyry, the vein being 15′ wide on the 200′ level.
E. W. vein 5′ wide, claimed to average $15 to $20 per ton for
depth of 60′. Four per cent. Hill is a stockwerk of veinlets,
isseminated or porphyry orebody. Ore said to assay 10.4 oz.
er, and $6 to $300 gold per ton.
by a 225′ main shaft on the Sazarac, 92 and 111′ shafts
100′ shaft on the Copper Queen claims.
Carl Anderson, Walter M. Brown, and by W. W. Wishon

ılar, company claims to own, control, or was negotiating for,
us districts and claimed that ore valued at about $14,000,000
ng; also that the future mine possibilities have a valuation
.000, and mine and mill equipment is worth $600,000. This
when these properties are in full operation the company
)0 per month for many years, which is interesting if true.
:garded.

Cap., $1,150,000; $1 par; 1,108,566 shares issued.

Annual report to Jan. 1, 1919, shows: total assets, $1,376,023, and liabi accounts payable, $416,236; reserve for depreciation, $104,570; reserve for de tion, $137,308; surplus, $9,342, after deducting $77,599 for dividends. Inc was $427,757, of which $426,206 was from mine bullion; expenditures amo to $186,646, leaving net profit of $177,911 before deducting $97,850 for depl reserve.

Dividends: begun October, 1917, total about 30c per share, the last 3½ cents, being paid in Oct., 1919.

Property: 9 patented claims at Midas, Gold Circle district, Elko co

EMPIRE-NEVADA COPPER MINING & SMELTING CO. NEV

Address: Yerington, Nev. Wm. Gelder, pres.; G. B. Garrison, J. E. Gelder, supt.

Inc. in Arizona. **Cap.,** $5,000,000; shares $5 par. Property taken by Walker River Copper Co., under a lease which provides that when the ties paid amount to $500,000, the title will pass to the leasing company. General Development Co. (Lewisohns) is a small stockholder in the E Nevada company.

Property: about 500 acres on Copper Flat in 2 groups: 1 about I W., the other 2½ miles N. W. of Yerington, Lyon county. Ore occu bunches and disseminated throughout a body of monzonite-porphyry, said opened for 3,000 in length and 1,000′ wide, carrying copper in the form o cates, carbonates and oxides, a considerable part of it averaging 2.65% c

Development: by 5 shafts from 80 to 160′ in depth, several tu and open cuts and also by diamond drilling. Mine is said to have produced $150,000 from surface workings. Shipped 6,000 tons of 6% ore to M Valley smelter, 1912, and 2,900 tons in 1914 Property has small smelting assay office, hoist, boarding house, etc. The leasing company was pushin velopment work in 1919.

ESMERALDA COPPER & SILVER CO. NEV

Successor to Esmeralda Copper Co.

Address: Luning Nev., and 6 Montrose Ave., Verona, N. J.

Officers: Mayor D. H. Slayback, pres.-treas.; Jas. Calvert, v. p.-J. W. Parker, sec., with J. W. Van Schoick, directors. L. B. Spencer, cons.

Inc. 1907, in Nevada. **Cap.,** $1,200,000; par $1; non-assessable.

Property: 9 claims, 180 acres, at Luning, Mineral county, devel by shafts and crosscuts, to depth of 300′. Assays reported to averag copper and 4 to 5 oz. silver. Stock was offered for sale (1919) below pa on a "liberal payment plan" to furnish funds for further development.

EXCELSION MOUNTAIN COPPER CO. NEV

Mail returned from former office: Hawthorne, Mineral county, Nev.

Officers: at last accounts, Frank D. Qualey, pres.-gen. mgr.; J Suits, sec.-treas., Lick Bldg., San Francisco; George Brodigan, W. R. Jack W. B. Tait, directors; Wm. Winkelman, supt.

Inc. Aug., 1907, in Arizona. **Cap.,** $1,000,000; shares $1 par. An meeting, June 7.

Property: Qualey mine, 13 claims, 260 acres, 16 miles S. E. of H thorne, in Whiskey Flat district, Mineral county, Nev., said to have su showings of copper along a contact between granite and limestone. H shallow shafts and one 1,500′ tunnel, said to show 4% copper ore. Total w ings about 3,000′ to a depth of 600′.

Equipment: includes 50-h. p. gasoline engine and 6-drill compre Property closed down since 1914.

EXCHEQUER LEASING & MINING CORPORATION NEV

Mine sold in Sept., 1919, to the Exploration Syndicate No. 2, which see

EXPLORATION SYNDICATE No. 2 NEV

Office: 42 Broadway, New York City. **Mine office:** Cherry Creek. J. W. Walker, mgr.

Property: (1) a lease on the Mary Ann mine at Cherry Creek, W Pine county, owned by the Cherry Creek Silver M. Co. The mine con irregular orebodies in fissure veins in monzonite, with ore reported to a from 35 to 100 oz. silver per ton. Also (2) the Exchequer and Imperial gr 1 mile N. of Cherry creek, White Pine county, formerly owned by the Exch Leasing & Mining Corp. Ore occurs in fissure veins in quartzite, 2 to 5′ with N. E.-S. W. course, reported to run 45 oz. silver and from 60c. to $3 per ton.

Development: at Mary Ann includes 500′ main tunnel, 400′ of sto along the vein, and 2 winzes, 100 and 160′ deep, being deepened in 1919.

Equipment: includes 35-h. p. gas. engine, compressor, hoist, drills. Reserves are reported as 7,000 tons of 24 oz. milling ore in sight.

Production: in 1918, about 700 tons of ore shipped to the Garfield, Ut smelter ran 30-40 oz. silver, and 85c. gold per ton.

Development: at Exchequer-Imperial includes 250′ vertical shaft 1,200′ tunnel. The mine is credited with a past production of **$3,000,000.** Op tions were resumed in 1913, but did not prove profitable. Encouraged unde edly by prevailing high price of silver, present management started operati in 1919, and plans extensive development work. Three carload shipm hauled by wagon to Cherry Creek in May, 1919, said to have assayed 60 oz silver.

FAIRVIEW EXTENSION MINING CO. NEVA

Address: L. D. Gordon, 1011 First National Bank Bldg., San Franc

Property: 14 claims south of the Fairview Round Mountain mine, Fairview P. O. A shallow shaft yielded 50 tons of $30 ore. A head-fr electric hoist, 6-drill compressor, etc, erected in September, 1919.

FAIRVIEW RED ROCK CONSOLIDATED MINES NEVA

Office: J. A. Wright, financial agent, Exchange Bldg., Denver, C H. A. Riedel, pres.

Inc. in Arizona. **Cap.**, $2,500,000; $1 par. Stock offered at 5c per s cash, or 5½c. per share in 10 equal monthly payments, March, 1917.

Property: the Red Rock group, 15 claims, 230 acres, near Fair P. O., in the Fairview mining district, about 42 miles E. of Fallon, Chu county, the nearest railroad point. The mine shows 2 parallel contact w about 400′ apart, between limestone footwall and porphyry hanging wall, to be from 2-8′ wide at surface for about 1,500′ and to carry ore averagin per ton in gold-silver-copper. The veins have an E.-W. strike, dipping at 65°.

Mine without equipment and property as yet a prospect.

FAIRVIEW ROUND MOUNTAIN MINES CO. NEVA

Main office: 1011 First Natl. Bank Bldg., San Francisco, Cal. office: Round Mountain, Nev.

Officers: L. D. Gordon, pres.-mgr.; C. J. Berry, v. p.; H. G. Ma sec.-treas., with H. R. Cooke and J. R. Davis, directors. Gibson Berry, supt.; R. J. Ledwick, mine supt.; E. Michal, mill supt.

Inc. June 25, 1906, in Nevada. **Cap.**, $1,000,000; shares $1 par; 95 shares issued; 200,000 held by Round Mountain M. Co.

Annual report for the year ending Dec. 31, 1918, shows: assets, $1,05 which includes mining properties, $946,061; Liberty bonds, $19,121; cash, $7 income from ore sales, $178,801; total operating costs, $63,103, including m and development, $35,822; milling, $18,539; marketing and misc., $8,741, operating profit, after deducting for depletion and depreciation was $

Dividends: 2c in 1918; 14c in 1919. Total is $153,715.

Property: 10 claims, 170 acres, in Round Mountain district, Nye co includes the Fairview patented claim, 19.54 acres and the adjoining Daisy g 40.9 acres (surveyed for patent), purchased in 1917 from the Round M Mng. Co., for 200,000 shares of Fairview treasury stock.

Ore: occurs in sheeted zones and fissures in rhyolite, the mill averaging $21.79 in gold and silver.

Development: by 500′ tunnel to depth of 250′, with 3,000′ of work In 1918, 1,546′ of work was done at a cost of $13,973, or $9.04 per foot. O tions were mainly confined to the south segment of the Fairview vein on the level, reported to be 15′ wide and to average $10 per ton in gold.

Ore reserves estimated July, 1919, at 10,000 tons, running from $15 per ton.

Equipment: includes 25-h. p. gas. hoist, compressor, electrical 6-stamp amalgamating mill of 30 tons daily capacity, taken over with the mine.

HANNAPAH DIVIDE EXTENSION MINES CO. NEVADA

Office: M. J. Rankin, Santa Clara College, Santa Clara, Calif.

Officers: W. R. Porter, pres.; Louis O'Neal, v. p.; M. J. Rankin, sec.-treas.; with I. E. Chapin, D. A. Beattie, and W. C. Ralston, cons. eng. directors.

Inc. in Nevada; 300,000 treasury shares offered at $1 each in Dec., 1919.

Property: 9 claims, 176 acres, in the Silverzone district, being reopened and rich silver ore struck late in 1919. Shipments were to be started early in 1920.

HANNAPAH MINE NEVADA

Address: Silverzone (Hannapah), Nevada.

Owned by Frederick E. Browne. The mine has an old shaft recently retimbered, which is reported to expose $150,000 worth of ore above the 150′ level.

Hannapah Nevada has been re-christened Silverzone (q. v.) as a result of the renaissance of the old silver camps of Nevada, brought about by the increased price of silver. The mineral deposits of the camp have been known for many years, but after working out the richer oxidized ores deep exploration was not considered profitable and aside from some leasing work, the camp has long been idle. In 1919, the activity of Divide, led to the reopening of the Old Hannapah mine, and the incorporation of several new companies to develop and operate other properties in the district.

HARNEY GROUP NEVADA

Address: Stindl & Donohue, lessees, Pioche, Nev.

The mine is 1 mile east of Pioche, Lincoln county, and in April, 1919, an orebody 9′ wide was cut that consisted of galena averaging $80 to $100 per ton. Shipments were made in 1919, but no record is obtainable.

HAYSTACK MINES CO., INC. NEVADA

Address: Winnemucca, Nev.

Officers: Pete Egoscue, pres.; F. L. Reber, v. p.; C. T. Smith, sec. B. J. Loinaz, treas.; with Y. Arrascada, and Jose Ugariza, directors.

Inc. June, 1914. **Cap.,** $1,000,000; none issued. Annual meeting first Tuesday in January.

Property: 5 unpatented claims, 35 miles W. of Winnemucca and 7 miles S. of Jungo, Humboldt county, on the Western Pacific R. R. Ore carries free-milling gold in fissure veins in granite and quartzite, said to average $22 per ton.

Development: by 3 shafts, deepest 100′. Machinery installed in 1919.

HIDER NEVADA MINING CO. NEVADA

Officers: Fred Redmond, pres.; J. J. Morris, sec.-treas., with Mrs. A. F. Pitt, E. O. Lee and T. E. Fitzgerald, directors.

Cap., 1,000,000 shares; 347,980 issued.

Property: about 23 miles south of Battle Mountain, Lander county, said to show several veins carrying copper ore.

Development: includes 125′ incline shaft and a tunnel.

Management shipped some ore from the dumps in 1917. No recent returns.

HILLTOP MILLING & REDUCTION CO. NEVADA

Hilltop, Lander county, Nev. **Officers and directors:** Frank LeBa pres.; Chas. E. Beach, v. p.; E. Ross Carver, sec.-treas. and mgr.

Inc. in Nevada. **Cap.,** $50,000; shares $10 par; all outstanding. Annual meeting in January. Company operated a 75-ton 10-stamp cyanide plant at last accounts.

HOLDEN MINING & MILLING CO. NEVADA

Address: 1482 Broadway, New York City, and Tuscarora, Nev. J. L. Harrington, pres. C. C. Griggs, mgr.

Inc. 1916, in Nevada, to take over lease and bond on 2 claims of the

IROQUOIS COPPER CO. **NEVAD**

Address: Mina, Nev.

Officers: H. B. Lind, pres.; M. A. Lind, v. p.; J. L. Fenwick, se treas.

Inc. in Nevada. **Cap.,** $12,000; par $1; 8,000 shares issued and own by the Nevada & Boston Copper Co.

Property: the Iroquois Copper Co. hold title to a group of 9 l mining claims adjacent to the Wall Street mine, and midway between Mi and Luning, Nevada. The property covers a contact-metamorphic zo 3,000' long and 50' to 300' wide, of garnetized limestone with porphyry trusions, but no definite contact; course of zone, N. E.-S.W. This mater carries ore in fractures and cross fissures, the garnet material being ported to carry a large body of 1½ to 2% copper ore.

Development: by 1,300' of workings, including the 125' Mary and M Mastadon shafts on a 18 to 48" strong vein of oxidized ore.

During 1916-1918, property was worked by lessees who shipped ore th averaged 7% copper, 2 oz. silver and gave a return of $50,000.

JACKET-CROWN POINT-BELCHER MINES CO. **NEVAD**

Office: Mills Bldg., San Francisco, Cal. Mine near Virginia Ci Storey county, Nev.

Directors: M. B. Forman, C. L. Moore, J. L. Brainard, H. W. Glens and L. M. Bliss. Wm. P. Miller, supt., Virginia City, Nev. Company is merger of 3 of the big Comstock mines.

Inc. Feb. 11, 1915, in California. California Corporation Commissi authorized issue of 360,000 shares common and 12,000 shares preferred the Yellow Jacket G. & S. Mng. Co.; 208,000 common and 10,400 prefer to Belcher Mng. Co., and 150,000 common and 10,000 preferred to the Cro Point G. & S. Mng. Co. Above stock is in payment for all properties these 3 companies subject to debts of $80,962; 217,600 shares were sold par, and money used for development.

Property: the bonanza mines that made the fortunes of Flood, Mack Lucky Baldwin, and D. O. Mills. The mines are in the southern part the Comstock lode, a great fissure vein 4 miles long, filling a fault plane the andesite-diorite rocks of Mt. Davidson, near Virginia City. The o is quartz carrying silver-gold. Geology described in Monograph 3, U Geological Survey.

The merger made it possible to install modern pumps, to unwater 1,700' and 1,800' levels of the mines where good ore was worked until great influx of hot water stopped mining.

Equipment: 125-ton mill and cyanide plant erected 1917.

Production: for 1915 and first half of 1916 came from old stopes a and workings on the 1,600' level and above, the average production fro both mines reported at about 1,000 tons per week. No recent report work received, but property was being operated 1918-19.

JARBIDGE CENTRAL MINES CO. **NEVAD**

Closed down.

Officers: J. P. Duncan, pres.; Angus McDonald, v. p.; W. W. Fi sec.; with John MacRae, Ira Brackitt and H. O. Milner, directors.

Inc. Oct. 5, 1911, in Nevada. **Cap.,** $1,500,000; $1 par; 1,250,000 issue

Property: 9 unpatented claims in Jarbidge district, Elko county, n to show a quartz vein in rhyolite, dipping 85° S. W. and pitching S. 32° Average gold assay is $15 to $20 per ton.

Development: by vertical shaft to 65' and by 2 tunnels 175' and 2 long. Work in 1916 cost $5,000, done on an option. A prospect.

JEFFERSON GOLD & SILVER MINING CO. **NEVAD**

Address: S. H. Brady, mgr., Reno, Nev.

Property: the old Kanrohat mine in Jefferson canyon, 8 miles fro Round Mountain, Nye county, developed by 4 tunnels to depth of 1,0 An orebody 14' wide reported exposed on the bottom level. Ore carri gold and silver.

JULIA CONS. MINING CO. NEVA

Address: 315 Bush St., San Francisco, Calif.

Cap., $550,000; shares $5 par. Listed on New York Curb, but lifel

Property: on the Comstock Lode, Storey county, is practically worked. Assessments made at intervals. Idle.

JUMBO COPPER MOUNTAIN MINING CO. NEVA

Office: Goldfield, Nev.

Officers: Chas. Sprague, pres.; J. K. Turner, v. p.-cons. engr.; Gill, sec.-treas. L. L. Dellinger, supt.

Inc. Nov., 1917, in Nevada. **Cap.,** $2,500,000; shares $1 par; assessal Assessment of 2c per share levied April, 1918. Company is a subsidiary of Jumbo Extension Mng. Co. (which see), whose shareholders received one sh in this company for each Jumbo Extension share held, free of charge. Vend of the Copper Mountain mine took $25,000 worth of shares in the new comp at 25c. each as part payment for mine.

Property: 5 patented, 12 unpatented claims, 340 acres, 18 miles fr rail at Nolan, Mineral county.

Development: by 3 shafts, with over 6,000' of workings. A cross from No. 1 shaft opened 3' of 7% and 5' of 4% ore, and from No. 2, 3' of and 4' of 4% ore in 1917. No. 3 shaft at 385' depth passed through the con zone (porphyry and limestone) exposing 8' of sulphide ore assaying 5% cop Recent work has been devoted to development on the 275' level of No. 3 sh By September, 1919, the drift was out 635', it having been in ore for 150'.

Production: shipments to September, 1919, by company and less amounted to over $100,000.

Reported in November, 1919, that company was about to abandon mine the owners, Ed. La Patt, Ed. Schultz and Mrs. J. L. Woodward, deman $50,000 due on purchase price. Company spent $130,000 to date.

JUNE BUG DEVELOPMENT CO., INC. NEVA

Office: Ogden, Utah. **Mine office:** Las Vegas, Clark county, Nev.

Directors: Lester S. Scoville, pres.; Milton J. West, v. p.-mgr.; Fra L. Scoville, sec.-treas., with John Hochett and Walter B. Scoville.

Inc. Jan., 1916. **Cap.,** $100,000; shares 10c par; 825,000 issued. Ann meeting, January 4.

Property: 9 claims, surveyed for patent, 18 miles N. W. of Las Veg in the Goodsprings district, Nev., said to show gold, silver and zinc ore. ore occurs in shoots 30' long, and 6-10' wide and from 14" to 5' thick, reported assay 40% zinc, $1.50 gold and $4 silver per ton. The ore is a zinc silicate. Ve are in limestone formation.

Development: by shallow shafts and about 1,200' of workings. Sh ments of 650 tons for 4 months ending June, 1916, to the Utah Ore Sampling C returned $35,000. Three cars of ore shipped in March and April, 1917, retu $2,811. No shipments since. Driving a new tunnel in 1919, which was expe to cut the ore at a greater depth.

JUSTICE GOLD & SILVER MINING CO. NEVA

Address: 264 Russ Bldg., San Francisco, Calif.

Officers: Franklin Leonard, Jr., pres., 25 Broad St., New York C Wm. Bannan, v. p.; J. B. Shaw, sec.

Inc. Jan. 14, 1907, in Maine. **Cap.,** $2,500,000; $5 par; increased Ma 14, 1910, from $1,000,000, shares $1 par; all issued. Bonded debt is $612,50 authorized $1,000,000 first mortgage 10-year 6% gold bonds, convertible into s on the basis of $10 per share and redeemable on 31 days' notice at 102½ a accrued interest.

The mortgage contains a sinking fund provision, by which the compan required to pay to the trustee within 60 days after January 1, each year, beg ning 1912, 20c for each net dry ton of ore treated during the year preceding, a provision whereby the sinking fund payments may be reduced proportionate as outstanding bonds are retired.

Guaranty Trust Co., New York, and United States Trust Co., Boston, re trars. Bankers Trust Co., New York, and Boston Safe Deposit & Trust C transfer agents. Shares listed on Boston Stock Exchange and New York Cu

Annual report for year ending December 31, 1918, shows: Current ass $1,723,767, and current liabilities, $205,558, compared with $1,639,347 and $214, in 1917. Net profit for 1918 amounted to $178,202, compared with $358,277 1917, and a deficit of $71,762 in 1916.

Property: 9 claims, patented, 170 acres, and a fractional claim of acres, known as the Spragg mine, lying south of the Bluestone and about miles west of Mason. Company also owns a smelter and 1,320-acre smelter near the railway.

The Gray Eagle property, 14 patented claims, 256 acres, near Happy Ca Siskiyou county, Cal., was acquired in September, 1916, for 144,250 fully- Mason Valley shares, said to be worth $721,250. The title to the property the name of the Gray Eagle Copper Co., all of which shares are held by Ma Valley. In 1912, Henry Krumb estimated ore reserves as 450,000 tons, aver ing 4.64% copper and $1 gold per ton. In 1916, O. R. Whitaker estimated follows:

	Tons	Copper, %	Gold, Oz.	Silver,
Semi-oxide	50,000	5.00	0.06	0.2
Mineralized walls	600,000	1.13	0.025	Tra
Chalcopyrite	440,000	4.68	0.50	0.0

Up to June, 1918, about 8,000' of underground work and 7,500' of diam drilling was reported to have proved 930,000 tons of ore averaging .025 oz. and 3.04% copper, and 500,000 tons averaging 0.01 oz. gold and 1% copper.

The Majuba Hill group, 20 miles E. of Imlay, Humboldt county, has developed under option since 1916. During 1917, 1,752' of work was done in 1918, 2,650'; said to have opened promising ground in the No. 3 tunnel. total of $142,509 had been expended on the Majuba group to December 31, 1 Shipments amounted to 788 tons of 11.51% copper ore in 1918, and in 1917 tons averaging 10% copper. The total to September, 1919, was 2,000 tons, a ing 12% copper and 1.4 oz. silver.

In Apr[illegible] the company was reported to have taken an option on [illegible] Northe[illegible] near Schurz, and to have started sinking a shaft.

Ge[illegible] county [illegible] garnet deposit between [illegible] tuffs. The latter rocks are [illegible] escarpments and sharp gul[illegible] altered limestone of [illegible] le cuprite, succeeded, at [illegible]

New York is president, and ... ll of Go ... gely interested.

Property: 10 claim ... Gol ... vein cross

mitic limestone and carbonaceous shale. Ore carries silver, which occurs argentite, with some gray copper, galena and gold. There is about 2,000' underground development.

Samples of over 4,000 tons varied from 3.8 to 177 oz. silver and 0.5% 0.7% lead, averaging 53.5 oz. silver and 0.04 oz. gold. Presumably idle.

MINERVA TUNGSTEN CORPORATION **NEVAD**

Office: 330 Investment Bldg., Los Angeles, Cal., and Pioche, Nev.

Officers: Bryant Mathews, pres.; J. B. Van Winkle, v. p.; O. Wern sec.-treas., with K. G. Gillette, A. M. Chase, and O. A. Knox, mgr., directors.

Inc. 1918, in Nevada. **Cap.**, $350,000; par $1; 250.000 issued. Operati expenses for past year totaled $35,000.

Property: 17 claims, 340 acres, in Minerva district, White Pine coun 55 miles N. E. of Ely and 77 miles N. W. of Pioche.

Examined by F. L. Hess, F. B. Weeks, E. R. Pembroke, J. B. Winwo J. Nelson Nevius, S. R. Porter, O. A. Knox and M. van Sicklen.

Geology: scheelite ore occurs in a quartz vein in limestone dipping 5 with E. W. course and 9 to 50' wide. Shoots are up to 750' long. Ore carr 1 to 4% tungstic acid as scheelite.

Development: by 100' vertical shaft and tunnels 200 to 350' lon Greatest depth is 150'. Workings amount to 3,000'.

Ore blocked out is estimated at 25,000 tons, with 100,000 tons probable.

Equipment: gas engines, compresor, drills, 3½-mile pipe-line for wat 150-ton gravity concentrating mill, camp for 50 men, auto-trucks, etc.

Production: 10 tons of 70% concentrate from test runs.

Pending an improvement in the tungsten market, work is confined to develo ment and experimental work in the mill.

MINES DEVELOPMENT CO. OF NEVADA **NEVAD**

Address: Lovelocks, Humboldt county, Nev.

Officers: John T. Reid, pres., treas. and gen. mgr.; Paul G. Reid, v. sec. and supt., with R. C. Moore, J. Theis, Peter Anker and W. H. Raw directors, at last accounts.

Inc. Sept. 1, 1904, in Arizona. **Cap.**, $750,000; shares $1 par; issue $454,000.

Property: 5 claims, 100 acres, in the Juniper Mountain district, s to show various fissure veins, alongside of quartz porphyry dikes, intrusive monzonite. Veins run N. 20° W. and are nearly vertical. The vein develop averages 5' wide, is traceable for 2,000' and proven to 170' depth. Small sca of ore found at or near surface show chalcocite, bornite and tetrahedrite, giv average assays of 2% copper, 5 oz. silver and $1 gold per ton.

Development: by a 500' tunnel. An 800' shaft to explore surface posits at depth is proposed. Property has been idle for several years, owing lack of funds and speculative character of claims.

Company also has some claims under option in the Table Mountain distr Churchill county, Nev. Two cars of sorted ore shipped are said to have retur 22 and 26% copper. Mine is remote from rail and only assessment work done.

MONTEZUMA SILVER MINES CORPORATION NEVA

Office: Goldfield, Nevada.

Inc. Oct. 5, 1917, in Nevada. **Cap.,** $1,000,000; par $1; about 150,0 treasury

Officers: H. B. Nedham, pres.; J. G. Thompson, v. p.-res. agt.; Jo Hover, sec.; Robert Dixon, treas.; Duncan Cameron, asst. treas.; A. Cooper, mine supt.

Property; 9 patented claims, 178 acres, in the Montezuma district, meralda county, Nevada, about 16 miles S. W. of Goldfield (nearest point), and 30 miles S. W. of Tonopah. Properties were operated as vidual mines and produced heavily 40 years ago, the ore being haule mule teams 200 miles to Austin, Nevada, for smelter treatment. Oper of properties was resumed by present company, 1917, the new develop giving a noteworthy improvement in the physical condition of the pr ties. Prior to resumption of operations in 1917, about 9,000′ of develop had been performed in the various properties, the deepest working b a 300′ shaft on the Bullion mine, and many thousands of tons of valu mill ore placed on the dumps. Properties are traversed by 10 diffe veins varying in width from 1 to 10′. Ore assays upwards from $10 a in silver, lead, copper, gold, and a small amount of zinc. Three fee rich jamesonite ore (sulphantimonite of lead) was cut at 260′, in new s this ore carries high silver values.

MONTGOMERY-SHOSHONE MINES CO. NEV

Company had a 5-year lease on property of the Charleston Hill Gold Co., at National, Nev. It was claimed that the gold-bearing vein of the

wide contact vein between granite and limestone, the material giving good p tests. A 135′ tunnel shows 60′ of ore, assaying from $9 per ton up in gold. second tunnel, 375′ long in December, will be continued until the ore is reach

NEVADA BLACK HAWK SILVER MINING CO. NEVAD

Office: 232 North Virginia St., Reno, Nevada.

Officers: C. C. Flagg, pres.; Chas. G. Sadlier, v. p.; A. D. Bird, se treas.; O. W. Whiting, E. M. and H. M. Hamlin, directors.

Inc. July, 1919, in Nevada. **Cap.**, $75,000; par 5c; 750,000 shares promotion stock outstanding.

Property: consists of 6 claims, viz: Black Hawk, Gray Hound, Glan Glance No. 1, Hamlin No. 1 and 2 with all claims joining. The Black Ha claim was worked in the 70's and early 80's, and has produced over $250,00 silver, lead, and gold. All of these claims have large outcrops, and samples r as high as $250 to $300 per ton. The property is in Black Hawk mining distr at Marietta, 17 miles S. W. of Mina, Mineral county, adjoining the Indola mine on the south, and the Silver Gulch Mining Co. on the southeast, 2 mi north of Marietta.

Development: by 200′ of shaft and tunnel work; 500′ of tunnel w crosscut the Black Hawk vein, and Hamlin vein at a depth of 300′.

No equipment, but contracting for engine and compressor for tunnel wo in October, 1919.

NEVADA BONANZA COPPER CO. NEVAD

Main office: 159 S. Main St., Salt Lake City, Utah. Mine at Morn star City, Lyon county, Nev.

Officers: Freeman Morningstar, pres. and gen. mgr.; Sereno B. Tut v. p.; Fred C. Dern, sec.-treas.; Walter C. Tuttle, asst. sec.-treas., with Robt. Deighton, H. P. Clark, W. D. Mathis, Thos. J. N. Nippur, M. S. Woolley P. L. Williams, directors.

Inc. 1906. **Cap.**, $2,100,000; $1 par; 1,448,000 issued.

Property: 12 claims, 7 patented, 250 acres, adjoining the Nevada D las ground, about a third of a mile from Ludwig, on Nevada Copper Belt road, in the Yerington district. J. C. Dick, E. M., of Salt Lake City, report fissure veins crossing property; the Green Dutchman vein being about 5′ and assaying well in gold and copper. The vein on the Copper King claim been developed by a 3-compartment, 115′ shaft, said to show copper ore its depth.

No record of recent operations obtainable.

NEVADA & BOSTON COPPER CO. NEVA

Address: care H. B. Lind, Mina, Nev.

Owns all the outstanding stock of the Iroquois Copper Co. (q. v.), has title to a copper property near Mina, Mineral county.

Inc. in Wyoming. **Cap.**, $2,500,000; par $1; 1,000,000 shares held intact by three stockholders; 10,000 sold; 1,490,000 in treasury.

NEVADA-BULLION MINES CO. NEV

Mine near Bullion, Elko county, Nev. Company often called the Nevada Mines Co., owns a group of claims adjoining the Nevada-Bu Mining Co. holdings and a half interest in the Kerr & Peterson lease company's ground.

Development: by a 1,980′ tunnel, which extended 300′ to cut the vein opened in old mine workings. but property is now tied up in litigation.

NEVADA CONSOLIDATED MINES & SELLING CO. NEVAD

Idle and probably dead.

Officers: Alex. Brown, pres.; Chas. L. Newton, v. p.; C. C. Matthew sec.; F. G. Carey, treas, at last accounts.

Property: about 1,000 acres, including a gold property formerly own by the Huntoon Valley Mining Co., 45 miles south of Hawthorne, Mine county, and copper claims 10 to 20 miles S. W. of Hawthorne, formerly own by the Walker Lake Expl. Co. The copper property, developed by 3 cross tunnels to 440' below the outcrop, was claimed by the company to have a v carrying disseminated pyrite and chalcopyrite, averaging 2½% copper and gold. This vein has apparently been lost in the lowest tunnel. Country rock granodiorite. The mine had 1,500' of workings.

NEVADA CO-OPERATIVE MINING CO. NEVAD

Address: Goldfield, Nev.

Officers: Chas. S. Sprague, pres.; J. K. Turner, v. p. and cons. en P. J. Somers, sec.

Inc. 1913. Cap., $2,000,000; shares $1 par; assessable; 1,500,000 sha in treasury. Company is a reorganization of Goldfield Mines Operating Co.

Property: 11 claims, 150 acres, including the Empress, in Gold Mou tain mining district, Esmeralda county, 37 miles S. E. of Goldfield, shows well-defined quartz veins, from 1-6' wide with numerous quartz stringers, runn N. E. The formation is Cambrian sedimentary rocks, quartz-monzonite p phyry, granite, rhyolite, and basalt.

Development: total work to June, 1915, was about 3,000', of wh 2,000 is on the Central or Liberty vein. A crosscut tunnel, driven 800', exp ore averaging $8.17 across a width of 1½'. Drifts run from a raise on the ha ing-wall from the 800' level, encountered a quartz vein, assaying $26.40 gold a 54c. silver per ton.

Equipment: includes several buildings and an old 10-stamp mill, wh is to be remodeled. Mine was inactive pending favorable opportunity for financing, but resumption reported in September, 1919.

NEVADA COPPER CO. NEVAD

Company inactive since 1910. Office: 572 Bullitt Bldg., Philadelph Pa. Mine office: Mina, Mineral county, Nev.

Officers: Jas. S. Austin, pres.; J. H. Whiteman, v. p.; C. A. Higbee, s treas. Company is controlled by the owners of the Tonopah Mining Co.

Property: Dunlap copper mine, 10 claims, 200 acres and millsite, Silver Star mining district, 10 miles E. of Mina, operated under lease in 1 by E. S. Chaffey.

Claims show quartzite and quartzite-breccia with mineralized zone 700' w and 2,000' long, carrying ore-bearing reefs with oxides, carbonates and s copper. Shipments made in 1919 reported to have assayed 6% copper.

Development: by several thousand feet of tunnel, open-cuts and win mostly in ore, but none showing sulphide, as water-level is not reached.

Equipment: includes compressor, blacksmith shop, etc.

NEVADA COPPER HILLS MINING CO. NEVAD

Idle, and possibly dead.

Office: 18 South Mulberry St., Mansfield, Ohio. Mine office: Lu Mineral county, Nev.

Officers: at last accounts, A. H. McCullough, pres.; F. W. Le v. p.; T. J. Foster, sec.; Chas. Ritter, treas.; Rowland Lea, gen. mgr.

Inc. Oct. 24, 1907, in Nevada. Cap., $1,500,000; $1 par; issued Farmers Savings & Trust Co., Mansfield, Ohio, registrars. Annual meeting Monday in December.

Lands: 10 claims, 200 acres, in the Fitting district, 9 miles s Luning. The property is reported, by Mr. Lea, to have replacement ore in limestone over a width about 600', with a N.-S. strike, and a dip of 6°.

During the first four months of 1919, the total loss on shipping ore w
$47,560 was $78,378.

Property: about 950 acres, with 2 millsites, 80 acres, and miscellane
lands, including water-rights, giving total holdings of about 1,070 acres on
western slope of the Mason mountains. Lands include former holdings of
Ludwig Copper Mng. Co., the Douglas C. Mng. Co., which succeeded the Dou
M. & S. Co., the Nevada Douglas Co. and the Moore Mng. Co. Holdings of
Nevada Douglas C. Co. consisted of 4 separate and distinct mines, the old Dou
mine, the Amalgamated group and the Casting Copper mine, being the orig
holdings of the company, and the Ludwig mine. Country rock consists of li
stone intruded by grano-diorite with large contact orebodies and fissure v
There is also one claim at Buckskin, 7 miles distant, which carries fluxing ore

The Moore Mng. Co. owned the Moore group of claims, a prospect
about 450′ of development work and "considerable oxidized ore blocked out
way that it cannot be measured." Property of the old Western Nevada Co
Co., described in Vol. X, has been fully paid for by Nevada Douglas.

Ludwig mine: is about a mile N. W. of the Douglas. The prop
comprises 2 mining claims and a 40-acre tract in Smith Valley, on which t
is a well and pumping station. The Ludwig was opened 1865, and was a shi
for some years of small quantities of high-grade ore, production including s
very handsome malachite and azurite, a portion of which was sold to lapida
and considerable bluestone was mined for the old mills of the Comstock
used the Washoe process.

Geology: the ore occurs in a fissure vein with a white limestone f
wall and a silicious limestone hanging wall, which changes to a garnetiferous li
stone, heavily impregnated with sulphides in places. Where crushing has
mitted surface waters to work downward, large bodies of carbonates and co
glance ores are found as replacements in the footwall limestone. The
proper has an average width of about 30′ and has been developed along
course for 1,300′ and to a depth of 800′ by levels, along hanging wall, every
The orebody on the 700 level is 50′ wide and 300′ long and runs 6% copper.
shoots, or pipes, of high-grade secondary ore, running from 16 to 30% in co
form chamber deposits in the limestone near the porphyry contact, proven d
to 800 level. Ore reserves were estimated at 200,000 tons of 2% copper or

In addition to copper ore, the Ludwig has a very large deposit estimate
contain 15,000,000 tons of gypsum, on the footwall, said to be 3,000′ long,
wide and 400′ deep, which figures seem high. This deposit of gypsum i
commercial value, and some has been mined and shipped.

Douglas mine: this has a typical contact metamorphic deposit in w
garnetized limestone carrying copper sulphides and their resultant oxi
ores occur in very irregular orebodies in limestone, which have a tend
towards a horizontal rather than a vertical extension. The mineralized
is about 700′ wide and 2,000′ long with numerous parallel fissures which see
control the mineralization. This mine has been developed by a main wor
tunnel and a deeper haulage tunnel with numerous crosscuts and drifts
the property. The working tunnel, 4,290′, has an average depth of 120′ be
the surface and the ore is in places continuous to the surface. Four 50′ w
show the downward extension of the ore. Claimed to have 75,000 tons of
blocked out.

The **Casting Copper mine** shows a large area of garnet-epidote lime
constituting low-grade carbonate ore, which will be extensively mined.
mine has a vertical 350′ shaft and a 500′ tunnel. Claimed to have 100,
blocked out. When shipments were being made to the smelter the ore
5% copper as compared with 3% in the Douglas mine.

At the Amalgamated mine little development work has been done, but
surface exposures indicate the existence of similar large contact meta
deposits.

Ore reserves: in all properties are estimated at 550,000 tons
out, and 2,000,000 tons partly blocked. A report says that "Engineers
probable ore several times the latter amount." In May or June, 19

Officers: W. C. Losey, pres.; S. S. Endslow, sec.-treas.

Property: 4 groups of claims, comprising 24 claims near Luning, M eral county. The Carbonate group is developed by 1,800′ of workings to d of 350′, and the Montreal group of 4,000′ of workings, said to have disc several orebodies containing gold, silver and copper values.

NEVADA HILLS MINING CO. NEVA

Address: Reno, Nev.

Officers: Geo. Wingfield, pres.; H. M. Hoyt, v. p.; E. A. Julian, mgr.; C. F. Burton, sec.-treas., with Chas. E. Knox and L. A. Gibbons, direct A. H. Westall, supt.

Inc. April 19, 1906, in South Dakota. **Cap.**, $6,250,000: $5 par: 1,065 shares issued. Reno National Bank registrar. Stock is listed on San Franc Exchange and New York Curb.

Property: the Fairview Eagle mine, about 107 acres, at Fairvi Churchill county, Nev. After a profitable career as a gold-silver producer mine was closed early in 1917 and company is looking for a new property.

Company's operations in former years were quite successful, the sur at end of 1916 being $351,140 or about 33c. a share. In 1918, company gave M on various sections of the mine, resulting in shipments of high grade ore to Hazen Sampler in 1918 and 1919.

NEVADA HUMBOLDT TUNGSTEN MINES CO. NEVA

Controlled by Humboldt Tungsten Mng. Co. (q. v.).

Address: Lovelocks, Nev., or Mill City, Nev. C. J. Jones, H. E. Lo and P. J. Murrish, incorporators.

Cap., $1,000,000; $1 par.

Property: claims near Mill City, Pershing county, said to show a posit 5′ wide of ore carrying 4% tungstic oxide, for length of 120′.

Equipment: a 100-ton mill was reported completed in Dec., 1918, the first shipment of three carloads of concentrates was made February, Power and water supplied by the Mill City Development Co., a subsidiary, a 34-mile power line; the water supply of 250 gallons per min. supplied thr a 22,000′ pipe line of 6″ wire wound redwood pipe carrying water in 2 st from a 24′ well. Two storage reservoirs of 100,000 and 50,000 gal. have b built. Mine worked 7 months in 1919.

In September, 1919, the company was taken over by the Humboldt Tun Mining Co. interests.

NEVADA LEAD MINING CO. NEVA

Address: H. L. Brooks, mgr., Cobre, Nev.

Officers: B. F. Woodward, pres.; H. C. Eldridge, sec.; with Ja Hall, Mathew Mesler, E. E. Fisher, directors.

Property: 11 miles from Cobre, Nev., and 7 miles from Loray, Southern Pacific R. R. said to show ore in limestone-quartzite contact. At of 80′ is said to be 18″ of ore assaying 40% lead, 20 oz. silver, and $3 gol ton. Several carloads had been shipped up to 1917, but no recent returns h been secured.

NEVADA LINCOLN MINING CO. NEVA

See Vol. XIII for details. About mid-1918, Frank Wilson, then presi sued company for services rendered, and secured judgment by default, and mine was sold to satisfy the judgment. Wilson bought it, and organized Wilson-Nevada Mining Co., to which the property was transferred. In S tember, 1919, the Lincoln company started suit against Wilson and his co to set aside the judgment and sale.

NEVADA LORING MINES CO. NEVA

Address: T. J. D. Salter, Tom Ward, or J. C. Foster, Loring, via Lo locks, Nev.

Property: the Mayday claims in the Loring (formerly Willard) d trict, Pershing county. In September, 1919, several veins had been ex assaying high in gold and silver.

Officers: A. G. Anderson, pres.; Geo. T. Rosengren, v. p.; I. Camer treas.; L. Mundorff, sec.

Inc. Sept., 1914, in Nevada. **Cap.,** $2,000,000; $1 par.

Property: 400 acres mineral land and 600 acres miscellaneous land Wellington, 8 miles from Masonic, Lyon county, said to show gold-silv lead ore. **Development:** by 2 shafts, 100 and 300' deep.

Company also owns and is operating the Silverado mine in Mono cou California, near Sweetwater, Mineral county, Nev. Shipments of silver made to Hazen sampler amounted to $33,281 in 1917 and $35,125 in 1918. Cya plant and new equipment installed in 1919.

NEVADA QUEEN COPPER CO. NEVA

Office: 404 Mining Exchange Bldg., Colorado Springs, Colo M near Yerington, Lyon county, Nev.

Officers: Duncan Chisholm, pres.; John A. Chisholm, v. p.; R. G dett, sec.-treas., with Geo. M. Irwin and D. P. Randall, directors.

Inc. Oct. 5, 1906, in Colorado. **Cap.,** $1,500,000; $1 par; issued 1,107, Is operated as a close corporation. Annual meeting second Monday in Octo

Property: 28 claims, patented, 467 acres, lying immediately north the Nevada Douglas and Yerington Central Copper companies. Developed shafts of 186' and 210', showing copper ore said to assay 1.5 to 28%. Idle several years.

NEVADA QUINCY MINING CO. NEVA

Address: 303 Judge Bldg., Salt Lake City, Utah.

Property: in Cherry Creek mining district, White Pine county. Co pany in process of dissolution.

NEVADA RAND MINES CO. NEVA

Address: Box 152, or 10 Fordonia Bldg., Reno, Nev.

Officers: C. G. McBride, pres.; Dr. C. F. Watkins, 1st v. p.; S. R terthwaite, 2nd v. p.; Wm. V. Rudderow, sec.-treas.-mgr.; C. E. Hymer, su

Inc. July 8, 1916. **Cap.,** $100,000; par 10c; 822,600 issued. June, Annual meeting second Monday in July.

Property: 7 unpatented claims, 110 acres, in Rand district, Min county, 17 miles from Nolan on the T. & G. railroad. Group carries a fis vein in hornblende-andesite, with an ore-shoot opened for 240' in length fractured mineralized zone approximately 100' wide, from which high-gr silver-gold ore has been shipped. This zone is said to extend into claims of Extension Company to the N. W. Ores are highly silicious and oxidized, w free gold and hornsilver. Examined, 1919, by S. E. Montgomery, J. C. Jo and Charles Kirchen.

Development: by 450' shaft, with total workings of 2,500'. Recent w on the 150 and 200' levels, south of the old workings, disclosed a new ore from which considerable high-grade and milling ore has been mined. M agement plans to continue work on the 250' level in 3 directions. Reserve estimated at 35,000 tons of $15 milling ore, and 1,400 tons of $17 ore on dum

Equipment: includes 18-h. p. gas. hoisting engine and assay plant June, 1919, a 40-50-ton mill was installed, which is driven by a 32-h. p. oil engine. A cyanide plant will be added, as tests show a 90% extraction be obtained.

Company appears to have a promising mine in a district that has pro very rich ore, and is following a conservative policy. The output totals $ 300 tons in 1919 averaging $57.92 per ton.

NEVADA REGENT MINES CO. NEVA

Inc. June, 1915, in Utah. **Cap.,** $1,000,000; shares 10c par.

Property: in Regent district, Mineral county, Nevada. No recor turns secured.

NEVADA SCHEELITE CO. NEVA

Mine address: Ely, Nev.

Property: S. E. of Ely, White Pine county, equipped with mi reported producing tungsten ore during 1918. No production figures obtai

Inc. May, 1906, in South Dakota. **Cap.**, $5,000,000; shares $5 par. St stricken from the New York Curb August, 1918. Empire Trust Co., New Yo registrar. Balance on hand, March 31, 1918, was $121.

Company realized $4,090 on 80,000 shares of Greenwater Copper Mi & Smelter Co. stock in 1914, retaining 272,000 out of the 3,058,775 issued sha of the Greenwater Co.; also owns a controlling interest in the Tybo C Mining Co., owning silver-lead-zinc properties at Tybo, Hot Creek district. N operated by the Louisiana Cons. M. Co., which see.

Stockholders of the Nevada S. & M. were given the privilege of exchan their stock on a basis of 10 shares of Nevada for 3 shares of Louisiana C This offer was withdrawn February 10, 1918, after more than 70% of the o standing stock had been exchanged.

NEVADA STANDARD COPPER CO. NEVA

Officers: Wilbert E. Marsh, pres., P. O. Box 24, Mina, Nev.; C. Korthe, v. p.; L. H. Marsh, sec.-treas., with B. H. Wyant and Matthew King, directors. Marsh sold his majority holdings in the company to G. Raessler of Luning in 1919.

Inc. 1912, in Nevada. **Cap.**, $100,000; shares $1 par; non-assessa 6,850 issued.

Property: the Green Mystery group of 11½ claims, the Tray Do group of 10 claims and a mill-site, near Luning in Santa Fe district, Min county, 8 miles N. E. of Mina, on the Goldfield branch of the S. P. R. R. Green Mystery claims cover low rounded hills at about 6,000′ elevation. rocks are leached porphyries underlain at 20′ depth by low-grade oxidized co ores. Ore contains bornite, chalcocite and chalcopyrite. Assays reported 1.1 to 25% copper, with small gold and silver values.

Development: by 192′ shaft on the Green Mystery claim, which at cut a fault plane fissure that widened to 20′ on the 104′ level. Crosscutting 1915 on the 192′ level to the North opened up 11′ of low-grade copper ore level at 104′ cut a 24′ shear zone carrying low-grade ore. Management c siders it a typical porphyry, or disseminated copper deposit. There is a bed copper-bearing conglomerate between porphyry and lime, extending for 4 along the contact. An incline sunk to explore this conglomerate is 60′ with drifts N. & S. for 160′. The Tray Dollar covers several lead-silver v containing ore assaying from $16-$40; a copper-silver contact vein betw lime and monzonite is said to assay $50-$134 per ton. Developed by 5 tunn 50-175′ on fissure veins and 335′ crosscut to contact vein with 175′ further t to reach the ore-shoots. Property examined by W. R. Brown, W. H. W and C. W. Clark.

Equipment: includes gasoline hoist, pump, blacksmith shop and bu ings for men. There are 3 springs, 2½ to 5 miles distant. Report $25 expended on property to March 1, 1919. No salaries paid.

NEVADA SUPERIOR MINES CO. NEVA

Probably dead, as mail is returned from former office at 625 D Bldg., Salt Lake City. **Mine office:** Jungo, Nev.

Officers: Otto Grantz, pres.; E. R. Reitsch, v. p.; John Geiger, s and gen. mgr.; Dr. Allen C. Eakin, treas., with D. R. Peterson, directors, at accounts.

Inc. 1905, in Utah. **Cap.**, $300,000; shares $1 par; assessable; 15 shares outstanding. Income for 1915 was $164 from royalties.

Property: 21 claims, 420 acres in Humboldt county, 23 miles fr Jungo on the W. P. R. R., shows gold-silver-lead-zinc ore in fissure veins t versing schist and slate. The main orebody, from 2-20′ wide, strikes N. and is said to give average assays of 8.6 oz. silver, 11.2% lead, 1% copper, zinc. Shipments of crude ore made by lessees in 1915 ran $15-$24 per Developed by 2 tunnels, 1,000′ and 2,500′ long, and 330′ vertical shaft.

Equipment: includes 75-ton concentrating mill, steam power, c pressor, pump and hoist. Company has been inactive since 1913 owing to l of funds.

waste-filling system as the walls in the lower levels are insecure, caving in la masses, thus making the shrinkage system of stoping used above the 400' le inadvisable in the lower workings.

Development: by shaft and winze, to depth of 2,000', with a total 66,438' of workings. Exploration in 1916 indicated favorable conditions depth and during the following year the sub-shaft was sunk from 1,600' to 1,9 Work done during 1918 totaled 8,872', mainly on the 1,900' and 2,000'. Cr cuts were driven on the 700 cutting the formation for 1,555' at right angles the strike of the vein. Results at depth were not encouraging and manager planned prospecting ground between upper levels in 1919.

A one-year lease from August, 1918, was procured on the holdings of Monitor Belmont Mng. Co., at Belmont, which see. This was relinquished no ore was found.

The 100-ton Churchill mill, now operated as a department of the Ne Wonder, ran in 1918 on ore that averaged $2.06 in gold and 13.20 oz. silver.

Production:

	Tons	Ag. oz.	Au. oz.	Total Value	Av. Rec. %	Cost per ton
1918.....	49,710	657,815	5,108	$742,306	91.82	$10.09
1917.....	55,800	929,284	7,882	822,940	89.10	10.78
1916.....	72,241	1,352,615	11,466	1,112,835	92.67	8.90

At the end of November, 1919, company ceased operations. Cash assets about $400,000.

NEVADA ZINC CO. NEVA

G. L. Bemis, Tobar, Elko county, Nev., gen. mgr., at last accounts.

Property: the Pola Star group near Tobar, has a zinc-lead dep 40' wide and opened for 600' on surface. Ore said to average from 30 zinc and from 4-5% lead. Developed by tunnel and 500' shaft. Reported ducing at the rate of 200 tons per month in 1917. No recent returns.

NEW BONANZA COMSTOCK MINES CO NEVA

Incorporated December, 1919, in Nevada, by C. A. Garret, T. B. Gu Gurney Gordon, F. M. Kleppe, and O. R. Vaughn. Cap., $75,000; 20c par. information as to property obtainable.

NEW JERSEY MINES CO. NEVA

Officers: 628 Hudson St., Hoboken, N. J., and Goldfield, Nev.

Officers: Henry V. Broeser, pres.; L. A. Opdyke, v. p.; J. H. Ste treas.; Geo. H. Snyder, sec., Jersey City; above, with 14 others form the dir rate; Harry Ernest, mgr.

Inc. Jan. 15, 1912, in Nev. **Cap.**, $1,250,000; shares $1 par; outstan 1,010,850 shares; assessable 1c per share per year. Registrar & Transfer New York, registrar.

Treasurer's report for year ending March 31, 1917, shows rece $18,017, which includes assessments, $6,912, sale of shares, $1,000, renewal of etc., $4,997. Disbursements amounted to $17,672, leaving balance on hand There were only $1,500 owing on the note. No later returns given out.

Property: 5 claims, 3 patented, 53 acres, several miles N. E. of field, said to show gold-silver ore.

Development: 507' shaft, with work done in 1916 on the 330' and levels. Conditions remain as in 1916, showing ore, but not in com quantities. Idle.

NEW TUSCARORA MINING CO. NEVA

Address: Tuscarora, via Elko, Nev. **Officers:** W. J. Craig, pres J. R. Austin, v. p.; W. J. Wolstenholme, sec.-treas., with E. L. Sco Barnhart and P. D. Fenkell, directors.

Cap., $50,000; shares 5c par; 500,000 issued.

Property: 4 claims in the old Tuscarora district, Elko county,

Development: a tunnel (in 750', Nov., 1918) being driven to vein. Shallow shafts said to show ore with high values in gold and

and generator, 525 cu. ft. compressor, 25-h. p. hoist, with smaller compressor a hoist, also necessary buildings, numbering 18.

Production: total to end of 1919, about 400 tons of ore said to ha averaged 31% copper and $12 gold and silver.

Property shut down most of 1919, as owing to high overhead charges, a lack of large reserves costs were too high to yield a profit. Mine needs furth development before it can become a substantial producer.

NONPAREIL MINING CO. NEVAD

Address: M. Helliere, sec., Reno, Nev. L. T. McAtee, pres.

Inc. 1919, in Nevada.

Property: Nonpareil group on Lincoln hill, Rochester mining distric Pershing county; mine is credited with a production of $30,000 in gold.

NORTHERN LIGHT COPPER CO. NEVAD

Property: 6 claims, 20 miles east of Yerington, Lyon county, producin some copper ore in August, 1919. The mine was closed for a considerable tim but late developments are said to be "surpassing expectations."

NORTH MOUNTAIN MINING CO. NEVAD

Controlled by John Dern, 515 Dooly Blk., Salt Lake City, Utah. Mine op ated under lease by Marion L. Thomas, 2 Rector St., New York City, and J. Walker, Cherry Creek, Nev.

Property: Gilligan group, 11 patented claims in the Egan district, ne Cherry Creek, White Pine county, first operated in 1870 under management General Rosencrans.

Ore occurs in veins cutting quartzite, that are from 4 to 5′ wide, run E.-W and dip steeply N. In 1884, a 1,600′ tunnel was driven which is reported to ha cut the vein 1,100′ from the portal at a depth of about 600′ on its dip. T demonetization of silver stopped further development until 1918, when oper tions were resumed. Management reports recently opening up 4′ of ore on t tunnel level running 25 oz. silver.

NORTH NEVADA MINES CO. NEVAD

Address: C. K. Jarvis, Reno, Nev.

Property: claims at Fairview, and 7 claims on Rebel creek, northe Humboldt county, acquired late in 1919. The latter have 600′ of tunnels a other work, ore carrying silver and gold.

NORTH STAR MINING CO. NEVAD

Address: G. F. Brown, Mina, Nev.

Property: 6 claims, 3 miles from the Simon mine and near the Olym A shaft was to be sunk to develop a gold-bearing vein, in the winter of 1919-

OLD IMPERIAL MINING & MILLING CO. NEVAD

Cherry Creek, White Pine county, Nev. Property advertised as sold for $ delinquent tax, January, 1916.

ONONDAGO MINES CORPORATION NEVAD

Office: 1209 Union Trust Bldg., Providence, R. I.; also 50 Broad New York City. **Mine office:** Elko, Nev.

Officers and directors: Homer L. Carr, pres.; Erik F. Carlson, v. E. L. Kerstetter, sec.-treas. M. F. Quinn, mgr.; Frank S. Connors, supt.

Inc. Feb. 16, 1917, in Nevada. **Cap.,** $300,000; par $1; all outstandi Listed on Boston Curb and traded in on New York Curb. Security Transfer Registrar Co., New York, registrar and transfer agent. Controlled by Mi Holding & Operating Corporation, New York, which owns 277,560 shares. Op ating expenses for 1918 amounted to $66,244.

Property: the Onondago and Zenoli mines about ½ mile apart, in S ford district, Nev. The Onondago group of 6 claims, 100 acres, 1½ miles fr Barth, Elko county, is developed by 800′ tunnel and 200′ shaft. Another pr erty of about 200 acres, near Elko and held under option is being develo Claims said to show 3′ of high-grade silver-lead ore near surface, with the outcrop traceable for 2,000′. Ore: sulphide, occurs in fissure vein in lime and said to average 40% lead and 4 oz. silver. Developed by 165′ incline sha

Equipment: power plant destroyed by fire to be re-built, and a 30-

Inc. 1915. Cap., $1,000,000; $1 par; 715,000 issued; 515,000 shares o by the Diamondfield Co.

Property: 9 claims, in process of patent, 180 acres, at Orizaba, county, shows veins carrying gold-silver-copper and lead ore. Veins are 2' wide, and occur on a contact between limestone and granite. The main strikes S. 20° E., and dips 70° S. W.

Development: by 1,300' of workings, including 150' shaft and 90 drifts.

C. D. Wilkinson, who reported on the property in October, 1915, esti 1,500 tons of $20 ore exposed in the mine and 1,200 tons of $12 ore on the d J. K. Turner reported, November, 1918, no ore in sight; $6,000 worth of able ore between the 35 and 65' levels; $8,500 worth of possible ore fro 85 to 65' level; ore on 3 dumps valued at $44,730.

Production: Sept. 1913, to April, 1918, amounted to $22,980 gro $16,156 net, the largest shipments being made when the price of silver per oz.

Further development, adequate modern equipment, and better railroad ties are necessary to insure profitable operations. The nearest railroad Millers, about 38 miles south.

ORLEANS MINING & MILLING CO. NEV

Address: J. W. Dunfee, lessee, Hornsilver, Esmeralda county, N

Inc. Sept., 1916, in Nevada, 1,000,000 shares issued.

Property: 5 unpatented claims, 120 acres, at Hornsilver, 28 mi of Goldfield, carries gold-silver ore in 8' fissure vein in diorite-lime-shal tact. Average assays given as $21 per ton and management claimed re of 15,000 tons of mill ore, at last accounts.

Development: by 600' incline shaft, being deepened in 1919.

Production: reported as totaling $260,000.

ORO AMIGO PLATINO MINING CO. NEV

Address: Goodsprings, Nev.

Officers: S. E. Yount, pres.; Geo. A. Fayle, v. p.; H. K. Riddell treas. and mgr., with N. B. Hunter, directors, at last accounts.

Inc. Nov., 1914, in Nevada. Cap., $1,000,000; shares $1 par; 5 shares issued. Listed on Los Angeles Exchange. Annual meeting, Januar

Property: 5 unpatented claims, 60 acres, in Yellow Pine mining d Clark county, about 2 miles N. E. of the Boss mine. Ore carries copper, platinum, palladium, and the rare mineral plumbojarosite, occurring in 6 to 4" wide.

Development: by 2 tunnels, 70' and 150' long, with 1,500' total ings. No recent returns secured.

ORO ZONA MINES CO. NEV

Address: Hawthorne, Nev.

Inc. June 12, 1919, in Nevada, by Eugene Grutt, Emil Grutt, and Platts.

Cap., $150,000; 10c par.

PACIFIC STATES MINING & MILLING CO. NEV

Office: Goldfield, Nev. Mine address: Bellhelen, via Tonopah, N

Officers: T. T. Cornforth, pres.; ex-Gov. W. A. Haggott, v. p. mgr.; Ben Gill, sec.-treas., with Chas. S. Sprague and J. B. Wainright, dir

Inc. 1919, in Nev. Cap., $1,500,000; par $1; 500,000 shares in tre 100,000 offered at 50c., June, 1919.

Property: 6 claims, 100 acres, in Bellhelen district, Kawich moun Nye county, 50 miles E. of Tonopah. Tract covers apex of veins for 1,50

Geology: claims show rhyolite lavas cut by a parallel veins ru N. E.-S. W.; Midvale vein, the only one developed, has 70° N. dip and sh quartz streaks 6 to 18" thick linked by splits and forks. This quartz is a grade ore, and the pyritized material between is milling ore. Values averag per ton for 131 samples, about 10% of value being gold.

Development: 2,300' of work, including 580' crosscut tunnel cutti 3 veins 260' below apices. One vein at 340' from portal has 4' of mill

St., San Francisco, Calif. L. D. L. Cebrian, treas.; Clyde P. Johnson and J. T. Murphy, mgr., Goldfield, Nev.

Address: Clyde Garrett, Burney Gordon and Harry Cutler chief st[illegible] holders, Reno, Nev.

Property: in Pine Nut range at Como, 8 miles south of Dayton, sh[illegible] wide vein in andesite. High-grade ore discovered January, 1916, showed v[illegible] of $73 to $150.

Probably dead. Letters returned.

PEERLESS MINING CO. NEVA[illegible]

Controlled by Lewis Thompson and M. A. Conant of Springville, Utah[illegible]

Cap., 1,500,000 shares.

Property: 23 claims, 360 acres, near Hiko, Lincoln county, said to s[illegible] a 2½' vein, carrying ore containing silver, lead, and copper. Development s[illegible] slight and property a prospect.

PERSEVERANCE MINES CO., LTD. NEVA[illegible]

Address: Searchlight, Nev.

Officers: A. M. Buley, pres.; F. E. Sharps, v. p. and mgr.

Is a trust, with $500,000 capitalization.

Property: 4 patented claims, 80 acres, 10 miles N. E. of Searchl[illegible] Clark county, said to show contact vein in rhyolite-diorite. Ore is quartz [illegible] free gold and is said to average $22 per ton. Reserves, 4,000 tons blocked [illegible]

Development: by 2 tunnels, 325 and 375' long. Management sin[illegible] 500' shaft and erecting 10-stamp mill, at last report.

PIERMONT MINES CO. NEVA[illegible]

Address: F. H. Vahrenkamp, Tonopah, Nev.

Officers: F. H. Vahrenkamp, pres.; R. A. Millick, v. p.; F. B. Ma[illegible] sec.-treas.-mgr.; H. G. W. Dinkenspiel, and Edward Bowes, directors.

Property: an old silver mine first worked in the 70's, on the E. [illegible] of Schell Creek range, White Pine county, 27 miles from Ray siding [illegible]

Utah. Company levied an assessment of 1c a share in March, 1915.

Property: 6 patented claims at Pioche, Lincoln county, has been shut down for several years.

PIONEER EXPLORATION CO. NEVADA

Address: Hobart Bldg., San Francisco, Calif.

Reported to have acquired the Bloody Canyon antimony mine at Unionville, Pershing county, operated up to 1917 by the Antimony Syndicate and described thereunder.

PIONEER EXTENSION MINES CO. NEVADA

Office: 107 Boston Bldg., Denver, Colo. **Mine office:** Pioneer, Mineral county, Nevada.

Officers: H. A. Riedel, pres.; T. S. Ellis, sec.; Col. A. J. Trone, treas. gen. mgr.; Edwin S. Giles, supt.

Inc. in Arizona. **Cap.,** $1,500,000; shares $1 par; 400,000 shares in treasury.

Property: the Jolly Jane claim, 20 patented acres, adjoining the Pioneer Cons., at Pioneer.

Development: by 250′ shaft. A crosscut was driven from this level through rhyolite to prospect a contact 175′ E. of the Jolly Jane shaft. Mine reported under 3-year lease to Jolly Jane Leasing Co., since 1916. A prospect.

PITTSBURGH-DOLORES MINING CO. NEVADA

Address: Yerington, Nev.

Officers: H. S. McKee, pres., Pittsburgh, Pa.; A. Vignos, v. p.; R. Palmer, sec.; H. W. McIntosh, treas.; E. J. Schrader, gen. mgr.; J. B. Pe mine supt.; C. R. Wilson, mill supt.

Inc. 1912, in Arizona. **Cap.,** $1,500,000; shares $1 par; issued 1,000, Bonds: Authorized and outstanding, $175,000. Annual meeting in March.

Property: 16 unpatented claims at Rockland, Mineral county, 27 mi S. of Yerington, comprises the claims of the old Rockland mine, discovered 1868.

Ore: quartz, containing 1% pyrite with gold and silver values, occ in a fissure vein from 1½ to 9′ wide, with rhyolite hanging-wall and grano-dio footwall. Vein strikes N. E., dips 40° E., and carries pay ore in shoots, aver ing about 0.44 oz. gold and 3.4 oz. silver, value about $10.50.

Development: by tunnels, greatest depth of workings being 1,300′ a horizontal extension about 13,000′. Ore is extracted by the fill method, st being used in timbering. A Sullivan angle compressor furnishes air, power operating mine and mill is taken from the Truckee River General Electric

Owing to the distance of the property from the railroad, 27 miles, tra portation of supplies is expensive, $12 per ton.

Production: for 18 months to Dec., 1916, was 27,268 tons of ore, incl ing some from dumps and tailings, yielding $230,370. Mining costs were per ton, including development, and average milling cost was $2.75. In $18,749 was spent on construction work.

Mine and mill closed down indefinitely in 1918, owing to high costs and satisfactory conditions. See Vol. XIII for full details.

PITTSBURGH-ELY COPPER CO. NEVADA

Ely, White Pine county, Nev.

Officers: H. P. Harder, pres.; Louis H. Bock, v. p.; J. A. Varney, s Frank Straub, treas., trustee and gen. mgr.

Inc. Dec., 1916, in Arizona. **Cap.,** $5,000,000; shares $5 par; non-ass able; 695,285 shares outstanding at last reports.

Property: 11 claims, unpatented, 220 acres, including the Keyb group of 6 claims, 120 acres, near the Keystone mine of the Nevada Co dated, and a small group near the Cumberland-Ely mine of the same co Lands show porphyry and limestone, and company reports having copper c and sulphides, assaying 3 to 12% copper.

Development: by 2 shallow shafts and tunnels of 160′ and 40′.

Equipment: includes a 40-h. p. steam hoist. Inactive, except for assessment work, since 1907.

manganese, 3 oz. silver and some gold, 3% lime, 11% insol. and 14% silica, va at from $7.50 to $9.50 per ton. Owing to large percentage of iron, the o especially valuable as a flux to the lead smelters, the iron commanding a b over the cost of smelting, with silver, gold and lead values coming in as a p From this source alone the ore yields $3-$4 per ton.

Company also owns the Pioche King group of 9 claims, and about 1,000 a of patented land at Dry Valley and Bullionville, 12 miles from Pioche, sa contain 120,000 tons of tailings on dumps, showing 5.34% lead, 10 oz. of s 0.11 oz. gold per ton, and estimated to average $5 per ton profit.

A 200-ton oil flotation mill was erected to treat these tailings in 1916. T mill results during 1918 did not prove as successful as anticipated, but 10 tons of tailings are expected to run 8 oz. silver, 1.80 oz. gold, and 3% lead.

The Davidson mine, adjoining the Prince, was taken over in July, 1918, i is being extensively developed. Receipts from ore sales are more than pay for development work.

Development: the Prince mine is developed by 550′ shaft with seve miles of drifts. A new 2-compartment shaft started in May, 1918, and comple to 400′ in July, 1919, is being deepened to 1,300′ so as to explore the quar underlying the limestone. Equipment was moved from the old to the new s and the old shaft abandoned. Ore reserves estimated at approximately 1,0 tons.

Diamond-drilling is under way: hole No. 3, on the 600′ level, when a depth of 340′, ran into a bed of oxidized iron-manganese 10′ thick, which ass 25 oz. silver and $3.60 in gold. At 627′ eleven feet of clean zinc sulphide w encountered, expected to run 30% zinc.

Equipment: includes steam power, hoist, compressor and 9 mile sta ard gauge railway connecting with the Salt Lake Route from Pioche. Fre rate was $1.75 per ton in 1917.

Production: shipments in 1915 were 117,037 tons; in 1916, 135,643 to in 1917, 122,872 tons; in 1918, 84,137 tons; in 1919 (to June), 5,000 to 6,000 t per month, increased to 8,000 in September.

Present management has put the mine on a paying basis, developed h ore reserves and accumulated a cash surplus. Present high prices for sup and the development work necessary during past year are responsible for i creased earnings. Costs total $12 per ton.

PROSKEY REGENT MINING CO. NEVA

Dead. Property at Rawhide, Nev., formerly held by Mogul Mining Co., purchased 1919 by the Seminole Regent Mng. Co., which see.

PROVIDENCE EXTENSION GOLD MINING CO. NEVA

Office: Morris, Ill.

Officers: I. F. Hatcher, pres.; W. F. Buck, v. p.; G. A. Leach, treas., with O. M. Barker, directors.

Inc. 1908, in Nevada. **Cap.,** $1,500,000; shares $1 par; 1,100,000 sh outstanding.

Property 3 patented claims and a fraction at Seven Troughs, Ha boldt county, Nev., reported by management to show high-grade free-mi quartz ore in fissure veins, 4″ to 2′ wide and to carry from $14 upward gold per ton. Examined by F. A. Wheeler.

Development: by 170′ vertical shaft. Idle since 1917, pending re-fin ing of the company.

QUEEN REGENT MERGER MINES CO. NEV

Office: 337 Monadnock Bldg., San Francisco, Cal.

Officers: J. D. Brown, pres.; H. B. Wade, sec.; J. E. Kerr, gen. m Wm. P. Miller, cons. engr., at last accounts.

Inc. 1911, in California. **Cap.,** $2,000,000; shares $1 par; 761,000 s issued.

Property: 5 unpatented claims, bought June, 1915, for $60,000, in mining district, Mineral county, 18 miles E. of Nolan, on the E. side of W lake. Tract is said to cover 4,000′ of the main fissure of the Rand district

Property: the Wedekind silver mine located in 1896 and said to h produced $500,000. Ore was extracted by open-cut and treated in a local m A 140′ shaft was to be deepened in 1919-1920.

RENO-YERINGTON COPPER CO. NEVA

Officers: E. L. Brown, pres.-mgr., 944 West 6th Street, Reno, Ne Victor Cokefair, v. p.; M. C. Brown, sec.; Farmers & Merchants Natl. Ba treas.; preceding with Walter Harris, O. H. Sonne, Will McDonough, direct

Inc. Jan. 25, 1907. **Cap.,** $1,000,000; $1 par; 750,000 outustanding.

Property: 5 unpatented claims, about 100 acres, north of the Blues mine, at Yerington, Lyon county, said to show sulphide ore in granite w easterly dip, averaging 3% copper.

Development: by 700′ tunnel and 100′ incline shaft sunk on the cont

Equipment: includes hoist and buildings.

REORGANIZED PIONEER MINES CO. NEVA

Address: Goldfield, Nev. **Mine office:** Pioneer, Nev.

Officers: W. J. Tobin, pres.; J. K. Turner, v. p.; Ben Gill, sec.-tre with E. A. Blakesley, directors.

Inc. May, 1918, in Nev. **Cap.,** $500,000; 10c par; assessable; 2,250 outstanding. Assessment No. 1 of 1c per share, levied March, 1919. Com is a reorganization of the Pioneer Cons. Mines Co. described in Volume XI the new company assuming all obligations of the Pioneer Cons. Stockhol were given the privilege of exchanging their holdings share for share upon p ment of a 1c bonus for the new stock. Up to March 1, 1919, 2,014,836 sh had been exchanged, and of the $15,836 indebtedness, over $12,000 had b paid off.

Property: 12 claims, 10 patented, 180 acres, at Pioneer, Nye county.

Geology: irregular masses of altered and mineralized rhyolite bre are traversed by small, irregularly intersecting quartz-filled fractures con ing gold-silver values. Isolated bunches of quite high-grade ore have been countered, but not of commercial size.

Development: by 500′ main working shaft and 15,000′ of workings. T shaft will be sunk to depth of 800′.

Equipment: includes electric power, 40-h p. hoist, 7-drill compres hoist, gasoline engine, 50-ton amalgamation and cyanide mill.

In 1918 company acquired the K.-K. claim and now plans developin greater depth to pick up the main Pioneer vein.

RESERVATION HILL M. & M. CO. NEVA

Address: W. E. Casson, mgr., Carson City, Nev.

Officers: R. A. Trimble, pres.; W. E. Baldy, v. p.; R. A. McKay, s treas., with H. R. Burlington and J. E. Monahan, directors.

Inc. 1907, in Nevada. **Cap.,** $1,000,000; $1 par; 788,000 issued.

Property: 2 claims, 35 acres, 1 mile from Reservation station, Mine county, Nev., partly under lease.

Development: by short tunnel and shallow shaft, the latter said show 18″ of ore that assayed high in silver, lead, and gold.

A prospect.

RICHLAND MINES CO. NEVA

Address: Imlay, Nev.

Officers: John R. Tullis, pres.-supt.; B. J. Sears, v. p.-treas.-mgr.; J. Ferguson, sec., with F. L. Reber and C. T. Smith, directors. C. T. Smith agent and registrar.

Inc. May 15, 1919, in Nevada. **Cap.,** $150,000; 10c par; 750,000 shares treasury. Annual meeting, May 15th.

Property: 4 claims, 80 acres, in Richland mining district, 7 miles of Imlay, Pershing county, is said to show veins in granite and shale. The vein has an easterly course and dips due north; it is reported to be 2′ wide to average $35 per ton in gold, silver and lead.

Development: by crosscut tunnel that is expected to cut both veins 100′ depth.

work. From section 921, there was milled 1,422 tons of $3.20 ore, of wh 78.5% was recovered by amalgamation. A 55 or 60-cent tailing could be pended upon. This section is one of the largest ore-zones in the mine and favorable for future exploitation. Sections 710 and 473 are too poor for c sideration.

The lode mine is now worked only by lessees, who extracted 180 tons $44.50 ore in 1917, and 2,131 tons of $36.70 ore in 1918. The royalty paid to company for those years amounted to $1,817 and $17,442, respectively. T company will probably resume underground work in 1920.

The company's operations for 1918-19 were mainly confined to placer min Company has over 367 acres of placer ground and estimates 1,500,000 yards gravel worth $1 a yard as available. Two monitors are used, tearing down t sluicing 1,200 to 1,500 yd. a day; main tail race is 4,449′ long, with two l laterals. The high-pressure pipe-line is 45,000′ long, is spiral steel, commenc with 30″ and reducing to 20, 18 and 16″; head 600′ with 400 miner's inches water. Total cost of the Jett Creek pipe-line, water-rights and placer equipm has been over $200,000. Operations started in June, 1915, and have been pr table, especially so, as the lode mine was closed to company operations.

The controlling factor in these placer operations is the water-supply, gi various results in different seasons. In 1916, a shortage of water was aided teams and scrapers; in 1917, the high-water season lasted 85 days, so a dam w built in Jett canyon, and the waters of Jefferson and Shoshone creeks were p chased; in 1918, the season was the poorest yet experienced, the hydraulic l being only 45% of that in 1917; in 1919, the heavy snowfall indicates a l season. Lessees are working on bedrock, making fair returns.

Equipment: includes two 50-h. p. hoists, 10-drill compressor, elect power and 180-ton plant, including Huntington and tube-mills. Company a operates the Toquima Stores Co., which carries a complete stock of dome supplies.

Production: to the end of 1918 was $3,430,964 from 411,015 tons of and 374,632 yards of gravel. Of this sum, $959,068 was profit. An analysis production shows the following:

Year	Tons	Value	Profit	Yards	Value	Pr
To end of 1916.....	398,897	$3,004,229	$752,934	175,477	$139,912	$65
1916.....	67,452	357,014	49,007	175,477	139,912	65
1917.....	12,118	78,483	29,773	127,788	140,016	91
1918.....	.....	.....	.....	71,367	68,324	19

The profits do not include royalty or sundry revenue.

Company has an efficient management and has made a good record, de unfavorable conditions. The future depends on its ability to mill a large q tity of low-grade ore at low cost, and on the profits from placer mining.

ROYAL CONSOLIDATED COPPER CO. NEVADA-ARIZO

Probably dead. Letters returned, 1915, from former St. Louis, M address. **Mine office:** Hawthorne, Esmeralda county, Nev.

Officers: L. L. Crisp, pres. and gen. mgr.; G. L. Werth, v. p.; E. Drake, sec.-treas.; B. H. Martens, supt.; preceding, with Robt. W. Alt and Al Lawson, directors.

Inc. April 27, 1907, in Arizona. **Cap.,** $2,500,000; $1 par; issued 1,43 Dec. 31, 1910. **Bonds:** $300,000, authorized, at 7%; issued, $2,300, Dec 1910. Annual meeting, first Monday in April.

There are two companies of this title; one an Arizona, the other a Nev corporation; the Arizona company apparently holding stock in the Nevada op ating company.

Property: 10 claims, 1 fractional, 200 acres, 8 miles from Luning a 16 miles from Hawthorne and Mina. According to the company's former exp the formation is "dyarite," porphyry and limestone, with large "burns" of gossan, the ore deposits consisting of copper, gold and silver, lying in a fis "cutting" a contact of porphyry and lime, the orebody being 250′ wide.

Property: Ely Valley group, 9 patented claims, 134 acres, in Ely mi district, near Pioche, Lincoln county.

Ore: occurs in fissure veins and as chamber deposit in limestone, to average 0.325 oz. gold, 3.05 oz. silver, 9% lead.

Development: by incline shaft to depth of 445', with 4,500' of worki

Equipment: includes 25-h. p. hoist and compressor.

Management estimates ore reserves at 3,000 tons, with 1,500 tons blo out. Planned 350' of core-drilling in 1919.

SILVER BELL & ALPHA CONSOLIDATED MINES CO. NEVA

Officers: Lorin Hall, pres., Salt Lake City; Clinton D. Ray, sec.; C Smith, supt., Rye Patch, Nev.

Inc. 1915, in Utah. **Cap.,** $1,000,000; shares $1 par; 450,000 in treas 100,000 were to be sold June, 1916, to erect a mill.

Property: two noted silver-gold mines at Rye Patch, Nev., Pers county, with reported production of $11,000,000. Mine is 3.6 miles from rail

Development: by shaft sunk through old workings and tapped by l working tunnel, with reserves of 200,000 tons of ore in old workings, sa assay 5 to 30 oz. silver per ton with 40c to $1.40 gold per ton. Company fig $2 mine and transportation costs and was to erect a mill. A streak of ore wa in 1916, carrying 2,520 oz. silver per ton in brittle silver and black sulphu

SILVER CENTER MINING CO. NEVA

Address: Clay Peters Bldg., Reno. Nev.

Inc. May 3, 1919, in Nevada, by H. M. Hamlin, E. C. Dalzela and W Jones. **Cap.,** $200,000; 10c par.

SILVER CHIEF MINING CO. NEVA

Address: Nixon Bldg., Reno, Nev.

Officers: D. A. Smith, pres.; W. T. Wilson, v. p.; J. B. James, sec.-tr with E. H. Smith and B. S. Gregory, directors.

Inc. 1919, in Nevada. **Cap.,** 1,500,000 shares.

Property: 6 claims in the Gillis range, 12 miles N. of Luning, Mi county, on the Rawhide-Luning road. Claims show granite-rhyolite contac which silver occurs. Work was started in August, 1919.

SILVER COMET MINING CO. NEVA

Address: Panaca, Lincoln county, Nev.

Officers: at last accounts, E. D. Smiley, pres.-mgr.; M. J. Smiley, J. W. Baker, treas., with W. A. Burnett, directors, all of Boston, except E Smiley.

Inc. Jan., 1913, in Nevada. **Cap.,** $500,000; shares $1 par. Annual m ing in July.

Property: 5 unpatented claims, 100 acres, in the Comet mining dist Lincoln county. Ore: gold-lead-silver-tungsten, occurs in nearly vertical fis veins in quartzite, said to assay $30 per ton in gold, silver and lead. Devel by 145' vertical shaft, with 950' of workings.

Equipment: includes a gasoline hoist and 50-ton mill completed in 1 the mill contains a crusher, rolls, mill and magnetic separator. No recent formation.

SILVERFIELDS AJAX MINES CO. NEVA

Name changed to Elgin-Bellehelen Divide Mining Co., which see in lis Divide companies herein.

SILVERFIELDS MINING CO., LTD. NEVA

Address: J. M. Hamilton, sec., 11 Pine St., New York.

Inc. Dec. 27, 1906, in Great Britain, as Golconda Consolidated Co., L and changed name to present title Feb., 1909. **Cap.,** £250,000; shares par; issued, £143,353, fully paid.

Property: sundry claims in Battle Mountain district, Lander county, merly owned by the Humboldt Sm. & Red. Co., with a third interest in the Ha lulu group, balance of which is owned by the Golconda-Nevada Copper Co. the Kennedy district, Humboldt county.

Development: by a 250' shaft showing a 3' vein in limestone said assay, 8% copper, 26% lead, 390 oz. silver and $4 gold.

Silver, which see, near Unionville, Pershing county. The only inform obtainable is from various brokers' circulars and advertisements. Ea 1920 it was proposed to merge the Silver Reef, Arizona Silver, Arizon tension, Arizona Tip Top, and Consolidated Silvers, Inc., into the Uni Silvers Co., the "final Silver" of the above named brokerage house.

SILVER STANDARD MNG. & EXTRACTION CO. NEV

Address: R. W. Martin, Las Vegas, Nev.

Officers: R. W. Martin, pres.; W. C. Borchers, v. p.; W. E. Ferron, treas.; with R. T. Leonards and C. D. Breeze, directors. G. A. Duncan, s

Property: the Duncan mine, Flagstaff group, Nelson townsite, water-rights in Eldorado canyon, Clark county. The Flagstaff property i to have yielded $500,000 in silver and gold up to 1915. One shoot was 8' and 450' long, and yielded 18,000 tons of $22.80 ore. Recent developme opened a new 6' vein of high value. Property is fully equipped, and enou was said to be available early in 1920 to supply the mill.

SILVER TUNGSTEN MINING CO. NEV

Office: 222 Judge Bldg., Salt Lake City. Raymond Ray, pres.; E Kimball, sec.-treas.

Inc. 1916, in Utah. **Cap.**, $50,000; shares 10c par; assessable; outs ing 38,000 shares. Listed in Salt Lake City. Cash on hand, April, 1916, no debts except a bond of $1,750 due May, 1917.

Property: 3 claims, unpatented, in the Cherry Creek mining di White Pine county, 8 miles from a railroad, said to show an 8' vein, cont tungsten ore.

Development: consisted only of 24' of trenching and 20' of tunn One of the mushroom tungsten companies started when tungsten was sell war prices.

SILVERZONE EXTENSION MINING CO. NEV

Organized by Geo. W. Quigley, J. W. Hanson and O. G. Wolther, of pah.

Property: 5 claims, covering 3,000' on a ledge or dike said to assa to $147 per ton, mostly in silver.

A new shaft is being sunk 400' west of the old Silverzone glory hole

SILVERZONE MINES CO. NEV

Silverzone (Hannapah), Nev.

Inc. 1919, by Wm. F. Gray and J. J. Clark of Tonopah.

Property: the Silver Glance mine, which was worked by "glory years ago. An ore-shoot opened for 150' in length and to depth of 125'. s run $8-$10 per ton, with 160,000 tons developed. Company has given lea parts of its holdings.

SILVERZONE MOHAWK CO. NEV

Care Wm. F. Gray, Silverzone (Hannapah) P. O., Nevada. This i a Gray & Clark property.

A new shaft sunk in 1919 is said to have cut 4' of $30 ore at a depth with $445 ore on the hanging wall. On the west end of this group, le Chas. Spilman, ore in the old Tripod shaft said to range from $10 to $ ton.

SMITH VALLEY MINES CO. NEV

E. J. Cooper, Receiver, Yerington, Nev. H. L. Van Valen, representi stockholders, 410 Advertising Bldg., Chicago, Ill., at last accounts.

Inc. 1912, in Nevada. **Cap.**, $2,000,000. Placed in receivers' hand 30, 1914; debts were about $17,000. Reported January 5, 1916, that obli "are being rapidly paid off; it is expected that the Receiver will be disch about 60 to 90 days from present date."

Property: 23 claims, 467 acres at Yerington, Lyon county, said to gold ore in a contact deposit between andesite and porphyry; width of 3' with average assay reported of $16.80 per ton. Claims 60,000 tons ore.

Development: 200' incline shaft, with 900' of workings. Equip cludes 25-h. p. gasoline hoist and a 6-drill compressor.

Letters returned and company presumably out of business.

Officers: Herman Badt, pres.; David Neff, v. p.; J. L. Vandive with Samuel Neff, all of Salt Lake City, directors.

Property: on Spruce Mtn., south of Wells, Elko county, develo 550′ tunnel, being driven 300′ further to reach the orebody. Ore occurs carrying lead and silver. Past production reported to have totaled $ High-grade ore shipped in October, 1919.

In January, 1920, rich ore was reported opened at depth of 400′, and of ore awaited shipment. This company had extracted 24 cars to th three of which netted $4,089.

STANDARD METALS CO. NE

Address: A. L. Chappel, 153 North Virginia St., Reno, Nev.

Inc. April, 1916.

Property: claims on Peavine mountain, 5 miles N. of Reno, in W county, first worked in 1863.

The main vein is in andesite; strikes N.-S., and dips 42° W. The p oreshoot is in a crushed zone, and is 155′ long, up to 61′ wide, and 67′ hig carries copper, silver and lead.

Development: by 350′ tunnel and 215′ incline shaft near mouth nel; further sinking is under way. Water amounts to 300 g. p. m.

Equipment: includes 6-mile transmission line, hoist, 60-ton (to larged to 100 tons) mill employing rolls, ball mill, tables, and flotati chine, making a $75 to $211 concentrate, auto-trucks and loading b the W. P. R. The product is sent to Utah smelters.

STANDARD METALS CORPORATION

Offices: 805 Arrott Bldg., Pittsburgh, Pa., and Reno, Nev.

Cap., $3,000,000; $1 par.

Officers: W. P. Lemley, pres.; A. L. Chappel, and B. L. Elliott, W. K. Elder, sec.-treas.; A. G. McCaughan, asst. sec.-treas.; with J. A. D. H. Collins, John Lofink, Jr., and W. H. Slifer, directors.

Property: 3 patented claims and millsite, 47 acres, including th master and Poe mines bought from the Standard Metals Co. in 19 1,725,000 shares of Standard Metals Corporation. The claims are on mountain, 5 miles N. of Reno, in Washoe county. The first work done district was in 1863. Old workings were to a depth of 100′, where a wide said to have been opened. Ore carries silver and galena. In March, 1 electric hoist and pump were erected, and shaft sinking started.

STAR OF THE WEST MINING CO. NEV

Offices: 1482 Broadway, New York, and Reno, Nev.

Officers: Robt. B. Todd, pres.-mgr.; Leonard L. Griffiths, v. p. Punderford, sec.-treas, with R. G. Withers and John F. Clapisson, director

Inc. April, 1919, in Delaware. **Cap.,** $1,000,000; $1 par; 500,000 sh treasury. Security Transfer & Registrar Co., registrar and transfer agent

Property: 6 claims, 4 patented, in Gold Park district, Nye county merly owned by the Nevada M. Co. Ore occurs in fissure veins in por with N. E.-S. W. course and dip of 45°, said to average $50 per ton in and gold.

Development: by 5,000′ of drifts and tunnels. Is an old producer ing a past production of $1,000,000. A 30-ton concentrating mill was installed in 1919.

Management estimated reserves, April, 1918, at 30,000 tons, aver per ton.

STATES MUTUAL CONS. MINES CO. NEV

Address: Searchlight, Nev.

Officers: Mrs. V. H. Brewer, pres.-mgr.; J. W. Carnie, v. p. McKee, sec., with Geo. Allan and Albert Cappel, directors.

Cap., $5,000,000; $1 par.

Property: 140 acres in Campaign copper mining district, Sear Clark county, said to carry a deposit 4,500′ long running from 2 to 3 per. **Development:** by tunnels.

Mrs. Brewer has been running the the mine for several years, and

Inc. June 4, 1910, in Nevada, as successor of Washington-Nevada M ing & Milling Co. **Cap.**, $1,000,000; shares $1 par; non-assessable; iss $799,420. Annual meeting, first Monday in January.

Property: 11 claims, 3 patented, 57 acres, with 120 acres mill and smel sites, 30 miles S. W. of Goldfield and 10 miles from a railway, in the Lida dist District shows Cambrian limestone and shale, cut by quartz monzonite, cap by volcanic rocks. The ores occur as impregnations and veins. The claims reported by the management to carry 12 deposits, 4 under development of 20′ average width, traceable 5,000′, carrying a sulphide ore, said to give an of 8.7% copper, 17 to 19% lead, 11% zinc, 11 oz. silver and $1.90 gold per to

Development: by 9 shafts, of 31 to 120′ depth, and by 6 tunnels of to 140′ length; the tunnels are not being used.

Equipment: includes a 15-h. p. gasoline hoist and 5 mine buildings. T management planned deepening the main shaft to 200′ at last report.

TEACUP MINING CO. NEVA

Address: McGill, or Cherry Creek, Nev.

Officers and directors: Geo. Granopolus, pres.; J. M. Lockhart, v. p.; J. Mueller, sec.-treas.; J. W. Wenzel, mgr.

Inc. June 27, 1919, in Nevada. **Cap.**, $1.000,000; $1 par; assessable; 322 issued. Operating expenses for 1918 averaged $5,000 per month.

Property: 22 claims, 2 patented, 440 acres in Cherry Creek district, W Pine county.

Geology: there are two veins under development; the Teacup, wor since 1868, lies along a contact between lime and shale, is, from 4 to 12′ w runs N.-S. and dips 45° W. The Exchequer is a fissure vein in quartzi 4 to 11′ wide, and runs S. 70° W. crossing the Teacup vein 675′ S. of t Claims cover 5,000′ along strike of Exchequer vein and 3,000′ on the Teacup.

Development: by a 1,000′ shaft and a 450′ incline shaft; a total of 4,(of workings to depth of 1,000′. A crosscut on 900′ level intersects the Ex quer vein.

Equipment: includes 60-h. p. gasoline hoist, assay-office and buildin compressor, 7,250′ tramway, and 100-ton mill with flotation and cyanide unit be installed.

Mine is credited with past production of 3,000,000 oz. silver, and mana ment reports reserves of 100,000 tons, running 14 to 27 oz. silver.

TECHATTICUP MINE NEVA

Address: R. T. Walker, lessee, Nelson, Nev. Owned by Joseph Wh ton Estate, Philadelphia, Pa.

Property: 9 claims, 8 patented, 1 mile E. of Nelson, Clark county, N said to show a quartz vein in monzonite, dipping 10 to 80° and pitching E. Ore is a sulphide.

Development: by 600′ incline shaft, and 3,000′ of workings.

Equipment: 25-h. p. gasoline hoist, 3 compressors and 50-ton cyan mill.

Production: in 1916 was 7,676 oz. gold and 58,393 oz. silver. Operati but no record available.

TECOMA CONSOLIDATED MINES CO. NEVA

Address: C. S. Woodward, mgr., Montello, Elko county, Nev.

Property: a silver-lead mine near the Utah border, first opened in 1 when mine was made to pay its way by the proceeds of rich ore shipp Since 1916, $140,000 has been spent in reopening the mine and a "red lime" on foot-wall of the silver-lead orebody was found to be zinc oxide. A bl 100x100′ of 20% zinc ore is developed. Development is extensive on 1,000′ le Dumps contain 10 to 20% lead and 5 to 10 oz. silver ore.

TENABO MILL & MINING CO. NEVA

Property acquired in 1920 by Consolidated Cortez Silver Mines Co., which Fully described in Vol. XIII.

Production to date is said to be 12,000,000 oz. of silver and 25,000 oz. gold. Reserves are now estimated at 39,000 tons.

Officers: Whitman Symmes, pres.-supt.; J. H. Goldman, v. p.; Swain, sec., with Geo. F. Bennett, A. L. Rader, C. W. Conliss, directors.

Inc. Nov., 1904, in California. **Cap.,** $200,000; shares $1 par; all out ing; assessable. Last assessment, the 45th, of 10 cents, called October 31

Gross earnings for 1916 were $378,818, less $164,727 for operating ch

Property: about 600 acres along the Comstock lode at Virginia north of the Mexican mine and south of the Sierra Nevada mine.

Development: following a change in management, work on the and 2,900′ levels was abandoned. The ore in sight on the 2,600′ level w tracted and the water allowed to rise to 2,100′. Exploration is now bein ried on by the Mexican near the Union Cons. south line, and by the Uni its own ground on the 1,600′ level. This has not yet resulted in finding or

Production: during past two years about $1,000,000, the ore aver $30 per ton. Total production approximately $4,000,000.

UNION COPPER CO. NEV

Yerington, Nev. Title changed to Standard Copper Co., in 1912.

UNION MINES CO. NEV

Office: Union, Nev.

Officers: W. P. Fairman, pres.; E. T. Comfort, sec.; L. R. That mgr. A close corporation and prefers not to have us publish information.

Operates a silver-lead mine, 35 miles S. of Palisade, Eureka county, N

UNIONVILLE MINING CO. NEV

Address: J. A. Spiker, pres.-mgr., Unionville, Nev.

Property: at Unionville, Pershing county, said to show 17,500 ton $20 gold-silver ore. There are 5 fissure veins in rhyolite with 3′ of ore on h ing wall. A 50-ton cyanide mill moved from Seven Troughs in Hum county, was erected in 1919.

UNITED COMSTOCK PUMPING ASSOCIATION NEV

Operates electrically-driven pumps to drain the lower levels of the Nort mines on the Comstock Lode at Virginia City, owned and operated by the S Nevada Mining, Cons. Virginia Mining, Mexican Gold & Silver Mining Union Cons. Mining companies.

The lower levels were completely re-opened to the 2,900′ level in Septe 1917, after being filled with water for 33 years. Expenses incurred are ap tioned among the mines.

The system comprises 3 Riedler pumps on the 2,000′, 3 centrifugals on 2,310′, 3 vertical centrifugals on the 2,500′, and 2 vertical centrifugals on the 2 and 2,900′ levels.

UNITED MINING CO. NEVA

Probably dead. Letters returned from former mine office: Carson City,

Officers: H. D. Cowden, pres. and gen. mgr., Bloomington, Ill.; R. Hingston, treas. and gen. supt.; F. W. Boston, sec.; L. B. Perry, asst. sec.

Inc. 1905, in Nevada. **Cap.,** $3,000,000; shares $1 par; non-assess 500,000 preferred and 2,500,000 common; issued $1,876,150.

Property: 34 claims, 680 acres, in the Delaware district, 12 miles Carson City, Washoe county.

Reported in 1915 that the Nevada mine was abandoned and stockho given shares in the Boston American Mining Co., Wash., an equally unpro and doubtful proposition. It is evident from the literature sent out companies that the management preferred to mine the public instead of its

Management reported, January, 1916, "property is not working are looking for some process that will enable us to handle our own plant."

UNITED STATES TUNGSTEN CORPORATION

Operated a mill for concentration of tungsten ore at Tungsten White Pine Co., Nev. Company was dissolved December 21, 19

excess of iron and manganese, making a desirable smelter flux. Litigation the Prince Cons. during 1917-18 terminated in favor of the Virginia Louise, latter obtaining a judgment of $27,334 for trespass. A compromise was eff whereby the Prince Cons. dismissed the apex suit filed against the Vi Louise and granted the right to ship ore over its private railroad at the ra 50c. per ton in return for the dismissal of the trespass judgment.

Development: by 600′ shaft and 2,500′ of drifts and raises. Ore blo out is estimated as equal to 3 years' supply at 100 tons per day, and an e quantity probable ore.

During 1918 the property was entirely re-equipped, development work sumed and shipments commenced in September to the Midvale smelter in U at the rate of 50 tons daily. Total tonnage shipped was 5,447 dry tons October, 1919, daily shipments were 100 tons. Net profits are reported $3 per ton. Extraordinary expenses are practically at an end, and future p can be devoted to paying off bonds and distributing dividends.

VULCAN MINING, SMELTING & REFINING CO. NEVA

Inc. in Nevada. **Cap.**, $2,000,000; $1 par. Traded in on New York C

Property: 18 claims, 16 patented, 300 acres, in Esmeralda county, 5 m from McLean on the T. & G. R. R.

Silver-lead ore occurs in a replacement deposit in limestone and is repor to carry from 50-300 oz. silver and 70-80% lead per ton.

Development: by 3,000′ of old workings, with reserves estimated 10,000 tons blocked out, valued at $500,000, and 20,000 tons of ore on the dum

Past production given as $325,000 net. Shipments are made to Hay sampler. Treasury stock was offered the Eastern public June, 1919, to pro funds for necessary equipment.

Officers: A. J. Robbins, pres.-gen. mgr.; E. B. Critchlow, v. p.; Reyn Robbins, sec.-treas., with A. J. McDermott and G. A. Fayle, directors.

Inc. in Utah. **Cap.**, $100,000; 10c par; assessable; 575,000 issued.

Property: 12 claims, 190 acres, in Yellow Pine district, Clark coun Nev., said to show a chamber deposit in limestone, dipping 45° W., with N course. Ore shoots are 2 to 8′ wide and 10 to 40′ long. Ore contains carbo of zinc and lead, with some copper and silver; zinc content is 35%.

Development: by 800′ incline shaft, 200′ tunnel and total of 4,50 workings. During 1918 only about 500′ of drifting was done on the 1 level of the shaft.

Production: to 1917 about $100,000, average in 1916 being $25 per t In 1918 output was 250 tons.

Owing to market and labor conditions management did only sufficient w to hold the property in 1919.

YELLOW PINE MINING CO. NEVA

Main office: Goodsprings, Nev.

Officers: J. F. Kent, pres.; R. B. Chapman, v. p.; Morris P. Kirk, mgr.; C. W. Kent, treas., with S. E. Yount and S. H. Westfall, directors.

Inc. 1905, in Nevada. **Cap.**, $1,000,000; $1 par; non-assessable; all issu No bonded indebtedness. Stock transferred and registered, 431 Security B Los Angeles, Cal. Listed on Los Angeles Stock Exchange.

Financial statement for year ending January 10, 1918 shows: gross rece $662,256; total expenditures, $248,575; gross profit, $414,778.

Dividends: in 1918, $300,000; in 1919, $150,000.

Property: 13 patented claims, 240 acres in Yellow Pine district, Cl county, 4½ miles N. W. of Goodsprings, and 12 miles W. of Jean, nearest point. In 1917, the Charleston claim, held under lease, was turned over to Charleston Mining Co. (which see), the Yellow Pine retaining a half interes the new company.

Ore occurs as replacement deposits in limestone, and averages 30% z 14% lead and 14 oz. silver. The main deposit dips about 30° W. and run N. S. Faulting is frequent, and oxidation continues to present depth increases, and zinc decreases at depth. The property and plant were descri in "Mining and Oil Bulletin" of Los Angeles, by H. A. Walker, in October, 1

Development: by an incline shaft, 900′ deep, greatest depth of work being 950′ and linear extent 29,000′. New work in 1917 amounted to 3,0 costing $12.08 per foot.

Equipment: includes 50-h. p. oil engine, hoist good for depth of 2,5 compressors, generator, 4½ miles of tramway from mine to mill, 12 miles 36″ gauge railway with Shay locomotive between Goodsprings and Jean on Salt Lake Route; 120-ton wet concentrator using jigs and tables. The s strictly speaking, is a separator rather than a concentrator. The ore is a lo grade silver-lead-zinc material, and in the treatment at this plant no reje is made, all products of the mill being shipped. In 1919 a calciner was adde eliminate moisture and carbon dioxide in the zinc carbonates.

Production:	tons Ore.	% Lead.	% Zinc.	oz. Silver.	Tot
1917	19,976	14.85	29.1	7.55	42
1916	20,581	10.5	30.4	4.53	4
1915	16,136	10.2	31.8	5.40	

Total production to January 1, 1919, 138,156 tons.

Operations were suspended from March to August, 1919, on account of which destroyed much of the plant, since re-built. The Yellow Pine managed and should pay dividends for a long while.

YERINGTON BULLION MINING CO. NEVA

Idle, and mail returned from former address, Lucin, Utah.

Officers: A. J. Schmidt, pres.; J. A. Knox, sec.-treas.

on No. 3 shaft which was 70′ deep (June, 1919), showing stringers of or the surface. A carload in 1916 yielded 4.45%.

The **Copper Flat** group, 1 mile E. of Yerington is developed by 20 pits and shallow shafts, deepest 60′, showing malachite and cuprite o 6% copper tenor. Shipments in 1917 averaged 6.46% copper.

The **Effie May** group is a gold prospect developed by a 135′ shaf about 2,000 tons of ore blocked out. Property is on the Nevada Copp railway.

YERINGTON MOUNTAIN COPPER CO. NE

Offices: 302 Natl. Bank Bldg., Tonopah and Golconda, Nev.

Officers: J. G. Kirchen, pres.-mgr.; E. M. Kirchen, v. p.; H. Perr treas., with H. J. Toner, W. A. Krasselt, H. R. Cooke and E. J. Haug, d W. L. Taylor, supt.

Inc. February 10, 1912, in Nevada. **Cap.**, $3,000,000; **shares** $1 pa assessable; issued $2,300,000. First Natl. Bank of Tonopah, Nev., an Corporation Co., New York, registrars and transfer agents. Listed o York Curb and San Francisco Exchanges.

Property: 46 claims, 920 acres, in the Mountain View district, N. W. of Schurz and 12 miles E. of Yerington, shows fissures in gran that run N. 40° E., and dip 65°. Ore minerals are mainly chalcocite, wi copyrite, chrysocolla, malachite, cuprite and occasional native copp assays 4½ to 8% copper, 2 to 4 oz. silver and 80c. to $2 gold per ton.

In July, 1916, company purchased the Adelaide mine, near Golconda boldt county, from the Glasgow & Western Dev. Co.

At the Adelaide mine there is a contact deposit in limestone and opened by a 300′ shaft and 1,450′ of tunnels, with a total of 6,500′ of In August, 1917, the orebody on the 200′ level was 20′ wide, and mont ments were 200 tons of 5% ore.

In 1918 a group of five gold-silver claims 100 miles N. W. of Tono acquired.

Development: at the Yerington by a vertical 300′ main sh 1,200′ of tunnels, with about 8,000′ of openings. The Azurite tunnel wa from the other side of the mountain to cut ore exposed in the Levine tu at 400′ greater depth. Tunnel discloses ore in bunches and streaks. Th tunnel yielded a good grade of shipping ore of about 5.5% copper.

Equipment: includes gasoline hoists, 2 compressors, pumps, etc

Production: in 1916 was from 400 to 600 tons per month. All w temporarily suspended February, 1918, on account of heavy flow of lower workings.

YUBA LEASING & DEVELOPMENT CO. NE

Out of business. Formerly at Pioche, Lincoln county.

Officers: Harry McNamara, pres.; W. A. Nye, v. p.; H. E. Dugan, sec.-treas., with H. C. Price, directors.

Inc. 1919, in Nevada. **Cap.,** $150,000; shares 10c par.

Property: 4 claims, adjoining Golden State Divide. A prospect.

BROKEN HILL DIVIDE MINING CO. **NEVADA**

Officers: John McGee, pres. and mgr.; J. C. Williamson, sec.

Property: 4 claims, adjoining the Anaconda Divide on N. E., 3 miles N. W. of Gold mountain.

Development: sinking was to be started in 1919. A prospect on outskirts of district.

BROUGHER DIVIDE MINING CO. **NEVADA**

Office: Tonopah, Nev.

Officers: H. C. Brougher, pres.; George Wingfield, v. p.; with G. A. Kernick, James Grimes and Gust Hanson (supt.), directors. E. J. Erickson, sec.-treas.

Inc. March 16, 1918, in Nevada. **Cap.,** $1,000,000; $1 par, 851,508 outstanding, assessable. Listed on San Francisco Stock Exchange. **Annual meeting,** first Monday in April.

Property: 7 claims, 72 acres, lying immediately north of the Tonopah Divide and southwest of the Divide Extension.

Development: in July, 1918, a vein 70′ wide was crosscut on 200′ (or 177) level. The vein on this level showed no ore, although the drifts were over 500′ long in December. The southeast drift of the 500′ level, 225′ long, cut several rich stringers, and according to reports in the daily papers, a large body of milling ore was cut assaying $24 per ton for a good distance, though the values are spotty. A raise 75′ up, was stopped as the values faded out. Efforts were made to locate the Divide Extension vein by trenching, and a fissure was found.

Equipment: electric hoist, compressor, drills, etc.

Property is rated by engineers as having good chances, but energetic development and abundant funds have failed to find a payable orebody at present depth.

BUCKSKIN DIVIDE MINING CO. **NEVADA**

Address: Tonopah, Nev.

Inc. 1919, in Nevada. **Cap.,** $150,000; par 10c.

Property: 2 claims south of the Pershing and west of the Bullion Divide.

Property: 5 claims, 100 acres, S. of the Kendall and N. of B group. Samples from outcrops assay up to $10 per ton. Examined b Higgins.

DIVIDE CITY MINING CO. N

Office: F. Pittman, agent, Tonopah, Nev.

claim-owner of the district, who had abandoned this ground. A shot in bottom of this hole exposed ore stringers and the superintendent sank a pect shaft, now known as the Caldwell, using a windlass. Rich seams found in the course of sinking, and at a depth of 45′ laterals were started west and southeast, cross-cutting a wide fracture zone, with a trend N. 22° E. Well-defined walls were found 55′ apart, with a S. E. dip drifts advanced N. E. on both walls, have continued in high-grade foot-wall drift having exposed faces continuously sampling from $150 to per ton, and the hanging-wall drift ranging from $20 to $150. The ore is said to average over $25 per ton and the waste-dump, taken from the and cross-cuts, is of shipping grade. This shaft was timbered, hoisting ment erected, and was 200′ deep in October. In a winze below this level value persists 2′ breaking $75 per ton. Drifts at 45, and 100′ depths are 130′ in ore worth $70 and stringers were reported cut on 200′ level. Surface trenching exposed the vein farther north and near the Dividend side-line, high assays are obtained from these trenches. The main Kendall shaft is deep, and a drift will be driven, following the northwest vein, to reach north vein.

The Kendall shaft is well placed for deep development of the rich found in the Caldwell shaft, as the vein dips out of the latter at an angle of

Development on the 200′ level of the Caldwell was at first along a zone, and drifting showed non-commercial values; an extension of the cross encountered the vein exactly where the dip would bring it, and in January 1920, the face showed 6½ feet of 224 oz. ore, with 4″ of $2,000 ore. Later has shown that the vein is bunchy, and that greater depth is needed to reach more uniform mineralization.

Equipment: electric hoist, compressor, etc.

Production: 20 tons daily in August, 1919.

Shares in this company rose rapidly to nearly $3 when the rich ore found, advancing in August to about $4. An unofficial estimate of ore able was $200,000 net, equal to 25 cents per share.

DIVIDE FRACTION MINING CO. NEVA

Office: Tonopah, Nev.

Officers: M. J. Sullivan, pres.; G. A. Cole, v. p.; H. J. Coogan, treas., with H. C. Heidtman and F. J. De Lonchamps, directors.

Inc. April, 1919, in Nevada. **Cap.,** 1,500,000; 10c par, non-assessable.

Property: 5 fractional claims, adjoining the Toggery and Oper groups. A prospect.

Is a reorganization of the Tonopah Gold Zone Mining Co., whose st were exchanged, share for share, into stock of Gold Zone Divide Minin

Property: 9 claims adjoining Tonopah Divide mine on S., and worked in 1901.

Development: by 520′ shaft with collar 250′ lower than that of To Divide shaft, and 1,600′ underground workings. On the 500′ level, drift tend to Divide company's boundary and west on vein for 200′. Condition indicate that greater depth is needed to get commercial ore, though stri carry gold and silver, in places up to $385 per ton. A short drift on vein i of Tonopah Divide boundary showed vein to carry an ore stringer of value, though not in commercial amount. Shaft sinking will be continu 800′, as a 100′ winze sunk from the 500′ is said to have cut 6′ of shipping ore, firming the belief that faulting had dropped the enriched horizon, several dred feet.

Equipment: 25-h. p. gasoline engine, hoist, 3-drill compressor, bl jackhammers, houses, etc.

Good location and management.

GREAT DANE MINING CO. NEVA

Office: Goldfield, Nev.

Officers: C. R. Evans, pres.; J. B. Kendall, v. p. and mgr.; R. W. Ca termole, sec.-treas., with C. H. Webster and F. B. Mechling, directors.

Inc. May 8, 1918, in Nevada. **Cap.**, 1,500,000 shares; 10c par; no assessable, 1,150,000 outstanding. Listed on San Francisco Stock Exchange.

A statement issued December 17, 1919, showed that receipts had total $25,418, including $23,788 from sale of 471,000 shares. Disbursements we $12,745 for development and supplies; $7,116 for equipment and erection o same, and $2,228 on property account. The balance on hand was $616.

Property: 6 claims, 130 acres, 1½ miles N. of the Tonopah Divid mine. Examined by J. B. Kendall, and A. H. Elftman, who said that outcrop assayed $2.20 in gold; silver increases with depth; and that sinking should b done to 600′. Ground is crossed by a well-defined vein proved by various ope

and shallow shafts, from two of which ore was shipped by former lessees; 800' E. of the new shaft now shows $6.50 ore.
Development: by 530' incline shaft sunk on a fault vein, opened on 00' level by 30' crosscut and 239' of drifts, and a 25' crosscut on the 400' with a 201' drift on the vein. The 400' showed some $10.55 ore, and nar- seams of rich ore ($70) were found on the 300' level. This same shaft is to have produced ore for shipment some 15 years ago, the ground being d early in 1901 by the South Tonopah Mining Co., the second mining com- to be incorporated in the Tonopah region.
Equipment: 50-h. p. hoist and all the machinery needed for develop- to depth of 1,000'.
The stockholders, at a meeting held on January 10, 1920, authorized a re- ization, the new company, called the New Sutherland Divide Mining Co., ve 1,500,000 assessable shares, new shares to be exchangeable for old at

Office: Tonopah, Nev.
Officers: George Wingfield, pres.; H. C. Brougher, W. J. Douglass, v. E. J. Erickson, sec.-treas., with Hugh Sutherland, directors.
Inc. May 14, 1919, in Nevada. **Cap.,** 1,500,000 shares; 20c par; assess- Listed on San Francisco Stock Exchange.
Property: 7 claims, 90 acres, adjoining Belcher Extension, Royal and Divide properties. Is about 4,500' N. W. of Tonopah Divide. Fully ped. Sinking main shaft.

GERY-DIVIDE MINING CO. **NEVADA**
Office: 139 No. Virginia St., Reno, Nev. Eva Keenan, res. agt.
Officers: T. J. O'Donnell, pres., Ernst & Cranmer Bldg., Denver; F. utchins, v. p.; J. N. Hyman, sec.-treas. (115 Broadway, New York), with . Graham, G. W. Bachman, E. B. Caldwell, directors. A. H. Warner, supt.
Inc. April 19, 1919, in Nevada. **Cap.,** $150,000; 10c par. Listed on San cisco Stock Exchange, and New York Curb. Corporation Trust Co., 37 St., New York, transfer agent.
Property: 12 claims, 200 acres, adjoining the Gold Zone on north, and ' south of Tonopah Divide. Located in 1902 by James Grimes. Many g dikes or iron-stained fracture ledges of appreciable silver value are said averse claims. Examined by A. H. Warner.
Development: 4 shafts had been sunk, deepest 200', before Grimes to present company. All surface work had shown minimum assays of 1 oz. r per ton. At 135' in main shaft, ore carrying free gold was opened. New t, to be sunk 500', was down 325' on July 27, 1919, at which depth driving under way. Leases have been let to the Doctor Divide Mining Co. and to A. Hooten, of Reno. Both are sinking shafts.
Equipment: all motor-driven, includes 30-h. p. electric hoist, com- or, blower, transformers, 36' head-frame, drills, shops, with accommod- s for 30 men.
All work stopped in 1919. Early, 1920, company had spent $40,000, was tly in debt and stock had dropped from 50c to 4c.

GERY EXTENSION MINING CO. **NEVADA**
Office: Reno, Nev. James Boland, res. agt.
Officers: W. A. Hooten, pres.-mgr.; J. R. Chamberlain, sec.-treas.; James Boland and R. G. Withers, directors.
Inc. June, 1919. in Nevada. **Cap.,** 1,500,000 shares; 10c par; 750,000 d.

Property: 2 claims, 600′ N. of Myra Divide. Also has a lease on T gery Divide. Sinking under way.

Equipment: gasoline hoist and compressor.

TOMBOY DIVIDE MINING CO. NEVA

Office: Tonopah, Nev., F. F. Garside, res. agt.

Property: the Virginia group, 4 claims, near Lookout Divide; also "B" group of 5 claims in Lone Mountain section.

TONOPAH BANKERS DIVIDE MINING CO. NEVA

Officers: A. W. Copps, pres.; W. P. O'Meara, v. p. and mgr.; F. Gillette, sec.; Thomas Normile, treas., with F. C. Jordan and P. C. Thorn rectors. W. P. O'Meara, supt.

Property: 4.500′ north of Tonopah Divide; with the High Divide nex, High Divide, Harmill, and Hennessy ground in between.

Development: contract let for sinking first 50′ in 1919.

TONOPAH DIVIDE JUNIOR MINING CO. NEVA

Office: Tonopah, Nev. W. T. Brown, res. agt.

Officers: H. H. Brown, pres.; L. R. Robins, v. p.-gen. mgr.; W. Gomm, sec.-treas., with Gust Hanson and James Grimes, directors.

Inc. Feb. 24, 1919, in Nevada. **Cap.,** 1,500,000 shares; 10c par; assessable. Listed on San Francisco Stock Exchange and New York Curb.

Property: 3 claims, adjoining the Tonopah Divide at S. W. corner the Grimes Divide.

Development: shaft sinking under way, down 150′ June, 1919. Eq ment: electric hoist, etc.

TONOPAH DIVIDE MINING CO. NEVA

Office: Tonopah, Nev.

Officers: H. C. Brougher, pres.; George Wingfield, v. p.; W. J. D lass, v. p.; E. J. Erickson, sec.-treas., with E. W. Blair, directors. S. C. Mit asst. sec.-treas. William Watters, supt.; E. A. Julian, gen. mgr. and cons. G. H. Garrey, cons. geologist.

Inc. June 3, 1912, in Nevada. A reorganization of the Tonopah G Mountain Mining Co.

Cap., 1,250,000 shares; $1 par; 1,010,800 issued. Listed on San Fr cisco and New York Stock Exchanges. Annual meeting, first Wednesday March. Tonopah Banking Corporation, registrar.

Balance sheet as of December 31, 1918, shows assets amounting to $1,035 of which mine property is placed at $956,367, and development at $58,503. C rent assets were then $20,464, and liabilities $24,815. By June 30, 1919, th liabilities had been paid off and there was a cash balance of $4,842.

Property: 13 claims, patented, 150 acres, in the center of the Div district, on the eastern slope of Gold Mountain.

Geology: the Divide vein, as the main ore fissure of the mine is cal is a shear-zone in the Divide breccia, a rock formed of rhyolite fragments. vein is large, varying from 15 to 30′ across and has sharp walls. A vertical p mineral slip runs with the vein, but crosses it, and is accompanied by many s pathetic minor slips with all sorts of strikes and dips. This fracture has b followed by the levels, which accounts for some apparent irregularities of orebody. The ore shoot is often bounded by clay seams, but in places the v ues fade out into the wall rock. At one place the ore is 90′ across, though averages 20 to 25′ in width. The outcrop is a soft altered rhyolitic bre stained with red and yellow iron oxides, without conspicuous quartz, and rather unattractive appearance, although a red seam carries horn silver. rhyolite dike intersects the vein at a small angle at the northwestern end of 365′ level.

A second ledge, known as the Gold vein, outcrops on the property and w mined in former years. It runs E.-W. and would intersect the Brougher v to south, if not faulted. A crosscut to the Gold vein shows two normal fa running north 75° west and with steep south dip, bringing down the overl formation.

The gangue of the Divide ore is a kaolinized rhyolite breccia, in wh

PROPERTY MAP OF CENTER OF DIVIDE DISTRICT, NEVADA.

scarcely any silicification can be noted. On the 165′ level an oxidized molybdenum mineral, powellite, a molybdate of lime, constitutes an important portion of the gangue, but this material decreases with depth.

Development: by a 600′ shaft with drifts on vein at 165, 265, 365, 47 and 585′ levels. The ore has a length of 300 to 510′ and an average width of 1 to 25′, with a maximum of 110′. Crosscuts at 50′ intervals with careful sampli of the mine, show the main orebody to have an average width of 21½′, a average length of 400′, and a developed depth of 500′, equivalent to 330,800 to of $27.60 ore, at a gross value of $9,108,000 and a net value of $6,138,000, wh is about $6 a share.

This estimate was made by A. I. D'Arcy, former manager, in Novembe 1919. It does not include any value for the ore of the Gold vein, nor of th ore shoot recently found to the N. E. of the shaft. The possible value of th ore below water level, may easily exceed in value, that of the ore so far d veloped.

The mining cost during the first half of 1919 was $6.93 per ton. Shaft sin ing cost $40.62; drifts and cross-cuts, $12.54; and raises, $8.47 per foot.

Equipment: all machinery is motor-driven (with three 50-k. w. trans formers), and includes a large hoist at surface, auxiliary hoist at 370 ft dep one 350 and one 1,200 cu. ft. compressor. Plant includes assay office, houses, e for 100 men, and complete outfit for extensive operations.

Production: ore shipments to the Goldfield Consolidated mill beg in October, 1918, and continued at rate of 220 tons per week until January, 19 when shipments were transferred to the MacNamara mill at Tonopah. In Ja the output was 60 tons daily. This ore is drawn from all part of the mine, b mainly from development on the four main levels and connecting raises. Offic figures are as follows:

		Per Ton					Tot
Year	Tons	Value	Loss	Extracted	Cost	Profit	Profi
1919 (half).....	6,464	$28.24	$2.67	$25.57	$16.71	$8.86	$57,7
1918 (quarter)...	788	20.89	2.28	18.61	17.98	0.63	1,2

With a mill of its own the company should be able to bring its total cost down to at least $9 per ton of ore mined. Hauling ore and treatment now co $8.403 per ton. See estimate of reserves given above.

TONOPAH DIVIDEND MINING CO. NEVA

Office: Tonopah, Nev.

Officers: J. R. Cunningham, pres.; Julius Goldsmith, v. p.; E. P. Cal linan, sec.-treas., with Ernest Cole and Herman Albert, directors. G. J. Mu phy, supt.

Inc. March 4, 1918, in Nevada. **Cap.**, 2,000,000 shares; increased Ap 1, 1919, from 1,500,000; 10c par, 1,280,000 issued. Listed on San Francisco Sto Exchange.

The Dividend is controlled by H. G. Humphrey, of Reno; Zeb Kenda George Wingfield, J. H. Miller, and others, all of whom are interested in Divi Extension.

Property: 6 claims, 85 acres, adjoining Tonopah Divide on south Brougher, Divide Extension and Divide Consolidated. Threatened litigati with the Midway Divide was adjusted in April, 1919.

Development: trenching in June, 1919, had exposed the Divide Exte sion vein, near the joint boundary, where it is joined by an E.-W. vein forma a large fractured area that is enriched to a high degree. At one point, assa ranging from $50 to $150 were obtained across 12′ of this material. The o is said to contain argentite and stephanite. The Dividend main shaft, 1,50 the N. W. is 500′ deep. On the 300′ and 500′ levels, crosscuts driven to cut th vein, had not yet reached it in January, 1920. The new shaft, close to the ea line of the Divide Extension, showed 6½′ of $60 ore at 50′ depth.

Equipment: electric hoist, compressor, drills, etc.

OPAH GOLD MOUNTAIN MNG. CO. **NEVADA**
e-organized in May, 1912, as the Tonopah Divide Mining Co., which see.

OPAH HASBROUCK EXTENSION MNG. CO. **NEVADA**
)ffice: Tonopah, Nev., P. J. Somers, res. agt.

nc. May 4, 1918, in Nevada. **Cap.,** 1,500,000 shares; 10c par.
roperty: 4 claims adioining the Hasbrouck mine on west. Sinking and equipment ordered.

OPAH HASBROUCK MINING CO. **NEVADA**
)ffice: Box 1235, Tonopah, Nev.
)fficers: G. A. Kernick, pres.; H. F. Bruce, v. p. and cons. engr.; B. ilson, sec.-treas.; also directors. A. A. Codd, res. agt. at Reno; J. A. aughlin, supt.
nc. Feb. 6, 1918, in Nevada. **Cap.,** 1,500,000 shares; 10c par; 750,000 d. Listed on San Francisco Stock Exchange. Registration Security Co., Francisco, transfer office.
Property: 6 claims, 130 acres, 3,000′ W. of the Tonopah Divide, be- n which are the Hasbrouck Annex, Kernick, and Verdi.
Development: a 200′ shaft, sunk about 16 years ago, opened 10 to 25′ illing ore. A tunnel driven on the vein somewhat later yielded 1,000 tons of nd a recent extension of the tunnel cut another vein. The ore is in rhyolite. lay, 1919, the old shaft was deepened to 400′, the old workings re-opened 50 to 100 tons of ore per week mined and shipped to the MacNamara mill onopah. A substantial tonnage blocked out by old and new work on the and 400′ levels, the ore being 15′ wide and assaying $12 to $50 per ton. ping 100 tons weekly.
Equipment: hoist, 4-drill compressor, etc.

:PEDO DIVIDE MINING CO. **NEVADA**
Office: 205 Nixon Bldg., Reno, Nev.
Officers: Wm. Watters, pres.; J. L. McCarthy, v. p.; J. F. Kunz, sec.- .. with Roger Dougherty and Richard Finn, directors. A. I. D'Arcy, cons. neer.
Inc. April, 1919, in Nevada. **Cap.,** $150,000; shares 10c par.
Property: 50 acres north of the Divide City, and 3,000′ north of Tono- Divide, adjoining the Midway and Homestake mines. Shaft being sunk machinery erected.

\DE DOLLAR DIVIDE MINING CO. **NEVADA**
Address: C. L. Farr, Ogden, Utah.
Property: the Rim Divide group of 7 claims in the N. W. part of dis- , near the Goldsmith Divide, acquired on August 14, 1919. Work has been ted. Examined by Rolla E. Clapp.

EADWELL DIVIDE MINING CO. **NEVADA**
Office: Tonopah, Nev., J. K. Pittman, res. agt.
Officers: F. M. Manson, pres.; J. H. Miller, v. p.; Allen Rives, sec.- s.. with Zeb Kendall, J. E. Adams and A. G. Raycraft, directors.
Inc. April 2, 1919, in Nevada. **Cap.,** 1,500,000 shares; 10c par; assessable.
Property: 8 claims, about 1¼ miles N. E. of Gold mountain and nearly)ining the Mizpah Divide on the East. Is prospecting.

EASURE DIVIDE MINING & LEASING CO. **NEVADA**
Address: 218 North Virginia St., Reno, Nev.
Officers: J. G. Huntington, pres.; S. H. Rosenthal, v. p.; H. F. McCray, : P. R. Whytock, cons. engr.; Thomas Bosanco, supt.
Inc. 1919, in Nevada. Treasury shares were being sold at 15c in De- ıber.
Property: a 2-year lease on part of the Polo claim of the Revert Di- : Mining Co. The leaseholder has 5 years after the lease expires in which reat the ore.
Development: in December, 1919, shaft was down 30′ on the Revert, wing 14″ of 224 oz. silver ore. Machinery has been erected.

TRILBY DIVIDE MINING CO. NEVA

Office: Tonopah, Nev.

Officers: Henry Malloch, pres.; E. H. Bisson, v. p.; A. R. Miller, treas., with R. E. Connolly and Eleanor Sooy, directors.

Inc. March 28, 1919, in Nevada. **Cap.,** 1,500,000 shares; 10c par; assessable. Listed on San Francisco Stock Exchange. Transfer office: Mills Bldg., San Francisco, Cal.

Property: 4 claims, 50 acres, adjoining the Belmont Divide, the Ro and Argonne. Examined by A. H. Elftman. Surface exposures said t good.

Development: sinking and erecting hoist in May, 1919. By Au shaft was down 100', where samples yielded a few dollars per ton.

TRINITY DIVIDE MINING CO. NEVA

Office: Tonopah, Nev., and Lovelock, Nev.; H. H. Hunter, Jr., res.

Officers: F. E. Baker, pres.; H. E. Loufek, v. p.; V. M. Place,, sec.-tr with J. G. Huntington and H. H. Hunter, Jr., directors.

Inc. May, 1919, in Nevada. **Cap.,** $150,000; shares, 10c. par.

Property: 3 claims, one of the outsiders, 4 miles S. E. of Gold Moun and 1½ miles S. of the Goldsmith Divide.

UNION DIVIDE MINING CO. NEVA

Office: Tonopah, Nev. F. K. Pittman, res. agt.

Officers: J. B. Hutchinson pres.; A. S. Haskell, v. p.; J. T. Wall, s treas.; above with Frank K. Pittman and Peter Halloran, directors.

Inc. April, 1919, in Nevada. **Cap.,** 1,500,000 shares; 10c. par; assess 750,000 in treasury.

Owns 4 claims adjoining the Signal and north of the Sutherland.

VERNAL DIVIDE MINING CO. NEVA

Property: near Verdi Divide, west of Tonopah Divide.

VERDI DIVIDE MINING CO. NEVA

Office: Tonopah, Nev. and Reno, Nev. Paul Revert, agt.

Officers: A. Revert, pres.; G. E. Benham, v. p.; C. S. Stevens, s treas., with C. C. Bridgeman, directors.

Inc. March 21, 1919, in Nevada. **Cap.,** 1,500,000 shares; 1c. par; n assessable. Listed on San Francisco Stock Exchange.

Property: 6 claims, adjoining Tonopah Divide on its west end T tract was located 18 years ago, and a 240' shaft sunk.

Development: a new shaft was put down in 1919, and an electric h and compressor installed. Careful sampling of 100 tons of ore on the d show it to average $25 per ton, indicating that the old shaft and workings worth reopening.

VICTORY DIVIDE MINING CO. NEVA

Office: Goldfield, Nev.

Officers: A. I. D'Arcy, pres.; H. E. Clark, v. p.; Andrew Walz, 2nd v. H. B. Ruhl, sec.-treas.; with C. A. Heller, directors; B. E. Garnett, asst treas.; S. M. Wilson, supt.

Inc. Jan. 11, 1919, in Nevada. **Cap.,** 2,000,000 shares; 10c par; 1,885 issued. Listed on San Francisco Stock Exchange. New York Trust C registrar.

Revenue in 1919 was $89,562, mostly from sale of shares; expenses w $44,464; cash on hand at end of year was $45,098.

Property: 3 claims and 3 fractions adjoining the Divide Consolidate Verdi, Brougher, and Belcher.

Development: 2-compartment shaft was 220' deep in January, 1920, a a crosscut at 200' showed ore that assayed $5 to $24 per ton.

VINDICATOR DIVIDE MINING CO. NEVAD

Office: 155 Main St., Tonopah, Nev. F. T. Dunn, agt.

Officers: A. J. Rigali, pres.; D. W. Ryan, v. p.; P. E. Brown, sec with W. H. Hart (supt.) and E. J. Robertson, directors.

Inc. in N **Cap.,** $150,000; shares, 10c. par.

Property: 5 claims, 60 acres west of the Hasbrouck groups and 1¼ s west of Tonopah Divide. Also owns 4 claims in Lone mountain district.
Development: shaft sinking under way in a brecciated rhyolite. Equip- t purchased in 1919 cost $12,575.

ST DIVIDE EXTENSION MINING CO. **NEVADA**

Office: Tonopah, Nev.
Officers: J. F. Good, pres.; R. C. McCarthy, v. p.; J. W. Dunfee, v. p.; A. Wright, sec.-treas., and H. C. Kane, directors.
Property: 2 claims adjoining those of the West Divide Mining Co.

ST DIVIDE MINING CO. **NEVADA**

Office: Goldfield, Nev.
Officers: L. L. Patrick, pres. and mgr.; H. B. Ruhl, v. p.; B. E. Gar- t, sec.-treas., with K. M. Patrick and Al. McCoy, directors.
Inc. May, 1919, in Nevada. **Cap.**, 1,500,000 shares; 10c par; non-as- sable. Listed on San Francisco Stock Exchange.
Property: 5 claims, in the West Divide district, 5 miles W. of Tonopah ide on west slope of Lone mountain. The main vein trends N. E.-S. W., l dips E. It has been opened by trenching for a length of 2,000′ and shows idth of 2 to 7′. An east vein also opened by a surface trench, shows ore run- g 98.8 oz. silver per ton. An old 150′ tunnel, driven in 1906 and 1911, yielded tons of 160-oz. ore. This tunnel is said to show 18″ of 8 to 12-oz. ore, and of rich ore.
Development: a shaft with a drift at 60′ depth shows ore assaying up to oz. silver per ton, over 40 tons being available for shipment.
Equipment: includes a complete plant for sinking.

ESTERN DIVIDE MINING & MILLING CO. **NEVADA**

Office: 421 Clay Peters Bldg., Reno, Nev.
Officers: S. E. Meserve, pres.; A. H. Butler, Jr., v. p.; with G. A. Ker- k, A. A. Codd, and H. F. Bruce, directors. E. E. Glass, sec.-treas.
Inc. February 12, 1919, in Nevada. **Cap.**, $150,000; 10c par. Listed on n Francisco Stock Exchange.
Property: 8 claims, 150 acres E. of the Hasbrouck Annex and 1,500′ W. of Tonopah Divide.
Development: includes an old 900′ tunnel, which cut a vein at a point 0′ in. This is to be further prospected. Sinking shaft. Well equipped.

ILSON DIVIDE MINING CO. **NEVADA**

Office: Tonopah, Nev.
Officers: J. R. Cunningham, pres.; J. M. Fenwick, v. p.; E. P. Cullinan, c.-treas., with M. J. Fitzgerald and T. M. Sheets, directors. Homer O'Connell, ipt.
Inc. April 2, 1919, in Nevada. **Cap.**, $150,000 shares; 10c par. Listed on an Francisco Stock Exchange.
Property: 4 claims, 75 acres, over 1 mile from Tonopah Divide and ad- oining the Mohawk Divide. Equipped and sinking shaft.

ONDER DIVIDE MINING CO. **NEVADA**

Office: Goldfield, Nev.
Officers: D. S. Ward, pres.; Joseph Bruder, v. p.; F. E. O'Neal, sec. nd supt.; E. Marks, treas.; L. F. Detweiler, directors.
Inc. March 21, 1919, in Nevada. **Cap.**, 1,500,000 shares; 10c. par; non- ssessable. Listed on San Francisco Stock Exchange.
Property: 2 claims, adjoining the Mammoth Gold Reef and Silver Di- ide, developed by 50′ shaft. Sinking, 1919.
Equipment: electric hoist and compressor installed.

ANKEE DIVIDE MINING CO. **NEVADA**

Office: Divide, Nev.
Officers: Hon. C. R. Evans, pres.; G. H. Howard, v. p.; C. P. Johnson, ec.-treas., with J. W. Crane and J. T. Murphy, directors.
Inc. April, 1919, in Nevada. **Cap.**, $150,000; shares, 10c par.
Property: 1 claim, 3 fractions in the S. E. section of the district ad-

joining the Liberty, Bingo, Champion and Gold Seam. Said to show veins carrying good ore.

Equipment: includes hoist and electric compressor.

YELLOW ASTER DIVIDE MINING CO. NEVA

Property: over 3 miles S. E. of Gold Mountain.

YUKON DIVIDE MINING CO. NEVA

Office: Tonopah, Nev.

Inc. 1919, in Nevada.

Property: 90 acres in Klondyke section of the Divide district, 6 m south of Divide mine.

ELY DISTRICT.

BOSTON & ELY CONS. MINING CO. NEVA

A consolidation of the Boston-Ely Mining Co., Smokey Development C and Ely Northern Copper Co

Address: Room 821, 25 Broad St., New York City.

Officers: L. E. Whicher, pres.; C. C. Burger, v. p.; R. M. Atwater, treas., with W. W. Cohen, W. F. Bartholomew, Geo. R. Presby, H. W. Bar W. N. McGill and A. L. Kingsbury, directors. L. J. Corwin, sec. Ray Guyer, gen mgr.; S. H. Williams, mgr. at Ely.

Inc. 1919, in Delaware. **Cap.,** $1,000,000: $1 par; 897,210 outstandi N. Y. Trust Co., transfer agent. Stock traded in on Boston Curb.

Property: 572 acres in Robinson mining district, White Pine coun about 140 miles from Cobre on the Southern Pacific R. R.

The Boston-Ely ground is 4½ miles from that of the Smokey group, Nevada Consolidated and Consolidated Copper mines lying between. T Smokey and Ely Northern are 1/3 mile apart All have rail connecti nearby.

The mines have been idle for many years and are fully described in for volumes of this book: Ely No. C. Co., Vol. VIII; Boston-Ely, Vol. XI; Smok Development, Vol. XI.

Company also owns an interest in the Colonial Silver Mines at Oaxaca, Me and in some oil-lands.

Geology: the copper-bearing ores occur in contact deposits betwe limestone and porphyry, as well as in the porphyry itself.

Development: by 1,230′ shaft in the Boston-Ely, which, with drifts a machinery, cost $180,000; this shaft is 3,000′ from the Alpha shaft of Cons dated Coppermines; by 1,800′ tunnel in the Smokey, costing $60,000; by 3 tunnel in the Ely Northern costing $15,000.

Work in 1919 included clearing out the Smokey tunnel, in which a sh is to be sunk at a point 1,665′ from the portal to explore the sulphide vein a porphyry areas below the tunnel.

Outlook for company is considered favorable, as indications on the E Northern, possibilities in the Smokey, and proximity (3,000′) of the Bosto Ely to the Consolidated Coppermines Alpha mine, give it several chances t make a producer.

BOSTON-ELY MINING CO. NEVAD

Consolidated with Smokey Development and Ely No. Copper as Bosto Ely Cons. Mining Co., which see. Fully described in Volumes XI and XIII.

BUTTE & ELY COPPER CO. NEVAD

General office: 1500 Alworth Bldg., Duluth, Minn. **Principal offic** Room 302, O'Rourke Estate Bldg., Butte, Mont. Mine P. O.: Kimberly, Whi Pine county, Nev.

Officers: Jos. B. Cotton, pres.; John D. Pope, v. p.; John W. Neukom sec. and asst. treas.; Thos. B. Adams, treas.; H. A. Holp, asst. sec.: al directors.

Inc. July 27, 1905, in Montana. **Cap.,** $500,000; shares $1 par; stoc was made assessable, 1907. Is a subsidiary of the Consolidated Copperm Co., which owns 422,625 shares. On December 31, 1918, had $295,772 in cash cash assets in treasury. Net income for 1918 was $3,845. Stock is listed the Butte Mining Exchange. Annual meeting, first Monday in June.

roperty: 12 claims, patented, 210 acres, in the Robinson district ad- g the Nevada Consolidated, White Pine county, includes a valuable water 20 miles distant, said to be capable of supplying 2,000,000 gal. daily; also res irrigable land near water rights.

)evelopment: 3 shafts, 1 with steam hoist, 310′ deep, showing dis- ated ore. Mining was suspended late in 1907, but churn-drilling was d on in succeeding years intermittently, developing several bodies of low- disseminated ore, said to show an average of 1½% copper.

n 1916 the Nevada Consolidated Copper Co. mined for account of Butte y 2,218 tons of ore from the Liberty Bell and Westphalia claims. This ssayed 1.375% copper and yielded 39,777 pounds of electrolytic copper. ie Liberty Pit is extended westward, the above and several other Butte & laims will be stripped and mined on the same terms as apply to mining of ermines ore under its contract with the Nevada company.

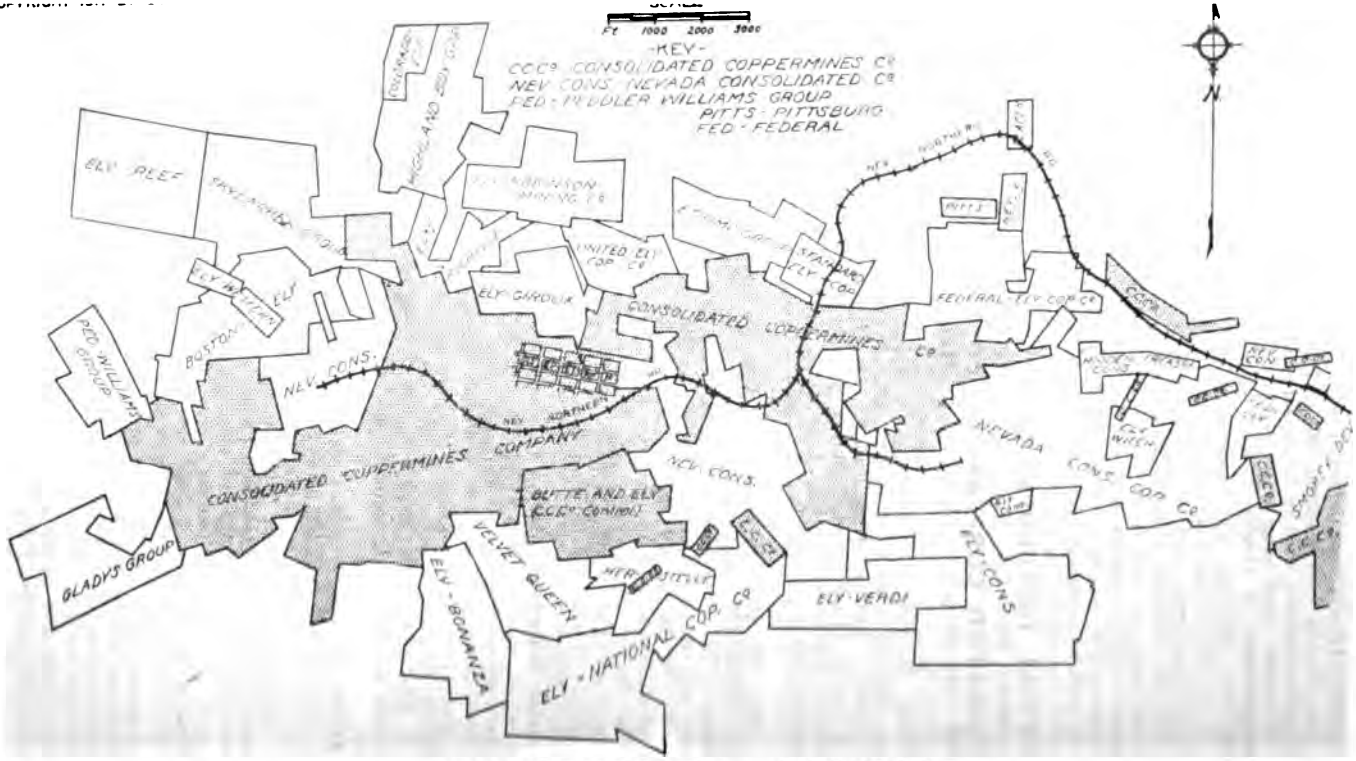
Inc. May 20, 1913, in Delaware. **Cap.**, $8,000,000; shares $5 par; non- sable; $4,802,795 outstanding June 30, 1919. Bonds authorized $3,500,000, nortgage 7% convertible, due 1928; $3,063,700 outstanding ($436,300 con- d and retired), redeemable by lot at 110 plus accrued interest on any est day. In May, 1919, the unissued bonds, amounting to $1,000,000 were ed shareholders, and underwritten by Carl H. Pforzheimer & Co. of New . The funds are to carry out intensive mine development, holding the ld copper until the market improved. Guaranty Trust Company, New York, fer agent; Bankers Trust Company, New York, registrar. Stock listed on York Curb.

Financial Statement: during the year ended December 30, 1918, copper, and silver sold realized $3,786,658. Of this, $45,429 was operating profit. e was a general deficit of $111,995, when general expenses, bond interest, discount were deducted. A combined balance-sheet of Consolidated Cop- ines and Giroux Consolidated shows assets totaling $1,992,924, and liabili- $1,538,922, making an excess of assets amounting to $454,002. Liberty Bonds int to $297,554; cash, $99,520; supplies, $278,473; and metals, $1,029,079. s payable are $200,000; accounts payable, $311,392; and advances on copper, 7,530.

Property: the Coppermines company owns in fee 1,151 acres of mining erties and claims, and 120 acres of unpatented lode locations, together with acres of ranch lands having valuable water-rights. It also controls through tock ownership of about 99%, the Giroux Consolidated Mines Co., 2,000 of patented mining claims and 1,800 acres of ranch lands, which have valu- water-rights; and through its stock ownership in the Butte & Ely Copper 209 acres of patented mining claims. The total area of claims, exclusive ie Mexican properties, is 3,480 acres of patented mining claims and 4,365 of ranch lands, beginning 2 miles west of Ely.

The Sultana mine, the Mexican property of the Giroux company, 11 claims rising about 459 acres of mineral lands, includes the San Jose mine, about le W. of Copete, in the Sierra de Oro, 25 miles E. of Carbo and about 35 s from Hermosillo. Property shows a contact vein of 50 to 100′ width, ten limestone and porphyry, opened by 3 shafts, No. 2, the main working ' sunk on an incline, 1,200′ deep. The San Jose mine shows, in the bottom



ELY-ROBINSON DISTRICT.

WHITE PINE COUNTY NEVADA

el, a vein of about 40′ width, carrying oxidized ores to shallow depth, succ-ded by sulphides. The Mexican property as a whole shows low-grade copper : with fair gold value. Total production to January, 1908, was $542,000. nes have not been in operation for several years, owing to unsettled political ıditions in Mexico.

Geology: there are three classes of ore deposits occurring on the vada properties (1) chalcocite disseminated in porphyry forming concen-ting ore similar to that of the Nevada Consolidated Co., lying in large con-uous masses that can be mined at low cost, some by open-pit steam-shovel thods, others by underground methods; and (2) heavy sulphide ore, high iron and higher in copper than the disseminated ore; and (3) direct smelting : in fissure and replacement deposits in limestone at or near limestone-porphyry ıtacts.

The porphyry ore is very friable and readily amenable to concentration. e Morris and Brooks orebody has a proven length of over 2,000′, a width of ′ and depth of 100′ to 175′, but drilling has not yet been extended downward the bottom of the orebody, along the south side. Another large orebody has :n proved on the west end of the Liberty Eureka pit on the Ora and adjacent ims. Drilling has disclosed considerable ore in the ground between these o orebodies, and farther east on the Minnesota and adjoining claims lling and underground work has exposed sulphide ore in the Old Glory ne. However, the lands are so extensive that only a small part of the prop-y has been thoroughly drilled. During 1918, there was 6,980′ of drilling done, ′ for ventilation and 1,470′ for re-checking old holes. The other work was a preliminary nature in areas more or less isolated from the proven orebodies.

Contact and limestone replacement orebodies have been developed only on : Alpha. The ore-bearing zone has been developed in this mine for a length 650′ and width of 200′ and opened on the 850′ to 1,600′ level and the shaft, 40′ deep is still in this material. The Alpha mine has the only deep explora-n work so far done to explore this limestone-porphyry contact. It is con-lered that the Coppermines Co. has several thousand feet along the south ıtact and a similar length along the north contact, much of which is favorably ırded. Regular shipments of this direct smelting ore were commenced in : spring of 1917, since when 82,917 tons of 7.67% ore has been shipped. It estimated that over 100,000 tons of 8% ore is exposed.

Development: porphyry ores have been developed by over 100 drill-les, totaling 66,936′; also by extensive underground work on the Morris-ooks, Minnesota, Old Glory, and other claims. The Morris-Brooks mine was ened in 1917, and worked until January, 1919, to test the adaptability of the nch-raise caving system, and to provide ore for the Kimberly mill, wherein periments were made to determine the best treatment. During this period, 3,590 tons were mined and milled. Future extraction will be by stripping and am-shoveling. Reserves in this mine have been estimated at over 2,000,000 ıs. New work in this mine during 1918 totaled 17,146 ft., being done solely open the property for economical extraction of ore. The total is 63,377 feet.

The Alpha mine has extensive lateral work on the 770, 1,000, 1,200 and 1,500′ ·els. The Alpha No. 1 shaft is 1.200′ deep, and No. 2 is 1,440′ deep, connects th the same workings, and is to be sunk 200′ deeper. During 1918, develop-:nt in the Alpha totalled 8,487′. New work up to April 30, 1919, was 4,940′; : total is 20,546′. Exploration has proved definitely the existence of a series N. W.-S. E. slip-planes in the altered zone (probably due to faulting), along ıich commercial bodies of ore are found. These slips have been followed rtically for a distance of 450′. On the 1,000′ level new ore has been cut 300′ :st of any other known ore on this level; larger bodies exist at 1,100′ than at 00′. On the 1,200′ level continuous ore from a few feet to 50′ wide has been llowed for a length of over 400′ and averages 8% copper; while on the 1,300′ ·el equally rich ore has been found. A diamond drill hole at the extreme :stern end of the 1,300′ level, passed through 20′ of ore averaging 7.28 per cent. pper lying between the 1,300 and 1,400′ levels. At greater depth the drill cut ugh 65′ of ore that averaged 7.1 per cent. copper, extending down to a

depth of 1,555′. This orebody lies about 400′ east of the first hole drilled, sh ing 33′ of 7.65 per cent. ore.

In January, 1920, active development was in progress at the Taylor on the north contact. On the 150′ level a crosscut passed through 50′ of sulp ore reported to average about 2% copper and $1.50 gold and silver, with sulphur. A crosscut is also being run on the 250′ level.

Ore reserves (May 1, 1919):

Class of ore	Tons	Copper.
Fully developed disseminated sulphide porphyry....	9,957,700	1.41
Partly developed disseminated sulphide porphyry....	9,695,000	1.25
Total	19,653,034	1.33
Heavy sulphide	156,000	3.21
Alpha oxide	100,000	8.00

Mine equipment: at No. 2 Alpha shaft includes a 26x48″ Allis-Chal double-cylinder hoist capable of handling 5-ton skips in counter-balance to d of 1,800′, at a hoisting speed of 1,500′ per minute; also a 20x48″ Allis-Chal hoist for the cage.

Pumping equipment consists of two pumps of 600 gallons and one of 1, gallons capacity per minute at the main pumping station on the 1,200′ l There is also an 800-gal. pump on the 1,400′ level.

A three-mile private railway connecting the principal shafts with the Nev Northern Railway, has grades averaging about 1.5%. Equipment includes sev Porter locomotives of 600 tons tractive power, and sufficient ore-cars for pr requirements.

Ore treatment: careful concentration tests were made on the porp ores by J. M. Callow, of Salt Lake, whose results were used in re-mode the old mill at Kimberly. Concentration is principally by flotation. The modeled concentrator having a capacity up to 1,000 tons per day, was wo until January, 1919.

During the last four months of operation, the mill recovered 82.31% f 1.336% ore. Concentrate carried 18.33% copper and 9.39% moisture.

The company employed Frederick Laist, of the Anaconda Copper Mi Co., to design reduction works. His conclusions are based on (1) the co tration of 2,000 tons daily of 1.4% porphyry ore; (2) the concentration of tons daily of 2.9% sulphide ore; and (3) the smelting of 150 tons daily of A 7.5% oxide ore. Assuming that these ores can be delivered at reduction w at $1.10 per ton for the first, $5 for the second, and $10 for the third, for a p of not less than 10 years, Mr. Laist recommends building a concentrator to h 2,000 tons daily of porphyry and 150 tons of sulphide; also a 3,000-k. w. po plant, and a 500-ton reverberatory smelting plant for concentrates and oxide The equipment will include waste-heat boilers, turbo-generators, coal-dust f reverberatories, and Great Falls converters. These works will be at Kimbe thus saving the 28 cents a ton freight to Ely. The total estimated cost of p ducing copper is given as 12.35 cents per pound. The cost of the works w be $2,500,000. In November, 1919, E. P. Mathewson was engaged to erect new works.

Direct smelting ores as well as the concentrates from the Kimberly c centrator have been treated at the Steptoe plant of the Nevada Consolida Copper Co. under a five-year contract made in 1917.

Nevada Consolidated agrees to mine and treat for account of the Co Coppermines, from properties at the west end of Liberty Pit, 415,000 to ore during the period ending August 15, 1918, and after that date at least 75,0 tons per year. Coppermines company, reserved the right to cancel the cont any time after August 15, 1918, upon giving three months' notice.

Production: during 1918, the company and its lessees extracted fr the 3 mines 496,793 tons of ore, yielding 15,768,481 lb. of copper, 4,338 o gold, 17,415 oz. of silver, 768,101 lb. of zinc, 178,451 lb. of lead, and 323,170

anganese. During the first four months of 1919 the respective totals were
tons ore, 1,516,296 lb. copper, 362 oz. gold, 1,259 oz. silver, 653,804 lb.
15,144 lb. lead, and no manganese.
Management of the company is now in strong and able hands, and a pro-
ive operating policy is practiced.

AMALGAMATED COPPER CO. **NEVADA**

ompany controlled since 1911 by Jesse Knight, pres., Provo, Utah, who
51% interest.
nc. 1907, in Utah. **Cap.**, $100,000; shares 10c. par.
Property: 6 claims, and a townsite, about 1 mile from the Steptoe
er, of the Nevada Consolidated Copper Co., at McGill, White Pine county,
s silver-lead ores. Several carloads of ore shipped in 1917. No recent
reported.

BELL MINING CO. **NEVADA**

Property: 132 acres, known as the Revenue group, at Ely. Pine county, near the Chainman and Altman mines. Idle for several years.

ELY VALLEY MINING & MILLING CO. NEV

Dead. Fully described in Vol. XIII. Property now owned by the Sa Mining Co. of Nevada, which see.

ELY VERDI COPPER CO. NEV

Address: Geo. Wingfield, pres., Goldfield, Nev. Mine near Ruth, Ely.

Directors: S. R. Roberts, John Berry, of Ely; A. P. Sawyer, and L. L. Savage, of Goldfield; M. R. Brown and H. S. Anderson, of Pierre, S. D.

Inc. May, 1912, in South Dakota. **Cap.,** $5,000,000; shares $5 par. reorganization of company of same name that was listed on New York in 1909.

Property: a large group of claims south of the Copper Flat st shovel pit of the Nevada Consolidated, in White Pine county. Only asses work being done.

ELY WITCH COPPER CO. NEV

Officers: J. E. Bamberger, pres., 163 So. Main St., Salt Lake City, U D. M. Hyman, v. p.-treas; H. Cohen, sec.; Ernest Bamberger, gen. mgr., ceding with H. G. McMillan and W. W. Armstrong, directors, at last acc

Inc. November 22, 1906, in Maine. **Cap.,** $5,000,000; shares $5 par. Stock listed on Boston Curb, but inactive at last accounts.

Property: 7 claims, 1 fractional, 54 acres, patented, bought for $2 lying in the porphyry zone between the Ruth and Cumberland-Ely mines o Nevada Consolidated, White Pine county, shows large blowouts of iron-st porphyry.

Development: by 300′ shaft, with levels at 100′ intervals, and by nels of 1,200′, 600′ and 1,050′, with 3,500′ of workings. Development was appointing, for, while claims cover the main monzonite belt of the district underground work on 300′ level showed values too low to work. Drill Nevada Consolidated Co. is the logical thing to do and that company can pro work this property since it is now handling 1.6% ore at a profit. Company speculative promotion at time Nevada Consolidated was floated, and pr lean on development, has been idle since.

FEDERAL ELY COPPER CO. NEV

Idle. **Office:** 26 Mining Exchange Bldg., Salt Lake City, Utah. **office:** Ely, Nev.

Officers: J. A. Cunningham, pres., at last accounts.

Inc. 1914, in Utah. **Cap.,** $150,000; shares, 15c. par; reduced 1916 $5,000,000; shares $5 par; assessable; 12 assessments levied to March, 19

Property: 21 claims, 3 fractional, 400 acres, also the Huesser ran 600 acres, 15 miles north of Ely, in the Steptoe valley, White Pine county, 1906, and a millsite. Mining lands are the Panama claim, bought 19 $10,000, lying about one-half mile north of the Star Pointer shaft of the Consolidated; 8 claims north of the Nevada Consolidated; 3 claims be the Cumberland-Ely and Turner-Ely, and the Queen of the West group, in inson Cañon. Company is said to have paid $225,000 for its lands.

Geology: property north of the Nevada Consolidated shows lime beds dipping to the east, said to be underlaid by cupriferous monzonite to carry 3 parallel shear zones, each about 400′ in width, 600′ apart, s a little copper and lead ore. The limestone capping on the Savage claim to carry lead ore. Churn-drill borings are said to have given a satis showing of ore, and there also was some test-pitting and surface trenching

Development: by tunnels aggregating about 1,600′ and 4 shallow 3 said to show copper sulphides at depth of 100′, the main shaft said to

contact of 3 ore zones, which seems peculiar, if the ore zones are parallel, laimed.

The Queen of the West shaft shows, at depth of 110', a sulphide orebody onsiderable size, averaging 3% copper, 1 to 2 oz. silver and 40 to 50 cts. gold ton. The Kessler shaft, about 100' deep, near the tunnel, shows lead carates of fair tenor. Mine has a small steam plant.

Company has done little save levy assessments for several years, doing ly enough work on the claims to meet annual assessment requirements. ir claims were surveyed for patent in 1912 and reported partly patented in . Operated by lessees at last accounts.

OUX CONSOLIDATED MINES CO. **NEVADA & MEXICO**

General office: suite 3300, 120 Broadway, New York City. **Mine offices:** iberly, Nevada, and Carbo, Sonora, Mexico.

Adams, treas; foregoing with Samuel Brenner, Albert E. mphreys, Jr., John D. Clarke, directors. H. T. Munroe, gen. mgr. and ada agent. Samuel L. Heslet, Mexican mine agent.

Inc. April 14, 1903, in Delaware. **Cap.**, $7,500,000; shares $5 par; issued 07,100. American Trust Co., Boston, registrar. Boston Safe Deposit & st Co., transfer agents.

The Giroux is now controlled absolutely by the Consolidated Coppermines , through exchange of Giroux stock for that of the Coppermines company. e latter company now owns about 98% of the total Giroux stock outstanding. description of properties and operations see Consolidated Coppermines Co.

DONALD-ELY COPPER CO. **NEVADA**

Office: Boston Bldg., Salt Lake City, Utah. **Mine address:** J. P. Tur-, supt., Ely, White Pine county, Nev.

Officers: D. C. McDonald, pres. and gen. mgr.; Col. Enos A. Wall, p.; Geo. W. Parks, sec., Boston Bldg., Salt Lake City, Utah; Frank Knox, as., with Frank J. Westcott, Geo. W. Lamb and Hon. Thos. Kearns, directors; P. Jennings, cons. engr. and mgr.

Inc. November, 1906, in Utah. **Cap.**, $1,000,000; $5 par; issued, $790,000. bentures, $100,000, at 6%, maturing November 15, 1915. Shares were listed the Salt Lake Stock Exchange, but withdrawn.

Property: 28 claims, patented, 325 acres. 19 claims held under bond and se. Property, on the lime belt, in the N. E. part of the Ely district, carries contact deposits, between porphyry and limestone, showing prominent iron crops. Management estimated veins as 20' wide carrying oxidized ores, aying 1 to 40% copper, and about 80 cts. gold per ton.

Development: is by the 415' Wall tunnel, showing 21' of heavy iron. e mine as a whole has about 3,000' of workings.

Equipment: includes a 25-h. p. gasoline hoist, 40-h. p. steam hoist, and 5-drill air compressor. There are 6 buildings, including necessary shops. A mping plant and pipe line supply water from a spring at nearby ranch.

An old 50-ton mill, with rolls and cyanide plant, remains from a former nership. The 100-ton concentrator has a gyratory crusher and 3 sets of lls. In May, 1914, drifting was in progress. Idle for several years.

hase and absorption, the physical assets of the Steptoe Valley S. & M. Co., h was dissolved October, 1914.

Property: 106 claims patented, 27 unpatented. Distributed as follows: er Flat Group—33 patented claims, covering about 355 acres; 23 unpatented, Group—57 patented, 705 acres; and 4 unpatented. Veteran Group—14 ited; and 2 outlying patents; also 40 acres for water supply and railroad g. and 182 acres for dumping overburden.

Geology: The geologic features of the property are somewhat similar ose of Morenci, Arizona, and Bingham, Utah. An area of Paleozoic lime- s and shales is intruded by a great mass of monzonite porphyry, tilting breaking the sedimentaries and forcing its way into them in dykes and Alteration of both sedimentaries and monzonite is extensive, and inclu- of great masses of country rock in the intrusive are common.

The main orebodies are found in monzonite porphyry; all of the porphyry however is not ore bearing. Small bodies of high-grade copper ore are ntered in the sedimentaries near the contact, and occasional occurrences lver-lead ore are met at some distance from it. These latter are of small rtance. In the porphyry, commercial ore occurs at depths varying from 700' below the surface, and up to 450' thick. Copper occurs as chalcocite, ocite coating pyrite, and some chalcopyrite, in seams and disseminated gh the mass of porphyry. As the copper-content fades out gradually in , the bottom limits of pay ore are determined largely by commercial factors. capping of leached porphyry, is for the most part barren, though there are ional occurrences of copper carbonates, silicates, oxides, etc., in it. Suffi- carbonate ore was found in the capping of the Copper Flat orebody to y the smelter with flux. A considerable part of the property is covered rhyolite, the remains of an extensive lava flow occurring long after the onite intrusions. Todate, no orebodies have been found in the rhyolite. he end of 1918, a total of 27,280,088 yards of capping had been removed, g 39,704,385 yards in place.

Development: has so far proved the existence of three main orebodies, ly: the Copper Flat, Ruth, and Veteran, and several of lesser importance— imberly, Ingersoll, Wedge, and Jupiter.

The Copper Flat orebody, which is the largest and most important, is mined am-shovels, and was disclosed in three places known as the Eureka, Liberty, Hecla pits. These three pits have been consolidated into one. The big pit oughly the shape of a dumbbell, with the former Eureka and Liberty pits east and west end respectively, and the Hecla in the middle. Its longest sion E.-W. is 4,100' and N.-S. 2,500'. It covers an area of 124 acres and its deepest point 250' below the surrounding country. Entrance for trains l in the northerly part of the Eureka and Liberty ends. These entrances ade from an assembly yard, where ore trains are made up for the Nevada ern R. R., which handles them from this point to the smelter, 26 miles t.

n mining, benches are maintained at about 50' intervals. To loosen up the ial ahead of the shovels, 6" holes, placed at proper intervals in the benches, n down by churn-drills. Nine drills of the No. 5 Keystone type are kept s work; 1½ in ore, 3½ in waste, and 4 as extras are kept in the pit to ize the amount of moving. Holes are spaced about 35' apart, 10 or 12' back the edge of the bank and average 50 to 55' in depth. They are sprung or ered by light charges before they receive the blasting charge.

After blasting, the material, ore or waste as the case may be, is loaded into ad cars by steam-shovels. In this work nine 95-ton Bucyrus shovels, having rhoef 4-cu. yd. dippers, are used. A good general average is 1,200 cu. yd. eam shovel shift of 10 hours.

Transportation of ore from the pits to the assembly yard, and of waste to anous dumps, e of by 15 saddle-back locomotives, 2 being of s, 2 of 81 to 7 of 45 tons, and one of 35 tons weight. In ne 56-to switch engine is employed in general service. for the fro om the mines to the mill are furnished by

the Nevada Northern R. R. and are of 55 ton, all steel Ingolsby type. There are about 200 of these in service. Overburden is handled with 70 wood and steel dump cars of 18 and 20 yard capacity.

Normally, over 10,000 tons of ore and 14,000 yards of overburden are handled daily.

Other pit equipment consists of one 30-ton locomotive type crane, one employes' car used to transport men to and from work; a repair car equipped with tools, compressor, and boiler; ten coaling cars of special design for the shovels; 4 flat cars for transporting drills, casing, etc.; and two powder cars, one a refrigerator used to preserve explosives at the right tempertature. Adequate machine, blacksmith, carpenter, engine and car shops with full equipment are maintained.

The Ruth orebody lies about 1¼ miles east of the Copper Flat deposit. Here the capping is too deep, from 110 to 540′ thick to mine it economically by steam-shovels, hence it is mined by underground methods.

The Ruth mine is served by two shafts, the Star Pointer—the main working shaft, a 4-compartment vertical, 25′-6″x5′-6″ inside dimensions; and the Ingersoll, an incline, 5′x8′-6″ inside dimensions. The two shafts are about 2,600′ apart, 600′ and 550′ deep, respectively, and connected on the 500 and 600 levels. To date about 14½ miles of underground workings have been driven, also several thousand feet of churn-drilling.

Ore is mined by the branch-raise caving system, which consists in driving raise series at 25′ intervals at right angles to motor haulage-ways. From the branch-raises, finger-raises are put up to open the orebody at 12½′ intervals both parallel and normal to the direction of the haulage ways. The orebody is undercut at the tops of the finger-raises, caved, and ore drawn off through the fingers and branches to the haulage ways. This method was described by W. S. Larsh in a paper read before the A. I. M. E. of New York, in February 1918. The advantage of all caving systems is primarily one of cost, but also always of complete extraction of orebodies. In the Ruth mine, certain blocks on the 300 to the 600′ level, inclusive, were expected to produce 1,741,374 tons of 2.15% ore, but actually yielded 1,776,183 tons, averaging 2%.

Material is moved underground by twelve 10-ton electric mine locomotives of 60 h. p. and 90 h. p., of 250 volt d. c. trolley type. Fifty 88 cu. ft. saddle-back steel cars, holding about 4 tons each are used.

In the Star Pointer shaft, ore is hoisted by a 400 h. p. 550 volt a. c. Nordberg hoist in 6 ton self-dumping skips running in balance. The shaft is also equipped with a 200 h. p. geared hoist handling a double deck cage capable of holding 40 men. From the tipple ore is distributed in a 3,000 ton bin by means of chutes and loaded from the bin into Nevada Northern R. R. 55-ton cars, which pass beneath it. A heavy duty hoist and 3,200 cu. ft. compressor were added in 1918. The Ruth mine produced 591,545 tons of 2.195% ore in 1916; 991,164 tons of 2.013% in 1917; 1,316,144 tons of 1.87% in 1918. The mine can produce a daily output of 5,000 tons, and the new hoist can handle 6,000 tons from a depth of 600′.

The Ruth is further equipped with 2 Ingersoll-Rand, P. R. E.-2, 3,000 cu. ft. air compressors direct connected to 550 h. p. synchronous motors, 3 phase, 25 cycle, 600 volts. About 80 air drills are in use. Direct current at 250 volts for the underground trolley system is furnished by three 150 h. p. Allis-Chalmers motor-generator sets of the Bullock type. A saw-mill, equipped with saws, framing machinery, and handling about a half-million foot, board measure, of timber per month; a blacksmith shop and a small machine-shop are maintained.

Nearly all of the waste, and some of the material for mining is hoisted through the Ingersoll shaft in a 2-ton capacity skip. Equipment here consists of a 112 h. p., 550 volt a. c. Wellman-Seaver-Morgan electric hoist.

The Kimberly orebody has been developed only by churn-drills. No underground workings and no mining. Drilling has proved the existence of 644,000 tons of 2.02% ore.

The Wedge and [illegible] lies are small, the former containing 4[illegible] tons of 3.12% materi[illegible] developed by underground workings. [illegible] mining is being done [illegible] present.

he **Veteran** mine, taken over from the Cumberland-Ely, west of and ing the Consolidated Coppermines Giroux holdings, is not producing, ions at this property having been discontinued indefinitely. Mine contained tons of ore, averaging 3.89% copper.

re reserves: extensive churn-drill borings on the Copper Flat, Liberty, n, Ruth and other properties, have proven a tonnage estimated January , as 67,993,117 tons of ore, averaging 1.59% copper and representing an pply of about 17 years. A revision of reserves was made in 1916, the timate being an increase of over 17,000,000 tons. Of this, 22% is in the mine, remainder at Copper Flat.

omparative Table of Recoverable Developed Ore:

nded	Tons	Copper, %	Year ended	Tons	Copper, %
30, 1907.....	14,432,962	1.97	Dec. 31, 1913.....	39,108,590	1.65
30, 1908.....	20,000,000	1.94	Dec. 31, 1914.....	41,020,296	1.68
30, 1909.....	29,000,000	1.94	Dec. 31, 1915.....	50,525,289	1.65
30, 1910.....	40,360,823	1.70	Dec. 31, 1916.....	67,993,117	1.59
31, 1911.....	40,853,371	1.66	Dec. 30, 1917.....	70,025,322	1.58

hurn-drill prospecting from the beginning of operations to end of 1918 564 holes averaging 362½'. In the Ruth the cost of drilling was $3.52 ot, an increase of $1.14.

lectric power is used throughout, current being brought from the Steptoe r, at 40,000 volts, and stepped down to 600 volts by seven 200-k. w. trans- rs in a concrete station at the Ruth mine.

re is shipped to the Steptoe smelter, at McGill, separately described below, 27-mile standard-gauge railway, equipment including 400 self-dumping rs. This line is a part of the Nevada Northern railway, having a standard- line of 165 miles in length, running from the mines and Ely to a junction he Southern Pacific railway at Cobre station. The Nevada Northern Rail- Co., controlled through stock ownership by the Nevada Consolidated, is lized at $2,000,000, with a $1,000,000 bond issue, at 5%, the line doing a l business in addition to handling the traffic of the Nevada Consolidated r Co. In 1918, it carried 4,661,943 tons of ore from all mines in the district, 5 tons of commercial freight, and 380,937 passengers.

lining costs:

	Moving overburden, cents per yard	Steam-shovel mining, cents per ton	Ruth mine, per ton
.....	41.20	41.69	$1.2855
.....	34.43	31.32	1.0251
.....	30.09	23.70	1.2021
.....	28.85	15.24	.....

eneral taxes represent a considerable proportion of mining charges, being to 46% in 1916.

eduction works: The concentrating mill and smelter owned by the ny are at McGill, White Pine county, Nev. Lands cover 8 square miles, water rights. The property is on the eastern side of Steptoe valley, on the at the foot of the Schell Creek range, 14 miles N. E. of Ely and 22 miles the mines, on the line of the Nevada Northern railway. The smelter site comprises 320 acres, 1 mile long and ½ mile wide, on a hillside with 10% permitting the works to be terraced, and handling material by gravity hout. Lands carry water-rights to Duck creek, and to the McGill ranch, ted as capable, jointly, of furnishing water for a 15,000-ton plant.

he mill is one of the largest and best in existence. Late in 1917 its ty was increased [illegible] 14,000 tons daily. All main buildings steel frame and [illegible]n the unit system. It is nearly a mile ite smelter, and [illegible] hard silicified, altered porphyry ore,

description of this plant by R. E. H. Pomeroy, was published in B (Feb., 1920) of the A. I. M. & M. E.

The reverberatory furnaces are charged with calcines mixed with lin dumped through slide-gates, from hoppers, suspended from the charg Each furnace has 2 tap-holes on one side, from one of which matte is off into matte cars of about 30-ton capacity. These cars are tilted and c poured into the converters by an electrically-driven mechanism mounted car frame. Slag is skimmed twice every shift, the skimmings going to iron box leading to a lined launder, in which a jet of water granulates t and washes it to the dump. Slags carry 50 to 45% silica, 6 to 12% calciun 25 to 35% iron oxide and 8 to 14% alumina. The reverberatory buildin dust chamber of 1,000′ square section, 155′ long, leading to a 300′ brick c 15′ in diameter at top. The total charge reduced in these furnaces in 19 654,650, a decrease of 86,774 tons.

The blast-furnace building, between the reverberatory and converter ments, has a single blast-furnace, 42x240″ at the tuyeres, and 84x240″ shaft, with a capacity of 300 to 500 tons of charge per day, the furnac so planned that it can be enlarged if desired to 80′ in length. The furnac above the ground level, with a height of 16′ from the tuyeres to the c floor, operating with a 10′ column charge and 40-oz. blast pressure. Th 4 steel water jackets on each side, and 1 at each end, and each side has 2 inch tuyeres, 10″ apart, receiving blast from a 30″ bustle pipe. The jackets each have separate blast boxes and independent air and water c tions, so that any jacket may be removed by breaking 3 simple conn Charging is done by cars dumped pneumatically, matte is tapped into la cars and slags granulated and sluiced, as in the reverberatory building. discharge through a 108″ downtake to a 12x15x250′ brick flue, terminating main roaster flue. The blast-furnace is not in operation.

The converter building is about 600′ from the reverberatory furnac receives molten matte from cars, behind and above the converters, the c being poured into a launder, while the shells remain in position for blast building has two 5-motor Shaw electric cranes, each with a hoist capa 60 tons besides 2 auxiliaries of 25 tons each. There are 2 of the old stall 96x150″ shells of the barrel type built for acid linings, but now used wit nesite brick linings. There are also 2 Peirce-Smith barrel-type converter originally 25′ 10″ long by 10′ diameter shell. One of these was lengthe the smelter to 33′ 11″. They originally had 30 tuyeres each but these hav increased to 35 and 46, respectively. The blast pressure used is nominally gauge at an altitude of 6,327′. The Peirce-Smith converters produce ab and 60 tons of copper per day on 40% matte.

Blister copper is poured into ladles and transferred into a brick-linec cylindrical receiver. This is mounted on rollers and rotated on its own a an electrical motor, so that the molten blister copper is poured through a pouring spoon into moulds on a horizontal straight-line chain and sp conveyor. These moulds discharge on a submerged apron conveyor which traveling in the water horizontally for a few feet turns on an incline and the copper ingots out of the water and lands them on the loading pla They contain 99.5% copper, weigh about 400 lbs., and after trimming and weighed on accurate scales, they are shipped in box cars.

The converter's slag is taken back to the reverberatory furnaces in side-tilting pots operated by compressed air. Flux for the converters co of concentrator slimes and silicious carbonate ore from the Copper Fla mixed and dried in 2 oil-fired rotary driers at the converter building handled and charged by boats. The hoods from the converters lead to a br flue running along over the charge floor for the extent of the converter bu covered by stalls. It is then connected by a circular flue 10′ diam. to a dust chamber which in turn connects to a brick stack 100′ from the groun diameter at top.

The power plant has 4 batteries of two 400-h. p. Babcock & Wilcox w tube boilers each and one battery of two 600-h. p. Stirling water-tube bo

batteries have Foster and 3 others have Babcock & Wilcox internal super-
rs, and there is a separate Foster super-heater for the steam supplied by
everberatory waste-heat boiler plant of ten 400-h. p. boilers. Steam is
ated at 160-lb. pressure, and can be super-heated 100° F. All boilers are
by Green chain-grate stokers, coal being fed from overhead bins by chutes
to the stoker hoppers. Each double battery of boilers has a 9x40′ steel
with induced draught, furnished by 5 Sturtevant fans, each connected
a 30-h. p. Sturtevant slide-valve engine, running at 150 to 175 r. p. m.
Each battery of boilers is equipped with fuel economizers of about 3,360
t. heating surface, set between the boilers and the induced draught fan;
are dampered so that they can be cut out for cleaning while the boilers are
rvice. A 3,000-gal. capacity Kennicott water purifier supplies make-up
for all boilers.

The engine-room, main floor, contains the generating engines, blowers, 3
ers and a switchboard, and the basement contains condensers, air pumps
oil filters. The electrical equipment consists of two 1,100-h. p. 22x48x48″
-Chalmers Corliss cross-compound engines, with 800 k. w. Bullock a. c.
rators mounted on the shafts; two 2,000-h. p. 31x66x48″ Nordberg Corliss
-compound engines with 1,500-k. w. Bullock a. c. generator mounted on the
s, and one 2,500-k. w. steam-driven Westinghouse turbo generator. Cur-
is generated at 600 volts and carried to a concrete transformer station,
pped with seven 200-k. w. Bullock water-cooled transformers, stepping
nt up to 40,000 volts, for transmission to the mines; four 750-k. w. water-
d transformers, and four 1,000-k. w. water-cooled transformers, stepping
nt up to 13,200 volts for transmission to the mills; 13,000 and 40,000-volt
e coils and lightning arresters.

A 3,000-k. w. turbo-generator was added during 1917, to take care of increased
r consumption at the mill, and one of 600-k. w. was to be ordered in 1919.

The smelter blowing plant, in the engine-house, includes a 350-h. p. 14x28x36″
m-compound engine direct-connected to a No. 10 Connersville blower with
city of 300 cu. ft. of air per revolution, making 120 r. p. m. This is for the
-furnace. For the converters air is supplied at 10-lb. gauge pressure by one
-Chalmers blowing engine, 16″ and 24″ diam. steam, 34″ and 34″ diam. air
8″ stroke of 6,000 cu. ft. capacity; one Nordberg 25″ and 54″ diam. steam
nd 52″ diam. air by 48″ stroke of 12,000 cu. ft. capacity, and one Nordberg
nd 56″ diam. steam, 54″ and 54″ diam. air by 48″ stroke of 18,000 cu. ft.
city. These are all of the cross-compound steam, tandem, air and steam

A 20,000 cu. ft. steam-driven turbo-blower was added in 1916 to supple-
the blowing engine in supplying air for converters, etc.

A cross-compound air-compressor with steam cylinders 11″ and 21″ diam.
air 21″ and 12″ diam. and 18″ stroke of 1,080 cu. ft. displacement, compresses
o 100-lb. This was originally for tamping converter linings, but is now
for pneumatic tools of various kinds at the shops and the mill, and a
nd one of similar capacity was ordered during 1917, but delayed by abnormal
itions. A 2,000 cu. ft. 2-stage, steam-driven compressor was added in 1916.

In connection with the works are a number of thoroughly appointed shops,
ding a boiler, machine and carpenter shop, foundry, warehouse and round-
e.

The Steptoe works were started in April and the finished copper shipped in
ust, 1908. Nearly 1,500 men are normally employed at the plant.

Gold and silver extracted during 1918 was sold for $661,429, compared with
750 in 1917, and $801,818 in 1916.

The property has been splendidly developed, and is being managed ability and success. Operations during 1919 were reduced to 50% of cap and were stopped for a month through a strike.

NEVADA UNITED MINES CO. NEV

Address: 441 Equitable Bldg., Denver, Colo.

Officers: W. J. Chamberlain, pres.; H. F. Crocker, v. p.; R. J. P sec.; E. S. Kassler, treas, with H. B. Northrop, F. N. Bancroft, W. G. H A. G. Bowen and A. G. Burton, directors.

Inc. February 6, 1906, in Arizona. **Cap.**, $3,500,000; $1 par; 2. issued.

Property: 50 claims, 38 patented, about 600 acres, 18 miles from White Pine county, said to show "chamber" deposits of lead ore in lime Ore contains lead, silver, and iron.

Development: by tunnels totaling 2,400′ to 350′ depth. Mining caving system, and output was about 2,800 tons monthly in 1917.

Property is now worked by Nevada United Mines Leasing Co.

NEVADA UNITED MINES LEASING CO. NEV

Operating under lease the property of the Nevada United Mines Co. at Ely, White Pine Co.

NEW ELY CENTRAL COPPER CO. NEV

At a special meeting of the stockholders held December 20, 1913, it voted to deed to the Consolidated Coppermines Co. the entire property o New Ely Co., and in pursuance of this vote a deed was executed and deli the Cons. Coppermines Co. thereupon taking possession of all the proper the former company. The stock and bondholders deposited for exch 475,464 shares of the 500,000 outstanding shares and $167,550 of the $17 outstanding bonds up to Dec. 31, 1915. The new Ely Central Copper Co. be dissolved when all stock and bonds have been exchanged. Fully desc in Vol. XIII.

PRINCESS COPPER CO. NEVA

Idle. **Address:** C. W. Freed, pres., 1007 First Ave., Salt Lake Utah.

Mine office: Ely, White Pine county, Nev. F. J. Austin, sec.; H Clark, treas.

Inc. 1911. **Cap.**, $1,000,000; shares $1 par.

Property: 30 claims, about 550 acres, acquired of the Ely Resurrec Copper Co., in the Robinson district, lying a little north and east of Ely.

Mine has 2 short tunnels and a 140′ shaft, said to show 18′ of ore assa up to 5% copper, with gold and silver values, and some high-grade ore assa up to 46% lead and 110 oz. silver per ton, with gold values. Management p resumption of development work.

SMOKEY DEVELOPMENT CO. NEVA

Consolidated 1919, with Boston Ely Mng. Co. and Ely Northern Copper as Boston Ely Cons. Mng. Co., which see.

EUREKA DISTRICT.

ALKALI MINES CO. NEVA

Mine address: Eureka, Eureka county, Nev. W. E. Sanders, supt.

Property: the Windfall mine, developed by a 500′ shaft. **Ore:** conta gold, silver and lead.

Equipment: includes a crushing plant and 150-ton cyanide plant returns available since 1916.

BULLWACKER CONSOLIDATED MINES CO. NEVA

Address: W. A. Barnes, Eureka, Nev.

Officers: W. A. Barnes, pres.-treas.; B. F. Shepherd, Jr., v. p.; J. Cottle, sec., with E. S. McCurdy and A. Toriggino, directors.

Inc. 1919, in Nevada. **Cap.**, $600,000; $1 par.

Property: the Bullwacker and Silver West claims, 80 acres, on A hill adjoining the Eureka-Holly mine on the west. The claims were l in 1869, and have produced $500,000 from above the 300′ level. The 400′ shaft is to be repaired and sunk another 100′.

)ESUS-EUREKA MINING CO. **NEVADA**
Property sold to Eureka-Croesus Mining Co. q. v.

)ESUS EXTENSION MINING CO. **NEVADA**
Address: R. M. Bradley, Austin, Nev.
Company being organized in December, 1919.
Property: 4 claims on Prospect mountain, W. of the Eureka-Croesus.

:EKA-CLIMAX MINING CO. **NEVADA**
Address: Box 8021, Reno, Nev.
Officers: Tasker L. Oddie, pres.; M. D. Fairchild, v. p.; Ed. Malley, Al Revert, directors. J. L. Jose, sec.-treas.
Inc. 1919, in Nevada. **Cap.,** $150,000; 15c. par.
Property: 3 claims, 70 acres, which have produced $100,000 worth of rich on Prospect Mtn., said to be the high-grade section of the Eureka dis- Eureka county. The Deadbroke mine opened by a long tunnel from some rich ore was produced in the 70's, has been reopened.
n the "Nevada Mining Press" of November 25, 1919, it was advertised "while the Eureka-Croesus Mining Co. as such owns no interest in the ka-Climax Mining Co., those who own the Eureka-Climax, and all of its g operations will be conducted by the technical staff of the Eureka-Croesus. ecretary and treasurer of the Eureka-Climax Mining Co. is assistant secre- nd treasurer of the Eureka-Croesus, under whose supervision the accounts ooks of the company will be kept, in the office of the Eureka-Croesus g Co. at Eureka.
ugene Davis of the Eureka-Croesus Mining Co., has taken a large interest Eureka-Climax and will give it the same energy and push that has made le the rapid development of the Eureka-Croesus properties."

EKA-CROESUS MINING CO. **NEVADA**
)ffices: 20 Broad St., New York City, and Eureka, Nev.
)fficers: Frank L. Torress, pres.; Chas. N. Sigison, v. p.; with H. Carle- lack, Henry O. Evans and Walter W. Slack, directors. John D. Peckner, eas.; G. O. Bradley, cons. metallurgist; James Huebner, supt.
nc. in Delaware. **Cap.,** $1,500,000; shares $1 par; fully paid. U. S. oration Co., registrar and transfer agents. Stock listed on New York

roperty: 17 patented and 5 unpatented claims, at Eureka, Eureka v. includes the Ruby-Dunderberg, Connelly, and a number of old mines rly owned by various companies.
eology: the orebodies are replacements of fractured Paleozoic lime- , and include stocks, lodes, and bedding plane deposits, largely as irregular ular masses, from a few feet up to 100′ in thickness, and twice as much in ntal extent. In the workings above the 400′ level practically all the ore ial is oxidized, and it was left in the mine because there was no known d of treating it at a profit. The galena ores found in the deeper levels are different, and if a substantial tonnage of such ore is opened up by further as seems quite possible, the company has a definite source of income.
evelopment: the Catlin or main working shaft, is but 425′ deep, with ive workings on the 200 and 400′ levels and a winze 300′ deep, sunk below 0′ level.
umerous oreshoots were cut at various geologic horizons on these 2 , and the bottom of the winze is reported to be in $90 ore. More or less rade ore is being found in new work, a small shoot cut on 200′ level in aber, 1919, assaying 362 oz. silver per ton with 60% lead and $6 gold.
th levels connect with the workings of the old Dunderberg mine.
e present workings are said to total 2 miles, with 8 miles more of old that can be reopened. New work for last half of 1919, totals 2,500.′
eserves: estimated by R. W. Foster at 2,368,635 tons of ore of an value of $31 per ton, including 100,000 tons on dumps and 40,000 tons of of a gross value of $73,483,800, or $59,271,990 net. This estimate is not

regarded as a safe one, because the estimated cost of $6 per ton for reco the values in the oxidized material is as yet purely a matter of opinion.

Equipment: includes an electric power plant, 150-h. p. engine, ve ing blowers, hoist, 680 cu. ft. compressor, surface tram, orebins, and 1,0 mill to be erected in units of 250 tons each. Transportation to the main l Southern Pacific is over the Eureka to Palisade line (the Eureka & Ne controlled by Eugene Davis, who, while not on the Eureka-Croesus direct is in control of the company and dominates its policy.

Costs at present are given at about $17 per ton, so that ore assaying $20 per ton can not be utilized. As ore is oxidized, no milling method than sulphidization and flotation has so far been found applicable, bu process is not yet beyond the experimental stage. The management state with the formation of a synthetic sulphide an excellent extraction can be by oil flotation, so that the proposition is "a simple manufacturing ente for years to come." A smelter will probably be erected as a power-plant c erected near Eureka to utilize the oil shales so abundant nearby.

EUREKA-HOLLY MINING CO. NEV

Address: W. A. Barnes, v. p.-mgr., 576 Mills Bldg., San Francisco. L. W. Hope, supt., Eureka, Nev.

Cap., $500,000; issued $245,000.

Property: 11 claims, 296 acres, on Adams hill, Eureka, contains dep of lead-silver ore in limestone. There are also 320 acres of ranch and w rights. Property was the old Idaho mine, acquired in 1917, and reputed to yielded $150,000 from surface workings. Shipped $50,000 worth of high-g silver-lead ore in 1918, and management reported 60,000 tons of milling blocked out in the mine, March, 1919. About 20 men employed.

Development: by 500′ shaft, being deepened to 700′. Two orebod the east and west—are being opened. The former is the largest, and has yi $68,000 so far. Dimensions of the shoots are said to be 5 by 15′ on 100′; 500′ on 200′; 18 by 70′ on 300′; and 30 by 150′ on 400′ level. Reserves in veins are estimated to be 60,000 tons of $17 ore.

Equipment: includes two 75-h. p. semi-Diesel engines, hoists, (su and underground), 8-drill compressor, and plans for a 100-ton mill.

Is a promising property sponsored by reputable people.

EUREKA-NEVADA MINING CO. NEV

Office: 625 Dooly Block, Salt Lake City, Utah. **Mine office:** Eur Nevada.

HOPE CONS. MINING CO. NEV

Address: Eureka, Nev. J. H. Rogers, pres.-mgr.

Inc. 1918. **Cap.,** $500,000; shares $1 par.

Property: on Ruby hill, Eureka, Eureka county, developed by Prospecting in 1919.

RICHMOND-EUREKA MINING CO. NEV

Controlled by U. S. S. R. & M. Co.; property under lease and bond to ing & Development Corporation, q. v.

Address: P. O. Box 385, Boston, Mass.

Officers: C. G. Rice, v. p.; F. W. Batchelder, sec.-treas.; with Albert s, A. J. Seligman, C. A. Wimpfheimer, C. A. Hight, N. W. Rice, F. Y. rtson, and Sidney J. Jennings, directors. A. P. Mayberry, supt.
Inc. September 28, 1905, in Maine. **Cap.**, $3,600,000; $10 par. Annual ing, fourth Wednesday in September.
Property: several patented and unpatented claims (about 200 acres) at ka, Nevada. Geology of the district described in U. S. Geological Survey, . 7, 1884. Mine was first worked in 1869, and produced up to 200 tons up to 1910, when the Eureka-Palisade railway was washed away. When railway was repaired, the increased rate demanded made the extraction of available low-grade ore unprofitable and regular mining operations have yet been resumed. Speiss from the dumps has been shipped to the U. S. lting, Refining & Mining Co.'s plants for experimental treatment.
Development: by shafts and extensive openings. Reserves have been nated as equal to 500 tons daily for 8 years. Mine has never been pros- ed below water-level, and there remains a large section of ground above level also unexplored. Whenever circumstances warrant, work can be med.
Equipment: 1,400-h. p. steam boiler plant, 1,500 cu. ft. compressor, hoist ,200′ capacity, steam pumps of 650 gal. capacity from 1,350′ depth, machine- , 500-ton orebin, etc.
The Mining & Development Corporation of Maine, controlled by E. O. er and H. P. Henderson of 60 Broadway, took a lease and bond on the erty in October, 1919, agreeing to spend $200,000, or $10 per share in lopment, etc.

BY HILL DEVELOPMENT CO. **NEVADA**
Address: E. O. Holter, or H. P. Henderson, Mining & Development p'n, 60 Broadway, New York City.
Inc. 1920, in Delaware.
Company operates the Richmond Eureka and Eureka Cons. mines un- lease and bond given the Mining & Development Co. The Ruby Hill also an option until 1922 on 254,000 shares of Mng. & Dev. Co. stock, giving 100,000 es of its own stock for the option and mine control.
Property: the two bonanza silver-lead mines which made the camp of ka famous in the early eighties and which produced silver bearing ore to the value of 34 million dollars before the demonetization of sil- in 1896.
The main or Locan shaft, 1,200′ deep is to be unwatered, and the deep nd beyond the Ruby Hill fault is to be explored. The chance of find- a displaced section of the orebodies or new orebodies is a legitimate ure based on geological inference, but flotation and other new methods oncentration, together with the restoration of the old price of silver enable company to work the low-grade ores known to exist in the old ings.

Officers: Geo. Wingfield, pres.; J. D. Hubbard, v. p.; C. F. Burton treas.; E. A. Julian, gen. mgr., with J. H. Carstairs, L. A. Gibbons and Hoyt, directors. A. H. Lawry, cons. eng.

Inc. November 13, 1906, in Wyoming. **Cap.,** $50,000,000; shares issued, 3,559,148 shares. Stock listed on San Francisco and Salt Lake Ex and New York and Boston Curbs. John S. Cook & Co., Goldfield, Nev.

Company office, Reno, transfer agt. Annual meeting, third Monday in ch.

Company is a merger of Goldfield-Mohawk, Red Top, Jumbo, Laguna Gold- . Goldfield and Combination mining companies. In 1911, company acquired :gerone Fraction and the Bull Dog and Jumbo Fractions. Company owns re stock of the Goldfield Cons. Milling and Transportation Co. and the Gold- Cons. Expl'n. Co. (q. v.); a 25% stock interest in the C. O. D. Cons. Min- Co., and 87% stock interest in the Aurora Cons. Mines Co., Mineral county, .. and an interest in the Dolly Varden Mines Co., B. C. All of these com- es are described under their own titles.

Annual report for 1918 shows: Total earnings, $796,409; operating ex- es, $804,211; operating loss, $7,802. Assets include: Property, $28,396,844; s to subsidiaries, $904,865; cash, $136,062; undivided profits, $1,880,816.

At the end of 1919, company had, cash, $268,935; accounts, etc., receivable, .965; supplies, $106,197; securities, etc., $35,336; junking value of plants at lfield and Aurora, $230,000.

Dividends: 20c. in 1907; 90c in 1909; $2 in 1910; $2 in 1911; $1.60 in : 70c in 1913; 30c in 1914; 45c in 1915; 5c in 1919, on December 31, a total 9.176,788, or $8.20 per share.

Property: 26 patented lode claims, and 1 unpatented claim, 390 acres, oldfield, Nev., with 6 working shafts, Combination, Mohawk, Red Top, Jum- lermont, Jumbo No. 2 and Laguna. Output is from several mines working re veins whose stoping width varies from a few feet to as much as 20 or 30'. Veins show orebodies with variations in which the commercial limit t dependent upon structural planes, the shoots swelling out and pitching with slight relation to the vein walls.

Geology: development has shown that (1) most of the orebodies have appeared as oxidized masses under silicified outcrops, invariably turning to iide ore; (2) silicification always accompanies mineralization, but many zones reccia are barren; (3) whenever ore is found in latite, it has always been exploited in the overlying dacite, and is a continuation downward of the ore-shoot; there is marked falling-off in value as the latite is reached, and ically all ores thus far mined in the latite are sulphides; (4) the bonanzas been confined to the dacite, with the exception of the Engineers' lease and v isolated shoots in the similar Milltown andesite; and (5) no pockets have t been proved under the Siebert lake beds, all known orebodies being in- ed by surface exposure.

Development: during 1918, 4,848' of work was done at an average cost 5.72 per foot. **Ore reserves**: estimated January 1, 1918, at 30,000 tons ging $10 to $12 per ton. A system of leasing outlying parts of the property royalty basis was decided upon in 1916. Several lessees mined good ore.

Equipment: is excellent and complete for daily output of over 1,000 *of ore.*

Production, Costs, and Profits Since Completion of Mill:

In February, 1919, the entire holdings of the company were leased period of 5 years to the Goldfield Development Co., which see.

Goldfield Consolidated ranked as one of the greatest gold mines world, producing over $50,000,000 and disbursing over $29,000,000 in div

GOLDFIELD DEVELOPMENT CO. NE

Address: P. O. Drawer 119, Goldfield, Nev.

Officers: Corrin Barnes, pres.; A. I. D'Arcy, v. p.; H. G. McMaho treas., with A. H. Howe and Benj. J. Henley, directors. F. D. Bradley, lurgist; Elmer Burt, mine supt.

Inc. February 13, 1919, in Nevada. **Cap.**, $125,000; increased to $ in December, 1919; shares 5c. par; assessable; 200,000 shares in treasury S. Cook & Co., registrar. Annual meeting, third Monday in February.

The Development Company was organized to operate the holdings Goldfield Cons. Mines Co., including the mining property, 1,000-ton mill a road in the Goldfield district, Esmeralda county. Part of the ground h purchased and the balance taken under lease for a period of five year February 1, 1919, with the privilege of sub-leasing any part or all of the Thirty-six sets of lessees were at work December, 1919, and more leases granted. Little ore was in sight when work was started, but most of the have found and shipped ore.

The four main shafts, the Laguna-Redtop, Grizzly Bear, Clermo Combination, are all kept open, and a new shaft was sunk on the Comb Fraction (also held under lease), which will be the main haulage way the ore caved in the Combination mine. Management plans to mine Co tion hill by caving and thus obtain an output of 1,200 tons daily of low ore for the mill. The ore will be drawn from a strip of ground that from the north boundary of the Florence mine to the January shaft loca the January claim, a distance of about 1,000'. The ore is 40' wide and from the surface to the 380' level. Management estimates 1,500,000 tons averaging $5.60 gold per ton, and a total operating cost of $3.15 per ton. a detailed examination of the property, made prior to this company's ta over, more than 1,000 samples were cut and assayed. As a result of this ination it was concluded that the reserves will actually yield $5.50 per to cost of $4, giving a net profit of $2,225,000 for the ore already blocke Recent work, both in old ground and virgin territory has shown th resources of this acreage are not yet exhausted as rich ore has been which may "sweeten" the average given above.

Shipments by company and lessees from February 15 to April 1, am to 1,090 tons, valued at $21,246.

Company will start milling 500 tons of $15 to $20 ore daily about April this to be increased to 2,000 tons of $6 ore when mill is completed.

With its competent management and ample ore supply company s earn handsome profits.

GOLDFIELD GREAT BEND MINING CO. NEV

Office: 302 News Bldg., Goldfield, Nev.

Officers: C. S. Sprague, pres.; J. K. Turner, v. p.; Ben Gill, sec- with L. L. Dellinger and B. W. Ward, directors.

Inc. May 8, 1915, in Nevada. **Cap.**, $1,500,000; shares $1 par; assess all outstanding. Assessment No. 5, of 10c. per share, levied January. Stock listed on San Francisco Exchange.

Financial statement for period February, 1916, April, 1918, shows receipts, $90,214, including sale of 30,040 treasury shares, $1,502; assessmen 2, $14,498; assessment No. 3, $14,575; ore sales, $59,346. Expenditure same period amounted to $84,875. Report for 9 months ending January 1, shows: receipts, $24,731, including $14,781 from assessment No. 4, and $ from ore sales. From January to July, inclusive, income was $16,880 expenses, $13,610; accounts and bills payable were $4,901.

Property: 7 patented claims, 112 acres, in Diamondfield sectio Goldfield, Esmeralda county. Claims show a quartz vein in andesite, with dip and E.-W. course. Oxide and sulphide ores occur in shoots said to ave $60 per ton. **Development:** by shafts to 500'. The mine was unwatered

round work begun in 1915. A drift is being driven E. from the 375' f the main shaft toward the Lockhart shaft to intersect the downward on of oreshoots exposed on the 236' level. From February, 1916, to 1918, 4,633' of new work was done at a cost of $54,579 or $11.78 per foot; new work done in 1918 cost $19 per foot, and 655' of new work in 1919 4.11 per foot.

uipment: 75-h. p. hoist, compressor, pump and an old mill which will ly be re-built.

oduction: (net) in 1916 (4 months), 106 tons, yielding $3,168; in ,800 tons, yielding $46,533; in 1918, 715 tons, yielding $12,937, a total tion of 2,621 dry tons. Operations to April, 1918, showed an operating $25,529. First seven months of 1919 yielded 85 tons of $21.48 ore.

ldress: Reno, Nev.

ficers: Elmer H. Cox, pres.; J. Ross Clark, v. p.; C. F. Burton, sec.-Trustees: Geo. Wingfield, John Erikson, Edgar Ames and E. A. Mizner.

c. 1908 in Washington. **Cap.**, $5.000.000; shares $1 par. Stock listed Francisco Exchange.

operty: St. Ives and Velvet claims, the latter causing considerable on with the Jumbo Extension during 1915, for which see Vol. XII.

velopment: by shaft to 1,750' and winze 150' below, opening veins oots of copper-gold-silver ore. Work on the 1,350' level developed 2% ore, but no gold. In 1917-18 work was started on the 1,750' level in an to find the extension of the Atlanta orebodies. Owing to excessive deep work was abandoned in September, 1919, and transferred to the el where bunches of high-grade ore had been found.

ging by results at other mines in the district, depth holds little promise.

c. November 20, 1916, in Nevada. **Cap.**, 2,500,000 shares; 10c par: all nding; assessable. Stock listed on San Francisco Exchange. Assessment of 1c. per share levied May, 1919. Company is a consolidation of the Hill Mining, Florence American Mining and Florence Extension Mining nies.
roperty: 5 claims, 70 acres, owned outright, and 10 acres held under at Goldfield, adjoining the Florence Goldfield on the S. and W. Ore ns gold, silver, and copper, occurring in a quartz vein in andesite. The rty carries the extension of the Florence vein.
velopment: by 800′ vertical shaft. During 1918 a total of 1,700 linear f new ground was opened up by drifts, crosscuts and winzes on the 500′ 00′ levels. Developments on the 600′ proved disappointing and manage- is concentrating all work on the S. drift of the 500′ level to reach the ice Goldfield vein. By September a 4′ vein had been cut 450′ S. of the

E.-W. fault on the Florence Goldfield. The vein was opened for 70', sho an 18" shoot of $40 ore.

Company has a lease on a block of ground at depth of 430' to 650' i Florence Goldfield mine, immediately beneath the rich ore mined by the I ganized Cracker Jack.

Equipment: includes double drum electric hoist, compressor and tric power.

Company has an excellent speculative chance of finding bonanza ore.

RED LION CONSOLIDATED MINES CO. NEV

Described in Volume XIII. Merged December, 1919, with Yellow Consolidated Mining Co., which see.

REORGANIZED ATLANTA MINES CO. NEV

Is a reorganization of the Atlanta Mines Co., fully described in Volume

Address: Reno, Nev., and Goldfield, Nev.

Officers: Geo. Wingfield, pres.; W. E. Zoebel, v. p.; C. F. Burton, treas., with B. J. Henley and L. N. French, directors. A. I. D'Arcy, mgr.

Inc. 1918, in Nevada. **Cap.**, $1,000,000; 20c par; 4,250,000 outstan assessable. Assessment No. 2, of 1c. per share levied March, 1919. Liste San Francisco Exchange.

Property was conveyed to the new company in consideration of assum by the new company of all indebtedness of the Atlanta. Stock was excha share for share upon payment of 1c. assessment, stockholders having a 4 exchange privilege.

Property: 74 acres, patented, at Goldfield, Esmeralda county, Nev. cludes the Atlanta, Black Bear and Union Jack mines, adjoining the Florenc the east and the Goldfield Cons. on the north.

Geology: ground contains extension of the Goldfield Cons. orebodie the shale-latite contact. Exploratory work carried on through the St. shaft of the Goldfield Cons. cut the Atlanta vein on the 1,750' level. This is 40' to 100' wide, runs N. S. and dips at 45°. The ore is pyritic with t hedrite, and varies from gold ore, free from copper, to ore carrying 9% to copper. The great ore-shoot thus far shows bands of medium grade ship ore, but was as a whole, a low-grade concentrating ore that may average $8 ton, besides a shoot of shipping ore 6'-15' thick that averaged $20 per ton. orebody extended 110' upward and for 380' on the strike, and was opened winze below the 1,750' level.

Development: by 1,750' Merger shaft. During 1918 the winze was s from the main or 1,750' level to depth of 1,900', and in March, 1919, $59 g copper ore was encountered in an east crosscut driven to cut the Atlanta ve

Production: began April, 1915. Total shipments to April, 1916, fr the 1,750' level, 239 tons, netting $1,347.

The geology of the district is described in Prof. Paper No. 66 of the U Geological Survey, 1909, by Ransome, and by J. E. Spurr, in Econ. Geol February, 1916. Property promises to be a producer of low-grade concentrat ore from which it should be able to make profits.

REORGANIZED BLUE BULL MINING CO. NEVA

Office: P. O. Box, 2012, Reno, Nev.

Officers: Geo. Wingfield, pres.; W. E. Zoebel, v. p. and asst. sec.; C Burton, sec.-treas.; preceding, with L. N. French, directors.

Inc. 1912, in Nevada. **Cap.**, $1,500,000; shares $1 par; all outstandi assessments totaling 8c. called to end of 1918. Listed on San Francisco Excha Share prices, 1c. low, 5c. high, 1918-19. Annual meeting, third Monday December. Company was organized to acquire title to the property of the Bl Bull Mining Co., sold at sheriff's sale June 14, 1912. Latter company's sto was exchanged share for share for new stock on payment of 1c. per share

Property: 8 claims, 148 acres, in the Goldfield district, Esmerald county, Nev.

Development: by a 730' shaft with workings on the 500 and 700' leve ope[illegible]ictor and Blue Bull veins. Crosscuts have been run into t [illegible]ed Mining Co. ground under a leasing agreement. Con

ial ore was found on the 500′ level, but not on the 700. Work on the 100 250′ levels during 1918 disclosed a vein 50′ long, from 6 to 18″ wide, aver- g $100 per ton in gold, silver and copper.
Property is a prospect.

)RGANIZED BOOTH MNG. CO. OF GOLDFIELD NEVADA

Address: Goldfield, Nev.
Officers: Geo. Wingfield, pres.; W. E. Zoebel, v. p.; C. F Burton, sec.-
i.
Inc. 1912, in Nevada, as a reorganization of the Booth Mng. Co. Stock exchanged, share for share, on payment of 1c. **Cap.**, $1,000,000; share ar; assessable; 999,957 outstanding. Annual meeting, third Monday in mber. Listed on San Francisco and Salt Lake City Exchanges; traded in ew York Curb. Stock transferred at company's office. Five assessments, egating 7c. have been levied; the fifth, 2c. per share, was in January, 1915. e prices, 2c. low, 22 high, 1918; 9c. low, 40c. high, 1919.
Dividends: No. 1, 5c per share, paid March 6, 1916; No. 2, 15c. on l 6; No. 3, 10c., on April 26; No. 4, 5c., on June 6, making a total of $349,984 that year. On May 15, 1919, a cash dividend of 5c. per share and a stock lend of 1 share of Tonopah Divide stock for each 50 shares of Booth stock was declared payable from proceeds of sale of stock of the Reorganized anas Mining Co., 250,000 shares of Spearhead Gold Mining Co. Reorganized, 2,000 shares of Tonopah Divide Mining Co.
For an account of litigation, etc., see Vol. XIII.
Property: formerly owned by the old Booth Mining Co., consists of claim adjoining the Red Top and Laguna mines of the Goldfield Cons. In ember, 1915, all development work was suspended, and it was reported the agement would endeavor to purchase another property.
The company is said to have the distinction of being the only non-producing e that receives an income without incurring the slightest expense for operating.

)RGANIZED CRACKER JACK MINING CO. NEVADA

Address: Goldfield, Nev.
Officers: E. P. Junor, pres.; Geo. K. Cremer, v. p.; H. G. McMahon, treas. and mgr., with C. H. Shirtz and J. A. Erickson, directors.
Inc. December 18, 1915, in Nevada, as a reorganization of the Cracker Mining Co. **Cap.**, $150,000; shares 10c. par; assessable; all outstand- Company being financed by assessments. On December 21, 1915, a call of 1c. share was made, each stockholder in the old company being required to pay assessment before receiving share for share of the new company. Listed on Francisco Exchange. Share prices, 1c. low and 6c. high in 1918; 2c. low 10c. high, 1919.
Property: 5 claims, 2 patented, 140 acres, at Goldfield, adjoining the dstorm-Kendall on the east; said to have had $50,000 expended on it for elopment. In January, 1916, the company purchased the adjoining 3 claims, cres, formerly owned by the Adams Gold Mining Co., which had been sold taxes. Adams group has a vertical shaft 320′ deep with levels at 115′ and depth, said to show gold-silver ore in a 20′ vein in rhyolite. Work on the level has been carried to a point 1,150′ E. of the shaft, and drifts are being nded N. and S. on the Cracker Jack and East veins. A winze sunk on the vein at 50′ from the 320′ level is reported to have intersected the Cracker vein in April, 1919. By November there was exposed 8′ of $25 ore. rves above 120′ were estimated at 50,000 tons of $8 ore. At 440′ ten feet of ore was cut.
Equipment: includes electric hoist, compressors and drills. Property prospect.
In addition to the work being carried on in the main property, the company s a 5-year lease on part of the ground of the Goldfield Consolidated Mines and the Florence Goldfield Mng. Co., where extensive developments are g carried on at a depth of 400′. This work is being prosecuted through the t of the Red Hill company. The lease secured from the Florence Goldfield block 220 by 150′ from surface to 530′ and another from surface to 430′.

REORGANIZED DIAMONDFIELD TRIANGLE MNG. CO. NEVA

Address: Ben Gill, treas., Goldfield, Nev.; J. K. Turner, cons. engr.

Inc. 1917, in Nevada. **Cap.**, $2,000,000; shares $1 par. Is a reorgan tion of the Diamondfield Triangle Mng. Co.

Property: 7 claims in Diamond district, developed by vertical shaft to show a promising quartz vein.

Idle since 1917, pending re-financing of company. Stockholders invite exchange their stock, share for share and payment of 1c. assessment.

REORGANIZED KEWANAS GOLD MINING CO. NEVA

Address: Reno, and Goldfield, Nev.; Geo. Wingfield, pres., W. E. Zo v. p.; C. F. Burton, sec.-treas.; A. I. D'Arcy, mgr.

Inc. July, 1913, in Nevada. **Cap.**, $1,500,000; shares $1 par; all outst ing; assessable. Last assessment levied August, 1919. Listed in Salt Lake and San Francisco; traded on New York Curb: Share prices, 1c. to 10 cts. 3 c. to 8c. in 1919.

Company is a reorganization of the Goldfield Kewanas Mining Co., w became bankrupt in 1913. As a result of the apex suit filed in 1915 by R ganized Booth Mining Co., which see, the latter company received 250,000 sh Kewanas stock which was disposed of during 1918.

Property: 2 claims and a fraction, about 40 acres, east of the Lag group of the Goldfield Cons. at Goldfield.

Development: by means of the winze on the Kewanas ground an east crosscut into it from the 700′ level of the Laguna shaft of the Gold Cons. Work up to July, 1918, consisted of exploration of the vein exposed the 840′ level; 550′ N. of the winze the vein split, one branch strikes N. W. other N. E., with shale between. Both branches have been explored; so no large bodies of pay-ore have been exposed, but development is to be tinued on this prospect.

SANDSTORM-KENDALL CONSOLIDATED MINES CO. NEVA

Address: Reno, Nev.

Officers: Geo. Wingfield, pres.; W. E. Zoebel, v. p.; A. I. D'Arcy, 1

Inc. in Nevada. **Cap.**, $1,500,000; shares $1 par; assessable; outstand 1,326,724. Listed in San Francisco.

Property: 70 acres at Goldfield, developed by shaft to 500′ with a wi to the 700′ level. Ore carries gold and is a contact deposit between ande and rhyolite. At last accounts the company was doing development work and above the 350′ level, and prospecting at 260′ to find ore that yielded years ago.

The mine is a prospect.

SILVER PICK CONSOLIDATED MINES CO. NEVA

Offices: 262 Russ Bldg., San Francisco, Calif., and Goldfield, Nev.

Officers: Herman Zadig, pres.; A. S. Wollberg, v. p.; E. S. Van Dy gen. mgr.; C. D. Olney, sec.-treas., with M. Grothyohn, J. J. McCarthy and O Newcomer, directors. G. F. Dyer, supt.

Inc. September, 1911, in Nevada. **Cap.**, $1,500,000; $1 par; assessab all outstanding. Shares listed on San Francisco Exchange. Share prices to 10c., 1918; 5c. to 15c. in 1919.

Property: 5 patented claims, 60 acres at Goldfield, Esmeralda coun being developed by 1,300′ shaft on the Deserted claim and a 280′ shaft on No End claim. A large body of low-grade sulphide ore is exposed in the Deser but there is no quantity of commercial ore yet. Company has taken a 5-y lease from 1919, on south end of Mohawk No. 1 claim, north end of Moha No. 2 claim, and north end of Combination No. 1 claim of Goldfield Cons. M Co., comprising about 20 acres. Work being advanced towards leased gro from 1,300 and 700′ levels of Silver Pick shaft in September, 1919.

SPEARHEAD GOLD MINING CO. (REORGANIZED) NEVAD

Office: 421 Clay Peters Bldg., Reno, Nev.

Officers: Geo. A. Kernick, pres.; H. Berg, v. p.; A. A. Codd, sec treas.; H. F. Bruce, supt., with A. A. Busey, directors.

Reorganized March 25, 1916, in Nevada. **Cap.**, $1,500,000; increased fr

)0,000: shares $1 par; assessable; 10 assessments levied to date: 1,500,000 ed. Listed on San Francisco Exchange. Annual report for year ending mber 31, 1918, shows: receipts, $50,343; expenditures, $26,382; cash on hand, 113.

Property: 2 claims, 27 acres, at Goldfield, adjoins the Kewanas, Jumbo nsion and Merger Mines Co. on the east. Several years ago lessees sank 4 ts, 80′ to 100′ in depth. Mine was worked intermittently until October, with the idea of continuing the 240′ shaft to the shale-latite contact. This nation was cut at 880′ and the shaft bottomed at 910′. In sinking, 3 wide tz veins of no value were passed through. At 910′ depth stringers contain- chalcocite and chalcopyrite were cut, some said to assay $30 per ton. During , a total of 2,127′ of work was done on the 250, 285′ and 910′ levels. High- le ore was encountered in a zone of silicified shale on the 910′ level and ral raises were driven towards the shale-latite contact, which was reached 50. No ore was found.

During 1919 new work, mostly on the 910′ level totaled 2,049′, but only a few ns of rich ore were cut.

Company had a lease on the Never Sweat claim of the Blue Bell Mining adjoining. Spearhead 450 and 910′ levels are headed toward this claim.

Equipment: 60 h. p. hoist, compressor, drills, etc.

RNAL MINING CO. OF GOLDFIELD **NEVADA**

Main and transfer office: 351 Bullitt Bldg., Philadelphia, Pa. **Mine** :e: Goldfield, Nev.

Officers: Meyer Schamberg, pres.; N. S. Keith, sec.-treas.

Inc. 1904, in Arizona. **Cap.,** $1,500,000; $1 par; increased, 1915, from 00,000.

Property: 2 claims, in Diamondfield district, Goldfield, adjoins Gold- l Bull Dog Mng. Co. and is controlled by same interests. Developed for a hundred feet, partly by lessees. Has shipped in a small way.

LLOW TIGER CONSOLIDATED MINING CO. **NEVADA**

Office: Goldfield, Nev.

Officers: H. A. Riedel, pres.; with H. G. McMahon and A. I. D'Arcy, :ctors. G. B. Bettles, mgr.

Cap., $450,000; shares 10c par; assessable; 1,764,176 shares in treasury. essments are limited to 2c. per share per annum. No. 1 of 1c., was due uary 10, 1920. Stock is listed on San Francisco Exchange. Shares quoted c., 1918 and 1919.

Cash at end of 1919 amounted to $20,000.

Property: 350 acres, next south of the Goldfield Consolidated and E. he Columbia Mountain fault, including ground of the Red Lion Consolidated ies Co., Desert Chief Consolidated Mining Co., and the New Goldfield Sierra ning Co., absorbed in December, 1919. Ore carries gold and copper.

The Yellow Tiger has a 750′ shaft. The first work to be done by the consoli- ed interests will be intensive surface prospecting and geologic investigation. The new life put into these long dormant properties may result in discovery ore.

LLOW TIGER MINING CO. **NEVADA**

Reorganized as Yellow Tiger Consolidated Mining Co., which see.

PROPERTY MAP OF ROCHESTER, NEVADA.

Inc. 1913 in Nevada. **Cap.,** $1,250,000; $1 par; 1,164,492 issued. Sto listed on San Francisco Exchange and Boston Curb. Transfer office: Re Nevada.

Dividends, first paid December 20, 1916, amounting to 5c per share; of 2½c. on September 30, 1918; 3d of 2½c. on April 20, 1919.

Annual report to June 1, 1918, shows: current assets, $49,272; liabilit $24,188; total earnings, $235,910; operating profit, $48,373.

Property: 7 claims, about 130 acres, in the Rochester mining distr said to show ore in silicified schist netted with quartz stringers. It is essenti highly altered sericitized rhyolite, varying from a soft and friable talcos schistose product to an extremely tough silicified variety. Cerargyrite is valuable constituent of the ore. Sulphides are not common. Ratio of gold silver is about 1 to 300. Quartz veinlets are some times high in gold.

Development: by 400′ shaft and 5 tunnels, longest over 1,400′. Thr ore-zones have been opened, and a fourth is indicated. A total of 2,659′ work was done during the fiscal year ending June, 1919, at an average cos **$31 per foot.**

Equipment: is complete including 125-ton mill, with rolls, tube-mill agitation in cyanide, counter-current decantation, Oliver filters and Merrill

tion system. Mill feed is about $9 per ton. Plant is of excellent design cost $85,000. Recovery is 95%. Treatment costs $1.56 per ton, and all es at property, $5 per ton. Power obtained from Nevada Valleys Power at $8 per h. p. a month.

Production: mill treated 32,605 tons in 1916-17, making an extraction 88%, and in 1917-18, 31,390 tons, with an extraction of 88.5%. Output scal year ending June 1, 1918, was 250,378 oz. silver and 357 oz. gold at a cost of $5.003 per ton, compared with 339,062 oz. silver and 617 oz. gold osts of $5.42 for previous year. Total production to January 1, 1919, was $1,000,000. Reported producing 100 tons daily during 1919, to September, a water shortage forced closing down the mill and curtailing operations.

KARD EXTENSION MINES CO. **NEVADA**

ROCHESTER MINES CO. NEV

Fully described in Vol. XIII. Merged into the Rochester Nevada Mines Co., which see.

ROCHESTER NEVADA SILVER MINES CO. NEV

Offices: Reno and Rochester, Nev.

Officers: O. W. Jones, pres.; F. M. Manson, v. p.; Wm. Adams, with J. W. Snyder, J. W. Davey, E. M. Lyon and R. W. Street, direct Nenzel, sec.-treas.; C. D. Kaeding, cons. engr-mgr.; C. A. Bennett, A. Carpenter, cons. metallurgist. Management of the new company is in an executive committee composed of F. M. Manson, J. W. Davey, Clemmons.

Inc. 1919, in Nevada. Was planned as a consolidation of the Crown Point Mining, Rochester Mines, Rochester Combined Mines, Elda Fina Mines, and Rochester Merger Mines company, which are scribed in Vol. XIII.

This plan was modified ... 1920, owing to the unwillingness procrastination ... and Rochester Combined shar...

these companies were excluded from the merger. This necessitated a ge in capitalization.

The three companies received 3,750,000 shares in exchange for their stock, in ollowing ratio; Rochester Mines, 1,750,000; Elda Fina, and Merger, 1,000,000 s each. This consolidation settled serious litigation over apex rights, the important suit being that of the Rochester Elda Fina vs. the Rochester s for $1,056,000. The scheme of consolidation dealt directly with individual holders, all of whom had the privilege of exchanging their shares for in the new company. This exchange privilege was accepted by 65% of rs of Rochester Mines; 90% of Combined; 80% of Elda Fina, and 60% enzel Crown Point. The Rochester Mines has paid $90,000 in dividends, ast one in October, 1918.

Property: 41 claims in the Rochester district, Pershing county. Geol- in the Combined property—a fault-contact between rhyolite and rhyo- iff; in the Elda Fina—a contact deposit between rhyolite and felsite; in the er—quartz veins in rhyolite, carrying oxide and sulphide ore; in the Roches- lines—replacement veins along fissures and shear-zones in sheeted rhyolite; n the Nenzel Crown Point—ore occurs as a contact deposit and in fissures rsing rhyolite and felsite formation.

Development: the total amount of workings and surface exploration is nsive. In the Combined, tunnels have opened ore to a depth of 400′ but ves are said to be small; in the Elda Fina, by shaft, also by drifts; in the er, by two tunnels—the Friedman of the Rochester Mines and the Pitt— cut several veins; in the Rochester Mines, mostly by tunnels, total work- covering several miles and reserves said to be good for several years at nills: a shaft and drift-tunnels opened well-defined veins, reserves being ated in 1916 as $4,000,000. About 1,000′ of new work done monthly in the ger and Mines properties.

Equipment: all of the mines have hoists, compressors, and other ma- ry for underground operations, including an electric locomotive in the tunnel. The Rochester Mines has a 180-ton cyanide mill in regular ation, extracting silver and gold worth over $60,000 a month. Rochester s ore is carried to the mill by a 12,000′ aerial tram. Electric power is able for all operations in the district, which is connected with the main line e Southern Pacific by a narrow-gauge railway.

Production: no figures available for this group, three of which have uced ore, principally the Rochester Mines, which, during the year ended 30, 1918, yielded $606.541 from 63.541 tons of ore. The operating profit his period was $133.777, and costs $7.44 per ton. This mine has produced $3,000,000 since 1913.

Consolidation of this group is the best thing that could have been done, ng litigation, centralizing management, operations and treatment of ore, and company should eventually enter the list of dividend-payers. By 1920 a t should show what has been done and future possibilities.

HESTER OCTOPUS MINES CO. **NEVADA**

Address: Lovelocks, Nev.

Office: Sam O'Connell, pres.-mgr.; W. E. Wright, v. p.-supt., R. J. Pier- sec.-treas.

Inc. 1916 in Nevada. Cap., $1,000,000; $1 par.

Property: 65 acres at Lower Rochester, Pershing county, ¼ mile from a ad, developed by tunnels. Ore is reported to assay 20 to 25 oz. silver and $5 gold per ton. Reported making regular shipments in 1919.

HESTER RAVEN MINES CO. **NEVADA**

Probably idle. Address: Lower Rochester, Humboldt county, Nev.

Officers: J. J. Morely, pres.; Frank L. Reber, v. p.; T. J. D. Galter, reas. and res. agt., with E. S. Howard, Frank Towelly and C. F. Hardley, ors.

Olympic gold mill.

velopment: by 200' crosscut tunnel. Plan 500' tunnel and shaft.
st the tunnel was in 100' in a limestone-rhyolite contact.

LEAD MINES CO. **NEVADA**

e changed May, 1919, to Simon Silver-Lead Mines Co., which see.

LEAD & SILVER MINES EXTENSION CO. **NEVADA**

ers: W. J. Douglass, pres.; T. J. Flynn, v. p.; W. O. Dougherty,
Carthy, Louis Cirac, directors. Ray French, sec.-treas.

erty: 5½ claims, 110 acres, adjoining the Simon mine on the east.

Treasury stock offered by Smith & Aman of San Francisco. at 15c. M 1919.

SIMON MINA MINING CO. NEVA

Office: 318 State Bank Bldg., Tonopah, Nev.

Officers: J. K. Turner, pres.; C. A. Calhoun, v. p.; L. L. Dellinger, m Branch H. Smith, sec.-treas., with R. E. Smith, directors.

Inc. May 14, 1919, in Nevada. **Cap.,** $150,000; 10c par: 950,000 shar outstanding. Stock sold at 15c., May, 1919.

Property: 5 claims covering 3,000' along a limestone rhyolite conta 1½ miles S. of the Simon mine.

Development: by 280' shaft, at bottom of which $12 silver-lead ore w encountered in an 80' crosscut.

Equipment: gasoline hoist and buildings.

Examined by F. M. Maloney, formerly of Cerro de Pasco. A prospect.

SIMON SILVER BELL MINING CO. NEVAD

Address: Mina and Tonapah, Nev.

Officers: P. A. Simon, pres.; W. J. Douglass, v. p.; C. C. Boak, se treas., with J. F. Wall and A. H. Elftman, directors.

Inc. May, 1919, in Nevada. **Cap.,** $150,000; 10c par; 800,000 outstan

Property: Bell group, 7 claims, about 80 acres, side lining the S on the south.

Development work started in 1919.

SIMON SILVER LEAD EAST EXT. MINES CO. NEVAD

Address: 221 Odd Fellows Bldg., Reno, Nev. **Operating office:** Mi Nevada.

Officers: C. B. Burkham, pres.; J. M. Andrews, v. p.; Geo. S. Gr sec.-treas., with Ernest Rackliff, directors.

Inc. April, 1919, in Nevada. **Cap.,** $250,000; increased later to $375,0 25c. par; 96,000 shares outstanding. Company reports $4,000 in treasury, Octo 1919. Transfer office: Reno, Nev.

Property: adjoins the Simon property on the east and south. D veloped by 2 shafts, 35' and 65' deep, and equipped with gasoline hoist.

SIMON SILVER LEAD EXTENSION M. CO. NEVAD

Address: Chris. McCarthy, mgr., Mina, Nev. **Office:** Tonopah, N Wood Elkus, supt.

Inc. April 21, 1919, in Nev. **Cap.,** $150,000; 10c par. T. J. Flynn, C McCarthy, and A. C. Kearns, incorporators.

Property: the Extension group in Simon district. Work said to d close ore at places along trend of vein.

SIMON SILVER LEAD MINES CO. NEVAD

Office: Mina, Nev.

Officers: P. A. Simon, pres., W. B. Zachau, sec. Burch Hershey White, cons. engrs.

Inc. November, 1919. **Cap.,** $1,500,000; par $1; 1,100,000 issued.

Property: 9 claims in Simon (officially known as Bell) district, Mine county, Nev., 22 miles east of Mina. Originally discovered 50 years ago, intermittently worked until real development began in 1919. Examined in by Walter Harvey Weed.

Geology: claims cover a limestone-porphyry contact with irregular trusions of older andesite and granite. Ore is found in veins which cros rocks, but in part follow fault contacts. The orebody is a replacement d mainly in limestone, and in part in porphyry; it runs E.-W. and dips 6 Two shoots of sulphide ore occur, separated by mineralized porphyry. Va fade in footwall limestone, but show high-grade ore against limestone fo Shipping ore carrying 15-30% lead, 12-32 oz. silver per ton, and 8% zinc, o for a width of 8' or so, in main orebody, and also beyond a cross fault in discovered orebody 300' or more to the east of the shaft; yet the value of mine rests upon the 400,000 tons of partly developed milling ore, which aver e per ton, 6.4% lead and 7.18% zinc. It is estimated this d at a net profit of $6.20 per ton.

Development: main working shaft is 430′ deep, being vertical for 230′, n inclined to follow footwall to 6th level. The South orebody is crosscut to hanging wall on each level, and the North orebody is crosscut and proven n the 4th (or 280′) level downward.

Surface cuts and pits show pay ore at numerous places along outcrop of ı, for total distance of 2,100′, of which only 400′ is explored underground. It is considered possible that the mine will develop into one of the largest er-lead properties of this country, big enough to warrant a large concen- ion plant and its own smelter.

ION TRIANGLE MINING CO. **NEVADA**

Address: Mina, Nev. and Tonopah, Nev.

Officers: E. S. Mulford, pres.; Geo. F. Thompson, v. p.; C. C. Boak, sec., ı A. H. Elftman, J. W. Dunphy, E. S. Chafey and W. J. Douglass, directors.

Inc. May, 1919. **Cap.,** $150,000; shaers 10c par.

Property: 4 claims in the Simon district, adjoining the Cons. West Ex- ion and said to be on the Simon contact.

TONOPAH DISTRICT, NYE COUNTY.

TER ALL MINES CO. **NEVADA**

Address: Tonopah, Nev.

Officers: Hugh H. Brown, pres.; Herman Zadig, v. p.; M. E. Albert, treas., with J. H. Evans and E. A. Keenan, directors.

Inc. March 27, 1917, in Nevada. **Cap.,** $1,000,000; shares $1 par; 700,000 es issued; assessable. Annual meeting, April 3rd.

Reported at the time of organization to have taken over part of the holdings he Umatilla Tonopah Mng. Co. and the Montana Tonopah M. Co. in Tonopah ing district.

CKEYE BELMONT MINES CO. Letter of Co. unclaimed **NEVADA**

Office: 1055 Spitzer Bldg., Toledo, Ohio, and Tonopah, Nev.

Officers: A. B. Tillinghast, pres.; W. B. Kober, v. p.; W. B. Voorhees, : also directors. E. F. Rowley, treas, at last accounts.

Inc. 1908, in Nevada. **Cap.,** $2,000,000; $1 par; outstanding 700,000 es. Annual meeting, first Thursday in Jan. Private corporation. Stock un- d. Is a holding company, operating property formerly owned by Belmont Ex- ion Mng. Co., now defunct, and holding interests in the Buckeye Eagle and keye Tonopah companies. Reported in Oct., 1915, to have taken an option ı a drift gravel property in Plumas county, Cal.

Property: 15 claims, 13 patented, 300 acres, at Tonopah, adjoining the opah Belmont on a portion of the east end line.

Ore: quartz with silver sulphides and gold occurring in fissures in hyte. Veins strike E. W. and dip 30°.

Development: 3 shafts, 125′, 900′, and 1,234′ deep, with 5,000′ workings.

Equipment: includes 2 electric hoists, of 52-h. p. and 120-h. p., one 40-h. asoline hoist and two 8-drill air compressors.

Property practically idle during the war, but plans for 1919-20 include deep- g shaft and development on the 900′ and 1,200′ levels. There are two large of low-grade ore with several rich stringers. No production to date.

CKEYE EAGLE MINING CO. **NEVADA**

Tonopah, Nev. Control held by Buckeye-Belmont Mines Co. Same officers directorate as that company.

CKEYE TONOPAH MINING CO. **NEVADA**

Tonopah, Nev. Control held by Buckeye-Belmont Mines Co.; same officers directorate as that company.

LIFORNIA & TONOPAH MINING CO. **NEVADA**

Reorganized as New California & Tonopah Mining Co., which see.

H BOY CONSOLIDATED MINING CO. **NEVADA**

Address: Tonopah, Nev.

Officers: J. H. Goldman, pres.; G. B. Thatcher, v. p.; E H. Mead, sec.- , with E. M. Hall, directors. F. H. Norcross, res. agent.

Inc. March 21, 1914, in Nevada. **Cap.,** $2,000,000; $1 par; all outstand-

ing; assessable; assessment No. 12, of 1c per share, levied August 1. Listed on San Francisco Exchange. Annual meeting, November 21.

Company is a reorganization of the Tonopah Cash Boy Cons. Mng. Co. which suspended operations in 1914 with debts of $3,476, and 76,870 shares in the treasury.

Financial statement of Cash Boy for period March 20, 1916, to March 1, 1918, showed: receipts, $134,162, which includes: assessments, 6, 7, 8, 9, 10, netting $99,878; ore shipments, $23,488; royalties, $925. Cash on hand, $8,340. Expenditures for same period were $125,822.

Property: several fractions, patented, 30 acres, at Tonopah, Nye county, adjoins the Tonopah Merger on the W., Tonopah Victor on the S., and Tonopah Extension on the N. Ore: gold-silver occurs in veins in rhyolite.

Development: by 1,646' vertical shaft, with most of the recent work on the 1,527' level, where crosscutting and drifts to the S. disclosed 4 distinct veins carrying ore of commercial grade reported to show higher value with depth. A total of 1,976' of underground work was done from March to November, 1918. Crosscutting is being done to the N. on the bottom level to cut the downward extension of the veins exposed on the 1,527' level.

In 1920, there were 5 faces in ore on the 1,537' and 1,646' levels. The 1,537' level showed 30 to 36" of $68 to $89 ore, and the 1,646' had 1½' of $33 ore.

Equipment: includes 75-h. p. electric hoist and 3-drill air-compressor.

Production: in 1915, 150 tons, assaying $15 per ton; from March, 1918, to November, 1918, 1,740 dry tons were shipped having a net assay value of $13.41 per ton. Shipping 150 tons weekly in 1920.

Property is a promising prospect.

GREAT WESTERN CONSOLIDATED MINING CO. NEVADA

In 1915, control of this company was acquired by the Greenwater Copper Mines & Smelter Co., which see.

Address: Emery W. Elliott, 542 Mills Bldg., San Francisco, Calif. John McGee, supt., Box X, Tonopah, Nev.

Annual statement to December 31, 1919, shows: cash on hand, January 1, 1919, $2,537; received from assessment, $20,399; expenditures $21,564; cash on hand, December 31, $1,372. Assessment No. 10 levied September, 1918, delinquent, February, 1919. No. 11 was payable in September. Listed on San Francisco Exchange.

Property: 11 unpatented claims, about 300 acres, at Tonopah, Nye county.

Development: by 2-compartment shaft, 1,150' deep, which enters one of the ore-bearing formations at about 1,000'. Considerable exploration work was done on the 860' level, but it is said to have been all in cap rock and commercial ore was not found. Water hindered exploration during the early part of 1917. Management intends to explore the ground thoroughly by crosscuts and drifts. In June, 1918, work was resumed on the 1,100' level and a 12' vein intersected about 130' north of the shaft. All further work on the veins was suspended in October owing to the necessity of enlarging the shaft. A new 4-compartment shaft was sunk and is reported down 600' in August, 1919.

GREENWATER COPPER MINING & SMELTER CO. NEVADA

Address: Lloyd E. Marsden, sec.-treas., Room 515-E, 30 Church St., New York.

Officers: Chas. R. Miller, pres.; M. R. Ward, v. p.; preceding, Max E. Bernheimer, Chas. Gold, W. G. Denham, Clyde Milne, Oscar A. Dreyfus, F. I. Mallory, B. H. Campbell and W. H. Drayton, 3rd, directors, at last accounts.

Inc. Dec. 12, 1906, in Delaware. **Cap.,** $25,000,000; shares $5 par. Was a securities holding company only, and owned stock in a number of Greenwater promotions, all dead, described Vol. VIII, Copper Handbook. Company, December 31, 1910, had $144,727 invested in choice bonds, after losing about $170,000 through the failure of Chas. Minzesheimer & Co., New York brokers, who failed October 15, 1910.

Reorganized October, 1914, and capitalization reduced to $500,000;

par; 3,000,000 issued. Stock listed on the N. Y. Curb. Annual report ember 31, 1916, showed cash assets of $52,630, less expenses and loss on 50, leaving $47,670 net. Corporation Trust Co., Jersey City, N. J., transfer its. Annual meeting, second Friday in February.

Property: in August, 1911, company took over the O. K. and Supply ips, gold mines at Dale, Calif. Considerable work was done on the Supply t. In 1915 a crosscut on the 700′ level cut the Armenian and Jeane veins, ying practically no metal. Two winzes were sunk and drifts extended on 800-1,100′ levels of the Supply vein with negative results. The value de- sed with depth, and on the 1,200′ level no pay-ore was found. All develop- t and prospect work gave unsatisfactory results and the property was aban- d in October, 1915.

In November, 1915, the company acquired stock control of the Tonopah anza Mining Co. and the Great Western Cons. Mining Co., at Tonopah, Nev. The cost of shares and assessments in first-named company to end of 1916 $31,867, and of latter company $14,910. For the Ruby claims, 125,000 sury shares at par, 10c. each, was paid.

Company now hopes to recoup losses sustained in Californian operations. lings described under their respective titles.

'SY QUEEN MINING CO. **NEVADA**

Offices: 265 Russ Bldg., San Francisco, Calif., and Tonopah, Nev.

Officers: C. F. Wittenberg, pres.; F. A. Burnham, treas.

Inc. in Nevada. **Cap.,** 1,250,000. Four assessments have been called. d on San Francisco Exchange.

Property: 53 acres in Tonopah mining district, Nye county, said to show r ore. Vein is from 1 to 5′ wide. Formation is rhyolite, quartz and trachyte.

Development: by 1,370′ shaft. On the 1,350′ level a crosscut was run . for several hundred feet. At 247′ from the shaft a 4′ vein was cut with from 8″ to 18″ in width, and a winze was being sunk on this vein at last nts.

.IFAX TONOPAH MINING CO. **NEVADA**

Offices: 1008 Kearns Bldg., Salt Lake City, and Tonopah, Nev.

Officers: F. M. Smith, pres.; Thos. Kearns, v. p.; F. J. Westcott, sec.; . Zabriskie, treas.; preceding, directors. B. F. Edwards, gen. mgr., Syndi- Bldg., Oakland, Cal. J. W. Sherwin, supt.

Inc. Sept. 27, 1902, in Utah. **Cap.,** $2,000,000; outstanding, $1,895,000; s $1 par. Stock transferred at company's office. Registrar & Transfer Co., assau St., New York, registrar. Annual meeting, second Tuesday in Oc- . Listed on New York Curb and San Francisco Exchange.

Property: 4 patented claims, 81 acres, adjoining the central portion of elmont property on the east. Company also operates property of the ll Extension Co. of Tonopah.

Ore: gold-silver, occurring in trachyte. For geology of Tonopah dis- see U. S. G. S. Prof. Paper, 42, or Jim Butler company herein.

Development: by vertical shaft, 1,734′ deep, with the deeper levels at 1,200′, 1,400′ and 1,700′. The 1,000′ crosscut picked up the easterly exten- of the Belmont vein and ore shipments were made. After considerable the vein was lost through faulting. Owing to an excessive flow of water was stopped until July, 1919, when the water was reported under control ork to be resumed.

The West End Consolidated Co. is reported to be in charge of develop- work, taking treasury stock in payment.

BUTLER TONOPAH MINING CO. **NEVADA**

Office: 500 Bullitt Bldg., Philadelphia, Pa. Mine office: Tonopah, Nev.

Officers: Clyde A. Heller, pres.; Wm. M. Potts, v. p.; S. Deas Sinkler, p.; J. K. Kitto, sec.-treas.; R. G. Wilson, asst. sec.-treas.; C. B. Taylor, aniel.

Directors: Clyde A. Heller, Wm. M. Potts, R. G. Park, H. C. Brougher, Taylor, S. D. Sinkler, T. W. Synnott, M. B. Cutter and J. C. Fraley, Fred'k aw, gen. supt.; L. R. Robins, mng. engr.; Clyde Jackson, supt.

Inc. Nov. 13, 1903, in Delaware. **Cap.**, $2,000,000; shares $1 par; all is- 1; 281,979 in hands of Trustee for company. Traded in on New York and ton Curb. Listed on San Francisco Exchange. Transfer agent: company's e; registrar: Fourth National Bank, Philadelphia. Annual meeting, second lnesday in January.

Dividends: initial of 10% was paid August 2, 1915. Total distributions ugust 1, 1918 were $1,151,074.

Treasurer's statement for 15 months ended December 31, 1918, shows: re- ts, $670,289, including $613,956 from ore shipments; disbursements for opera- s, $306,406; for Belmont Wagner Mng. Co., $235,853; for Belmont Shawmut g. Co., $107,435; dividends, $292,063; taxes, $42,937; cash on hand, $69,074; rty bonds, $102,500. Total net operating profit for the same period was ,053, as compared with $483,675 in 1917.

Property: 16 patented, 2 unpatented claims, 241 acres, at Tonopah, Nev.; the Ophir King group, 91 acres; also owns a one-quarter interest in an option he Eagle Shawmut mine, California, and Belmont Wagner property, both by the Tonopah Belmont Dev. Co. and separately described. The Jim er has $403,915 invested in these holdings.

Geology: of Tonopah is complex; a series of volcanic rocks, partly lava s, partly intrusive sheets and masses of quickly varying thickness overlie another irregularly. The productive veins are in the Mizpah "trachyte," laid by the Midway andesite and intruded by the West End rhyolite. The s are cut through by the Midway andesite and do not commonly outcrop, terminate against the Midway andesite at depths up to 1,200'. They are re veins which for some distance lie on or in planes of contact between tive rocks. Values are in gold and silver. See U. S. G. S. Prof. Paper, 42. The company holdings are identical in character to those of its neighbors, Tonopah Mining and Belmont companies.

Development: is through the Desert Queen and Wandering Boy shafts. elopment for fiscal year 1917 was 5,012', costing $8.59 per foot, and for 15 ths ending December 31, 1918, amounted to 4,649', costing $10.43 per foot. elopment work having failed to expose new orebodies of commercial value, her work on the 865' level of the Wandering Boy was planned for 1919.

Ore reserves: Sept. 30, 1917, consisted of 18,320 tons positive ore, 5,000 possible ore, a total of 23,320 tons, compared with 19,158 tons in preceding , practically all of which has been taken out. Geological development in ous parts of the mine are not encouraging, but results late in 1919 were rted as satisfactory.

Recent production and costs per ton:

	Ore, Tons	Value per Ton	(A)	Mng. Dev.	Trans.	Trmt. Chge.	Gen. Exp.	Total Oper.	Oper. Profits
....	27,688	$26.15	$2.14	$8.21	$0.53	$3.98	$0.89	$13.61	$10.40
....	40,297	26.12	1.79	5.17	0.71	5.33	0.73	11.94	12.39

....	48,533	19.25	1.74	4.29	1.08	5.02	0.28	10.40	7.11
....	34,722	21.45	2.14	5.36	1.07	5.58	0.32	12.18	7.13

(A) Deductions by ore purchasers.

n the 7½ months ending July 15, 1919, the profit from 4,226 tons was $20,568. is treated at the Tonopah Belmont mill.

The apex suit of the Jim Butler against the West End Co. for trespass and extracted was decided July, 1916, in favor of the West End Co. by the Supreme Court, and the judgment confirmed June, 1918, by the U. S. me Court. Pending the suit the West End continued to mine ore, but the ne was impounded, the total amount being $373,614, from 62,758 dry tons

The Jim Butler has been fairly profitable, but is now a mine of diminishing

Deductions include dividends and administration, taxes, etc. (a) Defiicit.

The net income for the first quarter of 1919 was $150,524, and available resources on March 31 totaled $557,140. The second quarter's net was 425, and available resources $501,646. For the September quarter the net ne was $139,403. Cash assets were $301,466. The last quarter gave $28,793 and cash assets were reduced to $293,402.

Dividends: 20c. in 1906; 20c in 1907; none in 1908-09; 15c. in 1910; 90c. 11; $1 in 1912; $1.10 in 1913; $1.10 in 1914; 50c in 1915; 50c in 1916; 50c 17; 22½c in 1918; and 30c in 1919 to Dec. 31, making a total of 40 distribu-, equal to $10,178,063.

Property: 11 claims, 161 acres, adjoining the Montana Tonopah and pah Mining properties on the east, at Tonopah; and control of the sub-ries mentioned. In October, 1919, 360 acres of land, said to contain coal, and ations of oil, near the Walker river, was purchased. To prospect for oil, evada Coal & Oil Co. was organized. The Bell copper mine in the Simon ct was reported acquired in August.

Geology: the Tonopah district is made up of a thick series of rhyolitic ndesitic rocks, which is faulted in a very intricate manner, together with the panying veins. The deposits are quartz veins, in part filled and in part cement, intersecting the earlier andesite and to some extent entering into nderlying rhyolite. Principal ore minerals are argentite and polybasite, with amounts of pyrite, chalcopyrite, galena, zinc blende and gold. Veins vary dth from 3' to 25'. The principal producer of the Tonopah Belmont has the Belmont vein, cut off near 1,500' depth by the Mizpah fault; the veins producing are not as productive as they were.

Development: by 3-compartment vertical shafts, 1,127' and 1,718' deep. ions during the years 1918, 1917-'18, and 1916-'17 were 9,263'; 14,437', and ', respectively. Total workings are about 40 miles. Results during 1918 fair, some small new veins being opened; in 1917-'18 reserves were not

increased, and in 1916-'17 work was satisfactory. A comparison of reser shows the following:

Year	Tons	Year	To
1915-'16.....	142,164	1917-'18.....	75
1916-'17.....	98,694	1918.....	82

Early in 1919, development of the South vein was under way at the 6 level, where a good shoot of ore was opened and in May the downward exte sion of this vein had been cut at a depth of 1,166'. Some time previous it w found at 800 and 900'. An electric locomotive is used on the 1,000' level, grea facilitating moving ore and waste.

Equipment: includes a 60-stamp cyanide mill, which started operatio in July, 1912. For a detailed description of this plant see Trans. A. I. M. August, 1915. To treat custom ore, this plant was enlarged in November, 19 The plant at Millers was closed during 1918, but reopened 1920.

Production:

	Tons Milled	Value p. ton	Oper. Costs Mine	Mill	Extr. %	Profit p. ton	Production—O Gold	Silve
1918.....	87,089	$16.40	$4.56	$2.95	92.13	$7.82	10,974	1,076
1917-'18.	130,991	16.57	4.44	3.21	94.13	8.10	19,953	1,946
1917.....	144,762	17.54	4.65	2.76	93.35	8.64	27,831	2,629
1916.....	165,157	13.88	3.92	2.68	92.97	6.59	31,112	2,968
1915.....	181,424	16.74	4.02	2.56	92.99	...	40,591	3,714
1914.....	172,398	21.08	4.35	3.05	94.45	8.83	44,465	4,251
1913.....	60,359	24.21	4.35	3.66	94.43	12.42	38,371	3,826
1912.....	87,349	20.84	4.85	3.36	....	14.31	45,069	4,535

To offset the decreasing production of the original claims at Tonopah, t company has been branching out, acquiring new properties, thus making t company a permanent organization independent of the life of the Tonopah min which is now visible. With silver at $1 per oz., the Belmont can make gr profits. Returns in 1919 were good, that for April being a profit of $44,306 fr 9,315 tons of ore. In July, 7,880 tons gave a profit of $36,554. The miner's str from August to October reduced the 1919 output considerably, but early 1920 the output was increased to 400 tons daily. In February, 1920, profit $9,175.

TONOPAH BONANZA MINING CO. NEVA

Address: 365 Bush St., San Francisco, Calif., and care John Mc Box X, Tonopah, Nev.

Assessment No. 5 of 1c levied May, 1918. Cash on hand, July 30, $3,201.

Control of this property was acquired, 1915, by the Greenwater Copper Mi and Smelter Co., which see.

Property: 15 unpatented claims, 380 acres, at Tonopah, Nev., increa 1916 by acquisition of the Desert King Mining Co.'s property, 40 acres, adjo on the S. E. The claims, which lie in the western section of the district, had compartment shaft, 1,100' deep, when new company took over the property some crosscutting had been done on the 600' level, but no commercial ore veloped.

During 1918 about 600' of crosscutting was done on the 1,637', but no found and all work was suspended in October. Plan repairing shaft and stalling pump, 1919-'20.

Dividends: (calendar year) 15% in 1905; 15% in 1906; 35% in 1917; g in 1917-'18; 9% in 1918-'19, and 25% in 1919, to October 1st, making a of $2,230,600.

Property: 628 acres in the Tonopah mining district, Nye county, Nev., s Tonopah Mining Co. on the W. and West End Cons. Mining Co. on

During the fiscal year 1910-11 the company acquired the properties of the lock Cons. Mining Co., McKane Mining Co. and Pittsburg Tonopah Exning Co. and in June, 1915, properties of the Tonopah Merger Mining d the Tonopah Victor Mining Co.
e Sully claims of 77 acres were bought for $10,000 in 1916.

Geology: ore carries silver and gold in quartz veins in rhyolite, trachyte oleanic breccia. The ore minerals are argentite, stephanite, polybasite, proustite and pyrargyrite. There are 5 main veins, from N. to S., the r, O. K., New Victor, Lower Contact, and Murray, of which the Murray most important, showing a stoping width of 14'. The veins strike N. 45° 70° W., and N. 70° W., with dip 20 to 70°, growing steeper with depth. rebodies occur in shoots ranging in width from 3-60', with a maximum of 600' for any single shoot.

Development: by 2 vertical main working shafts, namely, No. 2, 1,440' nd the Victor, 1,760' deep. Extensions during recent years were 13,967' -'16; 12,017' in 1916-'17; 10,993' in 1917-'18, and 10,322' in 1918-'19. Total

workings amount to 28 miles. During 1918-'19 the Lower Contact vein at 6 yielded a large quantity of fair-grade ore, but the stopes were exhausted.

At No. 2 shaft, the 1,440′ level produced most of the ore. A number good shoots were found, but chances for finding further large ore-bodies a remote. At 1,680′ in the Victor shaft the Merger vein yielded heavily, the M ray on this level, 600′ long, 3 to 30′ wide, of good grade. No definite calculati of reserves is possible. A 4-compartment shaft is being sunk below the 1,7 level, and early in 1920, it was decided to deepen the old McKane shaft to a de corresponding with the 1,540′ level of the Victor shaft. This will improve ve tilation and give access to ground on the west. A new head-frame, hoist, co pressor, skips, ore-bins and pumps were erected at the Victor shaft. Ore extracted by overhead stoping and subsequent waste filling.

Equipment: at the mine includes two 150 horse-power hoists, De duplex and Aldrich quintuplex pumps, 2 compressors of 1,700′ capacity, a tramway from mine to mill. The new hoist at the Victor shaft has a capacity hauling 4 tons at a speed of 1,000′ per min. from a depth of 3,000′. All m chinery is electrically driven. The 50-stamp cyanide mill has a daily capacity 400 tons.

In September, 1917, an auxiliary 500 k.w. power plant was tested. This to generate electricity when the Nevada-California Power Co.'s supply fails

Production (year ending March 31):

	Tons	Value	Extr.	Oper. Cost p. Ton			Metal Sold—O	
Year	Milled	Per Ton	%	Mine	Mill	Total	Silver	Gol
1919.	114,921	$15.449	93.05	$4.80	$3.68	$8.48	1,367,440	13,1
1918.	110,188	12.543	90.51	5.26	3.38	8.64	1,169,671	11,8
1917.	109,402	17.107	....	4.90	3.62	8.82	1,882,402	18,8
1916.	91,981	18.038	92.39	4.61	4.48	9.59	1,106,519	20,5
1915.	71,882	19.966	89.57	5.19	3.75	9.39	1,790,032	17,5

Yields in 1919 were maintained, that for July being 8,660 tons, 102,081 silver, 985 oz. gold, and a profit of $52,280. In February, 1920, profit was $27,4

The Tonopah Extension is in much better physical condition than it was 1917, and should pay regular dividends with silver at over $1 an ounce. Manag ment is capable and careful.

TONOPAH GOLD ZONE MINING CO. NEVAD

Reorganized as Gold Zone Divide Mining Co., of the Divide district, wh see.

TONOPAH MIDWAY MINING CO. NEVAD

Address: Tonopah, Nev.

Officers: H. C. Brougher, pres.-mgr.; R. P. Stenson, v. p.; E. P. Erick son, sec.-treas.; W. Brougher, R. B. Govan, W. J. Douglass, C. C. Boak, dire tors; W. J. Douglass, supt.

Inc. in Arizona; reorganized 1915, in Nevada. **Cap.**, 1,500,000 shar $1 par; assessable; outstanding, 1,132,096. On April 19, 1918, assessment No of 1c per share, was levied. Annual meeting, in February. Listed on San Fra cisco Exchange.

Property: 5 patented claims, 50.58 acres, in Tonopah district, said show silver and gold ore. The quartz vein in trachyte dips 45° and pay occurs in shoots. Five veins have been opened on the 600 and 800′ levels. D ing 1918 work was confined to the 600′ level. The S. crosscut from No. 2 was advanced 700′ and connection made with the Tonopah Mining Co.'s w ings on the Last Chance vein. This vein on the Midway is said to be 6-15′ in width and in places runs as high as $384 per ton.

In 1919, work is being done on the 800′ and additional compressors instal to continue work on the 1,200′ level, where a 20′ vein expected to be the d ward extension of the Brougher or Last Chance vein is to be developed.

Threatened litigation with the Tonopah M. Co. over the Last Chance has been amicably settled, the Midway receiving $34,527 in cash and a ver side-line [illegible] which will obviate future apex claims. Shipments are to We[illegible]

Development: by 2 shafts, 1,400′ and 835′ deep.
Operating expenses for year ending December 31, 1918, were $41,571 and re- s totaled $66,880, including ore sales, $17,456; assessments, $14,772.

1918, 20c.; in 1919, 10c. The total is **$1,251,940.**

operty: 10 patented and 7 unpatented claims, 84 acres, in the Tono-
strict. (In the suit of the Jim Butler v. West End, concerning apex
the West End-McNamara vein, instituted in 1914, the West End was

given a final favorable verdict in June, 1918.) Other holdings include 2,2 acres at Searles lake, California, leased from the U. S. Government. This being developed for potash, and $74,592 was spent to the end of 1918. In Ho duras, Central America, a promising gold-silver mine is under exploitation, which, so far, $33,953 has been spent.

Development: by 3 shafts, deepest 1,212', with 13 miles of working In 1917, extension amounted to 7,625', also sinking the Ohio shaft to 1,212'. new vein was found on the Ohio 500' level. Of the lateral work on this vein 1,225'—1,010' was in pay ore, the remainder in second-class ore. From April December it yielded 11,837 tons valued at $250,000. Reserves were 10,333 to of positive ore, valued at $206,660: 35,905 tons of probable ore, worth $1,015,0 and 61,111 tons of possible ore. The new vein is in trachyte. During 1918 sults in the Ohio were good, reserves increasing to 82,000 tons worth $2,000,0 The West End section can be counted on to yield profitably for some time.

Equipment: includes hoists, buildings, compressors, etc., and a stamp mill and cyanide plant. The daily capacity of the mill was originally 100 to but has been increased to 225 tons. Total cost of plant is more than $170,0 About 1,400 tons a month are treated from other mines.

Production:

Year	Ore Treated	Extraction %	Gross Value	Silver oz.	Gold oz.	Co per T
1918.....	50,195	91.97	$990,185	826,577	8,676	$1
1917*.....	45,910	92.69	721,937	677,117	7,161	1
1916.....	61,535	91.22	1,319,651	1,351,658	14,752	
1915.....	56,976	90.92	958,657	1,210,038	13,219	

* From 1917 on, these figures refer to company ore only.

Recent shipments have been over 100,000 oz. of silver-gold bullion month

The company's position is greatly improved by late developments and high price of silver.

Under date of January 7th, 1920, Mr. F. M. Smith, president of the W End Consolidated Mining Company, advised the stockholders that the direct decided to allocate the equities now possessed by the company in Tonopah, N California and Honduras, Central America, by organizing a new company to called the West End Mining Company, with an authorized capital of $2,000,0 to take over the silver properties in Nevada. A second company, viz.: the W End Chemical Company, with an authorized capitalization of $3,000,000, will over the Searles Lake properties in California. A third company, the West Opoteca Company, with an authoriaation of $3,000,000, will take the properties in Honduras.

The West End Consolidated Mining Company will be dissolved and 1,7 shares of capital stock of each of the new companies will be distributed t present stockholders.

Mr. Smith states: "The properties at Tonopah continue to be oper with good returns. The recent increase in the price of silver materially ad our ore reserves by making tonnages of ore, heretofore called low-grade, a able for milling at a profit. Recent developments underground continue to pose continuations of ore shoots previously opened up, with good values. T factors, together with the well known condition of the mine, give assuran continued operation of our mill."

The latest shipment of bullion from the West End company's mill at T pah consisted of 24 bars weighing 44,700 oz., and calculated to be worth $6 This shipment is the result of two weeks run in December and reflects the eral good condition of operations at the mill. It is generally believed tha West End mine at Tonopah has ore reserves sufficient to operate the mill fo years and that in addition it has virgin territory yet to be explored.

WEST END EXTENSION MINING CO. NEVA

...operty: is an electrolytic smelter and refinery for gold, silver, plati- ...d copper ores.

...JERSEY ZINC CO. **NEW JERSEY**

...full description in first part of United States section.

...any not only owns the Franklin Furnace, N. J., mines, but has hold- ...ious states and is, therefore, grouped with the Am. Smelting & Re- ... S. Smelting and other large companies with widely scattered holdings.

... NICKEL-COPPER REFINERY **NEW JERSEY**

... of International Nickel Co., 43 Exchange Place, New York. Plant

at Bayonne, N. J., treats nickel-copper matte from Sudbury smelter. A. J. Wa hams, supt. of plant; H. W. Walter, asst. supt.

PERTH AMBOY SMELTER **NEW JERSE**

Owned by American Smelting & Refining Co., which see. Has 600-ton c per-lead smelter, 200-ton lead refinery and a 300-ton electrolytic copper refin at Perth Amboy, employing about 2,000 men.

See A. S. & R. in U. S. section of this book.

RARITAN COPPER WORKS **NEW JERSE**

Owned by International Smelting & Refining Co. (q. v.), at Perth Amb N. J. A. C. Clark, supt.

THOMAS IRON CO. **NEW JERS**

Office: Hokendauqua, Pa. **Mine office:** Wharton, N. J.

Officers: W. A. Rarrows, Jr., pres.-mgr.; Fred R. Drake, v. p.; with Samuel Krause, Edwin Thomas, Andrew D. Chidsey, J. Mark Mauser, Thos Ritter, directors. Oliver T. Case, sec.-treas.; L. H. Stone, supt.

Inc. April 4, 1854, in Pennsylvania. **Cap.,** $2,500,000; $50 par. Auth ized bond issue, $1,000,000; $639,500 issued. Dividends total $150,000. St transferred at company office.

Property: Richard iron mine at Wharton, Morris county. Ore mag tite (Fe_3O_4) occurs in lenses in gneiss, and averages 58% iron. The mine worked by back stoping and shrinkage methods.

Development: by vertical shaft to depth of 1,400', with 10,000' of w ings.

Equipment: includes 200-h. p. electric double drum hoist, two el compressors of 800 and 2,800 cu. ft. capacity and 1,000-ton magnetic conc. m

Reserves: estimated by management to consist of 800,000 tons of blocked out with total reserves amounting to 2,000,000 tons.

Production: to 1918, 3,000,000 tons. Mine was not operated in 1 In June, 1919, company reports sinking a new electrically equipped shaft.

Company operates five blast furnaces at Alburtes, Helertown and He dauqua, Pa., producing 1,249,423 tons pig iron in 1918.

UNITED STATES METALS REFINING CO. **NEW JER**

Subsidiary of the American Metal Co., which see, under United States.

NEW MEXICO

According to the U. S. Geological Survey the output of the mines of Mexico for 11 months of 1919, with December estimated, amounted to $5 in gold, 709,000 ounces of silver, 2,800,000 pounds of lead, 52,200,000 pou copper, and 8,000,000 pounds of zinc, as compared with $682,791 in gold, 7 ounces of silver, 8,398,239 pounds of lead, 98,264,563 pounds of copper 24,050,324 pounds of zinc in 1918. These preliminary figures show decrea $115,000 in gold, 73,000 ounces of silver, 5,600,000 pounds of lead, 46,0 pounds of copper, and 16,000,000 pounds of zinc.

Mills of the Mogollon district, Socorro county, produced $129,000 in gol 310,000 ounces of silver as compared with $119,710 in gold and 302,902 oun silver in 1918. The Mogollon Mines Co.'s mill was operated steadily, Socorro Mining & Milling Co.'s mill was closed April 1, and operations we resumed. The shipments of gold-bearing siliceous copper ores from Lord increased heavily, but there was a decrease in the shipments of gold-bearing copper ores from Orogrande. Very little gold or silver ore was shipped Pinos Altos. The Whiteoaks district continued to produce gold from a mating mills.

The output of copper in 1919 was only a little more than half that in In 1919 the Chino Copper Co.'s output was 43,992,000 pounds, as compare 79,340,372 pounds in 1918. The Burro Mountain Branch of the Phelps Co., which in 1918 produced 53,146 tons of concentrate averaging 14.9 pe copper, was even more seriously affected by the drop in the price of copp suspended milling operations early in the year. The copper-matting San Pedro was dismantled. The 85 Mining Co., at Lordsburg, made a l

ıse in shipments in 1919, but shipped crude ore entirely as compared with centrates and crude ore in 1918. The copper ore shipments from Orogrande reased heavily.

The mining companies of this state are arranged alphabetically.

MIRAL GOLD AND COPPER MINING CO. **NEW MEXICO**

Idle. **Office:** Tusas, Rio Arriba county, N. M. G. F. Hall, mgr.

Inc. 1900, in New Mexico. **Cap.,** $500,000; shares $1 par.

Property: 8 claims, 160 acres, in the Bromide district, shows 3 fissure ıs carrying silver, copper and gold ores, opened by 3 shafts, deepest 150'. :tive owing to lack of funds.

HAMBRA MINING CO. **NEW MEXICO**

Defunct. Silver City, New Mexico.

ERICAN EXPLORATION & MG. CO. MEXICO & NEW MEXICO

Mine offices: Steeple Rock, Grant county, N. M.; Ahumuda Bravos, ıuahua, Mex., and Terrazas, Iturbide, Chihuahua, Mex.

Officers: Henry A. Haile, treas., with Jas. Duckworth, Geo. Empsall, sdale Smith, Arthur Smith, of Springfield, Mass., Jesse W. Morton and ry Hinckley, directors.

Inc. Sept. 28, 1907, in Maine. **Cap.,** $500,000; $1 par; issued 275,748.

Property: 600 acres, 16 claims, in New Mexico, and 12 properties in ico, also 3 mill sites.

Property includes the Burnham mine at Terrazas, the San Ignacio at Ahu- a, in Chihuahua, Mexico, and the Hinckley, at Steeple Rock. The New ican property has tunnels of 100' and 313' and shafts of 100', 100' and 150', 1,223' of workings, carrying mainly silver ore. The property at Ahumuda shafts of 25', 100', 160' and 474', giving ore assaying about 30% lead, 6% and 12 to 20 oz. silver per ton. The property at Terrazas shows contact sits between limestone and porphyry, giving assays of about 3% copper, lead, 8 to 20 oz. silver and $2.50 to $12 gold per ton. Development: by ts of 187' and 200'. Equipment included a 55-h. p. gasoline plant and neces- mine buildings.

ERICAN GOLD, COPPER M. & SM. CO. **NEW MEXICO**

Address: Santa Fe, New Mexico.

This company was forced into a receivership and the properties were pur- rd by George Heineman, of 1524 Poplar St., Kansas City, Mo., at receivers Awaiting final decision of court.

ERICAN SILVER CORPORATION **NEW MEXICO**

Inc. 1920 in West Virginia, to acquire property of Socorro M. & M. Co.

ACONDA SKOOKUM COPPER GROUP **NEW MEXICO**

Mail returned unclaimed from last address: E. H. Rodgers, 310 West Mis- i St., El Paso, Texas. Owned by E. H. Rodgers, L. H. Davis and J. F. ling.

Property: 4 claims, unpatented, located at north end of the San Andreas , Socorro county, 26 miles west of Oscuro, on the E. P. & S. W. R. R. to cover 6,000' of a quartz lode in granite, from 20' to 100' wide, and to disseminated copper sulphide ore, assaying 2½% copper, 1½ oz. silver and $5 gold per ton.

Development: opencuts and pits along the strike of the lode.

[illegible]SON-APACHE COPPER CO. **NEW MEXICO**

Mail returned unclaimed from last address:

[illegible]: Anderson, El Paso, Tex., chief owner. **Mine address:** Hachita, Co., N. M.

[illegible]rs: at last accounts, Hon. Geo. H. Neale, pres.; Harry Duey, v. H. Howe, sec.-treas.; Arthur Houle, cons. engr.

June 1, 1907, in Arizona. **Cap.,** $500,000; shares $5 par. Held [illegible] a $100,000 bond and lease, with $20,000 paid.

[illegible]ty: the Apache mine, 5 claims, 100 acres, 5 miles southeast of [illegible]Mine, opened 1883, was worked continuously until 1907 by leasers, pro- [illegible]ximately $200,000. Property said to show contact deposit 50-150'

wide between quartz-feldspar-hornblende-porphyry and carboniferous limestone, with ore, oxidized to present depth, and running 4 to 30% copper with one ounce silver to each unit of copper. Bornite ore occurs at the bottom of the shaft.

Development: by a 360′ shaft, for a length of 400′ and along the surface for 600′, said to show 200,000 tons of ore, with about 40,000 tons blocked out for stoping.

Shipments of low-grade copper and silver ore with lime gangue made intermittently to the El Paso smelter. Presumably idle.

ANIMAS PEAK GOLD MNG. CO. **NEW MEXICO**

Property: at Hillsboro, Sierra county, N. M., formerly owned by the defunct Hillsboro Cons. Mng. Co. of odious fame. Management planned refinancing company and development in accordance with available funds. Work on 200′ double compartment shaft started March, 1915. On the 200′ level an ore shoot, 3′ wide, was said to average $35 per ton in gold. No recent returns secured.

ATWOOD COPPER CO. **NEW MEXICO**

Name changed to Boston-Emerald Mining Co., which see.

AUSTIN-AMAZON COPPER CO. **NEW MEXICO**

Offices: 116 Texas Bldg., El Paso, Texas; Room 4 Porterfield Bldg., Silver City, N. M. **Mine address:** Tyrone, N. M.

Officers: Chas. E. Davis, Mayor of El Paso, pres.; M. W. Porterfield, v. p.; C. H. Leavell, sec.-treas., with John M. Wiley, managing director, and D. M. Jackson, director. J. H. Shockley, mgr.

Inc. Dec. 1, 1916, in New Mexico. **Cap.,** $1,500,000; $1 par: 1,060,000 outstanding. El Paso Bank & Trust Co., registrar and transfer agents. Annual meeting, second Tuesday in March.

Property: 15 claims, 500 acres, in Burro Mtns., Grant county, 6 miles W. of Tyrone.

Ore: chalcopyrite occurs in contact and quartz veins, running N.E.-S. W. through monzonite (quartz-diorite), and said to average 6% copper. A N.-S. mineralized shear zone, in places 150′ wide, is said to traverse seven claims.

Development: 3,000′ of shafts, drifting, etc. Over 30 shallow openings show ore. Management planned sinking to 700′ level, in 1917-18, but due to war conditions, high costs, etc., the property was closed down January 1, 1918.

Equipment: includes 18-h. p. gasoline hoist and compressor. Shipments to October 1st, 1917, 137 cars of 6.26% copper ore. J. H. Shockley reported that property could be made one of the important copper mines of the West.

AZTEC COPPER CO. **NEW MEXICO**

Office: 707 Colorado Bldg., Washington, D. C. **Mine office:** Organ, Dona Ana Co. N. M.

Officers: Gen. H. H. C. Dunwoody, pres. and mgr.; C. C. Clement, v. p.; B. K. Roberts, sec.-treas., with Col. M. C. Wyeth, C. F. Humphrey and Admiral C. H. Davis, directors.

Inc. in Arizona. **Cap.,** $1,000,000; $1 par; 600,000 shares issued.

Lands: 4 claims, 6 acres, in the Organ Mountain mining district, about 12 miles by good road southeast from Las Cruces. Claims cover the mineralized limestone porphyry contact worked by the Modoc mine. Developments are on the Orejon claim, opened by a 140′ 45° inclined shaft, sunk on a 12 to 18″ vein reported to carry copper, silver, lead and zinc ore, averaging $40 per ton. No recent reports available.

AZURE MINING CO. **NEW MEXICO**

Office: 170 Broadway, New York City. **Mine office:** Tyrone, Grant county, N. M. Louis Kahn, pres.; M. D. Rothschild, sec.-treas. Wm. Roger Wade, supt.

Inc. 1890, in New York. Is operated as a close corporation.

10 claims, 1,800 acres, near the Burro Chief group of the Co. Company sold 73½ acres, 1909, to Mangas Development

Burro Mountain property shows monzonite, quartz

rphyry and granite, with fissure veins in granite and disseminated ore in rphyry, there being 7 orebodies with 2 under development. The Santa Fé in is from 15 to 75′ wide, averaging 40′ and is traceable for 6,000′. This vein developed by a 417′ shaft, having 5 levels with 15,500′ of workings showing m turquoise as well as copper ore. The old turquoise mine has 2 tunnels and ge open-cast workings.

Besides the Santa Fé vein, the property has disseminated ore, one orebody the contact between granite-porphyry and monzonite-porphyry being 152′ ck, developed for 500′ in length and carrying 2½% copper present as dis-ninated particles of chalcocite. Property has been explored by churn drills d diamond drilling.

The mine was at one time the largest turquoise property in the world, sys-natic mining having begun in 1891. Gem production has practically ceased and property is considered valuable for its copper ore alone.

Company also owns the Tres Hermanos zinc mine in the Tres Hermanos trict, 23 miles S. of Deming, Luna county, N. M., said to show oxidized ores rying zinc-lead-silver values.

Ore: occurs as blanket and chamber deposits in limestone, 2-5′ wide, orted to assay from 30-35%zinc, 30-40% lead, and 6-8 oz. silver. Developed several vertical shafts, from 30-100′ deep.

Equipment: includes compressor and 20-h. p. gasoline hoist.

Production: in 1915, mainly from development work, was 720,000 lbs. c, 300,000 lbs. lead and 2,000 oz. silver.

Claims under option to Phelps Dodge Corporation (Burro Mountain anch), and systematic drilling of the property was started in 1917; results re not encouraging at last accounts.

ATTLESHIP MINING & MILLING CO. **NEW MEXICO**

Probably dead. See Vol. XII. Former office: 412 Mack Bldg., Denver, Colo. ne near Lordsburg, Hidalgo county, N. M.

Dr. O. L. Blachly, pres.; O. B. Crum, sec.-treas. Property reported under se to Andrew Bain, of El Paso, in 1915.

BEARUP GROUP **NEW MEXICO**

Owned by D. E. Bearup, Cooney, N. M. Located in Mogollon-Cooney dis-t, Socorro county, N. M.

Claims: 4 on Gold Hill and 9 in western part of district. The Gold ll claims show the Maud S. lode. Vein where opened has width of 2′ to 13′, is said to assay $12 per ton. There is also a narrow high-grade streak.

Development: by tunnels, longest 600′. Total amount underground kings, 1,500′. Small shipments made of ore extracted during development k said to have assayed $98 to $235 per ton and 50 tons shipped to concen-or assayed $21 per ton. There was a small 2-stamp mill and gasoline en-e on the property. No recent returns secured.

BENNETT-STEPHENSON M. & M. CO. **NEW MEXICO**

Officers: O. Jolliffe, pres.; Jas. C. White, v. p.; C. B. Gill, treas.; J. L. Cullough, sec. Annual meeting, April 7th, at Las Cruces. Controls, through ck ownership, the Organ Mountain Mining Co., which see. Fully described, I. X.

Mines under lease until 1921 to Phelps Dodge Corp.

BETHLEHEM COPPER CO. (INC.) **NEW MEXICO**

Mail returned unclaimed from former address: Steins, N. M.

Officers: J. A. Sund, pres.-mgr.; Wm. Charles, v. p.; F. P. Davy, sec.-

Inc. June 1, 1917, in New Mexico. Cap., $1,000,000; $1 par; 527,500 ld.

Property: 12 patented claims, 240 acres, in San Simon mining district, ia county, said to show a contact deposit between diorite and porphyry. ported to be 100′ wide and 3,500′ long. Values of ore given as $2.40 gold, ilver and 1.4% copper per ton. Developed by open cuts.

e a prospect. No recent information obtainable.

BIG THREE MINES NEW MEXICO

Situated 3 miles north of Organ, Dona Ana county, N. M. Owned and operated by Capt. C. B. Gill, Geo. Luchen and Dr. J. H. Johnson.

Property: 7 claims show copper, silver and lead deposits. Working 116' deep, and equipped with 14-h. p. gasoline hoist. No recent information.

BITTER CREEK MINING CO. NEW MEXICO

Address: Taos, New Mexico.

Officers: Fred S. Lewis, pres.; Wm. T. Hinde, v. p.; Condon C. Lowe sec.-treas.-mgr., with Wm. McKean and Alvin Burch, directors. L. O. Haberstich, supt., Red River, N. M.

Inc. July, 1916, in New Mexico. **Cap.,** $1,000,000; 425,070 shares outstanding, March, 1919. U. S. Corporation Co., New York, registrar and transfer agents. C. W. Galvin & Co., 50 Broad St., New York City, selling agents.

Property: 5 claims, 100 acres, known as the Hub mines, at Red River, Taos county, said to show telluride ore in fissure veins in andesite. Values are gold and silver.

Development: by prospect shaft and several shallow tunnels. Plan continuing the Dorothy tunnel. Company purchased an additional claim, 2 acres, in 1918, said to show a 150' body of quartz and quartz-porphyry ore, assaying from $1-$7 in gold, to be developed by crosscut tunnel.

BLACK COPPER CO. NEW MEXICO

Mine office: Elizabethtown, Colfax county, N. M. Developed by shaft and credited with past gold production of $200,000. No recent returns available.

BLACK HAWK CONS. MINES CO. NEW MEXICO

Formerly Black Hawk Mining & Milling Co.

Mine address: E. D. Lidstone, pres.-mgr., Box 456, Silver City, N. M. Fiscal agents, C. A. O'Leary, Pioneer Bldg., St. Paul, Minn. Business office 706 Security Bldg., Milwaukee, Wis.

Inc. May, 1919, in Delaware. **Cap.,** $1,500,000; $1 par.

Officers: E. D. Lidstone, pres.; J. A. Camm, v. p.; Geo. H. Cheyne treas.; J. L. Dietz, sec. John P. Fetsch, directors. Liberty Trust Co., Boston, Mass., transfer agent. Equitable Trust Co., Boston, Mass., registrar.

Property: two groups, a total of 700 acres of mineral land in the Hanover-Santa Rita district, Grant county, New Mexico. Also 8 claims, 160 acres in Bullards Peak district, N. W. of Burro mountains, comprising all holdings of Black Hawk M. & M. Co.

The Hanover property held under lease and bond, comprises two groups, one on each side of the A. T. & Sta. Fe R. R. line at Hanover junction. There are seven shafts, the Lucky Bill shaft on the South Group opening a 30' vein that yielded 320 tons of ore in September, 1919, from the 150' level with the 300' level reported ready for stoping. Shipping ore is also mined at the Walker and Lucky Bull shafts and milling ore at Patterson shaft. Examined in January, 1919, by I. L. Wright.

Equipment: all five shafts are equipped with hoists, air-compressors, pumps, buildings, etc.

Production: in 1919 was 406,000 lb. lead, 2,100 oz. silver. The Black Hawk group, southwest of Silver City, is idle. It has yielded bonanza silver ore in former years, but is not in shape for economic working at present.

The Hanover property is a young one, with proven orebodies and is a district that has been productive for a half century. Considered promising.

BLACK HAWK MINING & MILLING CO. NEW MEXICO

Fully described in Volume XIII. Holdings purchased in May, 1919, by the Black Hawk Consolidated Mines Co., which see.

BLACK RANGE TUNNEL & MINING CO. NEW MEXICO

Address: E. D. Randolph, sec.-gen. mgr., 219 Main St., Lafayette, Ind.

Officers: H. E. Black, pres.; A. O. Behrn, v. p.; W. C. Mitchell, treas., with T. F. Gaylord, B. L. Phillips and Martin Hardsocg, directors; C. Hullinger, supt., Chloride, Sierra county, N. M.

Company presumably a reorganization of the Black Range Copper ng Co. and Black Range Reduction Co. (see Vol. X), both now dead. **Property:** the Silver Monument mine, showing a vein of silver-copper

Development: 2,300′ tunnel and shaft. Main vein has apparently not found. Equipped with steam plant, compressor and a 25-ton concen- on mill. No recent reports obtainable.

INEY CONSOLIDATED COPPER CO. **NEW MEXICO**

Office: Lordsburg, Hidalgo county, N. M.

Officers: D. L. Hill, pres.; H. W. Peak, v. p.; R. S. Spann, ssec.; J. P. eus, supt.

Inc. 1919, in Texas. **Cap.**, $2,000,000; $1 par. Company reports that it unincorporated association, operating under declaration of trust, with- ersonal liability, in any event, of the trustees or of any stockholder.

Property: Bonney mine group, property of Tyndale Copper Mining El Dorado group, Manilla group, Misers Chest Extension group and s, in all about 750 acres, located in Virginia district, about 5 miles S. f Lordsburg. The Bonney Mining Co., on September 15, 1918, refused tend the lease on the property held by the Lawrence Mining Co., and dingly the mine was operated by the Bonney Mining Co. until January, when the copper market was demoralized. Property was purchased in 1919, by D. L. Hill, of Lordsburg, N. M., who consolidated it with ad- ig mineral ground, under the present title.

Geology: veins are strong, well-defined fissures, 4-20′ wide, which be- water level carry sulphides well disseminated through quartz gangue. try rock is andesite, with monzonite, diorite and rhyolite.

Ore: of the Bonney mine occurs as chalcopyrite, bornite, chalcocite ome covellite, carrying gold and silver values in five fissure veins in ite. Veins are located in isolated hills, 4 miles N. E. of Pyramid Peak, ntirely separated therefrom. Shipments in 1918 averaged 0.156 oz. 3.77 oz. silver and 3.39% copper.

Development: at Bonney mine, by 3 shafts, 500, 400 and 350′ deep; 500′ ses and 4,500′ of drifts and crosscuts. Company has opened 1,400′ on vein and 600′ on 500′ level. The reserves are estimated at 257,000 tons average value of $15.50 per ton.

Reserves: broken ore 21,000 tons, blocked out 16,000 tons. Estimated 0 tons (figured to 400′ below 500′ level).

Equipment: includes 100-ton flotation-concentraton mill, semi-Diesel r plant, hoist, dwellings, concrete office, etc.

Production: for 16 months prior to January, 1919, company shipped ore pper Queen smelter, Douglas, Ariz., containing 1,882 oz. gold, 50,732 lver and 898,421 lb. of copper all valued at $286,056.

NEY MINING CO. **NEW MEXICO**

roperty purchased by the Bonney Consolidated Copper Co., which sec. he Bonney mine was under option to the Lawrence Mining Co., until mber, 1918, then operated by the company until January, 1919, when o the demoralized copper market, the smelters refused to pay a definite for ore. This forced the company to shut down the mine. Property old July, 1919, to D. L. Hill of Lordsburg, N. M., who formed the Bon- Consolidated Copper Co., to take over this and adjoining property.

TON & BRICE COPPER CO. **NEW MEXICO**

reorganization of the Jarilla Consolidated Copper Co. Mine at Otero county, N. M.

Officers: at last accounts, E. E. Locklin, pres.; W. W. C. Spencer, -gen. mgr., with Clinton Gowdy, G. E. Moffett and John Colthrop, ors.

Inc. 1917, in New Mexico. **Cap.**, $2,000,000; $1 par; issued, 1,000,000. al meeting, first Monday in May.

Property: 40 claims, about 800 acres, in Jarilla (Silver Hill) district, county, carrying sulphide ore in contact deposits between limestone

and monzonite porphyry. Vein said to be 3 to 30′ wide, 300′ to a half mi long, and proven to 170′ depth, averaging 3 to 5% copper, 2 oz. silver a $1 gold per ton.

Development: by 5 shafts, deepest 172′, and the Harvey tunnel, 1 long.

Company is a merger of and holds the properties formerly owned b the Eureka Mines Cons. Co., Boston Jarilla Copper Co., Amarillo Mi Co. and Eureka Placer Mining Co., whose combined capitalizatio $8,000,000 was reduced to $2,000 000. No recent report obtainable.

BOSTON EMERALD MINING CO. NEW MEXIC

Formerly known as the Atwood Copper Co. **Address:** J. Tan supt., Lordsburg, New Mexico.

Property: the Atwood mine, near Lordsburg, Hidalgo county. Late 1918 it was reported that H. V. Snell, of Globe, Ariz., had purchased controlling interest from Morningstar & Augustine.

Development: shaft being unwatered, preparatory to sinking to 1,000′ level, in 1919.

BOSTON-HECLA MINING CO. NEW MEXIC

Office: 40 Court St., Boston, Mass. **Mine office:** Lordsburg, N. M.

Officers: R. E. Candruff, pres.-treas.; J. B. Piscope, v. p.; D. W Ta lor, sec., with R. S. Fisher and M. W. Lawlor, directors.

Inc. April 18, 1918, in Arizona. **Cap.,** $2,000,000; $1 par; 1,000,800 sha outstanding. Equitable Trust Co., Boston, Mass., transfer agent.

Property: 9 claims, 3 patented, 120 acres, about 3 miles S. W Lordsburg, Hidalgo county, between the 85 and Octo mines.

Ore: sulphide occurs in quartz-fissure veins in andesite and dior reported to assay 0.04 oz. gold, 2.17 oz. silver and 2.6% copper. Orebo is 20—125′ wide, with E.-W. course and dip of 70°.

Development: by 300′ shaft. Sinking a second shaft to same dep **Equipment:** includes 40-h. p. hoist and compressor.

Property has been examined by O. H. Reinholt, San Diego, Calif J. T. Bickle, Globe, Ariz.

BUFFALO-NEW MEXICO MINES CO. NEW MEXI

Office: 450 Brisbane Bldg., Buffalo, N. Y.

Officers: J. F. Rooney, pres.; H. F. Heinrich, v. p.; C. H. Reeser, s W. G. Germain, treas. R. P. Kelly, supt.

Inc. 1910, in Arizona. **Cap.,** $1,000,000; $1 par; 350,000 shares o standing.

Property: 15 unpatented claims, 200 acres, at Red River, Taos coun said to show a quartz vein in andesite and rhyolite with gold and si values.

Development: by 200′ shaft and 300′ of workings. A 2,300′ tunnel being driven to drain the mine. **Equipment:** includes 40-h. p. steam h and steam compressor.

BURRO MOUNTAIN COPPER CO. NEW MEXI

Out of existence. Property operated as Burro Mountain Branch of Phelps, Dodge Corporation, which see.

BURROS DEVELOPMENT CO. NEW MEXI

Address: J. M. Kiner, pres., Silver City, N. M. R. W. Jackson, v C. C. Royall, sec.-treas.

Inc. 1917, in New Mexico. **Cap.,** $600,000; shares $1 par; 100,000 sha offered the public October, 1917, at 10c to provide funds for patenting development. No later returns received.

Property: 21 claims, 420 acres, a short distance south of Leopold. to show a vein of 7.2% copper ore in a 75′ shaft.

B. V. N. MINING CO. NEW MEXI

Probably defunct. **Last address:** Pinos Altos, Grant county, N. M.

Officers: at last accounts, Dr. A. M. Torello, pres.; J. W. Bettes, Fischer, Robt. Noble, Jos. Vinot, H. Bettes and S. D. Bettes, Wm. Donovan, supt.

nc. Nov., 1914, in New Mexico. **Cap.**, $250,000.
Property: Silver Hill mine, in Pinos Altos district, shows gold-silver-ore in vein, 1' wide, believed to be continuation of rich orebody on ning Lankston and Pacific No. 2 claims.
Development: 3 tunnels, 289', 300' and 400' deep and 260' stope Some done in 1915, no reports received since.

UMET-NEW MEXICO MINING CO. **NEW MEXICO**
Office: 154 W. Randolph St., Chicago, Ill. **Mine office:** Silver City, Mexico.
Officers: Alex. McCallum, pres.; Alpheus McCallum, v. p.-treas.; J. A. nt, sec.; A. W. McCallum, asst. sec.; J. A. McCallum, supt., with Jacob nberg, directors.
nc. in New Mexico. **Cap.**, $1,000,000; $1 par; practically all outling.
Property: three groups in Magdalena district, 12 claims, 10 patented, cres, 2 miles from a railroad and 5 miles from Magdalena, reported to ore assaying 3 to 21% copper, 3 to 97 oz. silver, 0.06 to 0.96 oz. gold, d maximum of 24%, and a zinc maximum of 12%.
n Pinos Altos district company has 3 deeded claims, and 3 claims under n. 120 acres; 7 shipments from there assayed between 0.20-1.26 oz. gold, 19 oz. silver, 9 to 43% lead and 3 to 38% zinc. The company also holds ear working bond on the Langston mine, located near the Pinos Altos rty; Calumet receives ½ profits made after all expenses are paid, ding a profit for milling the ores.
Development: by tunnels with 3,000' of openings at Magdalena; by 2 s and 3,000'-4,000' of drifts and stopes at Pinos Altos; by 200' shaft and derable drifts at the Langston mine.
Equipment: includes hoisting plants, blacksmith and machine shops, ings and a concentration and a flotation mill near Pinos Altos with a ity of 1,500-3,000 tons per month.

IBEL MINING & MILLING CO. **NEW MEXICO**
Address: H. L. Pratt, mgr., Red River, N. M.
Company said to be operating a mine near Red River, Taos county.

LISLE MINING CO. **NEW MEXICO**
Office: 50 East 42nd St., New York City.
Directors: August Heckscher, of New Jersey Zinc Co.; G. M Heck-, Sumner Girard, H. K. Welch, and S. Makeever; M. K. Welch, mgr
n February, 1918, company filed petition of bankruptcy giving liabilities 16,473 and assets as $43,829. Although the petition is nominally a itary one, it is reported that the company's action was taken in response e demand of the Heckschers for protection of their interests. Of the liabilities $101,353 had been advanced by the Heckschers.
Cap., $3,000,000.
Property: the Carlisle group, at Steeplerock, N. M. After the bankcy proceedings, this mine was turned back to the owner G. H. Utter, and scribed under that name. It produced $6,000,000 in gold ores, when d by Marshall Field, L. Z. Leiter, and N. K. Fairbanks. With depth, res turned into complex sulphides which were not amenable to the lurgical processes of the early '80s. Mine had been idle 39 years, until arlisle company took it over.

E AND WEST **NEW MEXICO**
Address: Gage, N. M.
a private concern which does not furnish financial information.
Property: 3 claims, near Gage, Victoria Mining district, Luna county; ed to show a quartz vein, running N. E.-S. W., containing gold, silver pper, and developed by a 30' shaft. Only a small amount of develop-work has been accomplished.

MPION COPPER CO. **NEW MEXICO**
Offices: 7 Government St., Kittery, Me., and 1853 Commonwealth Ave., on, Mass. **Mine address:** Copper Hill Box, Dixon, Taos county, N. M.

Officers: R. J. Barton, pres.; Benj. B. Earl, v. p.; Arthur M. Cru sec.-treas.; preceding, with Ralph Thompson, E. J. Quiry, directors. Jas. Burton, gen. mgr., Dixon, N. M.

Inc. July 7, 1911, in Maine. **Cap.**, $400,000; increased March, 19 from $200,000; shares $1 par; changed in 1918 from 2,000,000 shares, 10c p Listed Boston Curb. Annual meeting first Tuesday in March. Comm wealth Trust Co., Boston, transfer agent.

Report issued March 1, 1918, shows assets of $20,336 cash, $274 accounts receivable, $26,913 as equipment and development, and $150,00 mining property.

Property: 468 acres, made up of 15 claims, on Copper Hill, in the Co per Mountain district of Taos county, 9 miles east of Embudo, the near railroad station, and 25 miles N. E. of Taos, 2 potash claims of about acres, a mile from the mine, and 85 acres in the Big Bug mining district Arizona. The potash claims, the Arizona property, and ten claims of abo 200 acres, were purchased in 1917. The remainder of the property was a quired at foreclosure sale 1914, for $15,499. Mine is said to have 8 pra tically parallel veins of 18" to 20' width, between a schist footwall and qua zite hanging wall, the ore carrying cuprite, malachite and chrysocolla, su ceeded at depth by chalcocite and gray copper; ore carries silver and go with chalcopyrite beginning to show in lower workings, all in a quar gangue.

Development: includes shallow shafts and surface cuts on seve claims, a 250' shaft on the Champion, a 180' shaft sunk on a 4' vein in t Oxide mine, and a 500' tunnel, which has stoping ore and cuts a 45° blan vein. Report for 1917 showed 200' of stoping and drifting, 930 tons hoist and a yield of 67 lb. per ton milled.

Equipment: includes 2 horizontal boilers 54"x14", two engines, 6 80-h. p. the other 40-h. p. gasoline hoist, 2 compressors and several drills. 1,000' ground tram leads from the mouth of the Champion tunnel to oreb A 15,300' gravity pipe line, of 7" spiral steel riveted pipe conveys water fr spring to reservoir at mill.

In May, 1918, company tried the Greenawalt process of leaching a electrolysis, thus saving, it was reported, 98% of all ore values. A pl capable of 60 tons per day was installed early in 1919. No record of la activity.

CHEMUNG COPPER CO. **NEW MEXI**

Dissolved, see Vol. XIII. Formerly at Tyrone, N. M.

* Deficit.

Dividends: initial in June, 1913, $2.25 being paid in that year; su when $2.50 per share in 1914; $3 in 1915; $8.25 in 1916; $9.90 in 1917; $ in 1918, and $3 in 1919. On March 31, 1920, 37½c was paid. The total $29,339,224.

Property: 206 mining claims (3,493 acres) at Santa Rita, of which claims (3055 acres) are patented. Also 120 acres of agricultural land jacent to the mining claims. The mill-site at Hurley, including water-s and residue-disposal area, totals 18,530 acres.

The property is the old Santa Rita del Cobre mine, which is the old copper mine in New Mexico, and the second oldest in the United Stat having been opened, 1804, by Spaniards. The property was worked by American named Pattie, in 1822 and to 1827. It was in possession a Frenchman from 1828 to 1834, when an American called McKnight, be operations which ceased in 1836. From 1840 to the late fifties, it was possession of a Spaniard. In 1851 Santa Rita was the headquarters of American Commissioners, of the Boundary Survey. Some time be 1860 four Americans attempted to operate the property. In 1862 C Sibley, of the Texas Confederate force, held the mine. In 1873 M Hayes, acting on behalf of Denver people, succeeded in purchasing claims, attempting to perfect the title by obtaining U. S. patents, alth patents had been refused by the Commissioner of the Land Office in Hayes' application was turned down in April, 1873. Between that and the final decision of the Secretary of the Interior in November, title was obtained by Hayes from the surviving heirs of the original Spa ish estate and final U. S. patent was obtained to the claims covering Santa Rita del Cobre Grant. Title was acquired by the Chino Copper from the Santa Rita Mining Co., since dissolved.

Geology: Santa Rita is situated in the Central mining district, Gr county, New Mexico on a branch of the Santa Fe system which connects Whitewater with the Deming-Rincon division of the same railroad. orebody and town of Santa Rita are located in a distinct basin and rocks exposed in the district may be roughly divided as follows: 1. sedimentary; 2. intrusive; 3. extrusive. The sedimentary formation, of w there is a large area in comparison with the intrusive exposures, con of limestones of more or less purity, and belonging to the sub-carbon and carboniferous series, there also being some isolated exposu Devonian rocks. These beds vary from nearly pure limestones, th cherty limes and shaly limes, to shales. A considerable area of Cre sandstones and shales is exposed through faulting, the former co

quartzite in the immediate neighborhood of the intrusives. The ıcipal intrusive rocks in the Santa Rita basin are grano-diorite, a rtz-monzonite porphyry, and another of distinct porphyritic texture ch may be classed as andesite. This latter rock intrudes the two gen- types as also the sedimentaries, in sills, lacoliths and dikes. The boun- forming the S. E. side of the Santa Rita basin is composed of two s, the principal one being rhyolite and rhyolite tufa overlaying an r flow which is of an andesite nature.

The grano-diorite is intrusive into and across the edges of the sedi- tary series, which form a syncline dipping to the south from the north- bordering ridges toward the lowest point of the basin. The area in the basin has been strongly faulted in wide zones and in two gen- directions. The intersections of the numerous faults have resulted in ughly circular shear zone that has a diameter of ¾ of a mile. This has been the depository of the valuable copper minerals, chalcocite, ite and native copper. Bornite, chalcopyrite and cupriferous pyrites also found, but to a much lesser extent than the previously named. re also occurs in small restricted areas, malachite and azurite with a limited amount of chrysocolla.

Development: the old workings, which were very extensive, have been tically eliminated by the steam-shovel operations.

Recent work:

	Churn-drilling feet	Overburden moved cu. yd.	Ore mined tons	Ore reserves tons	Copper content per cent	Cost of mining cents p. t. per ton
.....	15,020	3,264,556	3,749,238	96,552,026	1.630	69.55
.....	22,425	3,712,414	3.607,825	.....	.....	50.88
.....	13,161	3,564,623	3,216,065	95,555,843	1.656	37.97

Equipment: consists of 10 steam-shovels, 21 locomotives, 140 dump , of 6 to 20 cu. yd. capacity. Company operates about 24 miles of track, ıg access to the pits. There is also a primary crushing plant, equipped 48"x60" jaw crusher, together with bins for handling and breaking up se material loaded by shovels.

Mill: the concentrating plant at Hurley, 9 miles from the mine on the a Rita branch of the Santa Fe railway, with original capacity of 5,000 per day, was started in October, 1911, but is now equal to 11,000 tons , due to improved metallurgical methods, and addition of 2 units, mak-

The mine has a coarse-crushing plant, consisting of gyratory crushers, 20" Garfield rolls, producing a maximum size of ¼". The mill is ɔped with 16"x42" rolls for preliminary grinding and Garfield Chilean for final grinding. Roughing treatment consists of Garfield tables, wed by Wilfleys and Richards-Janney classifiers and Isbell vanners. of the enlarged mill was set aside for treating 500 tons of partly oxi- l ore daily. A 5,000-ton tailing retreatment plant will start as soon as minary tests are satisfactory. There are several million tons of mate- ıwaiting treatment.

Graphic metallurgical control at the works is described by H. M. Merry all, 153, September, 1919, of A. I. M. & M. E. By means of large wall- s, a daily record of essential data is kept, such as weight of ore milled, rs of headings, tailings, and concentrates, screen analyses, costs, and of copper. Such presentation is necessary at any plant, or mine, so re- may be seen at a glance.

Power plant includes twelve 445-h. p. Heine boilers, three 1,250 k. w. rators, direct-driven by Nordberg Corliss engines, and one 2,000 k. w. Chalmers turbo-generator set. Primary water is secured from the [illegible] Spring, 3½ miles south of Hurley, from underflow of White- [illegible] Cameron Creek draw and Whiskey Creek draw. There is also [illegible] reservoir below the mill, the dam forming this reservoir

having been built out of mill tailings and having storage area of nea 3,000 acre feet. Coal is now obtained from a mine in the Gallup field of N Mexico, owned by Chino and two other companies.

Settlement at Hurley includes in addition to mill and accessory bui ings, office building, store, school, shops and dwellings, town having po lation of about 3,500 people. Town of Santa Rita, on company gro has population of over 4,000.

Both property and management are regarded as exceptionally s and the stock as a very high-grade investment.

CHINO DEL NORTE COPPER CO. NEW MEXI

Address: C. W. Hoyt & Co., 79 Milk St., Boston, Mass. **Mine** addr Geo. E. Coxe, gen. mgr., Hanover, N. M.

Officers: Wm. A. Ulman, pres., 233 Broadway, New York City; v Elmer E. Fox, Mesheck Frost, H. O. Bursum, Geo. E. Coxe, Clarence Hoyt, F. Greer Dodd, directors. John H. Leddy, sec.-treas. Wm. H. ney, cons. engr.

Inc. in Delaware. **Cap.**, $3,000,000; $1 par. Stock offered at 50c

Owns its properties through ownership of capital stock of El N Copper Co., of New Mexico, the operating company. Properties were for partly by 110,000 shares, $1 par, of preferred stock of the El Norte per Co.

El Norte Copper Co.

All the common stock and all but 11,000 shares of preferred stock this company, held by Chino Del Norte Copper. The El Norte owns New Mexican holdings.

Property: 4 separate tracts, 29 claims, 600 acres, and 17 more cl under option near Fierro and Hanover in the Central mining district, G county. Tracts cover contact deposits, in part covered by gossan, ex sively mined for iron ore.

Development: by 130' Mockley shaft, showing 12' vein with 8 to copper ore; also the Rattler tunnel and workings and several shallow s mostly sunk by former owners to get out very high grade oxidized ore, not carried below water level Examined by D. C. Sutton.

Regarded as a promising development proposition if properly fina and managed.

CLEAVELAND & WEATHERHEAD CO. NEW MEX

C. O. D. LEASING CO. NEW MEX

Idle for many years. Probably out of business.

Mine: at Lordsburg, Hidalgo county, N. M. Described in Vol 1916.

C. & O. MINING & MILLING CO. NEW MEX

Address: Pinos Altos, Grant county, N. M.

Officers: J. L. Caddel, pres.; A. Caddel, v. p.; Jackson Agee, se above, with John James and A. L. McCarty, directors; A. L. McCar

Inc. April, 1914, in New Mexico **Cap.** $100,000 shares $1 pa standing, at last accounts, 90,000 shares.

Property: 2 claims, patented, in the Pinos Altos mining district, 7 s N. W. of Silver City.
Ore: lead-zinc-copper in fissure vein in diorite. Vein has a N. S. se, dips 65° and is said to have an orebody 6" to 4' wide. Ore rals are galena, sphalerite, chalcopyrite and pyrite and average assay ud to be 2% lead, 2% copper, 8% zinc, $4 to $10 gold, and 10 oz. r per ton.
Development: by 200' incline shaft with 4,000' of workings.
Equipment: included 20-h. p. gasoline hoist, a 50-ton concentrator which run jointly with P. A. M. & M. Co. In 1917, unwatering of shaft was work done. No later returns available.

OPERATIVE MINING CO. **NEW MEXICO**
Office: Lordsburg, N. M.
Officers: E. H. Taber, pres.-gen. mgr.; C. A. Ball, sec.-treas.; D. W. or, asst. sec.; E. H. Gould, eng.; H. C. Walter, mill supt.
Inc. 1919, in New Mexico. **Cap.,** $250,000; $1 par; 170,000 outstanding.
Property: a lease and option on 8 claims, 160 acres, in Gold Hill dis- Grant county, said to show argentiferous lead sulphide in 4' fissure in monzonite. In Jan., 1920, a body of native silver ore was found from the surface, which was said to assay $1,000 per ton. The Yankee claim, purchased 1919, has 3 feet of 15 oz. ore which will be developed 20.
Developed: by 200' incline shaft and 250' of workings, blocking out tons. Company estimates reserves at 5,000 tons.
Equipment: 10-h p. hoist and an 80-ton mill with flotation unit is in e of construction.

PER BELT SILVER & COPPER MNG. CO. **NEW MEXICO**
Office: 512 Exchange Bldg., Denver, Colo. F. E. Wire, sec.
nc. in Colorado. **Cap.,** $175,000; 5c par.
Property: 13 claims, unpatented, 252 acres, 3 miles N. W. of Magdalena, rro county, said to show silver-copper ore with some gold.
Development: mainly assessment work consists of open-cuts with sev- shafts 15 to 50' deep. Company is sinking a double-compartment shaft, 100' in November, 1919. It is equipped with a hoist.

BACK MINING CO. **NEW MEXICO**
Mail returned March, 1919, from former address, Bland, N. M. Com- probably dead.
Property: Lone Star group, formerly owned by Navajo Gold Mining mpany, and said to show gold-silver, in veins, running nearly N.-S. and 12 to 40' wide.
Development: about 5,000' of workings, including crosscut tunnels.
Equipment: 100-ton cyanide plant and concentrating mill.

HILLA COMPANY **NEW MEXICO**
ole. **Address:** care Stephen B. Davis, Jr., East Las Vegas, New co.
roperty: 1,500 acres of mineral land between the towns of Lucero and alpita, Mora county, N. M., slightly developed by tunnels and shafts. mpany has been inactive since 1916.

DWOOD MINING & MILLING CO. **NEW MEXICO**
ddress: Mogollon, Socorro county, N. M. Earl C. Cleaveland, gen.
roperty: the Deadwood and Sunburst mines and mill, near Mogollon, ng the Queen, Deadwood and Confidence-Last Chance veins which e 8-10' in width, extend for 2,500' through the claims and carry gold- ore.
velopment: by 500' shaft and about 5,000' of workings.
uipment: includes 60-ton mill with concentration and cyanide equip- ll engine, electric hoist, etc.
oduction: 44,000 tons of ore since 1905, yielding $325,000.
operty is under option to the Mogollon Mines Co.

having been built out of mill tailings and having storag
3,000 acre feet. Coal is now obtained from a mine in the C
Mexico, owned by Chino and two other companies.

Settlement at Hurley includes in addition to mill
ings, office building, store, school, shops and dwellin
lation of about 3,500 people. Town of Santa Rita
has population of over 4,000.

of drifting on each level. Vein is estimated by company to average 10' idth and to carry 3.5% copper, 6 oz. silver and 0.1 oz. gold per ton. quipment: includes 100-h. p. electric motor, hoist, four 500-h. p. en- electric pump, and a 300-ton mill equipped with tables, 6 vanners and on unit. In 1919, company installed a 1,000-h. p. steam turbine using r boilers and driving a 750 k. w. generator. Mill recovery is 91%. 250 men are employed.
eserves: 263,460 tons of $13.56 ore, with normal metal prices, besides tween 210 and 310 levels.
roduction: latest figures received were for 1916; gross $1,456,586, as ed with $762,921 in 1915. In February, 1920, the mill was treating s daily, an equal amount going to smelters.
roperty considered good, and management competent.

DIVIDEND MINING & MILLING CO. **NEW MEXICO**

Defunct and stock valueless. Mine near Estey, Socorro county, N. M. See Vol. XIII.

DONNA DORA MINING CO. **NEW MEXICO**

Organ, Dona Ana county, N. Mex. Reorganized as Mineral Hill Mining Co., which see.

DUNCAN MINING & MILLING CO. **NEW MEXICO**

Address: Duncan, Ariz. **Mine address:** Steeplerock, N. M.

Officers: H. C. E. Spence, pres.; H. W. Evans, sec.-mgr.; F. N. Hall, treas.

Inc. in New Mexico. **Cap.,** $150,000; 50c par.

Property: 8 claims, 9 miles N. E. of Duncan, Ariz., in the Steeplerock district, Grant county, is said to show 2 veins running through the entire property, the Mt. Royal 40′ wide, on which most of the development work has been done, and 40′ east of it the Jim Crow vein, 80′ wide. The vein filling is a reddish brown monzonite and quartz carrying gold and silver and the high values occur where the hematite is massive.

Development: mainly on Golden Fleece claim by a 410′ incline shaft and about 2,000′ of workings. Company estimates reserves at 40,000 tons of $25 ore and 60,000 tons of lower grade ore.

Equipment: includes a 6-drill compressor driven by a 60-h. p. engine, 24-h. p. hoist, power house, machine and blacksmith shops, etc. Company has erected the first unit of a 125-ton mill, with power supplied by oil engines; mill said to contain crushers, ball mills, Dorr classifier and steel cyanide tanks.

ECLIPSE MINING & MILLING CO. **NEW MEXICO**

Address: Duncan, Ariz., and Steeplerock, N. M.

Officers: Geo. W. Trimble, pres.; Ben. F. Barbour, sec-treas. and mgr. with W. C. Downey, Wm. O. Olsen, Chas. H. Lee, Morgan M. Wilson and C. R. Meyer, directors.

Inc. in Arizona. **Cap.,** $1,000,000; shares $5 par; 106.000 shares issued. Annual meeting, first Wednesday in January. Is the successor to the Shamrock Mining & Milling Co., described in Vol. XII.

Property: 24 claims, 480 acres in Steeplerock mining district, Grant county, said to show a fissure vein in andesite, from 6-8′ wide with S. E. N. W. course. Ore is silicious and reported to assay 1.16 oz. gold, 15.1 oz. silver and 6.84% copper.

Development: by several tunnels and shafts.

ECONOMIC MINING & MILLING CO. **NEW MEXICO**

Probably dead. No returns since 1916. Fully described in Vol. XII.

EDISON MINING & MILLING CO. **NEW MEXICO**

Probably dead. Mail returned unclaimed March, 1919, from former address, Red River, Taos county, N. Mex.

EIGHTY-FIVE EXTENSION COPPER CO. **NEW MEXICO**

Office: Miami, Ariz. Mines at Lordsburg, N. M.

Officers: Lester B. Doane, pres.; L. D. McClure, v. p. and gen. mgr.; De Witt Murray, sec.; C. C. Faires, treas., with E. K. Davis, directors.

Inc. in Arizona. **Cap.,** $5,000,000: $1 par; 2,000,000 shares paid; property are being held in escrow; 400,000 shares offered the public at $ each, April, 1917.

Property: 600 acres adjoining the 85 Mining Co.'s ground at Lordsburg, shows several veins along a dike reported to be 75′ wide and traced for 600′. Ore is silicious and carries gold, silver and copper values.

Development: by 310′ vertical shaft, 265′ air shaft and the Hart shaft 125′ deep, with about 1,700′ of openings. The management (or perhaps we should say the promoters) claimed to have 463,460 tons of ore in sight averaging $13.50 per ton, giving the property a valuation of $6.284,517. This estimate is based on a report by J. L. Wells.

Production: to date 149 cars of ore shipped in former years from the Atwood mine, which netted leasers $40,965.

Property may have merit, but the statements above are in our opinion warranted by facts.

IHTY-FIVE MINING CO. **NEW MEXICO**

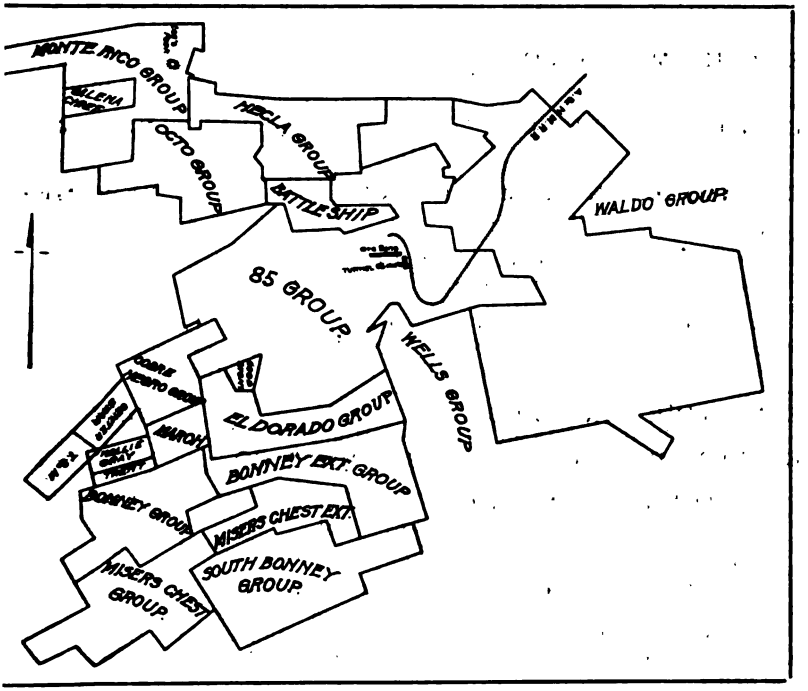
Office: Valedon, Hidalgo county, N. M.

Officers: A. P. Warner, pres.; C. H. Warner, sec.; P. B. Yates, treas.; I. Interrieden, mgr.; J. Jackson, supt.; M. Merry, mill supt.

Inc. Sept. 23, 1909, in New Mexico. **Cap.**, $1,000,000; shares $1 par. ual meeting, second Wednesday in December.

Company purchased the Superior mine of the Superior Mining Co., in

Property: 6 claims, in Shakespeare camp, about 4 miles from Lords-, in the Virginia district, includes a vein in rhyolite, developed by tunnel and a 1,700′ blind shaft, with a 300′ air shaft to surface, and



MAP OF MINING CLAIMS OF LORDSBURG DISTRICT.

′ of drifting on each level. Vein is estimated by company to average 10′ idth and to carry 3.5% copper, 6 oz. silver and 0.1 oz. gold per ton.

Equipment: includes 100-h. p. electric motor, hoist, four 500-h. p. en-, electric pump, and a 300-ton mill equipped with tables, 6 vanners and ion unit. In 1919, company installed a 1,000-h. p. steam turbine using or boilers and driving a 750 k. w. generator. Mill recovery is 91%. it 250 men are employed.

Reserves: 263,460 tons of $13.56 ore, with normal metal prices, besides etween 210 and 310 levels.

Production: latest figures received were for 1916; gross $1,456,586, as ared with $762,921 in 1915. In February, 1920, the mill was treating ons daily, an equal amount going to smelters.

Property considered good, and management competent.

EL CENTRO MINING & MILLING CO. NEW MEXICO

Address: Lordsburg, Hidalgo county, N. M.

Officers: E. S. Eno, pres.; Geo. M. Peck, v. p.; R. F. Fitz, sec.-treas. P. O. Box 275, Los Angeles, Cal., with Henry Muntz, Alfred Cole, D. D. Culver and J. A. Rovelstad, directors.

Inc. Nov., 1914, in Arizona. **Cap.,** $200,000; $1 par; outstanding 100,00[illegible] Company, in 1915, bought the Last Chance mine, owned by the Sutton Con[illegible] solidated Mining Co., and claimed to have produced $135,000 in the past.

Property: 4 claims, 2 patented, 68 acres, in the Pyramid mining dis[illegible] trict, 8 miles south of Lordsburg, said to show shoots 9-30′ wide of silver[illegible] copper ore in a fissure vein in andesite.

Ore reserves: claimed to be 10,000 tons of ore, assaying $4 to $12 pe[illegible] ton.

Development: 275′ vertical shaft with 2,000′ of workings. Mine id[illegible] in 1915-1916, but present management resumed operations, 1917. No late[illegible] returns received.

Officers: Jose Montanar, pres.; R. F. Oakley, sec.; W. T. Hinde, treas[illegible] L. C. Haberstich, supt.

Inc. March, 1919. **Cap.,** $1,000,000; $5 par; 7,000 shares outstanding. U[illegible] S. Corporation Co., New York, registrar and transfer agent.

Property: 4 claims, about 80 acres and a tunnel site, 200 acres in th[illegible] Keystone mining district, Taos county, said to show gold tellurides in se[illegible] eral veins.

Company plans to push a tunnel, which will unwater and develop the[illegible] claims.

GARNET COPPER CO. NEW MEXICO

Address: Ohaysi, N. M.

Officers: James H. Parker, pres., and C. Jungk, sec.

Inc. in New Mexico, in 1916. **Cap.,** $60,000; shares $1 par.

Company operates the Garnet, Mae Belle, James Fisk and Shoo Fl[illegible] mines at Ohaysi, Otero county, N. M.

Development: deepest shaft is down 450′. The deposit occurs in gar[illegible] net-lime zone of altered sedimentaries at porphyry contact, and ore con[illegible] tains copper and gold. Ore was sent to the El Paso smelter. No recent re[illegible] turns received.

rell, sec.-treas.; F. P. Jones, T. L. Lowe, J. Agee, T. W. Carter, D. C. rell and D. T. White, directors.
nc. 1917, in New Mexico. **Cap.**, $3,500,000; $1 par; 620,000 issued.
Property: 61 claims in the Burro Mountain district, N. M., including of National Copper Co. Considerable development done.

D BELL MINING CO. **NEW MEXICO**
Probably dead; mail returned unclaimed, March, 1919, from former ss, Deming, N. M.
nc. 1916, to develop a silver property N. E. of Hillsboro, Sierra county,

D BUTTES MINING & MILLING CO. **NEW MEXICO**
Office: Duncan, Ariz.
Officers: G. F. Fraser, pres.; Daniel Fraser, v. p.; John Evans, sec.-; A. Fraser, mgr., with W. Hutchins and M. C. Tilletson, directors.
Cap., 750,000 shares; par $1.
Property: 920 acres, divided into 3 groups in the vicinity of Twin s, Steeplerrock district, Grant county, N. M., about 20 miles N. E. of an, Ariz. The properties are (1) the Rival Extension group of 9 claims, ed on the Rival lode, showing a low grade gold ore; (2) the Twin Peaks of 26 claims, said to contain gold sulphides; (3) the Dark Thunder of 120 acres reported to have shipped 30% copper with some silver old. Company also owns 50,000 shares of the Rival Mining Co.
Development: at the Rival Extension and Twin Peaks, by a 265′ shaft 1,000′ of workings; the Dark Thunder has been prospected in several s.

D & COPPER DEEP TUNNEL M. & M. CO. **NEW MEXICO**
Office: Beaver Falls, Beaver county, Pa. **Mine office:** Elizabethtown, x county, N. M.
Officers: A. T. McIntyre, pres.; G. E. Dachtler, v. p.; W. H. Martin, reas.; W. P. McIntyre, gen. mgr. and supt., with J. M. Richards, tors.
nc. Oct. 10, 1900, in New Mexico. **Cap.**, $500,000; increased 1912 from 00; shares $1 par; 282,948 issued. Annual meeting third Tuesday in

Property: in the heart of Cimarron range, on the west slope of Baldy tain, 12,500′ high, comprises 12 claims, 260 acres, in the Moreno dis- 18 miles from the St. L. R. M. & P. R. R. at Ute Park. Orebody, a ct between slate and monzonite, is developed by 2 shallow shafts and 0′ crosscut tunnel, planned to penetrate the mountain with a final h of 3,500′, cutting 2 bodies of low-grade copper ore. Also said to a deposit of molybdenite. Total underground work, 4,400′.
Equipment: includes a 12-h. p. gasoline air compressor and 10 buildings; 1 stamp-mill. See U. S. Geol. Survey Prof. Paper, 68, p. 95, for geology s district.

DEN LINK CO. **NEW MEXICO**
Probably dead. See Vols. XII and XIII.

NT COUNTY COPPER CO. **NEW MEXICO**
Address: H. B. Link, mgr., Santa Rita, N. M.
ompany said to be developing a body of zinc ore, 1½ miles north of Rita. Mining is by tunnels. A mill was constructed in 1919, and was cing a good grade of zinc concentrate early in 1920. About 25 men yed.

AT EAGLE MINING CO. **NEW MEXICO**
Address: Red Rock, N. M.
fficers: J. H. Cauthen, pres.; J. S. McCelvey, v. p.; R. S Spann, sec.-; F. A. Kroll, mgr.
nc. Jan., 1919, in New Mexico. **Cap.**, $750,000; $10 par.
roperty: 16 claims, 300 acres, in the Anderson mining district, Grant y, showing a vein with gold, silver, copper in fluorspar; vein is 15′ wide

and 2,000′ long, surrounded by granite, course, N. 30° W. Company rep that ore carries 91.7% fluorspar.

Development: 800′ of open-cuts. Reserves are said to be estimat 300,000 tons with 10,000 tons blocked out.

Equipment: includes a compressor and tramway. Production to M 1919, about 3,000 tons. Company plans to sink a 3-compartment shaft and erect another compressor.

HANOVER BESSEMER IRON & COPPER CO. NEW MEXI

Address: Fierro, Grant county, N. M.

Officers: B. D. Coleman, pres.; C. F. Hess, sec., and J. W. Brock, tre D. M. Barringer, B. D. Coleman, J. W. Brock, R. A. F. Penrose, Jr., J Brock, C. C. Tegethoff and John Brockman, directors. C. K. Barnes, s L. M. Kniffen, supt.

Inc. Nov., 1914, in Delaware. **Cap.**, $1,000,000; $1 par; 625,000 outsta ing. Notes authorized and issued, $100,000. Transfer office, 511 Bell Bldg., Philadelphia, Pa. Annual meeting, first Monday in May.

Property: at Fierro, Grant county, shows ore averaging about 3 iron and 5% copper. Company had a 10-year contract which required shipment of 20,000 tons of iron ore per month to the Pueblo plant of Colorado Fuel & Iron Co., which was closed temporarily in September. work was being done late in 1919, but in December, the U. S. S. R. & M. was reported to have purchased the mine.

HANOVER COPPER CO. NEW MEXI

Address: Hanover, Grant county, N. M. Geo. A. St. Clair, pres., luth, Minn.; F. T. Walker, mgr.

Inc. 1909. **Cap.**, $50,000; shares $10 par.

Property: 18 claims, north of the Chino Copper property and o the holdings of the Philadelphia Copper Co. Mine has shafts 70′, and 150′ deep and tunnels 40′ and 60′ long, showing copper and zinc o Equipped with hoist and compressor.

HARDSCRABBLE MINING CO: NEW MEXI

Company is out of existence, as holdings have been taken over are being operated by the U. S. Copper Co., which see. See Vol. XIII

HECLA MINING CO., THE NEW MEXI

Office: 652 South Spring St., Los Angeles, Calif. **Mine** addr Lordsburg, N. M.

Officers: R. E. Vandruff, pres.; John W. Wilson, v. p.; W. G. W sec.-treas.; O. H. Reinholt, cons. engr.; Franklin Smith, geologist; F. Davis, gen. mgr.

Inc. Oct. 17, 1916, in Nevada. **Cap.**, $850,000; shares $1 par; treas reserve, $200,000; balance used, partly to pay for property and equipment partly for development. No indebtedness.

Property: 9 claims fully paid for, and another, the Bonnie Jean, o option, about 140 acres lying between the 85 and the Octo mines, 3 m S. W. of Lordsburg, in Hidalgo county, and 2 miles from the S. P. R. R.

Geology: similar to that of the 85 and Octo mines. Country rock diorite-porphyry. General geology fully described by Lindgren in Paper 68, U. S. Geological Survey. Outcrops conspicuous and form la marks, such as Lee's Peak 500′ from the Hecla, frequently mentio by Lindgren. Gangue very silicious and ore is therefore in demand fluxing the basic ores from Bisbee. Sulphides found near the sur Many mineral varieties occur, but main values lie in copper, gold and s contents, said to average over $30 a ton before the rise in metal p

Development: includes two 300′ and several shallow shafts. the deeper shafts was to be enlarged, retimbered and deepened. The graphy does not lend itself to successful tunnelling.

Equipment: includes 250-h. p. boiler plant, 40-h. p. hoist, 700 c compressor, pumps, etc. No 1919 returns received.

IBRILLO COPPER MINING CO. **NEW MEXICO**
Mine in Socorro county, N. Mex. No returns received in many years. **ably** dead. See Vol. XIII, for full description.

MOSA COPPER CO. **NEW MEXICO**
Office: 30 Church St., New York. **Mine office:** Hanover, Grant county,

Owned by the General Electric Co. Property has been closed down **n the** hands of a caretaker for the past 7 years.

CANYON MINING & SMELTING CO. **NEW MEXICO**
Office: 154 West Randolph St., Chicago, Ill. **Mine address:** Magdalena, rro county, N. M. **Registered office:** Oscuro, N. M.
Officers: Alpheus McCallum, pres.; A. Pement, v. p.; E. G. Raffety, .; A. W. McCallum, sec., with Alexander McCallum and A. B. Wilson, tors. J. A. McCallum, supt.
Inc. April, 1906, in New Mexico. **Cap.,** $1,000.000; shares $100 par; shares outstanding.
Property: 11 claims, 220 acres, 3 miles from Santa Fe R. R., in the **dalena** mining district, shows a shear zone in rhyolite running N. 25° with steep dip N. E. Surface shows thin seams of oxidized ore, de- ped by 1,550′ crosscut tunnel together with shafts and open pits of about '. Company has expended almost $71,000 on development work. Ore ys, 2.5% to 24.64% copper, 1.2 oz. to 5.42 oz. silver, and 0.02 oz. to 1.15 oz. per ton.
No production figures received.

INOIS & SARATOGA MINES **NEW MEXICO**
Address: C. T. Brown, Socorro, N. M. Mine at Kingston, Sierra ıty, N. M.
Nothing has been done at these mines for several years, but manage- t expected to resume operations in 1919.

K MINING & MILLING CO. **NEW MEXICO**
Mine probably closed down as mail was returned unclaimed in March, . The property was known as the Roosevelt group, a former gold mine old gulch, Santa Rita mountains, near Bayard, a few miles S. W. of Santa The ore deposit was said to show both silver-lead and molybdenum.

KS PEAK TRAMWAY & MNG. CO. **NEW MEXICO**
Office: Dalhart, Tex. **Mine address:** Carrizozo, N. M. N. M. Vinyard, -gen. mgr.
Company has iron ore properties about 25 miles east of Carrizozo. In 1919, an 8-mile tramway, to connect with the Chicago, R. I. & Pacific was in course of construction.

LLA CONSOLIDATED COPPER CO. **NEW MEXICO**

Address: Organ, N. M.

Officers: W. W. Cox, pres.; J. D. Isaacks, v. p., L. B. Bentley, sec.
V. B. May, treas., with C. T. Seale, directors.

Inc. April, 1919, in New Mexico. **Cap.,** $50,000; $10 par; $19,6
standing.

Property: about 20 acres, near Organ, Grant county, N. M.
pany reports ore reserves at 600,000 tons, averaging 4% copper and 5 o
per ton.

ORO IRON CO. **NEW MEX**

Address: Ohaysi, Otero county, N. M.

Officers: Winchester Cooley, pres.; T. M. Wingo, sec.; J. H. P
gen. mgr.; Edward Salveson, supt.

Cap., $20,000; shares $1 par.

Property: the Cinco de Mayo, Iron Duke, Iron King, Iron
Iron Mask, and Laura claims at Ohaysi developed by surface workings
hematite and magnetite iron ores.

Equipment: compressor and 5 drills. No recent returns receive

'ERO COPPER CO. **NEW MEXICO**

Presumably idle, as mail is returned unclaimed from former address, Brice, Oro Grande, Otero county, N. M. See Vol. XIII.

ARK SMELTING & MINING CO. **NEW MEXICO**

Office: 601 Canal Road, Cleveland, Ohio. **Mine office:** Magdalena, orro county, N. M. Philip Argall & Sons, of Denver, Colo., cons. engrs. elter: Coffeyville, Montgomery county, Kans.

Officers: Geo. A. Martin, pres. and gen. mgr.; Oliver Box, asst. gen. r.; L. P. Pressler, supt.; W. S. Stevens, mill supt.; W. E. Corts, smelter supt. : company is a subsidiary of the Sherwin-Williams Paint Co.

Property: includes the Graphic mine, 30 claims, 227 acres, with total dings of 800 acres in the Magdalena district, showing limestone, shale and rtz, carrying contact ore deposits between limestone and schist, of about 50′ ven width, 500′ length, and known depth of 500′. The upper workings show ge quantities of lead and zinc carbonates, ores being mainly smithsonite and alerite, with some cerrusite and argentiferous galena, and occasional cuprite native copper. Ores are mainly low in grade, with principal values in zinc. : ore-shoot, of about 500′ length on the 7th, 8th and 9th levels, is about 100′ e on the 9th level.

Development: is by a 300′ shaft, and two 1,500′ cross-cut tunnels, with ut 8 miles of workings, the lower levels showing a slightly argentiferous sul- le complex of zinc, lead and copper. Property regarded as one of the largest deposits of America.

Equipment: 125-ton mill was erected, 1912, to treat the large tonnage of -grade complex zinc-lead-iron sulphide ore already developed, by the froth ation process, using it as an adjunct to older methods of concentration. A 50- mill does dry concentration on ores above 20-mesh, and wet concentration ores below that size. Electric power is used.

Production: mainly zinc ore, is shipped to the works at Coffeyville, the manufacture of lead and zinc oxides, as the base for pigments, of which Sherwin-Williams Co., in control of this corporation, is one of the largest erican manufacturers.

Lessees paid $4,000-$5,000 royalties monthly, 1917. No later returns re- ed.

COS COPPER CO. **NEW MEXICO**

Office: 581 the Arcade, Cleveland, Ohio. **Mine office:** Cowles, San uel county, N. M.

Officers: Alfred H. Cowles, pres., Sewaren, N. J.; I. C. Gifford, v. p.; derick W. Swan, sec.

Inc. 1904, in Michigan. **Cap.,** $100,000; $25 par. A close corporation. company had a floating debt of $65,000, all owed to stockholders, of m there are only 5. Mine holdings under lease, since 1915, to Pecos es Co.

Property: 15 claims, 573 acres, all patented and 238 acres including able coal veins and placer ground, in the Hamilton district, 12 miles a Santa Fe. Holdings include water rights to the Pecos river for 2½ s, with 2,000 h. p. available for development.

Lands show lower Carboniferous limestone. The property carries a act "vein," vertical, 200′ wide, outcropping for 750′ and lying alongside fered schistose diorite. The band of shipping ore is 9′ wide with er width of concentrating material. The ore, being complex, is diffi- of treatment.

Development: includes 370′ Evangeline shaft. Report by W. E. Bur- , in 1907, claims 168,304 tons blocked out on four levels. Lessees have ished much new development and in 1917, the ore reserves were to be more than double those of 1907, the pay streak having 50′ in width.

ment: includes a 165-h. p. steam plant, with 2 hoists, 1 good for and a 3-drill compressor.

Property: 14 claims, 225 acres, in Lake Valley mining district, Sierra county, about 7 miles from Lake Valley, said to contain silver and lead ore in a vein 2½-7′ wide in andesite and extending 6,000′ on surface. The district is located between two old producers, the Bridal Chamber and the Graphic mines, which are 25 miles apart.

Development: 2 shafts, 175′ apart, one 525′ and the other 200′ deep, with some lateral workings. Diamond-drilling has been done on the Good Luck claim. It is said that the vein widens and carries more silver with depth, such as 2½′ and 12 oz. at 200′ and 5′ and 50 oz. at 500′. Is a much advertised and probably somewhat over-rated company.

Equipment: includes 2 boilers, one 40 h. p., the other 100-h. p, a hoist with 800′ of cable, compressors, 5 pumps and necessary buildings. Over $400,000 is said to have been spent on the mine.

R. & S. MOLYBDENUM MINES CO. **NEW MEXICO**

Address: C. W. Savery Securities Co., 604 Denham Bldg., Denver, Colo. M. B. Rapp, mgr.

Cap. $3,000,000; shares $1 par. Pre-organization offer at 75 cents each.

Property: 350 acres on the Red river, 8 miles N. E. of Questa, at an elevation of 8,500′, in Taos county. Ore is found as veinlets in altered limestone and monzonite-porphyry. After spending $50,000 in driving a 500′ tunnel, in ore all the way, averaging 1½% molybdenite, it was advertised that "a conservative mining engineer places a value on the ore of two hundred and fifty million dollars. An expert who recently visited the property stated that he had examined 72 different molybdenum mines and this property contained more ore than all of the other 72 put together." which is a stupid assertion for any reputable engineer to make. The property is described in the Eng. & Min. Journal, December 13, 1919.

A small mill, 5 miles from the mine, was rented and October, 1919, 35 tons of ore were treated that yielded 25 tons of 85% concentrate. It is proposed to erect a hydro-electric plant and 200-ton flotation mill.

Calculating on basis of 1 ton of concentrate from 74 tons of ore, a recovery of 85%, and a market price of 50 cents per pound of molybdenite it is contended that the revenue would be $850, operating cost $403, and profit $447 on 1 ton of concentrate. This multiplied by 2½ tons daily output from the new mill for 300 days per year, gives a total profit of $335,286.

SACRAMENTO COPPER CO. **NEW MEXICO**

Address: 310 Two Republics Bldg., El Paso, Texas. **Mine office:** L. C. Sutton, mgr., Tularosa, N. M.

Officers: Ed. Mechem, pres.; Eli Knight, v. p.; R. B. Rawlings, sec.-treas., with W. P. Stiles, T. J. Stafford and J. M. Gale, directors.

Inc. March 28, 1916, in New Mexico. **Cap.,** $750,000; 50c par; 250,000 issued.

Property: 54 claims, 1,080 acres, 6 miles N. E. of Tularosa, N. M., covering Copper Basin, at head of Coyote creek, at base of White Mtns.

Development: by 200′ incline shaft and various test pits and cuts. The whole area is to be explored by drilling before mine equipment is ordered. It is said that at a depth of 100′ copper ore was cut and 34′ of ore passed three assaying 1 to 7%; at 400′ there was 10′ of 2 to 9% ore.

SAN LAZARUS MINES CO. **NEW MEXICO**

Office: 2837 Hennepin Ave., Minneapolis, Minn. Mine near San Pedro, Santa Fe county, N. M. Company has been idle for many years. Property is fully described in Vol. XIII.

SANTA FE GOLD & COPPER MINING CO. **NEW MEXICO**

Office: 11 Broadway, New York City. **Mine office:** San Pedro, N. M.

Property: 279 acres of patented mining claims in Santa Fe county and 31,594 acres of miscellaneous grazing lands comprising the San Pedro grant in Santa Fe, Sandoval, and Bernalillo counties and in addition 300 acres of grazing lands comprising the Canon del Agua grant in Santa Fe county.

Early in 1918 the mine was closed due to lack of ore. Is a Lewisohn company, operated while high metal prices prevailed, but whose dimin-

erves, probably do not warrant working under present excessive prices supplies and labor. Fully described in Vol. XIII.

VANNA COPPER CO. **NEW MEXICO**

Address: Henry Hovland, Lonsdale Bldg., Duluth, Minn. Mine near ios Altos, N. M. I. J. Stauber and I. L. Wright, lessees.

Inc. September 16, 1908, in Arizona. **Cap.**, $2,000,000; $10 par. The npany was a merger of the Copper Gulf Mining Co. and Comanche ning & Smelting Co., and also absorbed the Casa Grande Development , owning in fee simple all property formerly owned by the Comanche ning & Smelting Co. and holding all but 320 shares, or 99.36% of the ck issue of the Copper Gulf Mining Co. In January, 1919, the company l 149,000 shares of full-paid stock outstanding. Cash balance, February 919, was about $10,000.

Property: 17 claims, 16 patented, in the Pinos Altos district, 4 patented ims in the Anderson district, and 1 patented claim in the White Signal trict. The claims in the Burro Mountain group sold January, 1916, to elps, Dodge & Co., for $700,000, constituted the principal and most val- le holdings. The Comanche group comprised 43 claims. The Copper lf group consisted of 1.440 acres. The Jennie group of 4 claims, patented 0, on the Gila river, 35 miles N. W. of Silver City, is not worked owing its inaccessibility, and development on the Chloride Flat property has n confined to assessment work.

NORITO COPPER CORPORATION **NEW MEXICO**

Office: 34 Pine St., New York. **Mine office:** Senorito, Sandoval county, w Mexico.

Officers: H. B. Walmsley, pres.; W. E. Greenawalt, v. p.; J. A. Kern, ; H. W. Webb, treas. J. T. McLaughlin, supt.; W. L. Bain and Oswald :ker, cons. eng.

Inc. November, 1916, in New Mexico. **Cap.**, $1,250.000, in $1,000,000 nmon shares at $1 par, and $250,000 cumulative 8% pfd. shares at $10 par, ivertible on call at par to common. All common shares are outstand- and 4,100 shares of pfd. are outstanding. Common listed on New York b. Empire Trust Co., New York, transfer agent.

Property: 22 claims, 400 acres, in the Naciemento district, Jemez moun- is, 2½ miles from Senorito, N. M. The most important mines are the eka mine, consisting of Conglomerate No. 1 and Conglomerate No. 2 s, and the Copper Glance mine. Some of the property was worked by Juratrias Copper Co., now dead.

Development: considerable tunnelling, etc., exposing a large deposit of -grade ore. A U. S. Geological Survey report in 1910 said that the ore the Copper Glance claims consisted of sulphides, carbonates and sili- of copper in white, to reddish sandstone or grit. The ore beds aggre- about 100′ thick. The average ore will probably be low grade, which applies to the Conglomerate claims. Management reports about 800,- tons of ore in place and several thousand tons on dump running up to copper in the carbonate ore, also, high grade sulphide ore.

Equipment: includes, a sintering plant, a 50-ton smelter, sawmill, power- nt and necessary buildings.

Leaching trials were made on the ore in 1915 by W. E. Greenawalt of ver, producing copper at under 5c per lb., including mining and milling. mpany does not claim to be able, under existing costs, to attain this re- . The property was sampled in Oct., 1916, by R. S. Ransford for J. G. & Co. Late in 1917, a group of strong interests agreed to drill and the entire ore beds in consideration of their being granted an on 501,000 shares, representing control of the company. Exploration ced in April, 1918, and later it was announced that property con- approximately 3,300,000 tons of ore. Property apparently has con- merit.

FF MINING CO. **NEW MEXICO**

ress: F. G. Kaermer, mgr., El Paso, Texas.

Inc. in Arizona. **Cap.**, $30,000.

Property: 2 claims, 40 acres, on Caballo mts., near Rincon, contains a blanket deposit and a fissure vein 4 to 6′ wide in limestone. Ten tons of ore daily, containing 22% manganese and 27% lime, are treated in a lime kiln turning the lime carbonate into quicklime. Washing out the lime as white emulsion leaves the manganese in concentrated state with but little loss in tailings. No crushing is necessary.

Development: by 35′ vertical and 15′ incline shaft, and about 100′ of prospect holes.

SIERRA CONSOLIDATED MINING CO. **NEW MEXICO**

Out of business. Property taken over by Statehood Mines Co., both of which companies were reported forced into bankruptcy through incompetent management and spectacular get-rich-quick financing. Mine now operated by the Snake and Opportunity Mines Co., which see.

SILVER GLANCE GROUP. **NEW MEXICO**

Address: Joseph Oliver, owner, Box 112, Fairview, N. M.

Property: 200 acres, at Mineral Creek, Apache mining district, Sierra county, said to show veins containing 10% copper, and 20 oz. silver per ton. Property is developed by 150′ shaft and about 400′ of tunnelling.

SNAKE AND OPPORTUNITY MINES CO. **NEW MEXICO**

Address: 50 Broad St., New York City, N. Y. **Mine office:** Hillsboro, N. Mex.

Officers: H. L. Carr, pres.; E. F. Carlson, v. p.; E. L. Kerstetter, sec.-treas.; N. C. Sheridan, mgr.

Inc. June, 1919, in Delaware. **Cap.**, $1,000,000; $1 par; 800,000 shares outstanding. Company is controlled by the Mines Holding and Operating Corporation of New York, through ownership of 450,000 shares of stock together with an option on 200,000 additional shares.

Property: 28 claims, 5 patented, about 400 acres, near Hillsboro, Sierra county, formerly owned by the Sierra Consolidated Mining Co. and later by Statehood Mines Co., both of which companies were reported forced into bankruptcy through incompetent management. Property contains gold bearing fissure veins in andesite.

Development: by 3 shafts, 570′, 458′ and 240′ deep. Company reports 170,000 tons of low grade ore, assaying $5-$10 per ton, broken in the stopes having been left by former operators as filling.

Equipment: 50-h. p. gasoline hoist, compressor, 100-gal. pump and 1 engines.

Reported that property produced over $2,000,000 gross, previous to 19 Present company expects to ship in 1920.

SOCORRO MINING & MILLING CO. **NEW MEXICO**

Office: J. D. Fackenthal, 165 Broadway, New York. **Mine office:** Mogollon, N. Mex. D. B. Scott, gen. mgr. in 1920.

Officers: Wm. Childs, Jr., pres.; Harry Balfe, v. p.; Robt. T. Neeley, v. p.; J. Diehl Fackenthal, sec.; Adam K. Luke, treas.; with Wm. A. Barber, Henry D. Hotchkiss, A. L. Williams, David Luke, directors, in 1917.

Cap., $2,000,000; par, $5. Company is in hands of a receiver, and reorganization is planned. On November 10, 1919, 42,177 shares were sold at public auction in New York at $1,085 for the 5 lots.

Bought entire holdings of Mogollon Gold & Copper Co. for $100,000 at public sale in Socorro, N. Mex., August, 1915. Sale ordered to satisfy judgment of $416,626, obtained by Equitable Trust Co., New York, holders of bonds to that amount.

Property: 66 claims, partly patented, over 1,200 acres, including the Cooney, Peacock, Little Charlie, Independence, and Fluoride groups, sometimes known as the Silver Bar mine, in the Cooney district of the Mogollon mountains, 85 miles N. E. of Silver City, the nearest rail point. The Fair is the principal mine, it having yielded $4,869,000 in gold and silver; followed by the Cooney with $1,700,000 in copper and silver. See account by D. B. Scott in Bull. A. I. M. & M. E., February, 1920.

Geology: the property shows porphyry and andesite, carrying the Fanny ire vein of 5 to 10′ average width, with a paystreak of about 3′ average 30′ maximum width, having numerous narrow feeders, some of which y high value gold. Ores include slightly auriferous and strongly argen- ous chalcopyrite, bornite and chalcocite, claimed to carry increasing r values at depth, and the east vein has been said to show native cop- at depth of 600′.

Development: 3 mines—the Fanny, Johnson and Cooney. The Fanny a 1,200′ shaft, and the Johnson, a mile west, has 400 and 450′ incline ts. The Fanny is the largest mine of the district and the chief pro- r. There are also various tunnels on the several groups with an ap- timate total of 30,000′ of workings.

Equipment: includes hoists, compressor, aerial tram and 250-ton mill, ball-mills and cyanide plant. The power plant has four crude oil nes developing 960 h. p.

The old mill was destroyed by fire in October, 1917; late in 1918, the plant was put in operation, but was closed and all work ceased April 1, . In March, 1920, property was acquired by American Silver Corp. of it Virginia.

ATEHOOD MINES CO. **NEW MEXICO**

Preceded by the Sierra Consolidated Mining Co.

Property taken over by the Snake and Opportunity Mines Co., which see.

EPLE ROCK DEVELOPMENT CO. **NEW MEXICO**

Out of business. Formerly at Steeple Rock, N. M.

Property: the Carlisle and Jim Crow groups, 33 claims, sold to George tter, in 1914, who sold it 1915 to H. K. Welch and S. McKeever, of York, who organized the Carlisle Dev. Co. See Utter, Geo. H.

NSET COPPER CO. **NEW MEXICO**

Probably dead. See Vol. XIII. Former address, care L. M. Stiles, ., Box 393, El Paso, Texas.

SQUEHANNA MINING CO. **NEW MEXICO**

Address: C. J. Plankenhorn, sec., Williamsport, Pa. Company suc- ed North American Copper Co., described in Copper Handbook, Vol.

Property: 9 claims, patented, in the Pryamid and Virginia districts, near dsburg, containing copper, silver and iron. Part of property was ked by lessees in 1915 and 1916, but no recent reports received. Fully ribed in Vol. XIII.

OS MINING CO. **NEW MEXICO**

Mine office: Twining, N. Mex.

Probably idle as no recent returns have been received.

Officers: A. Clarence Probert, pres.-mgr., P. O. Box 56 Taos, N. Mex.; B. Bidwell, v. p.; J. Wright Giddings, sec.; H. F. Probert, treas., with ry W. Davis, directors.

Inc. November 11, 1914, in Delaware. **Cap.**, $2,000,000; shares $10 par; 3,090 outstanding. Annual meeting, last Monday in January.

Property: 15 claims, 4 patented, 333 acres in Rio Hondo mining dis- near Twining, said to carry copper-gold-silver ore in schist and ss, averaging 2½% copper, $4.17 gold and 5 oz. silver per ton. De- ed by 1,800′ vertical tunnel and several shorter tunnels.

Equipment: includes air compressor and concentrator.

AS CANYON MINING & MILLING CO. **NEW MEXICO**

Office: C. S. Cleaver, 5427 University Ave., Chicago, Ill. **Mine office:** Dodd, supt., Organ, N. M.

Officers: E. H. Bickford, pres.; C. S. Cleaver, sec.; H. R. Gottman, .; also directors.

Inc. January, 1917, in New Mexico. **Cap.**, $100,000; $100 par.

Property: 8 claims in Texas canyon, Organ mountains, 7 miles E. of an, Don Ana county, N. M. Examined by C. M. Becker.

Development: by short tunnels. Ore averages 0.43 oz. gold, 14.05 oz silver, and 2.3% copper. Faulting is evident through the property. Not enough work done to place any value on mine. No recent returns securable.

TORPEDO MINE. **NEW MEXICO**

Address: Robert McCart, El Paso, Texas, who with P. D. Thompson and Roland Cox, of New York, are the owners.

Property: in Organ mountain district, near Las Cruces, N. M. Formerly under lease to Phelps, Dodge & Co., who withdrew from their lease early in 1918.

Development: several thousand feet of underground work done in search of lead-zinc ore.

TRI-BULLION SM. & DEV. CO. **NEW MEXICO**

Office: 10 Wall St., New York. **Mine office:** Kelly, Socorro county, N. Mex.

Officers: J. O. Wall, pres.; S. W. Traylor, v. p.; with G. C. Van Tuyl, Jr., W. B. Nash, H. V. M. Dennis, Jr., J. M. Henderson, A. S. Somers, S. F. Dominick, Gustavus Taylor and Frank Coenen, directors; D. O. Dever, sec.-treas.

Inc. 1903, in Arizona. **Cap.,** $5,250,000; shares $5 par; in 50,000 participating cumulative 4% stock with 1,000,000 common; issued 6,700 shares preferred and 999,900 shares common. Listed on New York Curb. Empire Trust Co., New York, transfer office.

Property: about 115 acres, at Kelly, N. M., including the Nit and Silver Bell groups asquired in 1912. The Nit mine, adjoining the Graphic, has an underground connection with the Waldo mine of the Ozark Smelting & Milling Co. The workings of this mine disclose a 50′ vein of 4.7 to 6% copper ore, 454′ E. of the 215′ shaft, in a crosscut from the bottom of a 45° winze sunk from the bottom level. Company owns also 2 copper and lead claims about 150 acres, known as the Starlight group, in the Stanley Butte district, Ariz.

The Tri-Bullion Co., suffered a loss of over $32,000 from embezzlement by its former treasurer in 1913-15. Property now in good hands, and with an able consulting engineer has a promising future.

TULAROSA COPPER CO. **NEW MEXICO**

Office: Tularosa, N. M. **Mine office:** Bent, Otero county, N. M.

Officers: E. P. Kern, pres.; H. E. Forrester, v. p.; G. B. Kent, sec. and gen. mgr.; W. F. Drake, treas., with J. A. Thatcher, A. J. Merrill and P. M. Lynch, directors.

Inc. March 5, 1905, in New Mexico, as successor of Tularosa Mining & Milling Co. **Cap.,** $5,000,000; shares $5 par; issued, $3,500,000. Stock listed on New York Curb. Registrar & Transfer Co., New York, transfer office.

Property: 807 acres, 307 acres, patented, at Bent, on the Tularosa river. Mine is 12 miles N. E. of Tularosa on the E. P. & S. W. R. R., about 100 miles N. E. of El Paso, Texas.

Geology: the property is underlain by a flat sheet of diorite resting on quartzite and covered in general by the basal sandstone of the Red Beds of the region. This diorite outcrops at the Virginia mine, as the company's workings are called, and dips gently in every direction away from this point. The ore is found in the uppermost part of the diorite, which is much altered to a depth of 35 to 55′ below its surface. This ore body shows lenses of glance, 2 to 18″ wide, running in all directions, which together with stringers and veinlets of ore, make a stockwerk proved to be ore-bearing over an area 200′ wide and about 1,200′ long. The altered rock between the lenses also carries disseminated copper glance and the ore as a whole averages 2½% copper; 30 to 55′ below the diorite surface the rock is fresh except along fractures; stringers of ore occur, however, at depths of several hundred feet.

Development: at the Virginia mine there is an open pit 60 by 120′ across and 35′ deep which is opened on the richest part of the deposit. The

evel corresponds to the bottom of the pit; the 2nd level is 25′ deeper. : workings are said to block out 85,398 tons of ore in an area of 105x n extent. Twelve diamond-drill holes from 88 to 400′ deep prospect round, and the results form the basis for an estimate of 800,000 tons licated ore of an average value of 2½% copper.
'roperty was to be drilled in 100′ squares and the limits of the orebody determined. One drill-hole encountered 136′ of ore at a depth of

:quipment: includes a 12,000′ ditch, hydro-electric plant, and concen- r of 300 tons capacity.
n a circular published by New York brokers it is stated that Tularosa ll the potent essentials to make just as great and valuable a property ıino, Ray, Inspiration and Miami; and is today practically the one big, veloped porphyry copper area that shows the existence of a wonderful ›dy that needs only development, which is being aggressively pushed. :ompared with other deposits of similar character, this one is, in our on, small and the ore bed thin, averaging perhaps 35′, while the ore ves are not large enough to compare with those of any of the copper hyries. The property does not warrant a large mill.
The orebody may, however, extend over a greater area, and a drilling ›aign should be made. The new parties in control have had wide rience in mining and possess ample means to test the property thor- ly.
No information available for two years, so presumably dormant.

.LOCH GOLD & COPPER CO. **NEW MEXICO**

Address: D. H. Tulloch, pres., Silver City, Grant county, N. M.
Idle. Property fully described Vol. XIII.

A PEAK GOLD & COPPER MINING CO. **NEW MEXICO**

Office: Portage, Wis. Mine and mill at Tusa, Rio Arriba county, N. M. I. Owen, pres.; R. J. Rosenfeld, sec.-treas.
Mine has been closed down since 1910. See Vol. XIII for full de- tion.

IDALE COPPER MINING CO. **NEW MEXICO**

Inactive or dead. Described in Volume XIII.
Property being operated by the Bonney Consolidated Copper Co., h see.

ONE—EL PASO COPPER CO. **NEW MEXICO**

Address: 1115 N. Kansas St., El Paso, Texas. **Mine office:** Tyrone, f.
Officers: R. M. Dudley, pres.; T. Lia, v. p.; N. F. Work, sec.-treas.; J. F. Ross, J. H. Maxey, R. K. Bell, H. L. Watson, J. B. DuBase and Mortinez, directors.
Inc. Nov. 31, 1917, in New Mexico. **Cap.**, $1,500,000; $1 par.
Property: 23 claims, 400 acres, 2 miles S. of Tyrone, N. M., said to v disseminated copper-silver-sulphide ore in porphyry, assaying 3.4% er and 2 to 6 oz. silver per ton.
Development: by 260′ shaft sunk during 1917. No later returns re- d.

TED STATES COPPER CO. **NEW MEXICO**

Office: 1639 Broadway, New York. **Mine offices:** Hanover, and Pinos , N. M.
Officers: J. W. McAlpine, pres.-treas.; C. B. Manville, 1st v. p.; A. E. n, 2nd v. p.; J. T. Janes, supt.-sec. Hardscrabble group, Pinos Altos, l; W. P. Fletcher, supt., Philadelphia mine, Hanover, N. M.
Inc. April, 1911, in New Mexico, as a reorganization of the Philadelphia per Mines Co. **Cap.**, $1,500,000; $1 par; all outstanding. Registrar & nsfer Co., New York, registrar; Security Transfer & Registrar Co., New k, transfer agents.
Property: totals about 297 acres divided into 2 groups, the first at Han- in the Central mining district, consisting of about 80 acres, 8 claims, 2

of which are the townsite of Hanover, the remainder known as the Ph delphia mine; the second group, 9 miles distant, 14 claims, 212 acres at Pi Altos, known as the Hardscrabble mine. Company also owns the Ra Davidson sawmill near the Pinos Altos property.

Development: at Hanover, by 2 main shafts, north, No. 1, and so No. 2, 200′ and 712′ deep, respectively, together with some minor shafts, about 4,000′ of workings. Early in 1919, company was stoping from 700′ level where heavy mineralization and stringers of chalcopyrite bornite, dipping east, indicate large orebodies nearby. No work was be accomplished at the Pinos Altos property in 1919, but management beli this to be a very valuable mine, following a heavy mineralized grano-dio dyke and traversed by several veins, dipping west, running N. E.-S. The country formation is monzonite porphyry, grano-diorite and gran Previous operators sunk 29 shafts from 20 to 150′, mostly inclines on veins.

Equipment: includes 2 hoists, each capable of reaching 2,500′ de steam plant, compressor, pump and sawmill.

Production: from both mines about $180,000 from development from upper levels by previous operations. In 1917, shipments of 12 c carried from 3.40 to 18.00% copper, with $3 for silver and gold, and 40 to 60% iron. It returned over $1,000 net per car. This was from Hanover mine. Ore from the Pinos Altos mine returned from 4 to 2 copper and 16 to 39 oz. silver per ton. In November, 1917, P. A. New who was selling the company's stock under a contract, which he failed carry out, brought suit against J. W. McAlpine for non-performance of co tract, but the trial resulted in a verdict against Newman. Management eliminated undesirable associations and has made progress in mine devel ment, so that the future seems to promise success.

UTTER, GEO. H. **NEW MEXI**

Office: 329 Cedar Ave., Long Beach, Calif. **Mine office:** Steeple Ro N. M.

Property: the Carlisle, East Camp, Jim Crow, and Summit group mines in Steeple Rock district, N. M., acquired from the Steeple R Development Co., which is out of existence.

The Carlisle Group.

Consists of 3 patented claims and millsite, in the Steeple Rock Mi district, Grant county, N. M., 15 miles N. E. of Duncan, Ariz. The ore free-milling gold and silver down to 300′, where it changes to base carrying galena, sphalerite, and chalcopyrite with small amounts of g and silver.

Development: by 500′ shaft with winze to 600′ level, showing in pla a width of 40′ feet′ of mineralized lode matter.

Equipment: includes a 100-ton concentrator and flotation mill.

Production: in 1918 totaled 2,500 tons yielding 50% lead, 10% zinc, 4 copper, 80c. to $2 gold, and 13 oz. silver per ton. Also produced 175 tons complex zinc-copper ores. Not operated in 1919, but kept unwatered. part leased to Eastland and others, who have opened some good ore

East Camp Group.

Consists of 8 claims, patented, 118 acres, Grant county, 18 miles N of Duncan, Ariz. On one of the claims two quartz veins join. The N get mine, of this group was operated in 1918.

Development: by shafts, 200 and 300′ deep and some tunnels Ve about 3′ wide contain gold and silver. Property was worked in the 70s. most of the old workings are now caved.

Jim Crow-Imperial Mines.

Consists of 8 claims, patented, 123 acres, 11 miles N. E. of Dun Ariz., but in the Steeple Rock mining district, Grant county, N. M. T mine contains a fissure vein with many branches, in eruptive rock. T

about 4' wide carries ore said to assay 0.65 oz. gold and 10 oz. silver on.

levelopment: by four shafts, two of which are 100' deep, the third 200' and the last 300' deep. **Equipment:** includes 25 h. p. hoist, compressor, engines of about 50 h. p., etc.

roduction: mine was idle from 1896 to 1914; previous production es- d at $50,000 in gold and silver. Ore shipped in 1915, averaged 0.7 oz. and 40 oz. silver per ton.

Summit Group.

onsists of 10 claims, patented, 180 acres, 16 miles N. E. of Duncan, in Steeple Rock mining district, Grant Co., N. M. Mine shows 2 fis- eins running through the property N. E.-S. W.

evelopment: by 2 tunnels, 120' and 470' long, a 264' shaft and 3 open Owner reports 2 oreshoots 12' wide by 50' long, assaying $7 to $8 nd silver per ton, and the outcrop assaying from $10 to $50 per ton. [r. Utter also owns the Apex and Ballali gold-silver mines, the former miles N. W. of the Carlisle, and the Ballali adjoining the Norman mine, leased to Christy, and others of Clifton, Arizona, and in which ore was opened in 1919. Two cars sent to El Paso netted $13,500. ly, 1919, the New York's Gift group was sold to Jos. Hardy and as- es of Duncan, Ariz., the consideration being $15,000, cash.

'ORIA MINING AND SMELTING CO. **NEW MEXICO**

ankrupt. Holdings bought by C. J. Boyd of Los Angeles at sheriff's December, 1915.

roperty: 2 groups, 1,000 acres, 20 miles apart, the Southern group en Organ and San Andres Mts.; the other in Plomo district, San s range, 35 miles N. E. of Las Cruces. Claims said to show silver- ores.

'OR SMELTING & MINING CO. **NEW MEXICO**

ddress: Gage, N. M. Company is a close corporation.

fficers: J. T. Duryea, 437 E. 162nd St., New York, pres. N. J. Welsh, Benito Colonna, supt.

roperty: 9 claims, 8 patented, 136 acres in Victorio mining district, county, 3½ miles south of Gage. Mine was operated by the Hearst- in interests in 1880-1890, and purchased by present company in 1907; d intermittently since by leasers. Management describes property ving two vein systems, the primary system being fissures in limestone, eling and dipping toward a N. E.-S. W. fault fracture; these are con- d with the fault fracture and with one another, irregularly, by a dary system of veins which strikes N.-S. and dips east. Ore assays % silica, 20-25% iron and 7-10% line.

evelopment: by 300' vertical shaft, 100' incline shaft, and about 4,000' rkings. Company plans to sink a new vertical shaft 500' or 400' below nt deepest workings. **Equipment:** includes 2 hoists and compressor. **roduction:** $1,500,000 in the past. Present management reports 100- ns monthly production.

TERN MINING & DEVELOPMENT CO. **NEW MEXICO**

robably out of business. See Vol. XIII.

TE OAKS MINES CONSOLIDATED, INC. **NEW MEXICO**

line office: White Oaks, N. M.

eported, 1916, that "internal dissension arose in the White Oaks Co.'s gement, and rather elaborate plans for reopening the mines have ap- tly been abandoned." No recent returns have been received. Fully bed Vol. XIII.

O GOLD & COPPER CO. **NEW MEXICO**

ddress: G. E. Moffett, supt., Alamogordo, N. M.; E. M. McClintock, El Paso, Texas.

ac. 1916, in New Mexico. **Cap.,** $250,000; shares $1 par; non-assess- 140,000 issued.

roperty: 3 claims, 55 acres, in Silver Hill district, Jarilla mountains,

Otero county, N. M., said to show a contact deposit in limestone. Ore ries 2.5% copper, 0.1 oz. gold and 1 oz. silver.

Development: about 1,200′ of tunnels.

Production: lessees in 1916 mined ore which contained 120,000 lb c per. No later returns available.

NEW YORK

CANOPUS IRON CORPORATION — NEW YO

Offices: Garrison, N. Y., and Phillipstown, Putnam county, N. Y. J. Pearse, supt.; E. Maltby Shipp, cons. eng.

Inc. in New York. **Cap.,** 100,000 shares; $10 par. Listed on New Y Curb, but stricken from list on October 21, 1919. U. S. Corporation transfer agents.

Property: corporation owns in fee the minerals under 140 acres, the surface in fee of 40 acres, at Phillipstown, Putnam county, N. Y. miles from the Hudson river and from rail, and 49 miles from New Y Examined by G. O. Angell, who endorsed reports of the above nam officials.

The ore is magnetite, and deposit outcrops for 2,200′, varying in 40 to 180′ in width. A 2,000-ton shipment averaged 64% iron, 3.27% 0.27% sulphur, and 0.11% phosphorus. Concentrates from low-grade contain from 66.01 to 68.95% iron, 2.12 to 4.75% silica, 0.138 to 0.165 phur, and 0.025 to 0.037% phosphorus.

Development: in shaft at depth of 165′ the orebody is 25′ wide, a thickness of at least 75 or 100′, is expected, as magnetic needle readi indicate 180 to 190′ in width. Company assumes an average width of 5 400′ depth, with reserves estimated at 6,000,000 tons. The Forest of D mine, due west, has been mined to 1,100′ in depth and has shipped ore over 100 years. Equipment and houses are being erected.

With iron ore at 12c per unit, 60% shipping ore is said to be wo $7.20 per ton. Freight to eastern Pennsylvania furnaces is given as $2 per ton, while mining and placing ore on cars or boat is $1.70, mak total cost of $3.95. On this basis a profit of $292,500 per annum (300 d is calculated, or a return of 29.25% on capital. The company's shares extensively traded in on the New York Curb, and the property well vertised, but thus far the share market seems to have received more tention than the mine.

CHATEAUGAY ORE & IRON CO. — NEW YO

Address: Lyon Mountain, Clinton county, N. Y. Jos. R. Linney, m Chas. W. Carpenter, purch. agent.

Property: at Lyon Mountain, Clinton county, in the Adirondack M Ore is a standard low phosphorus, assaying 28% iron, .007% phosph .09% manganese. Open pit and underground methods used.

Equipment: includes magnetic concentration mill.

Production: in 1918 amounted to 44,359 tons. Total output, 5 tons.

DOUGLAS, LACEY & CO. — NEW YO

Company was notorius promoter of numerous mining and oil pro sitions and was in hands of a liquidating organization, known as the Am gamated Properties, Inc., at last accounts. Mr. Stevens' opinion of t firm and their clever scheme for obtaining money from small investo fully described in Vol. X, under the title given above and that of the Am gamated Gold & Copper Co. of Arizona.

GRANT MINE — NEW YO

Mine near Carmel, Putnam county, N. Y. The orebody consists complex of arsenical sulphides, carrying copper, quicksilver, gold and The crude ore is estimated to have a gross value of about $25 per but, on account of its refractory nature, has no present commercial

ıd cannot be utilized without special metallurgical treatment. Closed own for several years.

IATHESON LEAD CO. **NEW YORK**

A subsidiary of National Lead Co., New York, and described there- ıder.

IINES HOLDING & OPERATING CO. **NEW YORK**

Address: 50 Broad St., New York City.

Officers: Wm. R. Jones, pres.; Jackson B. Sells, 1st v. p.; Homer L. arr, 2nd v. p.; E. L. Kerstetter, sec.-treas., with B. Brown Barker, Wm. . Hoffman and Frank H. Rogers, directors.

Inc. July 3, 1919, in Delaware. **Cap.**, $3,000,000; $1 par; 1,600,000 issued.

Company controls through stock ownership the following companies: lidnight Mining Co., Idaho (1,310,595 shares), Onondago Mines Corpora- on, Nevada (277,560 shares), Snake & Opportunity Mines Co., New lexico (450,000 shares). Also has option on 200,000 shares additional of ıake & Opportunity Mines Co. The companies are all in the development age and are described under their respective titles.

EW YORK PYRITES CO. **NEW YORK**

Address: 25 Broad St., New York City.

Property: near Gouveneur, St. Lawrence county.

ICHOLS COPPER CO. **NEW YORK**

Office: 25 Broad St., New York. **Works office:** Laurel Hill, Queens ›unty, N. Y. Employs about 1,500 men.

Officers: C. W. Nichols, pres.; J. B. F. Herreshoff, v. p.; J. A. Church, ., sec.; Edw. R. Nichols, treas.; M. E. Harris, auditor.

Inc. May, 1905, in New York. **Cap.**, $10,000,000; reduced 1912 to $7,000.- 00; $1,000,000 preferred stock issued 1914; shares $100 par; bonds $3,000,- 00. Is the successor of Nichols Chemical Co. The American Metal Co., td., owns 1,400 pfd. and 9,805 com. shares and 450 bonds, its share interest ıualing 14% of capital, and total investment $1,570,500.

Dividends: to Oct., 1914, at rate of 6% per annum, paid quarterly on ›mmon stock; then a break of 2 years, with a disbursement of 4% in ecember, 1916.

Works: the Laurel Hill plant includes a smelter and electrolytic re- ıery, with steam and electric power.

The smelter has a Herresshoff water-jacket blast furnace of 600 tons ted daily capacity.

The electrolytic plant is operated on the series system, and has 550 nks. Anodes are cast. The final product is cast mainly into wire bars. his company enjoys a deservedly high reputation for the purity of its oduct and the efficiency of its metallurgical practice. Is the largest ectrolytic refining plant in the world; capacity about 45,000,000 lb. of ›pper per month.

The works do a very extensive custom refining business, treating ainly ore and matte from outside producers in the smelter, and Western ister copper in the electrolytic plant. The works handle all the bessemer ›pper from the Phelps-Dodge properties, and from the Old Dominion, alumet & Arizona, East Butte, Granby and Ducktown companies, and hers. The mining properties at Capelton, Quebec, were taken over by the lbert Copper Co.

ORTHERN ORE CO. **NEW YORK**

Address: Edwards, St. Lawrence county, N. Y.

Officers: T. I. Crane, pres.; W. D. Blackmer, mgr.

Inc. in New York and operated as a close corporation.

Property: 650 acres of mineral-bearing territory located along a belt limestone at the contact with gneiss. The formation is cut by various ins and lenses of zinc-pyrite ore. Four of these orebodies are being de- ed and worked.

Development: by 900′ vertical shaft and 700′ incline (dip 50°). connected the 400′ level.

Equipment: includes hydro-elec. power with auxiliary steam-elec. generating plant of 500 h. p. Each shaft is equipped with hoisting plant and ore bins. Surface tramming to the concentrator is done with a gasoline locomotive. A central electrically driven compressor supplies air for both mines. The concentrating mill consists of standard crushing and tabling machinery. The mixed zinc-pyrite concentrate made on the tables is separated into a high-grade zinc blende concentrate and pyrite, both of which products are shipped.

Production: 125 to 200 tons of crude ore per day. Shipments amount to 1,000-1,200 tons zinc concentrate and 500-600 tons pyrites per month.

ST. LAWRENCE PYRITES CO. **NEW YORK**

Offices: 41 Broad St., New York, and DeKalb Junction, St. Lawrence county, N. Y.

Officers: Rudolf Metz, pres.; F. T. Rubidge, v. p. and gen. mgr.; W. J. Kingsbury, sec.; R. M. Atwater, Jr., treas.; O. F. Pattberg, supt.

Property: located in DeKalb Twp., St. Lawrence county, includes the Stella mines, and is one of the four largest pyrite mines in the U. S.

Ore: pyrite, occurring in lenses or veins in gneiss and schist. The oerbodies strike and dip in the same general direction as the gneisses, strike N. E., and dip 20° to 30° N. W. The walls are not sharply defined: the average assay is about 21% sulphur.

Development: by 2 shafts 1,600′ apart on parallel deposits. The north shaft, the Stella, is idle; here the orebody extends 400′ along the strike, averages 10′ in thickness and has been worked to a depth of 900′ on the dip. The operating shaft, the Anna, opened by levels 50′ apart vertically, has an orebody opened for 1,500′ on the strike, and average thickness of 20′. The ore is put through a crusher at the shaft before sending to the mill.

Equipment: includes a 700-ton mill with gyratory crushers, trommels, rolls, jigs, and tables. In cold weather the concentrates, to prevent freezing, are dried in a Ruggles-Coles cylindrical dryer. Concentrate assaying 44% sulphur, is sold to sulphuric-acid manufacturers and to paper mills. Power is electrical, obtained from a hydro-electric company for about $3 per h. p. per year. The property was thoroughly described in E. & M. Journal, April, 1913, p. 689.

Production: approximately 150,000 tons ore per year, yielding about 60,000 tons concentrates.

ST. NICHOLAS ZINC CO. **NEW YORK**

Practically dead. **Former office:** 37 Wall St., New York City.

Inc. in Delaware. **Cap., $1,000,000; $1 par.** Stockholders authorized the issuance of $70,000 five year 1st. mortgage 6% bonds, June, 1918. The company came to grief in 1918 and the president W. J. Pierce leased the holdings to the Summitville Ore Concentrating Co., Inc., presumably without consulting the wishes or interests of the stockholders. The Summitville company of which Pierce was an officer, filed an execution for $44,6 against the Nicholas property with the sheriff of Sullivan county on Mar 14, 1918, and despite the efforts of a Stockholders Protective Committee with offices at 2711 Grand Central Terminal Bldg., New York City, the Leasing company seems to have retained ownership of the mine.

Property: owned 1,050 acres between Summitville and Mamakating, Sullivan county, 90 miles N. W. of New York City.

Geology: fissure vein in sandstone or "grit" beds, which have been tilted to form the Shawangunk range. Fissure dips with slope of hill and bedding of the grits to N. W. about 45°. Ore is chiefly lead and zinc sulphides, with a little copper.

Development: upper workings opened vein 300′ below its outcrop and lower tunnel 800′ lower, a total of 1,100′. Vein is from 1 to 8′ thick and ore 8″ to several feet, averaging 2′ in upper workings.

Kirby Thomas, who reported on the mine in 1916, estimated 8,000 tons

developed ore, 10,000 tons of probable ore and 58,000 tons of prospective

Equipment: 100-ton concentrating mill erected April, 1917.

MMITVILLE ORE CONCENTRATING CO., LTD. NEW YORK

Address: Samuel Droshnicop, pres., 530 McDonough St., Brooklyn, Y.

Property: owns the former holdings of the St. Nicholas Zinc Co., at nmitville, Sullivan county, originally taken over early in 1918 under a sing agreement.

Through clever manipulation the minority stockholders of the old com- ıy were eventually deprived of their property. No report issued and sumably no work being done. See St. Nicholas Zinc Co.

TTENVILLE COPPER CO., INC. NEW YORK

Leo Lowenstein, pres.

Works at Tottenville, Staten Island, N. Y. Has an extensive copper re- ry for the production of ingot copper, brass, and bronze alloys, copper ıds and white metal.

Annual capacity, 200,000,000 lb. Brand is known as "C. T. C." copper.

ITED METALS SELLING CO. NEW YORK

Office: 42 Broadway, New York.

Officers: John D. Ryan, pres., T. Wolfson, v. p.; C. W. Welch, sec.- as.; with Wm. Rockefeller and C. F. Kelley, directors. C. S. Henry & , Ltd., 12 Leadenhall St., London, E. C., Eng., European agts.

Inc. Jan. 29, 1900, in New Jersey. **Cap.,** $5,000,000; shares $100 par; solved in 1915 and reorganized March 15, 1915, in Delaware. Is con- lled by the Anaconda Copper Mng. Co., through ownership of entire re capital.

The company does a general commission business in metals, mainly copper, and is the largest copper broker in the world, being the sales nt for the Anaconda Copper Mng. Co. and affiliated corporation, and a number of other producers, having the marketing of upwards of 000,000 lb. of copper yearly.

THERBEE, SHERMAN & CO. NEW YORK

Offices: Port Henry, N. Y., and 2 Rector St., New York City. **Mine** ce: Mineville, N. Y.

Officers: Lewis W. Francis, pres.; Moses Taylor, v. p.; Geo. C. Foote, .-mgr., with W. C. Witherbee, E. S. Peasley, C. H. McCullough, directors. E. Rogers, sec.-treas.; A. M. Cummings, supt

Founded 1849. **Inc.** 1901. **Cap.,** $3,000,000; $100 par; all outstanding; no ded debt. Regular dividends paid. Annual meeting 1st Wednesday in rch.

Property: magnetite mines in Essex and Clinton counties, and 4 mills y magnetic concentration) with a total annual capacity of 1,000,000 to 0,000 tons per year, the concentrates averaging 64-66% iron.

Company also owns 7,500 acres of ore land on the north shore of ›a, which are not being operated (1919).

NORTH CAROLINA

Companies are arranged in alphabetical order.

HBORO COPPER MINING CO. NORTH CAROLINA

Dead. Formerly operated the Scarlett mine N. of Ashboro, Randolph nty, N. C., which see. Described in Vol. XII.

DE WING MINING CO. NORTH CAROLINA

D. M. Hill, sec., 60 Federal St., Boston, Mass.

Company voted to sell all its assets and go out of business, 1917. Fully in Vol. XII.

COPPER CO. NORTH CAROLINA

Atwater St., West Detroit, Mich. Mine near Cullowhee, N. C.

Officers: at last accounts, Lewis C. Waldo, pres. and treas.; S. H. Knight, v. p.; Geo. E. Berriman, sec., with S. H. Knight, Geo. W. Clad and F. W. Olds, directors.

Inc. Oct. 12, 1901, in Michigan. **Cap.,** $2,500,000; $25 par; issued $1,585,000.

Property: 1,450 acres, freehold, including the Wayehutte mine, show 4 veins, 27' estimated average width, carrying mainly chalcopyrite, wit estimated average values of 3% copper, 4 oz. silver and $1 gold per to opened by a 55' shaft and a 200' tunnel. Lands also include an undeve oped water power. Regarded as promising if worked under proper direc tion.

COPPER KNOB MINE **NORTH CAROLINA**

Owned by Monaton Mining Co., which see.

CULLOWHEE MINING & REDUCTION CO. **NORTH CAROLINA**

Idle. Cullowhee, Jackson county, N. C.

Offices: at last accounts, S. B. Ezell, pres.; D. D. Davies, v. p.; Thos A. Cox, sec. and managing director; Chas. Davies, smelter supt.

Inc. 1905, as successor of Cullowhee Copper Co.

Property: 1,300 acres, 12 miles from Sylvia, nearest rail point, shows considerable body of sulphide ore, claimed to average about 5% copper and $4 gold per ton, probably correct for small lots of ore, but cannot be realized from a large tonnage.

Equipment: includes hoists and an air compressor, with steam and water power, latter with a plant 3 miles from works. The 30-ton smelter near Sylvia, blown in January, 1909, with semi-pyritic smelting, suspended operations late 1910, and probably will remain idle until rail connection are secured.

GARDNER-HILL MINING CO. **NORTH CAROLINA**

Company's gold-copper property, 9 miles from Greensboro, N. C. reported sold May, 1919, to H. K. English, of Knoxville, and to be reopened after an idleness of over 50 years.

GOLD HILL CONSOLIDATED CO. **NORTH CAROLINA**

Office: Room 309, No. 42 Broadway, New York. Mine at Gold Hill Rowan county, N. C.

Inc. as successor of Gold Hill Copper Co., a notorious promotion of the late Walter George Newman, known to have caught many Wall Street operators. New company, under same management, became bankrupt and property sold at auction, January 27, 1910, for $45,000. Company does not own the adjacent Union Copper mine.

Property: consisted of 1,050 acres in Rowan and Stanley counties, the Gold Hill mine, where gold was discovered in 1799. Gold quartz veins were discovered 1831, and in 1845 this mine was the largest gold producer in the United States.

Development: by 2 shafts of 615' and 830, and 2 lesser shafts. The mine was operated in 1913 and part of 1914. Shipments to the Perth Amboy smelter returned 1.5% copper and about $3 gold per ton, with small silver values. Copper occurs in minute particles of chalcopyrite in hard quartz schist and recovery by wet concentration is not commercially profitable.

Equipment: includes ten 100-h. p. boilers and a 10-stamp mill.

This company and its companion, the Union Copper Mining Co., enjoyed decidedly checkered careers. Operations conducted on a considerable scale, 1901-1903, were unsatisfactory and failed to show up the much advertised orebodies. A receivership ensued which was ended early 1906, but a receiver was again appointed, August, 1906, for the old company, on the application of Newman, on claims aggregating $352,000. In June, 1915, the Court again appointed a receiver for the property, which has been shut down and apparently abandoned by the company.

Mr. Newman evidently used this property solely for stock-jobbing purposes. The mine is considered worked out and low grade, but worthy

ome drilling in depth. At best the company could never have paid st dividends on its capitalization, and under the late management was egarded as worthy of any confidence whatever.

GUL MINING CO. **NORTH CAROLINA**

Dead. See same title under Nevada.

Property: had a 10-year lease on the Mint Hill mines, Union county, 18 from Charlotte, N. C., which was relinquished, 1917. Also controlled Proskey-Regent mine at Rawhide, Nev., by ownership of the Proskey-nt Mines Co. See Seminole-Regent Mining Co., Nevada.

IATON MINING CO. **NORTH CAROLINA**

Hopkins, Ashe county, N. C. J. B. Shale, pres., 301 W. 108th St., New City, D. W. Lloyd, mgr., Garren, N. C.

Owns the old Copper Knob mine, 160 acres, freehold, also 90 acres ellaneous lands, said to show a 30" fissure vein in hornblende slate, ing carbonate and sulphide ores, mainly bornite. Carload shipments . S. & R. Co. of N. J. said to have averaged $15 per ton in gold, silver copper. The slate wall rock also carries metal. Property was opened Has steam power, hoist, 2-drill air compressor and a 5-stamp mill.

ISBURY COPPER CO. **NORTH CAROLINA**

Idle and probably dead. Mine near Gold Hill, Rowan county, N. C. . Brown, pres.; W. S. Blackmer, sec.-treas.

Inc. 1904, in Arizona. **Cap.**, $100,000; shares $100 par.

Property: 50 acres, freehold, showing altered schists, carrying a fissure with N.-E. strike, and estimated at 4' width. Developed by a 100' shaft, ing chalcopyrite reported to carry copper and gold values. Ore can be ed by flotation and property probably worthy of careful prospecting.

RLETT COPPER MINE **NORTH CAROLINA**

Address: Frederick R. Thorns, owner, 112 Duane St., New York City. Dickens, supt., Ashboro, N. C.

Property: at Ashboro, Randolph county, N. C., formerly operated by Ashboro Copper Mining Co.

Ore: is a sulphide, carrying principally copper and zinc, with iron, ina, a trace of silver and gold, and occurs in contact and fissure veins, ing N. 40° E., with dip of 35°. Pay shoot reported to be from 2 to 5'

Development: by 120' vertical shaft and several tunnels, longest 220'.
Equipment: includes 25-h. p. hoist, compressor, pump and steam power. pecting and development work only done in 1917.Since presumably idle.

N-EDWARDS COPPER MINE CO. **NORTH CAROLINA**

Greensboro, Guilford county, N. C. Inc. Sept., 1912. **Cap.**, $100,000; es $100 par.

Owns sundry old properties, including the Twin mine, with an 18' vein, h was worked previous to the Civil War. Property shut down many rs, but company understood to be only dormant, not dead.

ON COPPER MINE **NORTH CAROLINA**

Office: care Alfred Rossiter, administrator, 60 Broadway, New York. **address:** Gold Hill, Rowan county, N. C. S. T. McKinney, mgr.

Lands: 550 acres, freehold, about 15 miles from Salisbury, in Rowan Cabarrus counties, well watered and timbered. The property has t, carrying 5 veins with average strike of N. 20° E. and practically ical dip, and 2' to 20' width. Three veins carry copper ores, the other 2, rted to carry silver and gold ores, respectively, are but slightly devel-. The copper veins are mineralized zones carrying lenticular shoots e, longest about 100' in length.

In 1916, No. 7 and 12 shafts were unwatered to 140' and work started shoot of 3% copper ore, which is 5' wide and exposed for 250'. From mber, 1916, to April, 1917, ore was shipped from shaft and dumps. drill holes near the Big Cut and No. 5 shafts cut 4% sulphide ore.

Development: is on the Big Cut copper vein, trenched at intervals for a of about 1 mile, and having 10 shafts, deepest 650'; these shafts

show a vein 20′ in width. The Big Cut vein shows oxidized ores and a lit native copper in the upper workings, succeeded by chalcopyrite, with qua gangue. Sampling by Dr. A. R. Ledoux, many years ago gave average 4.40% copper, 4 oz. silver and 40c to $1.20 gold per ton. No. 7 shaft, of 2 depth, shows a vein 4″ wide at surface and 3 to 4′ wide on the bottom le where the ore is claimed to average 4.5% copper. There are 14 shafts told, and about 5,000′ of workings. The property has been claimed, in press, to have produced about $1,000,000 worth of gold in early days.

One vein is said to carry zinc ore of low value, but is little developed

Equipment: machinery plant is extensive and includes a small exp mental flotation plant.

Buildings include a machine shop, smithy, engine-house, boiler hous office buildings, 50-room hotel, dwellings and stable.

OKLAHOMA

(For map of the Tri-State region, see page 875.)

(Companies are arranged alphabetically.)

The Miami zinc-lead field is the newest great mining region of United States.

The following excerpts from a report on the district by the R Hunt Company, give an excellent idea of its salient features.

The Miami zinc-lead fields lies in Ottawa county, the extreme nor east county of the state of Oklahoma, and extends into Cherokee cou Kansas. As now developed, it is 3 miles wide and 5 long. The Oklaho towns in the field are Commerce, Quapaw, Century, Cardin, Tar Creek, a Picher. Baxter, Kansas, is at the north edge of thefield. The Oklaho portion of the field is in Township 29 N., Range 23 east, Ottawa cou The Kansas portion of the field is in Township 35, Ranges 23-24, Cherok county.

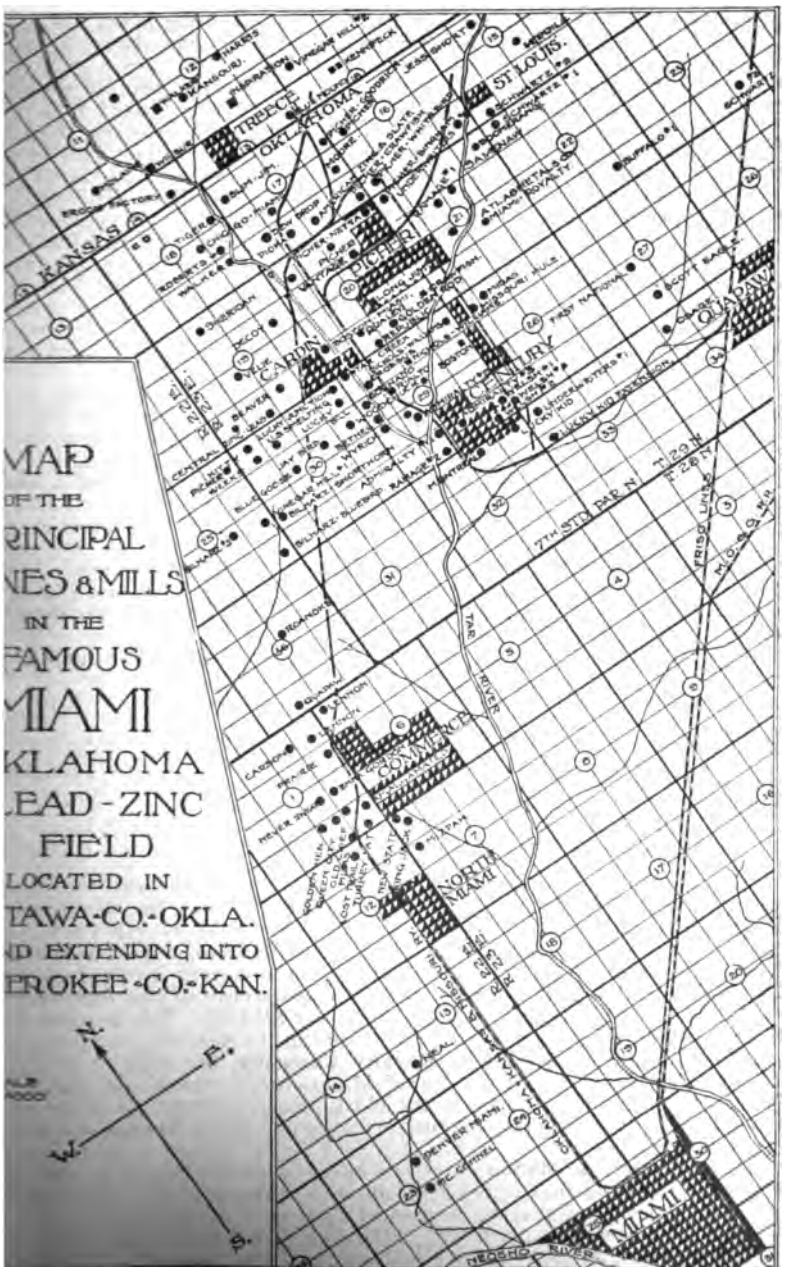
Geology: the mineralization of the Miami field occurs in trough posits of zinc and lead ores, found in the Grand Falls cherts of the Bo limestone series at various depths below surface from 100 to 300 feet. neath these cherts a very compact limestone forms a floor which water do not easily penetrate.

Water carries zinc and lead in solution until it reaches the faults overlying cherts. It rises through these fault cracks and penetrates thro the fractured and bedded cherts, depositing lead and zinc in them. greater the fracturing of the cherts, the greater the deposit of metal, as to quantity and value. The Miami or main fault of the district northeast-southwest through the district from Baxter, Kansas, to C merce, Oklahoma, and represents a throw of about 15 feet. Cross fa and fractures extend from this to East and West at varying angles. principal orebodies are formed along these cross fractures and in ground on both sides of them for a few hundred feet.

The main fault was sufficiently open to permit constant circulation water, while the side fractures retained water in a quiet state more fa able to precipitation of metal from the solutions contained. The nor west-southeast side fractures have the best ore bodies so far discovered.

The proven porton of the Miami field is within a limited area of abo five miles long by about three miles wide, in which small area are over concentrating mills. This remarkable development all occurred practic within three years. Nearly 700 churn drill rigs were in use in 1918 from 400 to 500 new holes are finished weekly.

Developments in the field generally show two principal sheets or bo ore; the upper at a general depth of 150 to 200′, and the lower between 25 300′, each bed of ore being from 15 to 30′ thick, and in some instances this thickness. It appears certain that the orebodies will prove to be more extensive, and especially much richer than drilling indicates, a



Note: Above properties described under Oklahoma, page 1270.

operations in this district have demonstrated that when the mines are open shafts and drifts the ore is from 50 to 100% richer than shown by assay drillhole samples.

Many operating mills in Miami are producing better than 10 tons of centrates from each 100 tons of mine ore. This is locally termed 10% reco It is probable that the field as a whole will average 8% recovery, though mills are actually recovering better than 15% in concentrates. This is pro to be one of the richest lead and zinc fields in the world, and, as its pro tion increases, will force the closing of leaner mineralized districts.

Prospecting is done by means of churn drill holes; Keystone typ drill rigs are used. A 300' hole costs from $450 to $500, and is drilled in 10 to 14 days. Samples are taken every few feet of the entire cuttings from mineralized area passed through, which are assayed for zinc and lead.

The ordinary amount of drilling on 40 acres is from 10 to 30 holes. operators in the district are satisfied if they find two or three holes near other carrying good ore, and will not drill further under such conditions sink shafts and build mills at once.

Shafts are sunk to the bottom of the orebody; the ore is mined, using room and pillar system; trammed to shaft; hoisted to mill bins, crushed by breakers and rolls, and concentrated in jigs and on tables, so that the mine ore is reduced to a concentrate containing about 60% metallic zinc 80% metallic lead. This is bought by smelters in the bins at the mills, and is no further expense.

The entire process of mining and milling is extremely simple and cheap does not require expert labor.

Mining and milling machinery is standardized and largely made in It is not high priced and can be obtained quickly. Wages are on a sliding depending on prices of concentrates, ranging from $3 per day at $50 per to $4.50 per day at $100 per ton.

Division of costs, so far as obtainable, indicate: Labor, 50%; supplies power, 15%; general expense, 5%.

Average of Miami, in 1917, costs were:

Crude Ore:

Mining, milling, general for 100 tons mine ore.....

Concentrates:

If 10 tons concentrates produced, cost per ton.....
If 8 tons concentrates produced, cost per ton.....

As examples of what has been done in the Tri-state field, the camp being conducted by some of the larger operators may be mentioned. **Eagle-Picher Lead Co.**, on first entering this field, is reported to expended a prospecting fund of approximately $100,000 merely in its explo work. The blocking out of its orebodies after discovery involved as much not more than the original expenditure. The investment of this concern prior the beginning of its production period was near $750,000. This concern now the largest single production of any company in the district.

The Commerce Mining & Royalty Company, the pioneer prospect and development company of that field, has never ceased drilling since original strike of ore in 1905 in the old Commerce camp. Its drills are going constantly, and its expenditure in exploratory work has reached extre large proportions.

The Church & Mabon interests have conducted some of the larg prospecting undertakings in the field, and as a criterion of how thoroughly work has been done, may be mentioned that upon one forty-acre tract 80 drill holes have been put down. This concern has developed a large of forty-acre tracts, many of which have proved to be some of the best ducers the district has yet known.

The Miami Zinc Syndicate has leases aggregating 4,000 acres, the Kansas and Oklahoma State line and west of Baxter Springs, Kans

:ted upon it a drilling campaign, with only a small part of the acreage out.

he largest undertaking, however, that has been started is that of the **ite Spelter Company**, which has to its credit approximately 16,000 of ground and whose operations promise to be the most extensive entire district. From 20 to 30 drills are kept at work doing explora- ınd development work. The field of its operations extends from the s-Oklahoma line north and northwestward to Asbury, Missouri. ng close behind the Chanute Spelter Co. is the **Waco Mining Co.**, ',100 acres in leases and fees, and P. B. Butler, with 6,500 acres in leases. large holdings, principally in the Kansas field, are being systematically ped on a large scale. Others who have done a large amount of exploratory :velopment work are Frank Danglade, T. J. Franks, J. G. Marcum, Vinegar inc Co., N. B. Gatch, H. Barndollar and many others.

1919 the State produced over 189,000 tons, the largest zinc output ever by any one State; 85% of it is from the Miami field. Detailed figures 344.062 tons of blende, 43 tons of calamine, and 43,448 tons of galena, all l at $17,875,970.

roduction figures (U. S. Geol. Survey) are as follows:

	1917	1918
rude ore, tons	3,523,200	5,754,700
ead concentrates, tons	32,775	69,912
alue	$3,301,534	$6,190,431
inc concentrates, tons	159,656	300,702
alue	$10,762,324	$15,182,135

ı calculating the weekly outputs of mines it may be stated that $55 is a fair for blende, and $80 to $100 for lead.

he mine owners of the State are indifferent and unresponsive to requests ıformation, so in many cases only the address can be given; this treatment marked contrast to the kindly co-operation of the operators of all other g districts.

E LEAD & ZINC CO. **OKLAHOMA**

ıddress: John Wingfield, Picher, Okla.
)fficers: C. C. Cole, pres.; J. R. Cole, Jr., sec.-treas.; L. Lockey, supt.; ohn Wingfield, mill supt.
nc. March 15, 1917, in Oklahoma. **Cap.**, $200,000; $1 par.
'roperty: 40 acres at Picher, containing zinc-lead ore.
)evelopment: by 170′ and 210′ shafts.
Equipment: mills of 500 and 600 tons capacity. Lack of water has pre- d regular operations.

IIRALTY ZINC CO. **OKLAHOMA**

(See this title in Kansas companies.)
)ffice: W. B. Shackelford, gen. mgr., Quapaw, Okla. O. F. Brinton, and mill mgr.
'roperty: 4 mines, 120 acres at Douthat, Okla. Shafts are down 220′ pen the usual type of 6 to 16% blende and galena ore. Four mills are ng 1,400 tons daily. A 500-ton (in 10 hours) plant was erected by lessees 18 to dress tailing from one of the dumps. Assays showed up to 5% zinc ead. Equipment includes rolls, jigs, sludge-tables and flotation plant.
'roduction: a normal weekly yield is 76 tons of blende, 60% metal, 30 tons of lead, 80% metal.

IO LEAD & ZINC CO. OKLAHOMA

ddress: J. T. Burgher, supt., Quapaw.
'roperty: is N. W. of Quapaw. A 200-ton

IANDER LEAD & ZINC CO. OMA

ddress: G. M. Ramsey, mgr., Tar River.
'roperty: is near the Larsh mine. A 500-

ALLIED LEAD & ZINC CO. OKLA

Address: Quapaw, Okla., but letters returned marked "unkn 1919. Reported, at last accounts, that the 250-ton mill was to be remodel

AMALGAMATED ZINC & LEAD CO. OKLA

Address: H. L. Huddleston, Miami, Okla.

A 250-ton mill was planned, at last accounts.

AMERICAN EXPLORATION CO. OKLAHO

Address: M. D. Draper, mgr., Tar River, Okla.

Company has two mines. No details available.

AMY T. MINING CO. OKLAHO

Address: Ed. Ballinger, supt., Miami, Okla.

Company proposed building a 200-ton mill, at last report.

ANNA BEAVER MINING CO. OKLAHO

Address: Tar River, Okla.

Property: mine and 2 mills in the Tar River field. Cages are u instead of buckets for hoisting, which is an innovation here. Mine is a ste producer, yielding over 50 tons of blende per week early in 1920.

ASSOCIATED LEAD & ZINC CO. OKLAHO

Address: T. Ricks, Quapaw, Okla. Company has a lease on a tract the town of Quapaw. A mill was erected in 1918.

ATOKA MINING CO. OKLAHO

Address: E. M. Applegate, supt., Miami, Okla.

Property: a lease on 40 acres west of Picher, on which 12 drill-h exposed good ore at 240'. A 300-ton mill was to be built in 1919, and hand erected to treat a tailing dump.

AURORA MINING CO. OKLAHO

Officers: T. S. Adams, pres.; J. E. Turner, v. p. and mgr.; and A. Crutchfield, sec.-treas.; all of Holdenville, Okla. J. W. Hale, supt.

Property: in the Leadville district, E. of Quapaw.

Development: shaft sunk to open ore shown by drill at depth of 95'. Assays averaged 19.7% blende and 1.9% lead.

Equipment: 150-ton mill driven by 100-h. p. gas engine, and compres

BAKER MILLING, SMELTING & REFINING CO. OKLAHO

John Baker, pres., writes that he holds the charter, keeping it in force the present, with no stock for sale. See Vol. XI, Copper Handbook.

BARTLESVILLE ZINC CO. OKLAHO

Subsidiary of American Metal Co., Ltd., 61 Broadway, New York, w owns 100% of the $500,000 capital.

Works: 2 zinc smelters at Bartlesville and one at Blackwell, Okla which $2,500,000 has been spent. One of the smelters was formerly owned by Lanyon Starr Smelting Co., which was merged into the Bartlesville Zinc Co plants include the following:

	Bartlesville No. 1	Bartlesville No. 2	Blackw
Furnaces	6	9	12
Retorts in each	576	576	800
Total retorts	3,456	5,184	9,600
Monthly ore capacity, total tons	....	14,000	....
Monthly spelter output, tons	....	5,000 to 6,000	....

At Bartlesville, one plant produces 350 tons of zinc oxide monthly, the o plant yielding 100 to 150 tons of zinc dust. At both places is a clinkering f that treats the residue from the retorts, making it available for blast-furna The clinker carries precious metals, mainly silver.

BEST MINING CO. OKLAHO

Organized in March, 1918, with capital of $200,000, by S. H. Lester, M. McLaughlin, and H. B. Callahan, of Shawnee, Okla.

BETHEL MINING CO. OKLAHO

Address: W. C. Miller, or J. A. Worley, Miami, Okla.

Pro l, Domado, and Croesus leases near Miami, 3 mills

roduction normally is 140 tons of blende (60%
third week of February, 1920.

CO. OKLAHOMA

kla.

her district. A concentrating plant was erected in 1918
made.

& ZINC CO. OKLAHOMA

Cole, Tar River, Okla.

INING CO. OKLAHOMA

Picher, Okla.

R. E. Stafford, pres.; H. H. Halsell, mgr.

rty: 40 acres and 250-ton mill. Mine was developed by A. E.
of the Eagle-Picher Lead Co., producing 33 tons of blende weekly
1920.

EIGHT MINING CO. OKLAHOMA

Property: at Miami, but letters returned unclaimed in 1919. Two shafts being sunk, at last accounts.

JIM MINING CO. OKLAHOMA

Address: G. W. Nesmith, supt., Commerce, Okla.

Officers: G. L. Benson, pres.; and C. R. Home, sec.

Property: 40 acres at Douthat, Okla., where one hole has been drilled ch acre, showing good ore. In January, 1919, ore was also found at 114'.)-ton mill was proposed.

SEVEN LEAD & ZINC CO. OKLAHOMA

Address: Commerce, Okla., but letters returned in February, 1919.)any was constructing a surface tram to connect its mines with the mill and s of its Queen City property, at last accounts.

THREE MINING CO. OKLAHOMA

Address: Quapaw, Okla.

Officers: Seth Conrad, pres.; V. Jenson, v. p.; Ira Edwards, sec.; C. C. bery, supt.

Property: 160 acres N. W. of Quapaw. On 80 acres 26 holes exposed arrying from 5 to 20% blende. Another 40 acre tract was sold to Howard al. of New York, for $75,000, plus 2½% royalty.

VEIN LEAD & ZINC CO. OKLAHOMA

ncorporated with capital of $250,000 in March, 1918, by W. A. Dotty, of i; G. B. Crumbine and J. A. Utterback, of Oklahoma City.

V MINING CO. OKLAHOMA

Address: C. S. Voorhees, supt., Quapaw, Okla.

Property: S. E. of Quapaw. A 250-ton mill was erected early in 1919.

HARZ MINING CO., O. M. OKLAHOMA

Address: Victor Rakowsky, Commerce, Okla.

Company has 3 mines, the Shorthorn, Chapman and Bluebird, and 3 mills, shut at mid-1919 on account of the market, but reopened, the weekly output 370 tons of blende and 33 tons of lead early in 1920.

LIKEN MINING CO. OKLAHOMA

Address: John Aycocks, pres. and mgr., St. Louis, Okla.

Property: a lease on ground adjoining that of the St. Louis M. & S. Co. larch, 1918, the U. S. Paymaster mill, near Joplin, Mo., was moved to the

CK EAGLE MINING CO. OKLAHOMA

Address: W. M. Garred, supt., St. Louis, Okla. Company operates in St. Louis district. A mill was erected and shipments made in 1918.

CK HAWK LEAD & ZINC MINING CO. OKLAHOMA

Address: Jack Williams, Picher, Okla.

Officers: J. Younts, pres.; Jack Williams, sec.-treas.; R. C. Ulmer, supt.

Capital $250,000.

a lease on Walker land, S. E. of Picher. Drilling revealed

ore from 218 to 248' depth. A concentrating plant erected and shipments began in 1918. In February, 1920, weekly yields were 29 tons of blende.

BLUE BONNET MINING CO. OKLAHOMA

Address: W. H. Logan, mgr., Hockerville, Okla.

Property: in southern portion of the Hockerville field, also the mine and mill of the Central Zinc & Lead Co., at Tar River, and another mine N. of Picher, both purchased in June, 1919.

Equipment: at Hockerville, a 250-ton mill driven by gas engines, originally by steam and electric power. The daily output averaged 55 tons of concentrate in 1919.

BLUE GOOSE MINING CO. OKLAHOMA

Address: Picher, Okla.

Production: 30 tons of galena (80% metal) weekly, at last report.

BON AMI MINING CO. OKLAHOMA

Address: Miami, Okla. In Nov., 1918, a 150-ton mill was to be built.

BREWSTER MINE OKLAHOMA

Owned by Federal M. & S. Co. of Idaho.

Address: 120 Broadway, New York; and Baxter Springs, Kan. P. V. George, supt.

Property: in St. Louis district, was bought for $125,000. Drilling since March, 1919, has revealed a large body of zinc ore, and $94,403 was spent on mill, employing flotation process.

Production: 130 tons of blende per week early in 1920.

BUFFALO MINING CO. OKLAHOMA-KANSAS

Address: F. R. Bouldin, pres.; C. B. Ward, sec., Miami, Okla.

Property: a lease N. of Quapaw, Okla., and another W. of the Big Mound in Kansas. Two mills were erected in 1918.

CANTON MINING CO. OKLAHOMA

Address: Box 511, or Room 317 Hancock Bldg., Miami, Okla.

Officers: J. L. Eggert, pres.; J. C. Abbott, v. p.; W. O. Johnston, sec.-treas.-mgr.

Inc. April, 1917, in Oklahoma. **Cap.**, $75,000.

Property: 40 acres at Lincolnville, Okla

Development: the deposit is 35 by 1,320 by 1,320', and is worked by shafts, 75' deep.

Equipment: gas engines, compressor, drills, and 500-ton (24 hours) mill. Developing.

CARNEGIE MINING CO. OKLAHOMA

Address: P. L. Bucy, Bartlesville, Okla.

Property: a lease near Douthat, on which the 300-ton mill bought from the National Zinc & Lead Co., of Webb City, Mo., was re-erected.

CARTHAGE MINING CO. OKLAHOMA

Address: Emma R. Knell, Carthage, Mo.

Cap., $32,000; shares $100 par; $16,000 paid in.

Property: 20-acre lease in the N. E. Oklahoma zinc field.

CENTRAL LEAD & ZINC CO. OKLAHOMA

Address: W. A. Geissing, mgr.-sec.-treas., Tar River, Okla.

Property: in the Picher-Century-Tar River area. Shaft sunk to 33 the deepest in the district, and mill was making two cars of lead concentrate and one of zinc, at last accounts. The mine was reported taken over by the Blue Bonnet interests in June, 1919.

CENTURY MINING CO. OKLAHOMA

Address: Carl Scott, or J. C. Trout, supt., Century, Okla.

Property: 40-acre lease S. E. of Douthat and E. of Century. A large deposit of ore was first entered at depth of 55'. A 150-ton mill was planned at last accounts.

CHICAGO-MIAMI LEAD & ZINC CO. OKLAHOMA

Address: Bob Eitle, Picher, Okla.

HOCTAW CHIEF LEAD & ZINC CO. **OKLAHOMA**

Address: Geo. Sullivan, Lincolnville, Okla.

Property: the Sullivan and Williams lease at Hockerville. Ore, 15' ck, assaying 8 to 17% blende and lead, was opened, a 250-ton mill erected and ipments made in 1918.

.IMAX MINING CO. **OKLAHOMA**

Address: Grant Mans, supt., Cardin, Okla.

Property: 40-acre lease N. W. of Cardin and 3 miles W. of Picher. aft cut ore at 230' in October, 1918, and a 150-ton mill was planned.

)MMERCE MINING & ROYALTY CO. **OKLAHOMA**

Address: J. F. Robinson, Picher, Okla.

Property: company is one of the largest operators in the region, in- ding the Blue Goose, and Cactus mines at Commerce, the Beaver and Webber Treece, Kansas, the Pelican mine and mill at Picher, and the Bennie, Jay Bird, ace Walker, and Wilbur at Tar River.

No details of operations are available.

)MMONWEALTH LEAD & ZINC CO. **OKLAHOMA**

Address: L. N. Dana, supt., Miami, Okla.

Property: a lease near Picher. Drilling revealed 12% ore at depth of 5'. Two shafts were sunk, and a 500-ton mill erected. This plant was burned June, 1918.

)NSOLIDATED LEAD & ZINC CO. **OKLAHOMA**

Address: Picher, Okla.

Property: S. E. of Picher. Water was troublesome in 1918. The mill :ludes sludge-tables, Dorr thickeners, and a flotation plant.

)NSOLIDATED ZINC & SMT. CO OF OKLAHOMA **OKLAHOMA**

Address: E. H. Squire, mgr., Commerce, Okla.

Property: the Emma Gordon mine at Commerce, formerly a rich pro- cer. Company was reorganized in March, 1919.

)NSTITUTIONAL LEAD & ZINC CO. **OKLAHOMA**

Address: Walter Eberlein, Picher, Okla.

Property: a lease at Picher, developing and shipping, at last accounts.

)RTEZ MINING CO. **OKLAHOMA**

Address: Jefferson City, Mo.

Officers: Houck McHenry, pres.; Charles Tweedie, v. p.; H. B. Church, , sec.-treas., with Cortez F. Enloe, A. W. Happy, G. E. Haigh, D. M. Oberman, C. Carson, W. T. Paylor, H. L. Grigsby, and W. T. Landrum (supt.), direc- rs.

Inc. 1917, in Oklahoma. **Cap.,** $140.000; $10 par; 7,000 outstanding.

Property: 40 acres at Picher, Okla. The deposit is a dissemination of lena and blende in flint and limestone.

Development: by 260' shaft and 400' of workings. Water was trouble- me during 1918.

Equipment: hoist, compressor, pump, gas power, and 200-ton mill, irted in February, 1919.

Production: 105 tons of blende per week in February, 1920.

)SMOS MINING CO. **OKLAHOMA**

Address: W. B. Campbell, Hockerville, Okla.

Property: formerly known as the Lucky Tiger, S. E. of Hockerville. 300-ton mill, employing flotation, was started in October, 1918. The ore is sily mined, as one machine-man and a helper broke down 1,159 cans of 1,000 . capacity each in one week of March, 1919. By the end of 1919 company had 500 tons of concentrate on hand. The first year's run averaged 12% zinc and ad.

Production: 120 tons of blende per week in February, 1920.

ROESUS MINING CO. **OKLAHOMA**

Address: W. E. Broach, Tar River, Okla.

Production: normally about 40 tons of galena (80% metal) per week.

CRYSTAL MINING CO. OKLAHOMA

Address: B. B. Dancey, pres., Picher, Okla.

A 250-ton mill was planned in 1918.

DALLAS-PICHER LEAD & ZINC CO. OKLAHOMA

Company had a lease on the Southland mine at North Century, but forfeited it for non-working. Mine now operated by Oko L. & Z. Co.

DANIEL BOONE MINING CO. OKLAHOMA

Incorporated in March, 1918, with capital of $150,000, by J. E. Jenkins of Springfield, Mo., and A. Avery, of Oronogo, Mo., to operate at Quapaw.

DEFENDER MINING CO. OKLAHOMA

Address: J. H. Wright, Joplin, Mo.

Property: between Cardin and Commerce. The 350-ton mill at the Wayland mine, Galena, Mo., was moved to the Defender in July, 1919. Conditional sale of mine made to A. M. Gaines in August. Rich ore is available for the mill.

DESPERATION MINING CO. OKLAHOMA

Formerly the Tiger L. & Z. Co.

Address: Charles Von Weise, or Mark Kirkpatrick, Ardmore, Okla. R. F. Glenn, supt.

Property: near the Harrisburg mine, west of Tar River. Drilling revealed three orebodies at depths of 150, 250, and 320'. The 350-ton mill was treating 8% ore in 1919.

Production: 42 tons of blende and 42 of lead per week early in 1920.

DEW DROP MINING CO. OKLAHOMA

Address: Picher, Okla. Operates on Eagle Picher Lead Co. land.

Production: normally about 43 tons of blende (60% metal) weekly.

DIAMOND JOE MINING CO. OKLAHOMA

Address: W. J. Strong, mgr., Lincolnville, Okla.

Property: S. E. of Hockerville, Okla. A 200-ton mill is yielding high-grade zinc concentrate.

DOMADO LEAD & ZINC CO. OKLAHOMA

Address: W. E. Broach, Tar River, Okla.

DOROTHY BILL MINING CO. OKLAHOMA

Address: J. R. Cole, supt., Tar River, Okla.

Property: a lease W. of Picher. Rich lead-zinc ore was opened at depth of 184' in September, 1918, a large mill erected, and shipments made.

DOUTHAT MINING CO. OKLAHOMA

Address: G. F. Dike, mgr., Commerce, Okla.

Property: between Cardin and Commerce. Some rich ore was opened in 1918, and hand-jigs were used to dress it, but a 200-ton mill was to be built at last report.

DUDLEY MILLING CO. OKLAHOMA

Address: C. Theuer, supt., Douthat, Okla.

Works: a plant, treating tailings from Admiralty No. 2 mine, equipped with gas engine, rolls, jigs, etc.

DULUTH-MIAMI MINING CO. OKLAHOMA

Offices: 819 Insurance Bldg., Oklahoma City, Okla.; 110 Sherman Bldg., Duluth, Minn.

Officers: G. W. Knox, pres.; E. P. Kreimer, v. p.; E. J. O'Rourke, sec.; E. L. Fogarty, treas., with John Lingelbach, J. B. Enfield, and Frank Nowkowski, directors.

Cap., $250,000; $1 par.

Property: 30 acres at Quapaw, Ottawa county. By May, 1919, a shaft had been sunk to the ore, and several drifts driven. Ore assays up to 38% lead. A mill is to be built at an early date.

DUNCAN LEAD & ZINC CO. OKLAHOMA

[illegible]ated with capital of $200,000 by W. E. Williams, J. H. Goodwin and [illegible]kett, of Miami, Okla.

\GLE-PICHER LEAD CO., THE OKLAHOMA-MISSOURI

Office: Continental & Commercial National Bank Bldg., 208 S. La Salle , Chicago, Ill.

Officers: O. S. Picher, pres.; Fred'k Hertenstein and H. G. Clopper, p.'s; Jos. Hummel, Jr., sec.; T. S. Brown, Jr., treas., with J. B. Swift, chair- n, F. L. Perin, J. E. Webb and S. M. Evans, directors.

Inc. June, 1916, in Ohio. **Cap.,** $9,000,000 com., and $1,000,000 6% non- nulative preferred; $100 par; $8,000,000 common., and $1,000,000 preferred istanding. Preferred dividends payable quarterly; initial dividend of 1½% d July 12, 1916. Central Trust & Safe Deposit Co., Cincinnati, transfer agent. nual meeting in January.

Company is a consolidation of the Eagle White Lead Co., of Cincinnati, io, and the Picher Lead Co.

The Eagle Picher Lead Co. is the third oldest corroder of white lead by the tch process in the United States, having been established in 1843 as the Eagle iite Lead Co., and in continuous operation ever since. Company is a manufac- er of carbonate of lead, dry and in oil; white and blue sublimed (sulphate of) d; oxides of lead for battery, glass, rubber, and paint-makers; and also mines l smelts zinc and lead ores.

Operations in the Picher field started on March 15, 1916. Company owns ne of the best mines in the State, and has 9 modern mills at work. The cen- l power plant contains the largest air-compressor in the district, of 4,000-cu. ft. ıacity.

Works: are situated at Joplin and Webb City, Mo.; Galena, Kan.; :her, and Henryetta, Okla.; Cincinnati, Ohio, and Newark, N. J., and Hills- o, Ill., the last acquired from Robert Lanyon Zinc and Acid Co. in July, 1919.

Production: normally 1,300 tons of blende (60% metal) per week.

The output of both galena and sphalerite by the Eagle Picher Lead Co. is ch larger than that of any other operator in the Miami district. Flotation ts have been installed at nearly all the plants and the concentrate recovered by t process has materially added to the production. The estimated capacity of concentrating plant is 6,400 tons in 24 hours. The ore is mainly derived from els between 250 and 270'. There is also a large production from ground leased the Big Chief Mining, Dewdrop Mining, Keltner Mining, Ohimo Mining, ıkee Mining, St. Joe Mining, Vantage Mining, National Lead & Zinc, and iite Mining companies, all separately described.

.RLY BIRD LEAD & ZINC MINING CO. OKLAHOMA

Address: Charles Neal, Treece, Kan.

Property: lease on Cooper land, near Tar River. Rich ore was opened 185' in depth and a mill built.

GHT FRIENDS MINING CO. OKLAHOMA

Probably dead. Reported to have taken over the Denver-Miami mine, near ami, in 1917. Letters returned unclaimed in March, 1919.
